THIRTEENTH BIENNIAL REPORT OF THE ADJUTANT GENERAL OF THE STATE OF MINNESOTA.

I. THE MILITIA.

Since the rendition of the last biennial report of this department, Dec. 1, 1902, important and far-reaching changes in the federal militia laws have been effected by the passage through Congress of the act "To promote the efficiency of the militia and for other purposes, approved January 21, 1903." Thanks to the energetic and judicious action of the Interstate National Guard Association, which considered this subject fully during its session at Washington, January, 1902, objectionable portions of this measure as originally introduced in the House of Representatives, were eliminated, and the law as enacted is a well-marked step towards the development of the military power of the nation, without prejudice to the conceded right of the states to control their military forces, when not actually in the service of the United States, pursuant to a call by the President.

The full text of the new law is given in appendix.

Section 1 divides the militia into two classes, the "organized militia," generally known as the national guard of states, and the reserve militia, comprising all men liable to militia duty, but not members of any recognized military organization. Able-bodied men of foreign birth, who have declared their intention to become citizens, are added to the class liable to be called upon for militia duty.

Section 3 decrees that the duly enlisted, uniformed and organized militia of states, who have heretofore participated, or may hereafter participate, in an apportionment of the annual appropriation,

as provided in section 1661, Revised Statutes, whether designated the National Guard or otherwise, shall constitute the organized militia of the United States, and that its organization, armament and discipline shall, within five years, by Jan. 21, 1908, be the same as that of the regular and volunteer armies of the United States.

To aid states in complying with this provision, the act authorizes the sale to them of articles supplied by the army supply departments, and a special law enacted—March 2, 1903—appropriates \$2,000,000.00 to enable the Secretary of War to issue to states, free of cost, standard arms and accoutrements, sufficient to equip existing organizations of this militia. Section 14 of the act authorizes states to use any part of their allotment under section 1661, for the pay, transportation or subsistence of their organized militia, when engaged in field or camp service, provided it appears from the report of inspections, which the Secretary of War is directed to have made at least once each year, by an officer detailed by him, that the organized militia of the state is fully armed and equipped for field service.

2. THE NATIONAL GUARD.

The State Legislature during its thirty-third session, 1903, passed an act, chapter 52, General Laws of Minnesota, to amend the military code, to provide for the maintenace of the state camp grounds and buildings thereon, to fix the organization of the National Guard, to promote good marksmanship therein, to regulate the disposition of military funds and the allowance of officers and enlisted men, to prescribe the duties and regulate the proceedings of armory boards, and making further appropriation for the maintenance of the National Guard and to carry out the provisions of this act. See Part II for full text: State law. Regulations M. N. G. 1904.

It directs that the active militia of the state shall be known as the Minnesota National Guard.

It prescribes the peace strength of the Guard, gives the Commander-in-Chief authority to fix number and grade of officers, non-commissioned officers and other enlisted men authorized by law, providing the change is made to conform more closely to the organization of the army of the United States.

It makes no change in the number of organizations composing the brigade, but abolishes the medical corps heretofore existing

as a separate body, and adds instead thereof, one surgeon (major), two assistant surgeons (first lieutenant—captain after five years' service), one hospital steward and two acting hospital stewards to the field staff and non-commissioned staff of regiments.

Under the provisions of this law, the medical corps was mustered out, General Orders No. 15, Headquarters M. N. G., May 15, 1903, the vacancies in regiments created by the act having been first filled.

Chapter 182, General Laws of Minnesota, an act to limit the term of office of the field and general officers of the National Guard, was also passed by the Legislature and is now in force. For text see Appendix 3.

With the exception of the changes affecting the medical corps, the Guard organization remains as given in previous reports.

3. INSPECTION.

Under the provisions of the Militia Act, the National Guard was inspected at home stations in 1903 by two officers of the regular army, detailed for this purpose by the Commanding General of the Department of Dakota, in compliance with orders from the War Department. Arms and accoutrements to equip the organized militia of the state, on the basis of strength shown by the reports of these inspectors, were duly issued by the ordnance department to all foot troops; modern field guns and equipment for the two batteries have not yet been obtained; it is, however, expected that the War Department will be able to supply this want during 1905.

A further inspection of the Guard was made while it was in camp in June and July, 1903, by Captain Thomas F. Dwyer, Twenty-first United States Infantry, who had been detailed, upon request of His Excellency, the Governor, for this duty by the War Department.

On December 23, 1903, Major William Gerlach, U. S. A., retired—since then promoted to Lieutenant-Colonel—reported to His Excellency, the Governor, for duty with the National Guard of Minnesota, under the provisions of the acts of Jan. 21, 1903, and March 4, 1903, and was duly placed on duty as inspecting officer, pursuant to section 12, Military Code—General Orders No. 36, series 1903, Headquarters M. N. G. This officer, pursuant to instructions from the War Department and this office, General Or-

ders No. 3, series 1904, Headquarters M. N. G., made a thorough inspection of the entire Guard at the home stations of organizations, between March 19th and April 30th, 1904. He was present with troops during the encampment at Camp Lakeview in June and July, last. During this latter period, he conducted a competitive drill, companies successively going through a field program, in order to establish their relative proficiency in tactical work.

The attendance at the inspection was satisfactory, and showed the Guard to be in a creditable condition. State and United States property was found to be well cared for. From a few of the inspection rolls, it appears that in some companies men have been long absent, therefore not attending the number of drills required to entitle them to the inspection allowance. Company commanders are, however, doing their best to remedy this evil. Detailed reports of the inspectors are given in Appendix 4.

4. ENCAMPMENTS.

All organizations of the National Guard were ordered into camp at Lake City for an eight days' tour of duty and instruction in June and July, 1903, General Orders No. 5, series 1903, Headquarters M. N. G., and for a like tour of ten days in June and July, 1904, General Orders No. 9, series 1904, Headquarters M. N. G.

The result of the camp work in both years was satisfactory and justified the heavy expenditure involved. An extension of the camping period in the future, if the additional expense incident thereto can be met by the use of a part of the allotment of funds to the state under section 1661, Revised Statutes, would be decidedly beneficial to the Guard. Much of the time of troops while in camp is necessarily devoted to target practice, to the manifest prejudice of other branches of their instruction. If efforts initiated near the close of last summer's camp, to shorten the period of instruction on the state target range, by going through the preliminary course at home stations before proceeding to camp, are successful, the difficulty may be at least partially overcome without lessening the now very creditable standing of the Guard in marksmanship.

The reports of regimental commanders relative to camp work are given in Appendix 1.

In addition to their regular camp work, two companies, B and

I, First Infantry (Minneapolis), with the permission of the Commander-in-Chief, visited in a body the Louisiana Purchase Exposition at St. Louis, Mo., without expense to the state.

The amount, \$2,500.00 per annum, appropriated by section 12, chapter 52, General Laws 1903, for maintenance and improvement of the State Camp Grounds is ample for all current expenses, such as care and necessary repair of buildings and water system, and completion of the target ranges. There is, however, urgent need for a storehouse of permanent character, stone or brick, wherein to keep the valuable property both of the state and individual organizations of the Guard, necessarily kept at Lake City from year to year, in order to save transportation. Storage room for this property is now rented in town, and this involves expensive hauling from and back to the city. A special appropriation to cover the cost of a suitable building, not to exceed \$6,000.00, is recommended.

The flagstaff now in use at the State Camp is low and unsightly. It is in full view of thousands of people who pass camp on the Chicago, Milwaukee & St. Paul railway. It should be replaced by an iron staff, similar to the staffs now supplied to its military posts by the national government. This change would cost about \$600.00, but the new staff would last for many years to come, and be a credit to the state.

2. ARMAMENT.

Since the passage of the Militia bill by Congress, and under the provisions of the Act of March 2, 1903, the old Springfield rifle, caliber 45, has been replaced by the United States magazine rifle, caliber 32, and appropriate accoutrements, issued partly upon the basis of the reports of the War Department Inspectors in 1903, and by purchase with funds allotted to the state by the national government under the operation of the acts of Congress of January 21st and March 2d, 1903. Part of funds so allotted has also been used to procure army revolvers, caliber 38, and equipments for the battalion of artillery and all commissioned officers of the Guard. The supply of small arms now on hand is sufficient to equip the authorized maximum strength of now existing organizations. It is hoped that new artillery equipment, already provided for by Congress, will be issued next year.

6. ARMORIES.

The armory in course of erection in St. Paul, under the auspices of the "Armory Board," is nearing completion and will be a credit to the city. It is a handsome, commodious structure and will fill a want long felt by the troops located here.

The City of Minneapolis, under chapter 33, General Laws 1902, has also made provision for the building of a new armory there. Difficulties in the way of selling the bonds issued for this purpose have been overcome, the work has been taken in hand and it is expected that it will be completed during 1905.

The City of Duluth has also provided suitable armory accommodations.

At the various one-company stations throughout the state—there are nineteen of these—the question of providing armories is a vexatious one, and a source of never-ceasing worry to company commanders. In many instances almost the entire inspection allowance, \$7.00 per man each year, given by the state, is expended to rent a suitable drill hall, and provide light and heat, as well as storage for the public property. It is true that local authorities give some assistance, but this is usually insufficient, and as the amounts so received are not fixed, but dependent upon the pleasure of the authorities for the time being, captains are practically obliged often to beg for assistance. Naturally they tire of this, and it is difficult to keep superior men in this position. When we consider the benefit, moral and material, which authority to establish a National Guard company confers on a community, and the credit due to patriotic men for freely giving their time and labor, in order to prepare themselves for the performance of a high public duty, to uphold the law and defend the integrity of the state, it is certainly hard to understand why the local authorities in a prosperous community can be so indifferent to their needs, and tardy in exercising the power conferred upon them by law to provide armory facilities for the citizen soldier. In some localities, companies have joined with civic organizations, and issued stock to obtain funds for the erection of a suitable building; in other towns they have built on their own responsibility. This imposes a heavy charge on all concerned, a poor reward for their patriotic work. They, the National Guard, deserve better treatment, and patriotism and local pride should impel their fellow citizens to appreciate their work.

7. TARGET PRACTICE.

Fully appreciating the importance of the expert use of his fire-arm by the infantry soldier, every possible effort has been made to encourage rifle practice by the National Guard. In this work I have received the most cordial support from commanding officers and the very efficient inspector of small arms practice of the brigade, Captain Orris E. Lee. Where safe ranges could be established at home stations, practice was carried on as far as the limited ammunition supply permitted, and this was followed by thorough instructions on the state rifle range during each season's encampment. In 1904 the full course "C," S. A. F. R. 1904, was completed by all organizations. Company, regimental and state team competitions were also held each year, and on September 23d and 24th, 1903, the Interstate Match for the Washburn Trophy took place on the range at Camp Lakeview, teams from Iowa, Illinois and Minnesota participating. For results see General Orders No. 31, series 1903, and General Orders No. 23, series 1904, Appendix 3. In both years, more especially in 1904, when special course "C," prescribed by the War Department for the organized militia was pursued, it was found that the target work took up the larger portion of the entire camping period to the evident prejudice of other instructions, especially field service. To overcome this difficulty gallery practice materials have been issued to troops since the close of the outdoor season. By gallery work during the winter and practice on home ranges next spring and summer before troops go to camp again, it is hoped they will attain a degree of efficiency which will justify the elimination of the preliminary firing heretofore had each year from the regular camp course. The time so saved can then be assigned to other much desired instruction.

8. PENSION DIVISION.

The following statement shows by classes the number of new pension claims filed in this office during the past two years, also the number allowed and rejected during the same period.

	Filed	Granted	Rejected
Invalid, original, act of July 14, 1862 (Civil war).....	15	2	10
Invalid, original, act of July 14, 1862 (Spanish war).....	62	34	8
Invalid, original, act of June 17, 1890.....	270	214	25

	Filed	Granted	Rejected
Invalid, restoration to act of July 14, 1862.....	15	2	10

Arrears of pay (Civil war)	21	4	17
Arrears of pay (Spanish war)	46	36	10
Totals	1,382	982	294

The above is a summary of the work done by this department during the past two years.

The statement shows an increase of three hundred per cent over the work done in this division during the previous two years, when there were 324 claims granted, representing an aggregate annual income to the pensioners of \$34,530.00; the claims granted to the pensioners during the past two years represent an aggregate annual income of \$111,876.00.

The large increase in the work of this division is due solely to the efficient and painstaking manner in which the work was performed. The large percentage of claims granted is significant of the character of the work done. The success of the department has been phenomenal; it is largely due to the fact that a rejected claim is never dropped unless the claimant is barred by some provision in law; the claimant is invariably told what to do in order to have his claim reopened and reconsidered, and if the claim is a just one, it is generally prosecuted to a successful termination, if the claimant follows the advice given. If a claim is still rejected by the Commissioner of Pensions after having been reopened several times, it is always appealed to the Secretary of the In-

terior, who frequently reverses decisions of the Pension Commissioner. This practice has been consistently followed during the past two years, and favorable decisions have been obtained in many claims which had been rejected three and four times.

This department was the means of having a very important precedent established, in August, 1903, which redounds to the benefit of all soldiers' widows in this state; it having induced the Pension Commissioner to rule that a widow, resident of this state, who can prove that she was the common-law wife of the soldier, shall be considered as the lawful widow of the soldier; so that it is no longer necessary to prove that a marriage was actually contracted. This simplifies the prosecution of widows' claims in a great many cases, because it frequently occurs that it is absolutely impossible to find a marriage record or to furnish the testimony of those who witnessed the marriage. The ruling referred to also provides that in the case of a soldier having an undivorced wife living, or a claimant having an undivorced husband living, at the time of the marriage of the soldier to the claimant, the claimant shall still be held to be the lawful widow of the soldier if such undivorced wife or husband died before the soldier died, and cohabitation of soldier and claimant is shown during the period after the removal of the barrier to the marriage. This ruling has been the means of having many abandoned claims reopened and allowed, and is of incalculable value to hundreds of widows in this state. An effort has been made to have it advertised as widely as possible, because it is reasonable to suppose that there are still a great many widows' pension claims pending in this state which would be granted if the claimants knew of the existence of the above ruling.

The pension laws passed by congress during the past two years are the following:—

Act of January 15, 1903, which increases the rate of pension for total deafness to forty dollars per month, under the general law.

Act of January 21, 1903, which provides pensions for members of the Militia, for disease or injury incurred while in the service of the United States.

Act of February 28, 1903, which amends the act of March 3, 1901, so as to include those widows otherwise entitled whose husbands died of wounds, injuries, or disease contracted during the period of their military and naval service, but who were deprived of pension under the act of March 3, 1865, because of their failure to draw any pension by reason of their remarriage.

Act of March 2, 1903, which increases the rates of pension under the general law, for loss of hand, foot, arm, leg, and for total disability in the same.

Act of March 3, 1903, which increases the pension of Mexican war veterans to twelve dollars per month.

Act of April 8, 1904, which increases the pension for total blindness to one hundred dollars per month, under the general law.

Order No. 78, which is a construction of the act of June 27, 1890, was issued by the Commissioner of Pensions on March 15, 1904, and provides that in the adjudication of claims under that law, if all other requirements have been properly met, a claimant shall be considered entitled to the rate of six dollars per month at the age of sixty-two; eight dollars at the age of sixty-five; ten dollars at the age of sixty-eight, and twelve dollars at the age of seventy.

9. MINNESOTA WAR CLAIMS ON ACCOUNT OF THE WAR WITH SPAIN, STATUS DECEMBER 31, 1904.

The state made disbursements and furnished equipment amounting in the aggregate to the sum of \$190,839.45.

Under the Acts of Congress approved July 8, 1898, and March 3, 1899, provision was made to reimburse the states and territories for expenses incurred by them in aiding the United States to raise and organize and supply and equip the volunteer army of the United States for the war with Spain. Under these acts, there has been filed with the Auditor for the War Department at Washington, D. C., seven separate installments of claims covering the above amount as follows:

First Installment—Transportation, pay-rolls, subsistence, equipment and general expenses.

Amount of installment (as corrected)	\$137,565.21
Amounts audited and payments received by the state—	
On account of transportation	\$5,467.15
On account of pay rolls	18,933.30
On account of subsistence, equipment and miscellaneous expenses	47,320.22
Total payments	<hr/> \$71,720.67
Balance on account of pay rolls suspended by the auditor for the war department transferred to third, fourth and fifth installments.....	2,939.94
Value of ordnance and ordnance stores and quartermaster supplies received in kind under the acts of replacement	59,653.80
Amount disallowed by the auditor for the war department	3,250.80
	<hr/> \$137,565.21

Second Installment—Expenses incurred in providing for the return to the state of sick soldiers of the 12th, 13th and 14th Regiments, Minnesota Volunteers, and for their transportation from St. Paul to their respective homes, and their return to the station designated for their

muster out of the service of the United States, and for the payment of expenses incurred for their care and treatment, including medical attendance, medicines, nurses and board, during the period in which they were unable to perform military duty, also for transportation furnished the enlisted men of the said 12th, 13th and 14th Regiments, Minnesota Volunteers, during the furlough period.

Amount of installment \$23,780.27

This installment was disallowed by the Auditor for the War Department on account of the expense being incurred after the muster of the regiments into the service of the United States. At the last session of congress the act approved March 3, 1899, was amended by an act approved April 27, 1904, which act provides for reimbursement for stores furnished or expenses incurred or transportation furnished after the troops raised had been mustered into the service of the United States, which should cover the amount of this installment, except the amount expended for transportation furnished the enlisted men during the furlough period which will require further legislation.

Third, Fourth and Fifth Installments—Balance of pay due the enlisted men of the 1st and 3rd Regiments Infantry, National Guard, who reported at Camp Ramsey for muster into the 12th, 13th and 14th Regiments, Minnesota Volunteers, who were accepted and mustered into the said regiments and for the officers and enlisted men who so reported and who were rejected by the medical examiner or mustering officer.

Amount of installments (including \$2,939.94 transferred from first installment) \$31,494.48

Payment has been received by the state for the amounts charged in the third, fourth and fifth installments.

Sixth Installment—Balance of pay (service for longevity) due to officers of the 1st, 2nd and 3rd Regiments Infantry, National Guard, who reported at Camp Ramsey for muster in the 12th, 13th and 14th Regiments, Minnesota Volunteers.

Amount of installment 642.60

The amount charged in this installment has been disallowed by the Auditor for the War Department.

Seventh Installment—Miscellaneous expenses.

Amount of installment 296.83

Payment has been received by the state for the amount charged in this installment.

RECAPITULATION.

Total amount of claims		\$190,839.45
Amounts allowed and payment made to the state..	\$103,511.98	
Value of ordnance and ordnance stores and quarter-		
master supplies received in kind.....	59,653.80	
Amount disallowed	27,673.67	
	<hr/>	
		\$190,839.45

10. THE NAVAL RESERVE.

Under the provisions of Chapter 355, Laws of 1899, the Minnesota Naval Reserve was mustered into the state service at Duluth, December 15, 1903, the crew then consisting of 12 commissioned officers and 83 petty officers and enlisted men—according to last return (Dec. 31, 1904) this force has been increased by recruitment to 13 commissioned officers, 16 petty officers and 97 enlisted men, a total of 126.

No provision has as yet been made by the state for the equipment and maintenance of this useful force, and the organization has been dependent on individual efforts of its members, who have provided themselves with uniforms. Some old arms, Springfield B. L. rifles, have been loaned to the Naval Reserve, and through the courtesy of the companies of the National Guard stationed at Duluth, and the city authorities, they have been able to drill in the armory there. The United States has allotted \$1,185.56 to the Naval Reserve of Minnesota, its share of the appropriation of \$60,000.00 for arming and equipping naval militia, by act, approved March, 3, 1903. This amount has been used to procure two 30-foot navy cutters and necessary equipment therefor.

Liberal provision for clothing and equipping the naval force of the state should be made by the legislature, and the name of the organization changed to Naval Militia, instead of Reserve, in order to comply with the wishes and practice of the Navy Department and other states of the Union.

Attention is invited to the report of Lieutenant-Commander Guy A. Eaton, now commanding M. N. R. Appendix 2.

It is respectfully recommended that in addition to making provision for the future wants of the State Naval Militia, the organization already formed, be reimbursed for all legitimate expenditures incident to their organization and maintenance up to date.

CONCLUSION.

The work of copying and indexing for the use of this office; the muster rolls of the Civil war and other records continually needed for reference in prosecuting the claims of Minnesota veterans for pension, back pay and allowances, and the heavy task of gathering, compiling and editing the information and material necessary to the publication of the History of Minnesota in the Spanish American War, has progressed well, but it is not yet completed. I would therefore respectfully recommend that further provision be made for this purpose.

I beg leave to avail myself of this opportunity to tender to the officers and members of the National Guard my thanks for the most cordial and unselfish support, I have ever received from them in the administration of the affairs of this department.

To Your Excellency, I am deeply indebted for your unfailing support and confidence.

Respectfully submitted,

E. D. LIBBEY,

Adjutant General.

APPENDIX I.

CAMP REPORTS.

HEADQUARTERS FIRST ARTILLERY, M. N. G.

ST. PAUL, MINN., July 14, 1903.

The Adjutant General, State Capitol, City.

SIR:—I have the honor to report that, in compliance with General Orders No. 5, A. G. O., c. s., the First Battalion of Artillery, under my command, proceeded to Camp Lake View, Lake City, Minnesota, for instruction, arriving about noon June 15, 1903, returning in the afternoon of June 22, 1903. A few additional run-ways, provided by the railroad company, in accordance with former recommendations, greatly facilitated unloading.

ATTENDANCE.

The percentage of attendance of my entire command was 87.1. It was distributed as follows:

ORGANIZATION	Strength	Attendance, Eight Days								Average	Per Cent Present
		1	2	3	4	5	6	7	8		
Field and staff	10	10	10	10	10	10	10	10	10	10	100
Co. engineers	72	53	53	58	60	60	60	60	60	58	80.5
Battery A	78	58	58	59	61	62	61	61	61	60	77
Battery B	88	88	88	88	88	88	88	88	88	88	100
Battalion	248	209	209	215	219	220	219	219	219	216	87.1

ROUTINE.

The regular camp routine was at once taken up, and the following calls were observed:

Reveille	5:00 a. m.
Roll call	5:10 a. m.
Stable call	5:20 a. m.
Mess call	6:00 a. m.
Sick call	6:45 a. m.
Boots and saddles.....	7:15 a. m.
Target practice (small arms).....	9:00 a. m.

Recall	10:45 a. m.
Mess call	11:45 a. m.
Stable call	12:15 p. m.
Target practice (field pieces)	1:30 p. m.
Recall	5:00 p. m.
Stable call	5:15 p. m.
Mess call	5:45 p. m.
Dress parade (first call)	6:30 p. m.
Dress parade (adjutant's call)	7:15 p. m.
Guard mount (first call)	8:00 p. m.
Guard mount (assembly)	8:15 p. m.
To quarters	10:45 p. m.
Taps	11:00 p. m.

HEALTH.

The weather was ideal for drill and target practice, the temperature varying from 62 to 80 degrees Fahrenheit. The sanitary condition of the camp was very good, the company's streets being kept in better condition than ever before. The food was of good quality, well cooked and wholesome. The number of men reporting for sick call was small; three men were sent to the general hospital, one for three days, one for two days, the other for one day. No serious accidents were reported. The absence of even the crudest hospital facilities was much felt and necessitated the sending of patients to the general hospital.

TARGET PRACTICE.

Owing to a careful disposition, it was possible to complete the target practice in the small time allotted. In spite of the inferior powder issued by the War Department, the following qualifications were made in accordance with General Orders No. 9, A. G. O., series of 1902, and General Orders No. 13, A. G. O., c. s.:

Expert Gunners—

Major George C. Lambert	F. S.	3rd season
Capt. Carl C. Bennet	Bat. B	3rd season
Capt. William J. Murphy	F. S.	1st season
First Lieut. Nels P. Nelson	F. S.	2nd season
First Lieut. Albert F. Pray	F. S.	1st season
First Lieut. William Keller	Bat. A	1st season
Sergeant Joseph M. Kvittum	Bat. B	1st season
Sergeant John A. Asmussen	Bat. B	1st season
Sergeant John E. Gray	Bat. B	2nd season
Corporal George W. Pasko	Bat. B	1st season
Corporal Charles B. Rosen	Bat. B	1st season
Corporal Richard E. Cotton	Bat. B	1st season
Corporal James W. Vant Hull	Bat. A	1st season
Corporal Harry E. Francis	Bat. B	1st season
Corporal Swante A. Skoglund	Bat. B	1st season

Gunners—

Sergeant Henry W. Dornseif	Bat. A	E. G.
Corporal Anton T. Axnes	Bat. A	1st season
Corporal Charles W. Johnson	Bat. A	1st season
Corporal Frank R. Loula	Bat. A	2nd season

A more detailed report on target practice covering all the work of the year will be made at the close of the season, as required by orders.

HORSES.

The experience of mounted organizations for the last twenty years has demonstrated conclusively that the practice of hiring horses for drills and encampments is to be condemned as resulting in little permanent benefit to the organization, saying nothing of the impracticability of hiring horses on short notice in case of emergency. It is obvious that, in order to avoid confusion, or even a panic, it is necessary that the horses as well as the men should receive the necessary training, and to be ready for call at any time. A battery without a set of permanent horses reminds me much of a fire engine company who, upon an alarm, would respond on foot, while part of the men were looking around trying to hire green horses to bring up the engines. I realize that any plan to equip the batteries with a complement of horses must take into consideration the expense of keeping and moderately exercising them when not in service. This problem may probably be solved in one of the following three ways:

First.—By hiring them, with the battery drivers, to responsible business firms in the two cities for light delivery.

Second.—By the establishment in each city of an emergency stable which, under minimum contracts with business firms, would furnish emergency teams when the spasmodic demands of business would require them.

Third.—By the allowance on the part of the United States government of the necessary forage. This matter is worthy of serious consideration, for it is of vital interest to the welfare and efficiency of the batteries.

CEREMONIES.

The battalion and its component organizations was inspected by Captain Thomas F. Dwyer, 21st U. S. Infantry, and was reviewed by the Commander-in-Chief, the Adjutant General, the Brigade Commander, Col. C. McC. Reeve, Col. Chas. A. Van Duzee and Col. Arthur W. Wright.

RECOMMENDATIONS.

I desire to renew the recommendations made in my two last camp reports "that a roofed shed be built on the lake side of the companies' mess house, where the proper apparatus (showers) can be installed at a nominal expense." I would recommend also that my command be equipped with the necessary appliances for a field hospital.

It is desirable that measures be taken to protect the bridge leading to the artillery grounds from the inroads made by surface waters discharging through the railroad culvert.

I think it is the general sentiment of the National Guard, that the Legislature be requested to make sufficient appropriation for the extension of the camp grounds, and the erection of a suitable storehouse.

Very respectfully,

GEO. C. LAMBERT,
Major Commanding First Artillery, M. N. G.

HEADQUARTERS FIRST INFANTRY, M. N. G.

MINNEAPOLIS, MINN., July 27, 1903.

Adjutant General M. N. G., St. Paul, Minn.

SIR:—In accordance with G. O. No. 5, March 24, 1903, A. G. O., c. s., this regiment went into camp at Camp Lakeview near Lake City, Minn., on Monday, July 6th, and remained until Monday, July 13th. The attendance was large, as shown by the consolidated morning reports; the health of the command excellent, and the conduct of the men above criticism. The usual camp routine and target practice was faithfully followed by both officers and men, particular attention being given to company and battalion extended order drill, advance guard and outpost duty. Guard mounting was held twice daily in order to familiarize the largest number of men with the duties of sentinels. Owing to the regulations prescribed for target practice, whereby an entire battalion was on the range for a day at a time, it was impracticable to have any regimental drills and the few evolutions possible were executed in the very limited time available at the hour of evening parade.

Officers' and non-commissioned officers' schools were held by the major and captains, and satisfactory results obtained. Short instructions in first aid to the wounded were given by the surgeons to the officers and men of the various companies, one company at a time, but not as frequently as would have been the case had more time been available. The daily inspections of the company streets, mess-houses and kitchens by the officer of the day and one of the surgeons showed, as a rule, that neatness and cleanliness were everywhere enforced; and the sanitary condition of the entire camp was most excellent. I respectfully submit that the present system of target practice is neither fair nor satisfactory. It is not fair in that all the companies do not shoot under the same conditions of heat, wind and atmosphere. It is not satisfactory because the absence of an entire battalion every day renders regimental drill well nigh impossible and prevents any practice in minor tactics.

If legal provision could be made for an inspector of small arms practice and the entire arrangement of target practice left with the regimental commander, I am satisfied that far better results could be attained. A generous and commendable rivalry exists between the different companies of this regiment in the matter of target practice, and it is not fair in determining their relative proficiency that one company should be allowed to shoot in excellent light and free from wind, while another company equally proficient should be compelled, as under the present regulations, to shoot in a haze almost dense enough to be a fog, and with a high or baffling wind blowing.

The regiment was reviewed by the Adjutant General, his Excellency the Commander-in-Chief, and the Brigade Commander. I feel specially gratified that the Adjutant General was able to spend the entire eight days in camp with the regiment, and his presence did much to maintain a high standard of military courtesy on the part of both officers and men. During the two days spent by the Brigade Commander in camp, that officer was untiring in his attendance on every duty and ceremony, and from his long and varied military experience he was able to make many and valuable suggestions. His frankness, impartiality and the great interest he manifested in everything pertaining to the

proper performance of the duties of the soldier created a most favorable impression among all members of the regiment, many of whom, unfortunately, had been brought in contact with him to only a limited degree in the past. I trust it may not be considered improper to refer to the pleasure with which we met the officers of the Second and Third Infantry and of the two batteries, who visited the camp, and this report would be incomplete were mention not made of the invaluable services rendered by Captain Thomas F. Dwyer, U. S. A., Inspecting Officer.

Yours respectfully,

C. McC. REEVE,
Colonel Commanding.

HEADQUARTERS SECOND REGIMENT, N. G. M.

AUSTIN, MINN., Aug. 14, 1903.

The Adjutant General, St. Paul, Minn.

SIR: I have the honor to report that in compliance with General Orders No. 5, current series, headquarters Minnesota National Guard, this command went into camp at the state camp ground near Lake City, from July 14th to the 21st, inclusive. Details of men reported to the quartermaster and regimental commissary at 9 o'clock a. m. July 13th, and upon the arrival of the regiment at about 1:30 o'clock on the 14th, everything was in readiness for the men.

The camp routine, as per General Orders No. 7, a copy of which is hereto attached, was taken up at once, and work was commenced upon the range at 4 o'clock in the afternoon. The average attendance of the regiment was 488, or 82 per cent of the entire strength of the regiment.

Organization.	Enrollment.	Average Attendance.	Percentage.
Field, Staff and Band.....	55	54	98
Company A	75	64.5	86
Company B	63	45	73
Company C	56	47.6	85
Company D	54	41.6	77
Company E	53	42	79
Company F	58	48	82
Company G	58	52	90
Company H	66	45	70
Company I	56	45	81

The attendance, while good, was not as great as it would have been but for the fact that some men were kept at home by the delayed harvest, and in two companies, I am informed by the company officers, employers positively refused to allow their men to go to camp. I think that effected as many as six in one of the companies.

The weather was cool and everything which could be desired for work, which was carried on continuously and with encouraging results from arrival in camp until almost the hour of departure. There was no sickness worth mentioning.

In my judgment the regiment improved rapidly during our tour of duty and the improvement was noticable and marked; the men were extremely prompt and obedient in the performance of their duties and exhibited a desire to do their part well and master the details. I regret to say that there are some of the

officers and non-commissioned officers who do not give military work the time, energy and study which should be required of them in order that they may become proficient.

In my judgment the amount of range work required is out of proportion to an eight days' encampment, and renders it almost impossible to accomplish anything beyond the merest rudiments of military drill. So fully was the time consumed this year by range work and the inspections of the various companies that it became impossible to take up field problems, which I had hoped to do. I appreciate the efforts made, and the improvement in range work, but it certainly is out of proportion and requires too much time unless we have a longer tour of duty.

Believing that each department of military service should be developed in its duties, and also with the hope of lessening the cost of subsistence, we undertook to, and did, subsist the regiment through the commissary department. The results have been, on the whole, fairly satisfactory. The average cost of subsistence was $25\frac{3}{8}$ cents per man per day. We did not attempt to limit the subsistence to the army ration, but the men were furnished with fresh meat each day, with such salted meats as they wanted, and with all of the necessities and some of the luxuries; everything was furnished which it was necessary to have. Everything purchased outside, or in addition, by each company was unnecessary, but the companies were allowed to buy such luxuries outside as they saw fit. This I now believe to have been a mistake. There was a wide difference in the cost of subsistence in various companies; for instance, the average cost per man per day in A Company was 18 cents, while in B Company it was $33\frac{1}{4}$ cents, these two companies representing the extremes. And in addition to this, I am told that the outside purchasing by Company B was nearly as much more. There should be no such difference, and it is made more than ever apparent that this department needs careful training, for the sake not only of the proper feeding of the men, but of preventing any unnecessary cost for subsistence. I believe that hereafter the regiment should be subsisted as nearly as possible upon the army ration, and that no purchasing should be allowed, except through the commissary department, when any waste or misuse of supplies can be more readily ascertained.

Some comment has been made in the papers regarding the prohibiting of the canteen in this regiment. I am not aware that there was ever a canteen allowed in the regiment at any time, but there has been in the past some selling, I am told, in company streets and kitchens. I believe such selling, without a license, to be a violation of both state and national laws no matter what the plan of such selling may be, and I further believe that the prohibiting of such selling in the camp operates to reduce the use of malt liquors and keeps it within reasonable bounds. There was absolutely no loss of time from duty in the regiment by reason of intoxication after the first day. It is my belief that in our camp of instruction men should be trained not alone to be soldiers, but also to be good citizens, and whatever can be done to that end should be done.

The regiment was reviewed by the commander-in-chief, his excellency Governor S. R. Van Sant, Adjutant General Libbey and Brigadier General Joseph Bobleter.

I hope during the ensuing year by means of proper inspections and schools of instruction, to be able to raise the regiment to a much higher standard, and to take it into camp in a better condition to benefit by its tour of duty next year.

Yours respectfully,

ARTHUR W. WRIGHT,
Colonel Second Infantry, M. N. G.

HEADQUARTERS THIRD REGIMENT OF INFANTRY, M. N. G.

ST. PAUL, MINN., July 9, 1903.

To the Adjutant General, State of Minnesota.

SIR: I have the honor to report that, pursuant to General Orders No. 5, A. G. O., c. s., this regiment mobilized at Camp Lakeview on June 15th, 1903, for an eight-day tour of instruction.

The making up of the train in the Union Depot yards at St. Paul, during the first half of the morning, is always a task of considerable difficulty and, in my judgment, it should be avoided in future, as far as practicable. The departure from St. Paul was delayed nearly an hour for the above reason, and the troops arrived at camp behind time. Anything that savors of tardiness in the movement of troops is detrimental to the service, and the opportunity for valuable instruction was lost in this case.

The troops were removed from the train in the shortest time practicable and guard mounting followed immediately. The condition of the grounds, including the rifle range, was exceptionally pleasing and reflects great credit upon those in charge. Nothing of importance, which has not been covered by previous communications, occurred and the time was devoted to routine work.

The health of the command was excellent and, with the exception of Private Berger of the Band, who suffered a broken collar bone while playing ball, no accidents are recorded. The working of the Hospital Corps under the present system was very gratifying and the change is a good one.

The additional service pay to the enlisted men was favorably commented upon generally. The officers' club was successfully conducted and was instrumental in keeping the use of liquor out of the officers' quarters. In this connection I would strongly favor the building of a suitable club room for the enlisted men, where all could obtain service from civilian employes, under the absolute control of the commanding officer. This would centralize what is probably one of the most serious drawbacks to camp life, and would enable the prohibition of liquor in the quarters of the men without hardship to them and with great satisfaction to a large percentage of those who do not use it. It would also tend to allay a prejudice which exists (and not without cause) in the minds of many parents, and which results in keeping a very desirable class of young men out of the Guard. This matter is well worthy of the deliberation of a board of officers.

The floors of the general mess houses are getting old and should be replaced before they are used another year. I would recommend the purchase of a complete hospital equipment for permanent issue to each organization. The field equipment of the Guard should be complete, and the necessary ranges and cooking utensils should be kept at stations. Each company kitchen should be provided with a steel range in addition, which might be used in turn by each regiment and thus save the large expense which is now saddled upon the men.

I would recommend that a suitable field piece be provided for firing the morning and evening gun, to be in charge of a detail reporting directly to the commanding officer. The army shoe should be available for purchase by the companies, and should be required. Flannel shirts might also be issued and charged to the individual, and in this way necessary articles could be had with-

out cost to the state. A general storehouse should be built upon the reservation containing, besides quartermaster and commissary storerooms, a cold storage room for meat and vegetable supplies. A separate building for ordnance stores, and a repair shop would prove of great convenience. The present sutler's store should be attached to the enlisted men's club room and managed by each regiment, and the profits devoted to the benefit of the service. An ice house would save considerable money, as the charges for ice are high and a supply is not always available.

The present system of inspection is not satisfactory. Certain portions of the work might be done at stations and omitted from the program required in camp, and more time be thus available for that part of the work which can best be done out of doors. The program this year was condensed to a dangerous extent, and the percentages do not show the true standing of the companies. I would recommend that a larger percentage be allotted to rifle practice, and that the subject, "Care of the Piece" be added, giving it permanence and a considerable value. Each man should care for his own piece—not alone at camp or in the field—but at company stations. The present practice in some companies of requiring an armorer to care for the pieces cannot be too severely criticised.

A time limit of, say, three months should be placed upon the service required by enlisted men before any allowance for camp pay or inspection money would be available, and the minimum number of drills, including instruction in the aiming and firing drill, care of the piece, and guard duty, specifically prescribed. A comprehensive course of indoor target practice should be required, and the necessary supplies be provided, together with a reasonable allowance for expense in fitting up the galleries.

In conclusion I desire to express my satisfaction with the results obtained and the progress observed on every hand.

Yours respectfully,

CHAS. H. VAN DUZEE,

Colonel Third Infantry, M. N. G.

WAR DEPARTMENT, THE MILITARY SECRETARY'S OFFICE,

WASHINGTON, SEPTEMBER 13, 1904.

Hon. Samuel R. Van Sant, Governor of Minnesota, St. Paul.

SIR: By direction of the Assistant Secretary of War, I have the honor to transmit herewith copy of a report of the encampments of the organized militia of Minnesota, held near Lake City, Minnesota, from June 14th to July 27th, inclusive, as submitted by Lieutenant Colonel Wm. Gerlach, U. S. A., retired, on duty with the organized militia of your state.

Very respectfully,

F. C. AINSWORTH,

The Military Secretary.

ST. PAUL, MINNESOTA, August 12, 1904.

The Military Secretary, War Department, Washington, D. C. Through Headquarters, Northern Division.

SIR: G. O. No. 9, c. s., Hd. Qrs. M. N. G. having directed the organized militia of Minnesota to go to Camp Lakeview for instruction, I proceeded there

with general headquarters, and remained with troops while in camp, returning here temporarily in interim between camping time of the various organizations. The state provided me with transportation, and no expense on account of U. S. was incurred by me on this duty.

Memorandum—a part G. O. No. 9—gives complete data regarding transportation; it is prepared by Captain W. H. Hart, Brigade Quartermaster and was carried out fully, except the part referring to the two artillery batteries going to camp. These organizations marched there, but returned by rail. It insured the prompt and comfortable conveyance of the troops, and with slight modifications, would serve as a good basis for mobilization of the Minnesota brigade in case of need.

I observed the movements as far as practicable, accompanying the First Infantry going from and returning to initial starting point, Minneapolis.

The entraining was effected quickly and in perfect order, connections at St. Paul and Red Wing were exactly made. On arrival at camp the headquarters, band and eight companies were detrained and in line in marching order in two minutes near track. Ten minutes later, the detail in charge of baggage had it unloaded on railway platform and proceeded to move it to camp. The troops were not aware that I was timing their work. All other performances of this character noticed by me, were equally well executed.

The encampment was by regiment; the artillery battalion occupied a separate camp, but joined with Second Infantry in parades and reviews. The camp grounds, state property, comprise about 160 acres, crossed by main line, Chicago to St. Paul, of C. M. & St. P. R. R.

The excellent rifle ranges have been described in full in former reports.

The water supply is obtained by connection with Lake City plant, is healthy and ample.

The lake affords the best bathing facilities. Officers' and hospital sinks have flushing closets, the men's sinks, located at safe distance from tents and mess houses, have metal tubs which are regularly emptied and well disinfected with quick lime. Vitrified pipe drains conduct kitchen slops to the lake, garbage is hauled off and dumped by wagon.

Officers wore new service uniform, the men were provided with blue blouses, trousers and caps, khaki field dress complete, and brought ponchos, and overcoats for guard duty. They were supplied with ordnance equipment. Companies used Donovan field ranges and china table war—company property—in mess rooms. Regimental headquarters messed separately, the regimental commissary acting as caterer. Company messes were conducted under immediate charge of their commanders and cooking done on camp ranges.

The second Infantry organized a regular commissary department. Other organizations made individual purchases.

Fresh beef, bacon, coffee, sugar, rice and beans, components of army ration, were freely used and well prepared. Ice, milk, butter, fresh vegetables and fruit were provided liberally. Some of the cooks were permanently enlisted, others only for the camping periods. Detailed men assisted in kitchen work. Mess rooms and cook houses were kept thoroughly neat and clean.

The exercises at camp consisted of company, battalion and regimental drill, guard mount, dress parade and reviews. The brigade chaplain held services on two Sundays.

Target practice was well conducted under the most efficient supervision of Captain Orris E. Lee, Brigade Inspector of S. A. P. His report in detail will be

forwarded upon completion of team practice, which will be held in September; 11 expert riflemen, 55 sharpshooters and 370 marksmen qualified in camp.

There was a pronounced tendency displayed by all commanders to improve the troops in field work, and remarkably good results obtained, under adverse circumstances. As now conducted, in compliance with existing regulations, target practice takes up the larger portion of camp time to the manifest prejudice of field exercises and extended order work. Regimental commanders, while they encourage the troops by prizes and every means in their power to attain proficiency in musketry, deplore these conditions, estimating fully the need of teaching infantry to shoot well. I cannot ignore the call for amendment in course pursued now by organized militia here. The first step should be thorough preliminary instruction, sighting drills and gallery practice, then work on home ranges. Troops at St. Paul and Minneapolis have with their own means already provided sub-caliber target machines; Duluth has a good range up to 500 yards, other stations are not as well equipped; at some safe ranges cannot be found. In working on these lines we are met by a hard problem, "How to provide ammunition?" If Section 21, Act Jan. 21st, 1903, could be amended to allow the War Department to issue cartridges to troops, who have satisfactory ranges and carry on practice according to regular army rules, this difficulty could be overcome, and the necessary final work done at camp in a reasonable time, giving more time for other important instruction during the necessarily short camping period.

The field service instruction was unavoidably short. It consisted of thorough elementary instruction in extended order regulations, followed by practice in use of terrain. Only one field exercise, by Second Infantry, comprising the occupation of a defensive position by one battalion, another battalion to develop this position, and then to await the arrival of reserve, before engaging the enemy could be undertaken, and in this case the time was too short for real deliberate execution, other exercises projected had to be abandoned to give time to shoot.

Guard mount was well conducted; slight irregularities observed at first were quickly corrected, and all were proficient in this work before leaving camp. Sentinels were active, daily improvement was noticeable; few, and these only slight irregularities, were discovered, and easily corrected.

My observation made plain to me the need for impressing all with the idea that sentinels should not merely casually see what passes near their post, but that it must be their constant care to observe all within their vision and hearing, and act accordingly.

Company morning reports and descriptive books were used, pay rolls were prepared, and all official correspondence, and issue of orders properly conducted. Present with troops at all times, I gave advice and assistance freely, when requested. In this connection I beg leave to state that the evident desire for improvement displayed by all, with whom I came in contact, made my work a pleasure to me.

A systematic course of theoretical instruction was impracticable for want of time. However, I attended officers' and non-commissioned officers' schools and took especial pains to lead company commanders to see the value of good squad instructors and leaders. This was prompted by my observing since I have been on duty with the National Guard a marked tendency on the part of captains to perform in person duties which should be delegated to their subordinates. This leads to training of commands as a whole, and prejudices the individual development of every member, which under present conditions alone assures efficiency in action.

By request of regimental commanders, I read before the First Infantry officers a paper on "Esprit de Corps," and occupied an evening, in officers' school of the Second Infantry, in illustrating in detail the work of a brigade of infantry, as side detachment of a division moving to find and oppose an enemy, which was reported to have crossed the frontier. I started the brigade in the morning, sending out patrols, and taking precautions to secure the march, showed reports coming in during the advance, and halted the troops in afternoon, establishing outposts and advance patrols for the night.

Whenever time was available I gave instructions in preparation of ration returns, requisitions for fuel and other supplies, transportation requests and bills of lading.

The regimental commissary of the Second Infantry and his commissary sergeant were instructed how to obtain, issue and account for supplies.

The deportment of troops was good at all times, officers especially, showed marked loyalty to superior authority, they did duty for duty's sake.

Unfortunately tents are necessarily pitched under the direction of the brigade quartermaster before the troops reach camp, and I had only a single opportunity for instruction in this direction. The hospital corps, First Infantry, practiced and became quite proficient in erecting wall and hospital tents.

A regulation regimental field hospital outfit was taken to camp, also emergency cases. The surgeons become familiar with their use, and are pleased with this addition to the equipment, but miss a few special instruments and medicines, which they use habitually in their private practice.

There was no serious illness or injury of men while in camp. Rigid sanitary inspections were made at least daily, irregularities discovered were reported and corrected at once.

In my opinion the question of footwear for infantry should receive serious attention. Prompted by previous observation, I procured a pair of the new (Bluecher) army shoe and wore it frequently in camp, demonstrating their superiority in active service to the guardsmen. The shoes generally worn by them are little protection when walking in grass wet with dew or rain. In a week in field, many men would be barefooted or suffer from scalds and blisters. As clothing in guard remains public property, and is not issued to individuals as an allowance, it is turned back when a member leaves the service and re-issued to others. While this is practicable with outer clothing, it is hardly feasible with shoes, and captains object, rightly too, to having the responsibility to account for shoes in hands of men added to their already great troubles. If authority could be obtained by law to sell shoes to me at cost, and then compel them to wear them on duty, the efficiency of the troops for field service would be increased materially, and the contingency of having to supply footwear suddenly to the troops, when called into service, largely discounted. This course would involve an advance issue to states to enable them to meet the demand as it arises, without a special appropriation, so hard to procure from legislatures.

Referring to the artillery troops: They marched to camp, from Minneapolis 70, and St. Paul 60 miles, returning home by rail. They worked hard on drills and target practice.

Special report in their case will be forwarded when necessary detailed data are received from battalion commander.

All troops at camp were reviewed by their commander-in-chief, the governor, the brigade commander and adjutant general. They were steady in ranks; the march past and general appearance were creditable.

The hard duties of the disbursing officer of the militia of Minnesota, were well performed by Captain Hart, brigade quartermaster, and he has been diligently engaged since troops departed in preparing and rendering his accounts. At his request, I have given him all the assistance possible in the performance of this duty.

From personal inspection I am able to state that payments have been faithfully made, that check books are properly kept, balances agreeing with bank statements and accounts correct.

Respectfully submitted,

WM. GERLACH,

Lieut-Colonel U. S. A., retired.

HEADQUARTERS FIRST BATTALION ARTILLERY, M. N. G.

ST. PAUL, MINN., Aug. 3, 1904.

The Adjutant General, State Capitol, City.

SIR:—I have the honor to report that, in compliance with General Orders No. 9, A. G. O. c. s., as modified by Special Orders No. 23, A. G. O., c. s., the First Battalion of Artillery, under my command, proceeded to Camp Lake View, Lake City, Minnesota, for instruction. Battery "B," Captain C. C. Bennet commanding, left its station at Minneapolis, Sunday, July 3rd, at 7:00 A. M., arriving at St. Paul at 9:30 A. M. My whole command, except the company of engineers, assembled immediately thereafter and proceeded to march overland to Lake City, with 173 officers and men, 110 horses, 4 field pieces, 1 gattling gun, 5 caissons, 5 escort wagons and 1 ambulance wagon. The command left at 10:30 A. M., and the first camp was established at the Wilkinson farm near Langdon. On July 4th, Battery "B" encamped near Swanson's farm house and Battery "A" at O'Rourke's farm between Hastings and Red Wing. The command reached Camp Lakeview on July 5th at 11:00 o'clock P. M., without serious accident, except the injury to one horse ridden by Commissary Sergeant Albert E. Barnes, which will form the subject of a special report as soon as the facts and circumstances have been officially ascertained. Reference is here made to the report of Captain William J. Murphy hereto annexed, which contains more detailed information of this march. The company of engineers proceeded by rail, via the Chicago, Milwaukee & St. Paul Railway, leaving St. Paul in the morning of July 5th and arriving at Lake City before noon of the same day. The entire command returned to their respective stations in the afternoon of July 14, 1904.

ATTENDANCE.

The percentage of attendance of my command during the entire encampment was 91.8, distributed as follows:—

ORGANIZATION	Strength	July, 1904, Attendance, Ten Days										Average	Per Cent Present
		5	6	7	8	9	10	11	12	13	14		
Field and staff.....	101	91		91	91	91	91	91	91	91	91	91	90
Co. engineers	72	60	60	60	66	66	66	66	66	66	66	64	88.8
Battery A	88	78	78	75	75	75	76	75	75	75	75	76	86
Battery B	88	88	88	88	88	88	88	88	88	88	88	88	100
Battalion	258	235	235	232	238	239	238	238	238	238	237		91.8

ROUTINE.

The following routine was observed throughout the encampment:

Revielle, first call	5:10 a. m.
Reveille	5:15 a. m.
Assembly (roll call)	5:20 a. m.
Sick call	5:30 a. m.
Stable call	5:40 a. m.
Assembly (stable duty)	5:45 a. m.
Mess call	6:45 a. m.
Fatigue call (camp police)	7:10 a. m.
Boots and saddles	7:25 a. m.
Assembly	7:30 a. m.
Target practice (small arms)	9:00 a. m.
Recall	11:00 a. m.
First Sergeants' Call	11:45 a. m.
Mess call	12:00 m.
Water call	12:25 p. m.
Assembly	12:30 p. m.
Target practice (first call)	1:20 p. m.
Assembly	1:30 p. m.
Recall	4:45 p. m.
Stable call	4:55 p. m.
Assembly	5:00 p. m.
Mess call	5:30 p. m.
Dress parade, (first call)	6:00 p. m.
Assembly	6:15 p. m.
Dress parade (adjutant's call)	6:50 p. m.
Guard mount (first call)	7:45 p. m.
Assembly	7:55 p. m.
Adjutant's call	8:00 p. m.
To quarters	10:45 p. m.
Taps	11:00 p. m.

HEALTH.

The health of the command was generally good and the sanitary condition of the camp satisfactory. The installation of a few shower apparatus, similar to those which were installed in the infantry camp is greatly needed.

TARGET PRACTICE.

The result of the target practice will make the subject of a special report at the end of the target season. It is to be noted, however, that the same kind of inferior powder was issued by the War Department, notwithstanding strong protests on my part in last year's report.

CEREMONIES.

The company of engineers and batteries were inspected by Lieutenant-Colonel William Gerlach, U. S. A., retired, on duty with the national guard. The battalion was reviewed by the Commander-in-Chief, the Adjutant General, the Brigade Commander, Colonel Arthur W. Wright, and other officers of the National Guard.

RECOMMENDATIONS.

In addition to the recommendations made in my last report I will suggest that practice marches such as were undertaken by my command this year be participated in whenever possible. It stimulates the interest of officers and men and prepares them more fully for active service, should any emergency arise.

Very respectfully,

GEO. C. LAMBERT,

Major Commanding 1st Arty. M. N. G.

HEADQUARTERS FIRST BATTALION ARTILLERY M. N. G.

ST. PAUL, MINN., Aug. 21, 1904.

The Commanding Officer, First Artillery, M. N. G.

SIR:—Complying with paragraph 7 Orders No. 23, c. s. Headquarters First Artillery, M. N. G., I have the honor to submit the following itinerary report of the practice march of the First Artillery from St. Paul to Camp Lake View July 3rd to 5th inclusive.

ITINERARY.

The battalion, under command of Major George C. Lambert, consisting of Batteries A, Capt. Wm. L. Kelly, Jr., commanding, and B, Capt. Carl C. Bennet commanding, assembled at the Armory, 3rd and Wabasha Streets, St. Paul, at 9:30 a. m., Sunday, July 3rd; Battery B having left its station at Minneapolis at 7:00 a. m. The battalion enumerated as follows: 173 officers and men, 110 horses, 4 field pieces, 1 gatling gun, 5 caissons, 5 escort wagons and 1 ambulance wagon.

The command moved at 10:30 a. m., crossing the Mississippi river by way of the Wabasha Street bridge and proceeded to South St. Paul where a halt was made at 12:30 p. m. Horses were watered in the Union Stock Yards and lunch and coffee served the men.

Broke park 2:15 passing through Inver Grove and re-crossing the Mississippi river by way of the Rock Island Railway toll bridge, toll having been suspended by the railway authorities upon previous request of the Battalion Commander; through St. Paul Park to the Wilkinson farm, a point one-eight mile east of Langdon, where camp was established for the night. Park and picket lines were formed in a grass-covered enclosure immediately in front of the Wilkinson farm house. The spot is admirably adapted for the camp of a command of this size, being clean, well drained and convenient. Water for all purposes procured from well operated by wind engine and having large stock tank attached. Eggs, milk, forage and fuel in abundance purchased on premises.

Six tents were pitched for officers and non. com. officers. Men slept under the carriage covered by tarpaulins and hay for bedding. Rained almost constantly all day and night.

JULY 4TH.

Broke camp at 7:30 a. m. and proceeded to Hastings again crossing the Mississippi by the spiral iron road bridge, before entering that town. The National

Salute was fired in the south side of the town in commemoration of our national birthday; crossed the Vermillion river and went into park immediately below the bridge and on the banks of that stream at 12:05 p. m. This is a good halting point, being clean, well grassed and spacious. Horses watered in ford above the bridge. While passing through Hastings the animal ridden by Com. Sergt. Albert E. Barnes, seriously strained her left hind leg and was left at Hastings under care of a veterinary. Broke park at 1:45 p. m. From this point to O'Rourke's farm the most trying part of the march was encountered, portions of the road being sandy and very heavy especially for escort wagons. The heat was very oppressive, making it exhausting to the horses. Halts were made more frequently and for a longer time. The horses of Battery B showed the greater degree of fatigue, having traveled ten miles farther than the rest of the animals, on the previous day. The objective terminus of this day's march was the Poor Farm, near Red Wing, but owing to almost incessant rain, causing bad condition of roads, and to extreme heat at times during the day, this itinerary was abandoned and Battery B went into camp at 6:30 p. m, about 600 yards south of the Jake Swanson farm house; a place known to the military who have marched over that road as "Hungry Point." Battery A moved on to O'Rourke's.

Hungry Point is in every way undesirable for camp purposes, especially for artillery. The available space is very limited and sloping towards the center to which point the water is shed when it rains. The space is so contracted that the low part cannot be avoided. Water procured from wind mill pump at Swanson's; fuel gathered in the woods surrounding, but it was necessary to send two miles for forage. From Ewers to Boothroyd's by way of "Hungry Point" is a most undesirable route; the road by way of Meisville is much more level and affords better general facilities for march and camp. O'Rourke's, the point where Battery A camped is excellent in every detail.

JULY 5TH.

Battery B broke camp at 6:40 a. m. A steep and slippery grade was encountered for the two first miles making it necessary for the cannoneers to dismount and assist at the wheels. Battery A, having left O'Rourke's at 7:30 a. m., was about five miles in advance. The batteries proceeded in this way, each stopping to water at the Poor Farm and to feed and lunch at the Reform School.

At 2:00 p. m Battery A halted one mile south of the Reform School until Battery B. came up. The horses were watered at this point from a creek and at 3:30 p. m. the march was continued.

Frontenac station was reached at 6:40 p. m. where the horses were watered from a creek running by the north suburbs of the village. The march was resumed at 7:40. The battalion arrived at Lake City at 10 p. m and came into park at Camp Lake View at 11:05 p. m. Everything was found in readiness for the prompt care of both men and animals, the Battalion Quartermaster and a detachment having gone on in advance for that purpose.

CARE OF ANIMALS.

So far as possible collars were carefully fitted to the animals but the lack of extra collars of assorted sizes makes the result in this particular imperfect. Harnesses were carefully adjusted and made to fit; teams were mated with a view to temperament and speed. Stops were made at frequent intervals, usually ten minutes each hour, but when very hot and in heavy roads more frequently and longer. At each stop drivers dismounted, loosened girths, moved collars forward, inspected harnesses and when necessary readjusted saddle cloths.

In park and camp the animals were picketed to the prolongs fastened to the carriage wheels. All the animals arrived at Camp Lake View in good condition with the exception before noted and a team horse in possession of Battery B, which was injured near Lake City by stumbling. The facts and details have already been reported by a Board of Survey.

CULTIVATION.

From St. Paul Park to one mile west of Hastings; from O'Rourke's to Poor Farm and from Reform School to Lake City the land is fertile and well cultivated. The intermediate distances consist either of sandy levels or broken and hilly approaches to the Mississippi, Vermillion and Cannon Rivers. Oats, barley, rye, corn and timothy and clover are principal crops.

Wabasha street bridge over Mississippi at St. Paul; steel on stone piers, brick road bed, double street car track. At Inver Grove over Mississippi steel and wood draw bridge, road bed in basked under railroad tracks. Approached by both wagon and rail by wood trestle. Owned by Chicago, Rock Island and Pacific Railway. Toll charged.

Over Mississippi at Hastings; steel and wood spiral approaches sharply inclined. Brakes convenient but not necessary.

Over Vermillion river at Hastings; steel and wood, one span 100 feet. Ford immediately above.

Over Cannon river; steel and wood 200 feet. Twenty feet above water.

Numerous wooden culverts found in safe condition.

WATER.

No lakes or springs. At Hastings and Frontenac fords. Poor farm artesian well. Large tanks supplied from wells operated by wind engines at almost every farm house.

CAMP GROUNDS.

Wilkinsons—Level, grassy enclosure, surrounded by shade trees immediately in front of Wilkinson's house. Very desirable. Water for men and stock from windmill. Milk, eggs, fuel and forage purchased on premises.

Hungry Point—Contracted and very sloping, divided by shallow water course. Room for but one battery and that insufficient. Water from wind engine tank at house of owner Jake Swanson, one-quarter mile distant. Fuel from wood surrounding; forage procured over two miles south. Undesirable in every way. This camp and the route via same should be avoided.

O'Rourke's.—Clean clover pasture, high and level, ample in extent. Well drained and in every way desirable. Water from tank supplied by wind engine. Fuel procured on premises.

Very respectfully,

WM. J. MURPHY,

Capt. and Adjutant, 1st Artillery, M. N. G.

HEADQUARTERS FIRST INFANTRY, M. N. G.

MINNEAPOLIS, MINN., August 23rd, 1904.

Adjutant General, State of Minnesota.

SIR:—I have the honor to report that pursuant to orders, this regiment encamped at the state camp grounds near Lake City from July 18th to 27th, in-

clusive. The attendance was the largest in the history of the regiment, the minimum being slightly under 500 while the maximum number present was 567; the average attendance being considerably above 500. The conduct of the men was excellent, the guard reports showing not a single soldier in confinement during any portion of the ten days tour of duty. For the health of the command reference is made to the report of the senior medical officer present. The sanitary conditions were good; the weather excellent.

While both officers and men were earnest in attention to their duties, the best results were not attained owing in my judgment entirely to the large proportions of the time of the whole encampment devoted to rifle practice. While I appreciate fully the necessity of teaching men how to shoot, I respectfully submit it is quite as important that they should know when to shoot.

From early morning until late in the afternoon, every day, Sunday included, the men were on the range; as much shooting attempted in ten days as a regiment in the regular army accomplishes in an entire year. Instruction in picket and outpost duty, except of the most desultory character, was absolutely impossible. Not a single regimental drill was held; not a single problem in minor tactics was attempted, although both officers and men were eager for the same; and all because an important portion of the command was *always* on the range. Some compensation is found in the large number of sharpshooters and marksmen qualified, but for practical use in actual warfare I would rather have a hundred men who knew when to fire at an enemy, than five hundred men whose knowledge was confined principally as to how to shoot at a target. I am not criticising the increased qualifications necessary for a soldier to become a sharpshooter, but I do declare that they are not suitable for practical use in the National Guard, nor are they necessary. It is not necessary for men who have ever fired a rifle to be compelled to fire ten rounds arbitrarily before commencing to try for qualification; nor is it desirable to allow a man who has not made at least 120 at known distances to try for a sharpshooter. If I am correctly informed, not a single man in the three regiments with a score of 120 or less at known distances qualified as a sharpshooter, and yet about a hundred and forty or fifty made the attempt. I most respectfully recommend that in future rifle practice, instead of being made the commanding feature of the camp, be relegated to the subordinate position it formerly held.

I desire especially to express my appreciation of the great assistance rendered by Col. Gerlach, U. S. A., whose untiring efforts and enthusiastic co-operation in all lines of military instruction contributed more than any other one cause to make the camp what it was, the most successful in the history of the regiment.

Very respectfully,

C. McC. REEVE,
Colonel.

HEADQUARTERS SECOND REGIMENT, M. N. G.

AUSTIN, MINN., July 30, 1904.

The Adjutant General of Minnesota, St. Paul, Minn.

SIR:—I have the honor to report that in compliance with General Orders No. 9, A. G. O., c. s., this command went into camp at the state camp grounds near Lake City, between the 5th and 14th days of July inclusive. Details re-

ported to the Quartermaster and Regimental Commissary at 4 o'clock p. m., July 4th, and upon the arrival of the regiment everything was in readiness for the men.

The camp routine, as per General Orders No. 5, was taken up at once and work commenced upon the range during the afternoon. The average attendance of the regiment was 466, or 80.6 per cent of its entire strength, as follows:

Organization.	Enrollment.	Average	
		Attendance.	Percentage.
Field, Staff, Non-commissioned Staff and Band	55	53	96
Company A	76	74	97
Company B	48	33	66
Company C	56	37	66
Company D	53	38	71
Company E	66	51	77
Company F	57	48	84
Company G	52	41	80
Company H	59	49	83
Company I	56	42	75

The weather during the encampment was cool and everything that could be desired for work, except that there were two rainy days which greatly interfered with and delayed our work. There was very little sickness, the highest* in one day being six and the lowest one.

In my judgment the regiment improved rapidly during our tour of duty, and I believe that the improvement was noticeable and lasting. All officers and men were extremely prompt and obedient in the performance of their duties and there was a noticeable desire to do their part well and master the details of their work. The time is too short to accomplish anything like the work which we desired to do, and we were obliged to break camp with a feeling of disappointment because our work was not completed.

It is my opinion that more time should be given, in all of the camps of instruction, to practical field problems so that both officers and men might understand what to do and how to do it when field work is required. I think that the exhaustive requirements of the rifle range seriously interferes with the performance of other work of equal importance. I recognize that men should be taught how to shoot, but they must first be taught how to get in a position to shoot, and how to keep themselves from being shot. Not many years ago, with less than half the opportunities we now have, we were able to do the required work on the rifle range with practically no interference with our other work, but owing to the extended requirements, in spite of the fact that we have twenty targets, it seems to be impossible to get the work out of the way so as to accomplish much in the other departments. I recommend that the matter be given careful attention to determine whether or not the requirements can be cut down or some plan devised to do a part of it at home; as a matter of fact, we are doing as much of this work in the ten days' encampment as regular troops are expected to do in a year. I hope for a change in this direction.

The regiment was subsisted this year as last, through the commissary department, with very satisfactory results. The average cost of subsistence was 24.7 cents per day, per man, for all necessities and some luxuries. I am told that but little was purchased outside.

More pains were taken by officers and men to perform well and satisfactorily "guard duty" than usual, with very encouraging results.

A new and beautiful stand of colors having been, upon requisition, issued to this regiment by General Libby, they were presented to the regiment by General Bobleter, on the occasion of his review, with a fitting and impressive ceremony.

The regiment was reviewed by the Commander-in-Chief, Governor S. R. Van Sant, Adjutant General E. D. Libbey, Brigadier General Joseph Bobleter.

I wish to express my thanks and appreciation for the many courtesies, and the kindness extended to me and this regiment by General Libbey, his staff and assistants, and by General Bobleter and his staff.

I assure you, sir, that it is the aim and ambition of the officers of this regiment to make it a creditable organization, upon a footing ready for active service in any emergency, at any time.

Respectfully,

ARTHUR W. WRIGHT,
Colonel Second Infantry.

HEADQUARTERS THIRD REGIMENT OF INFANTRY, M. N. G.

ST. PAUL, MINN., July 23, 1904.

The Adjutant General, State of Minnesota.

SIR:—Pursuant to the requirements of G. O. No. 9, A. G. O., c. s., I have the honor to report that this regiment mobilized at Camp Lakeview on June 14th, 1904, for a ten days' tour of instruction, returning to stations on June 23d.

The condition of the camp was excellent and reflects credit upon the officers in charge of its preparation.

The weather was exceptionally favorable and the entire time was available for routine work.

The presence of Lieut. Col. William Gerlach, U. S. A., retired, as inspecting officer was of great benefit to the command, and it is impossible for me to express the high esteem in which he is held by every one with whom he came in contact.

The service rendered by the detail in charge of the gun, under Sergeant Miller, was worthy of especial commendation, and was a source of considerable satisfaction.

The health of the command was exceptionally good and there was practically no sickness and no accident of any consequence.

I would recommend that the complete hospital equipment designed for a regiment be procured at the earliest moment and issued to the command.

It seems desirable that some provision be made for an enlisted men's club-room where such articles as are usually sold at a post exchange might be obtainable, and where beer and other light drinks could be sold to the men under proper restrictions. Under the present conditions it seems impossible to keep liquor out of the company streets, and there is no question but that its effect there is prejudicial to the best interests of the Guard.

Very respectfully,

CHAS. A. VAN DUZEE,
Colonel Third Infantry, Commanding.

APPENDIX 2.

THE NAVAL RESERVE.

NAVAL RESERVE, STATE OF MINNESOTA.

DULUTH, MINN., Dec. 7, 1904

The Adjutant General, State of Minnesota.

SIR: In accordance with your order under date of Nov. 28th, 1904, I have the honor to submit to you the following report of the Minnesota Naval Reserve:

The Minnesota Naval Reserve was mustered into the state service by Major H. V. Eva, Third Regiment, M. N. G., Dec. 15th, 1903, with 12 commissioned officers and 83 petty officers and enlisted men, making a total membership of 95. The crew is composed of the staff and the first and second divisions; our muster-in-rolls show five commissioned officers attached to the staff; each division has a compliment of three commissioned officers, who are watch officers, and eight petty officers.

Like all organizations of this character, the first year or so of its existence is the most difficult time to show advances; we have had many things to contend with, but on the whole, think we have accomplished much.

We could not receive Federal recognition without being uniformed; as there was no state appropriation to draw from, we uniformed ourselves at a cost of \$1,834.00.

Through the courtesy of Co. A and Co. C, Third Regiment, we were given a room as temporary quarters in the Third Regiment armory, Duluth. In the spring of 1904 the city of Duluth expended about \$3,000.00 on an addition to the armory for our use, the addition comprises a quartermaster's room for each division, a club room for each division, officers' quarters and captain's private office, as well as two quartermasters' rooms for the infantry. The quartermaster's rooms are now furnished with suitable lockers and gun racks, and the club rooms are being furnished in a neat and attractive manner.

Our share of the Federal appropriation was \$1,086.00. This amount was used for the construction of two 30-foot navy cutters. These cutters are now housed in the Naval Reserve boat house, at the foot of the Lake avenue slip, Duluth. This boat house we erected at a cost of about \$800.00, and it is equipped with all the appurtenances of a naval boat house.

One hundred Springfield rifles were furnished us by the state.

On September 2nd and 3rd a range shoot was attempted, under the direction of Capt. Orris E. Lee, brigade inspector of small arms practice, but owing to the very unfavorable weather it was not the success that we had hoped for; about 40 participated and 9 qualified as marksmen. By spring we will have two targets in place and will indulge in range work regularly.

The total strength Nov. 1st, 1904, is 123 officers and enlisted men, divided as follows:

Lieutenant commander and staff	7	
First Division—		
Commissioned officers	3	
Petty officers	8	
Seamen	41	
	<hr/>	
	52	59
Second Division—		
Commissioned officers	3	
Petty officers	8	
Seamen	53	
	<hr/>	
	64	64
Total membership		<hr/>
		123

The number of drills held by each division for the past 11 months is as follows, this does not include many boat drills held by different boat crews:

	No. of Drills.	Average Attendance.
First division	41	41 9-11
Second division	46	35 6-11

In January, February and March we were unable to secure regular drill nights, so many drills were missed, it being impossible to hold one every week as the armory was occupied. Now each division has one drill night a week. During the summer months the drill consists of boat work in the cutters, landing parties and some infantry work; in the winter months signal and infantry work and marlin spike seamanship, also the different duties aboard ship. The coming winter we will have some work with light rapid fire guns.

We have been greatly hampered by not having state aid and have expended about \$4,000.00 ourselves in equipment, boat house and furnishings for our quarters. We will ask the legislature to make appropriation for our maintenance and support this winter, and I sincerely trust that we will have the aid and assistance of the infantry and artillery in securing it, so that we may bring up our branch of the state service to that state of high efficiency that the others are now enjoying.

We have every assurance that the U. S. S. Fern will be assigned to this station the coming year, if suitable appropriation can be secured for her maintenance. The Fern is a ship of 840 tons and her berth deck will accommodate about 100 men, and her officers' quarters will care for 14 officers. We have every assurance from the secretary of the navy that this or a better ship will be assigned to us during the season of 1905.

A statement of the service of officers in the army and navy of the United States will follow this report.

Very respectfully, Your obedient servant,

GUY A. EATON,

Lieutenant Commander, Commanding, M. N. R.

APPENDIX 3.

GENERAL ORDERS.

GENERAL ORDERS NO. 1.

January 29, 1903.

1. The Act of Congress entitled "An act to promote the efficiency of the militia, and for other purposes," approved January 21, 1903, is herewith published for the information and guidance of all concerned.

2. The form of oath of enlistment in the National Guard of the State of Minnesota is amended to read as follows:

STATE OF MINNESOTA.

County.....

ss.

I do solemnly swear that I am of legal age to enlist, and have this day voluntarily enlisted, as a soldier in the National Guard of the State of Minnesota, *and the organized militia of the United States*, for the period of three years, unless sooner discharged by proper authority; that I will bear true faith and allegiance to the United States of America and the State of Minnesota; that I will serve them faithfully against all their enemies whomsoever; and that I will obey the orders of the Commander-in-Chief and the orders of the officers appointed over me according to law.

.....
Subscribed and sworn to before me this.....day of.....
.....190...., and I further certify that I have carefully examined
into the qualifications of the recruit above named and have found him eligible
under the regulations of the National Guard governing enlistment.

.....
.....Commanding Company "....."

.....
Infantry
Artillery

N. G. S. M.
Recruiting Officer.

3. When enlisting recruits, commanding officers will use the above form exclusively, and amend blank enlistment papers on hand to conform therewith

By order of the Commander-in-Chief,

E. D. LIBBEY,
Adjutant General.

AN ACT to promote the efficiency of the militia, and for other purposes.

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled:

That the militia shall consist of every able-bodied male citizen of the respective states, territories, and the District of Columbia, and every able-bodied male of foreign birth who has declared his intention to become a citizen, who is more than eighteen and less than forty-five years of age, and shall be divided into two classes—the organized militia, to be known as the National Guard of the state, territory, or District of Columbia, or by such other designations as may be given them by the laws of the respective states or territories, and the remainder to be known as the Reserve Militia.

Sec. 2. That the vice president of the United States, the officers, judicial and executive, of the government of the United States, the members and officers of each House of Congress, persons in the military or naval service of the United States, all custom-house officers, with their clerks, postmasters and persons employed by the United States in the transmission of the mail, ferrymen employed at any ferry on a post road, artificers and workmen employed in the armories and arsenals of the United States, pilots, mariners actually employed in the sea service of any citizen or merchant within the United States, and all persons who are exempted by the laws of the respective states or territories shall be exempted from militia duty, without regard to age. Provided, That nothing in this act shall be construed to require or compel any member of any well-recognized religious sect or organization at present organized and existing whose creed forbids its members to participate in war in any form, and whose religious convictions are against war or participation therein, in accordance with the creed of said religious organization, to serve in the militia or any other armed or volunteer force under the jurisdiction and authority of the United States.

Sec. 3. That the regularly enlisted, organized and uniformed active militia in the several states and territories and the District of Columbia who have heretofore participated or shall hereafter participate in the apportionment of the annual appropriation provided by section sixteen hundred and sixty-one of the Revised Statutes of the United States, as amended, whether known and designated as National Guard, militia or otherwise, shall constitute the organized militia. The organization, armament and discipline of the organized militia in the several states and territories and in the District of Columbia shall be the same as that which is now or may hereafter be prescribed for the regular and volunteer armies of the United States, within five years from the date of the approval of this act. Provided, That the president of the United States, in time of peace, may by order fix the minimum number of enlisted men in each company, troop, battery, signal corps, engineer corps, and hospital corps; and provided further, that any corps of artillery, cavalry and infantry existing in any of the states at the passage of the act of May eighth, seventeen hundred and ninety-two, which, by the laws, customs or usages of the said states have been in continuous existence since the passage of said act under its provisions and under the provisions of section two hundred and thirty-two and sections sixteen hundred and twenty-five to sixteen hundred and sixty, both inclusive, of title sixteen of the Revised Statutes of the United States relating to militia, shall be allowed to retain their accustomed privileges, subject, nevertheless, to all other duties required by law in like manner as the other militia.

Sec. 4. That whenever the United States is invaded, or in danger of invasion from any foreign nation, or of rebellion against the authority of the government of the United States, or the president is unable, with the other forces at his command, to execute the laws of the Union in any part thereof

it shall be lawful for the president to call forth, for a period not exceeding nine months, such number of the militia of the state or of the states or territories, or of the District of Columbia, as he may deem necessary to repel such invasion, suppress such rebellion, or to enable him to execute such laws, and to issue his orders for that purpose to such officers of the militia as he may think proper.

Sec. 5. That whenever the president calls forth the militia of any, state or territory or of the District of Columbia to be employed in the service of the United States, he may specify in his call the period for which such service is required, not exceeding nine months, and the militia so called shall continue to serve during the term so specified, unless sooner discharged by order of the president.

Sec. 6. That when the militia of more than one state is called into the actual service of the United States by the president, he may, in his discretion, apportion them among such states or territories or to the District of Columbia, according to representative population.

Sec. 7. That every officer and enlisted man of the militia who shall be called forth in the manner hereinbefore prescribed and shall be found fit for military service shall be mustered or accepted into the United States service by a duly authorized mustering officer of the United States; Provided, however, That any officer or enlisted man of the militia who shall refuse or neglect to present himself to such mustering officer upon being called forth as herein prescribed shall be subject to trial by court-martial, and shall be punished as such court-martial may direct.

Sec. 8. That courts-martial for the trial of officers or men of the militia when in the service of the United States, shall be composed of militia officers only.

Sec. 9. That the militia, when called into the actual service of the United States, shall be subject to the same Rules and Articles of War as the regular troops of the United States.

Sec. 10. That the militia, when called into the actual service of the United States, shall, during their time of service, be entitled to the same pay and allowances as are or may be provided by law for the regular army.

Sec. 11. That when the militia is called into the actual service of the United States, or any portion of the militia is accepted under the provisions of this act, their pay shall commence from the day of their appearing at the place of company rendezvous. But this provision shall not be construed to authorize any species of expenditure previous to arriving at such places of rendezvous which is not provided by existing laws to be paid after their arrival at such places of rendezvous.

Sec. 12. That there shall be appointed in each state, territory, and District of Columbia an adjutant general, who shall perform such duties as may be prescribed by the laws of such state, territory and district, respectively, and make returns to the secretary of war, at such times and in such form as he shall from time to time prescribe, of the strength of the organized militia, and also make such reports as may from time to time be required by the secretary of war. That the secretary of war shall, with his annual report of each year, transmit to Congress an abstract of the returns and reports of the adjutants general of the states, territories and the District of Columbia, with such observations thereon as he may deem necessary for the information of Congress.

Sec. 13. That the secretary of war is hereby authorized to issue, on the requisition of the governors of the several states and territories, or of the commanding general of the militia of the District of Columbia, such number of the United States standard service magazine arms, with bayonets, bayonet scabbards, gun slings, belts and such other necessary accouterments and equipments as are required for the army of the United States, for arming all of the organized militia in said states and territories and District of Columbia, without charging the cost or value thereof, or any which have been issued since December first, nineteen hundred and one, or any expense connected therewith, against the allotment to said state, territory or District of Columbia, out of the annual appropriation provided by section sixteen hundred and sixty-one of the Revised Statutes, as amended, or requiring payment therefor, and to exchange, without receiving any money credit therefor, ammunition, or parts

thereof, suitable to the new arms, round for round, for corresponding ammunition suitable to the old arms theretofore issued to said state, territory or district by the United States: Provided, That said rifles and carbines and other property shall be receipted for and shall remain the property of the United States and be annually accounted for by the governors of the states and territories as now required by law; and that each state, territory and district shall, on receipt of the new arms, turn in to the ordnance department of the United States army, without receiving any money credit therefor, and without expense for transportation, all United States rifles and carbines now in its possession.

To provide means to carry into effect the provisions of this section, the necessary money to cover the cost of exchanging or issuing the new arms, accouterments, equipments and ammunition to be exchanged or issued hereunder is hereby appropriated out of any moneys in the treasury not otherwise appropriated.

Sec. 14. That whenever it shall appear by the report of inspections, which it shall be the duty of the secretary of war to cause to be made at least once in each year by officers detailed by him for that purpose, that the organized militia of a state or territory or of the District of Columbia is sufficiently armed, uniformed and equipped for active duty in the field, the secretary of war is authorized, on the requisition of the governor of such state or territory, to pay to the quartermaster general thereof, or to such other officer of the militia of said state as the governor may designate and appoint for the purpose, so much of its allotment out of the said annual appropriation under section sixteen hundred and sixty-one of the Revised Statutes as amended as shall be necessary for the payment, subsistence and transportation of such portion of said organized militia as shall engage in actual field or camp service for instruction, and the officers and enlisted men of such militia while so engaged shall be entitled to the same pay, subsistence and transportation or travel allowances as officers and enlisted men of corresponding grades of the regular army are or may hereafter be entitled by law, and the officer so designated and appointed shall be regarded as a disbursing officer of the United States, and shall render his accounts through the war department to the proper accounting officers of the treasury for settlement, and he shall be required to give good and sufficient bonds to the United States, in such sums as the secretary of war may direct, faithfully to account for the safe-keeping and payment of the public moneys so intrusted to him for disbursement.

Sec. 15. That the secretary of war is hereby authorized to provide for participation by any part of the organized militia or any state or territory on the request of the governor thereof in the encampment, maneuvers and field instruction of any part of the regular army at or near any military post or camp or lake or seacoast defenses of the United States. In such case the organized militia so participating shall receive the same pay, subsistence and transportation as is provided by law for the officers and men of the regular army, to be paid out of the appropriation for the pay, subsistence and transportation of the army: Provided, That the command of such military post or camp and of the officers and troops of the United States there stationed shall remain with the regular commander of the post without regard to the rank of the commanding or other officers of the militia temporarily so encamped within its limits or in its vicinity.

Sec. 16. That whenever any officer of the organized militia shall, upon recommendation of the governor of any state, territory, or general commanding the District of Columbia, and when authorized by the president, attend and pursue a regular course of study at any military school or college of the United States such officer shall receive from the annual appropriation for the support of the army the same travel allowances and quarters, or commutation of quarters, to which an officer of the regular army would be entitled if attending such school or college under orders from proper military authority, and shall also receive commutation of subsistence at the rate of one dollar per day while in actual attendance upon the course of instruction.

Sec. 17. That the annual appropriation made by section sixteen hundred and sixty-one, Revised Statutes, as amended, shall be available for the purpose of providing for issue to the organized militia any stores and supplies or publications which are supplied to the army by any department. Any state, territory

or the District of Columbia may, with the approval of the secretary of war, purchase for cash from the war department, for the use of its militia, stores, supplies, material of war, or military publications, such as are furnished to the army, in addition to those issued under the provisions of this act, at the price at which they are listed for issue to the army, with the cost of transportation added, and funds received from such sales shall be credited to the appropriations to which they belong and shall not be covered into the treasury, but shall be available until expended to replace therewith the supplies sold to the states and territories and to the District of Columbia in the manner herein provided.

Sec. 18. That each state or territory furnished with material of war under the provisions of this or former acts of Congress, shall, during the year next preceding each annual allotment of funds, in accordance with section sixteen hundred and sixty-one of the Revised Statutes as amended, have required every company, troop, and battery in its organized militia not excused by the governor of such state or territory to participate in practice marches or go into camp of instruction at least five consecutive days, and to assemble for drill and instruction at company, battalion or regimental armories or rendezvous or for target practice not less than twenty-four times, and shall also have required during such year an inspection of each such company, troop and battery to be made by an officer of such militia or an officer of the regular army.

Sec. 19. That upon the application of the governor of any state or territory furnished with material of war under the provisions of this act or former laws of Congress, the secretary of war may detail one or more officers of the army to attend any encampment of the organized militia, and to give such instructions and information to the officers and men assembled in such camp as may be requested by the governor. Such officer or officers shall immediately make a report of such encampment to the secretary of war, who shall furnish a copy thereof to the governor of the state or territory.

Sec. 20. That upon application of the governor of any state or territory furnished with material of war under the provisions of this act or former laws of Congress, the secretary of the war may, in his discretion, detail one or more officers of the army to report to the governor of such state or territory for duty in connection with the organized militia. All such assignments may be revoked at the request of the governor of such state or territory or at the pleasure of the secretary of war.

Sec. 21. That the troops of the militia encamped at any military post or camp of the United States may be furnished such amounts of ammunition for instruction in firing and target practice as may be prescribed by the secretary of war, and such instruction in firing shall be carried on under the direction of an officer selected for that purpose by the proper military commander.

Sec. 22. That when any officer, non-commissioned officer, or private of the militia is disabled by reason of wounds or disabilities received or incurred in the service of the United States he shall be entitled to all the benefits of the pension laws existing at the time of his service, and in case such officer, non-commissioned officer, or private dies in the service of the United States or in returning to his place of residence, after being mustered out of such service, or at any time, in consequence of wounds or disabilities received in such service, his widow and children, if any, shall be entitled to all the benefits of such pension laws.

Sec. 23. That for the purpose of securing a list of persons specially qualified to hold commissions in any volunteer force which may hereafter be called for and organized under the authority of Congress, other than a force composed of organized militia, the secretary of war is authorized from time to time to convene boards of officers at suitable and convenient army posts in different parts of the United States, who shall examine as to their qualifications for the command of troops or for the performance of staff duties all applicants who shall have served in the regular army of the United States, in any of the volunteer forces of the United States, or in the organized militia of any state or territory or District of Columbia, or who, being a citizen of the United States, shall have attended or pursued a regular course of instruction in any military school or college of the United States army, or shall have graduated from any educational institution to which an officer of the army or navy has been detailed as superintendent or professor pursuant to law after having creditably pursued the course

of military instruction therein provided. Such examinations shall be under rules and regulations prescribed by the secretary of war, and shall be especially directed to ascertain the practical capacity of the applicant. The record of previous service of the applicant shall be considered as a part of the examination. Upon the conclusion of each examination the board shall certify to the war department its judgment as to the fitness of the applicant, stating the office, if any, which it deems him qualified to fill, and, upon approval by the president, the names of the persons certified to be qualified shall be inscribed in a register to be kept in the war department for that purpose. The person so certified and registered shall, subject to a physical examination at the time, constitute an eligible class for commissions pursuant to such certificates in any volunteer force hereafter called for and organized under the authority of Congress, other than a force composed of organized militia, and the president may authorize persons from this class to attend and pursue a regular course of study at any military school or college of the United States other than the military academy at West Point, and to receive from the annual appropriation for the support of the army the same allowances and commutations as provided in this act for officers of the organized militia: Provided, That no person shall be entitled to receive a commission as a second lieutenant after he shall have passed the age of thirty; as first lieutenant after he shall have passed the age of thirty-five; as captain after he shall have passed the age of forty; as major after he shall have passed the age of forty-five; as lieutenant colonel after he shall have passed the age of fifty, or as colonel after he shall have passed the age of fifty-five: And, provided further, That such appointments shall be distributed proportionately, as near as may be, among the various states contributing such volunteer force; And provided, That the appointments in this section provided for shall not be deemed to include appointments to any office in any company, troop, battery, battalion or regiment of the organized militia which volunteers as a body or the officers of which are appointed by the governor of a state or territory.

Sec. 24. That all the volunteer forces of the United States called for by authority of Congress shall, except as hereinbefore provided, be organized in the manner provided by the act entitled "An act to provide for temporarily increasing the military establishment of the United States in time of war, and for other purposes," approved April twenty-second, eighteen hundred and ninety-eight.

Sec. 25. That sections sixteen hundred and twenty-five to sixteen hundred and sixty, both included, of title sixteen of the Revised Statutes, and section two hundred and thirty-two thereof, relating to the militia, are hereby repealed.

Sec. 26. That this act shall take effect upon the date of its approval.

Approved Jan. 21, 1903.

GENERAL ORDERS NO. 2.

January 31, 1903.

The following changes have taken place in the military forces of the state since the publication of General Orders No. 29, A. G. O., series of 1902, dated Dec. 31, 1902:

Nels P. Nelson of Minneapolis, First Lieutenant and Quartermaster, First Artillery, Sept. 29, 1902.

By order of the Commander-in-Chief

E. D. LIBBEY,
Adjutant General.

GENERAL ORDERS NO. 4.

March 16, 1903.

1. The property of the organizations of the National Guard named below will be inspected at their respective armories upon the following dates:

Company A, First Infantry, at Minneapolis, on Monday, April 13th.

Company B, First Infantry, at Minneapolis, on Monday, April 13th.

Company F, First Infantry, at Minneapolis, on Tuesday, April 14th.

Company I, First Infantry, at Minneapolis, on Tuesday, April 14th.

Company C, First Infantry, at St. Paul, on Wednesday, April 15th.

Company E, Third Infantry, at St. Paul, on Wednesday, April 15th.

Company D, First Infantry, at St. Paul, on Thursday, April 16th.

Company E, First Infantry, at St. Paul, on Thursday, April 16th.

Company of Engineers, First Artillery, at St. Paul, on Friday, April 17th.

Battery A, First Artillery, at St. Paul, on Friday, April 17th.

Company G, First Infantry, at Red Wing, on Saturday, April 18th.

Company K, First Infantry, at Stillwater, on Saturday, April 18th.

Company D, Second Infantry, at Northfield, on Monday, April 20th.

Company B, Second Infantry, at Faribault, on Monday, April 20th.

Company G, Second Infantry, at Austin, on Tuesday, April 21st.
 Company A, Second Infantry, at New Ulm, on Wednesday, April 22d.
 Company I, Second Infantry, at Owatonna, on Wednesday, April 22d.
 Company H, Second Infantry, at Mankato, on Thursday, April 23d.
 Company E, Second Infantry, at Pipestone, on Friday, April 24th.
 Company D, Third Infantry, at Zumbrota, on Monday, April 27th.
 Company F, Second Infantry, at Rochester, Monday, April 27th.
 Company C, Second Infantry, at Winona, on Tuesday, April 28th.
 Company F, Third Infantry, at Brainerd, on Wednesday, April 29th.
 Company I, Third Infantry, at Crookston, on Thursday, April 30th.
 Company A, Third Infantry, at Duluth, on Friday, May 1st.
 Company C, Third Infantry, at Duluth, on Friday, May 1st.
 Company B, Third Infantry, at Anoka, on Saturday, May 2d.
 Company G, Third Infantry, at Princeton, on Monday, May 4th..
 Company H, Third Infantry, at Olivia, on Wednesday, May 6th.
 Battery B, First Artillery, at Minneapolis, on Thursday, May 7th.

2. The officer to make the inspections will be designated at a later date.
 3. The annual property return will be carefully prepared in duplicate and delivered to the inspecting officer before the inspection.

4. State property of every description will be conveniently arranged for inspection by the inspecting officer. The inspecting officer will carefully verify statements of state property received from the Adjutant General's office, noting on said statements or returns the condition and the provisions made for the safe and proper care of the same.

5. Company commanders will have all books and records in readiness and easily accessible to the inspecting officer on the day set for the inspection of the company.

By order of the Commander-in-Chief

E. D. LIBBEY,
Adjutant General.

GENERAL ORDERS NO. 5.

March 24, 1903.

1. The organizations of the National Guard named below will assemble at camp, near Lake City, Minn., for an eight days' tour of duty and instruction, as hereinafter designated:

Third Infantry—

Col. Charles A. Van Duzee, commanding, Monday, June 15, ending June 22, 1903.

First Infantry—

Col. Charles McC. Reeve, commanding, Monday, July 6, ending July 13, 1903.

Second Infantry—

Col. Joseph Bobleter, commanding, Tuesday July 14, ending July 21, 1903.

First Battalion Artillery—

Major George C. Lambert, commanding, Monday, June 15, ending June 22, 1903.

2. The commanding officer of the First Artillery will, at the close of his eight days' tour of duty and instruction, leave one gun in camp in charge of three competent men, together with the necessary ammunition, for salute firing. The men detailed for this purpose will report to the commanding officer of the Second and First Infantry respectively, for instructions as to salute firing. When not engaged in salute firing, this detachment will report to Capt. William H. Hart, Brigade Quartermaster, for such duty as he may require of them.

3. The fatigue or khaki uniform, as regimental commanders may designate, will be worn; no dress uniforms will be taken to camp.

4. Capt. William H. Hart, Brigade Quartermaster, will report to the Adjutant General for duty during the encampment. He will prepare the grounds, lay out the camp, and superintend the pitching and striking of tents; he will also procure and furnish the transportation necessary for the execution of all orders. Capt. Melvin J. Wiley, Ordnance Officer, and Sgt. Joseph W. S. Whitney, Ordnance Sergeant, First Brigade, M. N. G., will also report for duty.

5. The annual inspection, except as to property, will be held in camp; dates to be hereafter named.

6. Paragraphs 3, 4, 6, 7, 8, 9, 10, 11, 12, 13, 14, 16 and 19, General Orders No. 14, A. G. O., series of 1901, will remain in force.

By order of the Commander-in-Chief

E. D. LIBBEY,
Adjutant General.

GENERAL ORDERS NO. 6.

March 28, 1903.

1. Until otherwise ordered, General Orders No. 8, series of 1902, will remain in force.

2. General Orders No. 14, series of 1899, are revoked.

By order of the Commander-in-Chief,

E. D. LIBBEY,
Adjutant General.

GENERAL ORDERS NO. 7.

March 31, 1903.

The following changes have taken place in the military force of the state since the publication of General Orders No. 3, A. G. O., c. s., dated February 28, 1903.

- Frank P. Bruce of Minneapolis, First Lieutenant Battery B, First Artillery, Jan. 25, 1903.

By order of the Commander-in-Chief,

E. D. LIBBEY,
Adjutant General.

GENERAL ORDERS NO. 8.

April 7, 1903.

1. General Orders No. 4, A. G. O., c. s., are revoked.

2. The annual muster and inspection of the military forces of this state will be made by an officer of the United States army detailed by the war department, under sections 13, 14 and 18 of the Act of Congress entitled "An act to promote the efficiency of the militia," approved January 21, 1903, for the purpose of determining the number of magazine arms and equipments required to arm each organization, as provided by section 13 of that act.

3. The annual inspection allowance provided by section 113 of the Military Code will be based upon the number of officers and men present and inspected. The markings will be made upon the results of the drill and other requirements observed at camp. No allowance will be made for recruits mustered within thirty days prior to inspection. Their names, however should appear on the inspection rolls.

4. Inspection rolls will be carefully prepared in triplicate upon blank form No. 18, to be furnished by the Adjutant General, and will be delivered to the inspecting officer before the inspection. All names entered thereon will be given in full and correctly spelled, and shall contain no abbreviations except as to middle initials.

5. Property returns will be prepared in triplicate upon separate blanks, and delivered to the inspecting officer with the inspection rolls. State and government property of every description will be conveniently arranged for inspection. All books and records will be in readiness and easily accessible to the inspecting officer.

6. Companies and other organizations will be inspected at their respective armories on dates to be hereafter designated.

7. Since the allowance of magazine arms and equipments to each company, under the Act of Congress above mentioned, is to be based upon the number of men present, company commanders are urged to spare no means to muster up to their full strength.

By order of the Commander-in-Chief,

E. D. LIBBEY,
Adjutant General.

GENERAL ORDERS NO. 9.

April 15, 1903.

The accompanying roster of Commissioned Officers of the National Guard, Detail for Examining Board and List of Examining Surgeons, is published for the information and guidance of all concerned.

 Company I, Third Infantry, Crookston, Wednesday, May 20th.
 Company B, Third Infantry, Anoka, Thursday, May 21st.
 Company G, Third Infantry, Princeton, Friday, May 22nd.
 Company H, Third Infantry, Olivia, Monday, May 25th.

2. General Orders No. 49, current series, Headquarters of the Army, are herewith published for information as to the scope of the inspection:

"With a view to obtaining certain necessary information precedent to the execution of certain provisions of the act entitled 'An act to promote the efficiency of the militia and for other purposes' (published in General Orders No. 7, Adjutant General's Office, January 24, 1903), the Secretary of War directs that the commanding generals of the various geographical departments shall designate such number of experienced officers as may be necessary to inspect all of the organized militia of States and Territories lying within the limits of their respective commands."

"The number of officers to be designated for this work in each department will depend upon the number of cities and towns in which the militia organizations are located, the object being to perform the work of inspection as expeditiously as practicable, with due consideration for thoroughness and economy of transportation expenses. The work will be completed without delay."

"Immediately upon receipt of this order department commanders will communicate with the adjutants general of the respective States and Territories within their departments with a view to arranging all the details as to dates and places of the various inspections; the number of inspectors necessary and arrangement of their itineraries; the character of information desired, including certified returns of the several organizations, which should be prepared and submitted to the inspectors upon their arrival at the rendezvous thereof, and all other details which will facilitate the work. As soon as practicable thereafter the inspectors will be ordered by the several department commanders to begin their work and complete it as expeditiously as practicable. In arranging the dates, hours, and places for the inspections care should be taken to accommodate them to the usual avocations of the personnel of the militia to save time and expense. Concentration of regiments and battalions composed of scattered companies need not be made where it would impose expense to the individual or to the state."

"The inspectors will determine:

"1. The strength of the various organizations, making full returns thereof, including classification of officers and men present and absent, as shown by the official returns, verifying absentees from duly certified lists, together with a report as to whether or not all the officers and men are regularly enlisted.

"2. A return showing all United States rifles and carbines on hand, with all attachments and equipments, ammunition or parts of ammunition, therefor.

"(a) A separate return showing all United States standard service magazine arms, with bayonets, bayonet scabbards, gun slings, belts, and such other necessary accoutrements and equipments as have been issued since December 1, 1901.

"(b) An estimate showing the number of United States standard magazine arms (rifles and carbines), with bayonets, bayonet scabbards, gun slings, belts, and such other accoutrements and equipments, including sabers, pistols, and horse equipments, as are prescribed for the regular army of the United States, required for arming and equipping the organizations, based upon the numbers reported in return herein required from inspectors, the quantity on hand (serviceable and unserviceable), and the quantities to be supplied to complete equipment.

"3. Whether the organizations are sufficiently armed, uniformed, and equipped for active service in the field.

"4. Whether the organizations during the year ending June 30, 1903, have participated in practice marches, or have gone into camps of instruction at least five consecutive days, and have assembled for drill and instruction at company, battalion, or regimental armories or rendezvous, or for target practice not less than twenty-four times, and shall have been inspected at some time during the year under the authority of the state or territory by an officer of the militia thereof, or by an officer of the regular army under authority of the secretary of war."

"Blank forms and such further detailed instructions as may be necessary will be furnished by the war department upon application by department commanders."

"Reports of inspections will be sent to the department commanders, who will forward all reports of the militia of each state and territory as soon as all inspectors therein have completed and submitted such reports."

By command of Lieutenant General Miles:

H. C. CORBIN,
Adjutant General,
Major General, U. S. Army.

By order of the Commander-in-Chief,

E. D. LIBBEY,
Adjutant General.

GENERAL ORDERS NO. 12.

April 30, 1903.

The following changes have taken place in the military forces of the state since the publication of General Orders No. 7, A. G. O., c. s., dated March 31, 1903:

RESIGNED.

Second Infantry—

Joseph Bobleter, Colonel, promoted April 16, 1903, to Brigadier General, First Brigade.

By order of the Commander-in-Chief,

E. D. LIBBEY,
Adjutant General.

GENERAL ORDERS NO. 13.

May 4, 1903.

1. General Orders No. 9, A. G. O., series of 1902, relating to artillery target practice, except paragraphs 13, 16 and 17, will govern artillery target practice for the current season.

2. Paragraphs 2, 3 and 10, General Orders No. 9, A. G. O., series of 1902, are amended to read as follows:

"2. Each officer and non-commissioned officer will fire a record score of five shots at 1,800 yards, one preliminary or trial shot being allowed preceding each score."

"3. Of those securing the highest total score eight from each battery and four from the field, staff and non-commissioned staff will compete, at a range of 2,500 yards, for position on the State Artillery team, firing a record score of five shots with the privilege of a preliminary shot. At this range the average distance of shots from center of target may be taken into account in the selection of the state team."

"10. The expert gunner class will consist of the contestants securing a total score of 8, or more, at 2,500 yards. The gunner class will be made up of those securing a score of at least 5 and less than 8 at the same range. State decorations will be awarded for the two classes named."

By order of the Commander-in-Chief,

E. D. LIBBEY,
Adjutant General.

GENERAL ORDERS NO. 14.

May 9, 1903.

1. The beautiful custom of honoring the memory of those who have been faithful to their country even unto death is fraught with national significance, and is one which every soldier of the state should feel in duty bound to perpetuate both by effort and example.

2. All organizations of the National Guard are granted permission to parade under arms on Memorial Day, at their respective stations, for the purpose of participating in the exercises prepared by the proper memorial committees.

3. On Memorial Day, May 30th, at all armories and company stations, the national flag will be displayed at half-staff from sunrise until midday. At noon the flag will be hoisted to top of the staff and will remain there until sunset. When hoisted to the top of the staff, the flag should, when practicable, be saluted

by playing one or more national airs, as an appropriate mark of honor and respect to the heroic dead.

By order of the Commander-in-Chief,

E. D. LIBBEY,
Adjutant General.

GENERAL ORDERS NO. 15.

May 12, 1903.

In accordance with the provisions of chapter 52, laws of 1903, amending the Military Code, the Medical Corps of the National Guard, as organized under prior enactments, is mustered out of the service, and the officers and enlisted men thereof, except such as have been commissioned or appointed under the act of 1903 are honorably discharged from the military service of the state.

By order of the Commander-in-Chief,

E. D. LIBBEY,
Adjutant General.

GENERAL ORDERS NO. 16.

May 29, 1903.

1. The annual inspection of the military forces of the state will be continued and completed during the months of June and July, dates to be fixed by the regimental commanders.

2. The provisions of Article XXX of the Regulations of the National Guard, relating to inspection of troops, and of section 114, article 6, Military Code, will be strictly observed.

3. Return transportation will not be furnished to any member of the M. N. G. serving less than five days.

4. Maximum markings for standing of companies at inspection will be as follows:

(A) ATTENDANCE.

 Milton S. Mead of St. Paul, Aid-de-Camp, with rank of Captain, May 25, 1903, vice Charles H. McGill, resigned.

DECORATIONS.

Faithful Service Medals (10 Years)—

Olaff M. Nordly, Jr., of Red Wing, Captain and Military Storekeeper,
General Staff, May 9, 1903.

By order of the Commander-in-Chief,

E. D. LIBBEY,
Adjutant General.

GENERAL ORDERS NO. 18.

June 12, 1903.

1. The Commander-in-Chief will review the several organizations of the National Guard on the following dates:

Third Infantry, Colonel Charles A. Van Duzee commanding, and the First Battalion of Artillery, Major George C. Lambert commanding, Friday June 19, 1903; First Infantry, Colonel Charles McC. Reeve commanding, Thursday, July 9, 1903; and the Second Infantry, Colonel Arthur W. Wright commanding, Friday, July 17, 1903.

2. Major Charles W. Fisher, Assistant Inspector General, General Staff, will report to the Adjutant General for duty during the encampment of the National Guard. He will superintend the preparing of the inspection and pay rolls, and will check the regimental, battalion and company records, that the same may conform with the records on file in the office of the Adjutant General.

3. The brigade commander and staff will be inspected at Camp Lake View on Sunday, July 19, 1903.

By order of the Commander-in-Chief,

E. D. LIBBEY,
Adjutant General.

GENERAL ORDERS NO. 19.

June 15, 1903.

Captain Thomas F. Dwyer, U. S. A., having reported for duty to His Excellency, the Governor of the State of Minnesota, under instructions from the war department, will inspect the several organizations of the National Guard while in camp near Lake City.

Commanding officers will render him all necessary assistance in the performance of his duties.

By order of the Commander-in-Chief,

E. D. LIBBEY,
Adjutant General.

GENERAL ORDERS NO. 20.

June 29, 1903.

1. Section 5, Chapter 52, General Laws of Minnesota 1903, approved March 13, 1903, is published for the information of all concerned.

"Section 5.—That section one hundred and twenty-one (121) of said Military Code be and the same is hereby amended by adding thereto the following:

"Provided, that there shall be allowed annually to officers in actual command of troops, for incidental expenses in the administration of the affairs of their respective commands, the following amounts:

"To the brigade commander, one hundred dollars; to the commanding officer of each regiment of infantry, two hundred and fifty dollars; to the commanding officer of the battalion or corps of artillery, one hundred and fifty dollars; and to the commanding officer of each company or battery, one hundred dollars, the same to be drawn upon vouchers approved by the Adjutant General."

2. The annual allowance as specified in the foregoing section will be paid in four equal installments, which will be due on the 13th day of March, June, September and December in each year.

3. In order that a uniform system may prevail in the wording of the vouchers, they will be prepared in this office and forwarded to the officers to whom payment is to be made for their receipt to same; on their return to this office they will receive the approval of the Adjutant General, who will turn them over to the Auditor of the state for audit.

By order of the Commander-in-Chief,

E. D. LIBBEY,
Adjutant General.

GENERAL ORDERS NO. 21.

June 30, 1903.

The following changes have taken place in the military forces of the state since the publication of General Orders No. 17, A. G. O., c. s., dated May 31, 1903.

By order of the Commander-in-Chief,

E. D. LIBBEY,
Adjutant General.

GENERAL ORDERS NO. 24.

August 23, 1903.

INTERSTATE COMPETITION.

1. The Interstate Rifle competition between the states of Minnesota, Wisconsin, Iowa and Illinois for the "Washburn Trophy," will take place on the state rifle range at Camp Lakeview, Lake City, Minnesota, commencing September 21, 1903.

2. The Minnesota State Rifle team for the ensuing year will be composed of ten officers or enlisted men and four alternates, to be qualified and selected as hereinafter prescribed.

3. The Springfield rifle, cal. .45, with fixed ammunition, arsenal issue, and the elliptical target at known distances has been adopted and is prescribed for the competition.

The following officers and enlisted men are detailed for the duties hereinafter designated, and will report at Camp Lakeview at the opening of the state competition, Sept. 7th to Sept. 10th, 1903, and also for the interstate competition, Sept. 21, 1903:

Camp Commander, Lieutenant Colonel George S. Whitney, Second Infantry.
Adjutant, Captain Frank W. Matson, Third Infantry.

Quartermaster and Commissary, Captain William H. Hart, Brigade Quartermaster.

Statistical Officer, Captain Roy G. Staples, First Infantry.

Range Officers, Major Fred B. Wood, Second Infantry; Captain Frank B. Rowley, First Infantry; First Lieutenant Richard D. O'Brien, Third Infantry.
Sergeant Major, Sergeant Major Doughty C. Cordry, Second Infantry.

Quartermaster Sergeant, Quartermaster Sergeant Patrick Miller, First Artillery.

Statistical Clerk, Sergeant Fletcher W. Appleton, Third Infantry.

Musicians, Chief Musician William O. Miller, Second Infantry, and Musician Joseph E. Groh, Third Infantry.

Upon the recommendation of the Surgeon General, First Lieutenant John H. Dorsey, Assistant Surgeon, Second Infantry, and Sergeant William D. Kelly, hospital steward, Third Infantry, are detailed to act as medical officer and hospital steward, respectively.

5. The commanding officer of each regiment of infantry will detail five enlisted men to act as markers, two enlisted men to act as scorers, and one sergeant for telephone service, and will report the names of the men so detailed to these headquarters at once.

6. The rules and regulations governing the Interstate Rifle competition for the Washburn trophy, adopted by the Interstate Rifle Association at the Chicago meeting, June 22, 1903, will be in force at the contest. They are hereto appended and herewith published for the information and guidance of all concerned. Such other details as may be required under these rules for the Interstate Competition may be made at the range by the camp commander upon the recommendation of the captains of the state teams.

STATE COMPETITION.

7. The regimental teams, and also teams of Company B, First Infantry; Company C, Second Infantry, and Company B, Third Infantry, will report to the camp commander at the state range, on Monday morning, September 7, 1903, for practice and competition.

8. The first day will be devoted to preliminary practice. On Tuesday, September 8th, the competition between company teams will take place and the remainder of the day will be devoted to preliminary practice by regimental teams. The competition for the state trophy, between regimental teams, will be held on Wednesday, September, 9th.

9. The hours for practice and competitive firing will be fixed by the Brigade Inspector of Small Arms Practice and communicated to team captains the evening preceding the firings. Teams and competitors must be promptly on hand at the hours designated, and will be assigned ranges and targets before firing begins.

10. At the conclusion of the regimental match, competitions for positions on the state team will take place, and the seven members of each regimental team standing the highest, four additional to be selected by the Brigade Inspector of Small Arms Practice, and one member of the Company of Engineers, will compete for places on the state team, which is to be composed of ten members and four alternates.

11. The U. S. elliptical targets A and B, at known distances, and targets D. E. and F at skirmish, will be used for all matches.

12. The necessary transportation will be issued upon application to Captain William H. Hart, Brigade Quartermaster, Globe Building, St. Paul, Minn.

13. Officers and enlisted men attending the State and Interstate Competition will wear the blue service uniform, including overcoats. Pay, at the rate prescribed by law, and subsistence, will be furnished.

ARTILLERY PRACTICE.

14. The expert gunner class of 1903 will engage in three days' target practice on the state artillery range on September 7th, 8th and 9th, 1903, under such regulations as may be prescribed by the battalion commander. They will be assisted by a detail of four enlisted men to serve the guns, besides one marker, one scorer, and two men for telephone service.

By order of the Commander-in-Chief,

E. D. LIBBEY,
Adjutant General.

RULES AND REGULATIONS GOVERNING INTERSTATE RIFLE COMPETITION.

PRELIMINARY PRACTICE.

FIRST DAY.

FORENOON—Known distances. Each competitor will be allowed to fire ten (10) shots at each of the ranges 200, 300, 500 and 600 yards.

AFTERNOON—Skirmish firing. Each competitor will be allowed two skirmish runs of 40 shots, firing to be conducted under the same regulations that obtain in the regular competition.

SECOND DAY.

FORENOON—Known distance practice. Same as first day.

AFTERNOON—Skirmish practice. Same as on first day.

REGULAR COMPETITION.

THIRD DAY.

FORENOON—Known distance firing. Each competitor to fire ten (10) shots at each of the ranges 200, 300, 500 and 600 yards.

AFTERNOON—Skirmish firing. Each competitor to make two runs of 40 shots, 600 to 200 yards and back, 10 halts, 5 advancing and 5 retiring; 30-second

firing intervals at each halt, at least one shot to be fired by each competitor at each halt, or until his ammunition is exhausted.

FOURTH DAY.

FORENOON—Known distance firing. Same as on first day.

AFTERNOON—Skirmish firing. Same as on first day. As soon as possible after the close of the firing, the successful team will be announced, and the work of the regular competition closed.

X. When the firing is to take place "assembly" will be sounded at 8:30 a. m. and 2:30 p. m.

The foregoing program will be subject to such changes both as to hours of firing and otherwise, as in the judgment of the officer in charge may be deemed advisable.

XI. The detail of commissioned officers for the competition will be as follows:

One officer in charge, one camp commander, one adjutant, one quartermaster, who will also act as commissary of subsistence, and one medical officer. With the exception of the officer in charge, the above detail will be made from the National Guard of the state where the competition is held. One chief statistical officer, one assistant statistical officer, who shall also act as ordnance officer, 12 range officers, one of whom shall be designated by the executive committee or the officer in charge as executive range officer.

Each state entering a team for competition should furnish its pro-rata share of officers for range and statistical duty.

XII. The detail of non-commissioned officers and enlisted men will be as follows:

One acting sergeant major, who shall perform the necessary clerical work in the office of the adjutant, and be detailed on the request of the camp commander; one A. Q. M. Sergeant, who shall render all possible assistance to the quartermaster and commissary officer of the camp and be detailed at his request; two statistical clerks, one of whom shall act as ordnance sergeant in case of need; two sergeants for telephones, all to be detailed at the request of the officer in charge; 18 markers and six scorers, who shall respectively perform all necessary work in the pit and on the range, and two musicians.

Each state is requested to provide the detail of at least two markers and one scorer. In case the officer in charge of any state detail is so instructed, alternates on state teams when not required for competitive firing, may be designated for these duties.

XIII. The officers and enlisted men above noted will have the authority and perform the duties above prescribed, together with those laid down for officers and men detailed and assigned to similar positions in army competitions.

XIV. The following special regulations will govern in all firing held under the auspices of the association:

I. The following positions only, will be permitted in preliminary and competitive firing:

At 200 yards, the standing position.

At 300 yards, either kneeling or sitting.

At 500 yards, lying down, prone position.

At 600 yards, lying down, any position void of artificial rest.

Any variety of these position authorized by the regulations for competitive firing will be permitted.

2. The service rifle of the state competing and original service cartridges will be used in competition.

3. For the skirmish firing the distance will be between 600 and 200 yards, and any position for firing will be permitted; the firing will be at the group targets D, E and F, described in Par. 329, Small Arms Firing Regulations.

Targets for skirmishing will be drawn in the following manner: The number of the run and the number of the group will be placed on a card, i. e., Run No. 1, Group No. 5, all cards to be placed in a hat and each competitor to draw one card. The runs to be on or near the same number of targets as possible.

The competitors, one assigned to each group, will form in line in rear of the 600 yard firing point, with 40 cartridges being carried upon the person, and at the signal, "Skirmishers, Attention," will come to attention; at the command or signal, "Forward, March," the line will advance first at quick, and then, at proper command or signal, at double time, until the command or signal, "Skirmishers, Halt," "Commence Firing," when the sights will be adjusted to the estimated distance, the rifle or carbine loaded, and the position for firing assumed. After the last note of the signal, "Commence Firing," firing will be commenced and be continued for an interval of 30 seconds. At the expiration of the thirty seconds' interval the last note of the signal, "Cease Firing," will be sounded. After each halt for firing, the line will advance in the same manner as before the first fire, at quick and then at double time, until the succeeding halt is ordered.

Having approached sufficiently near the 200 yard firing point, the signal, "To the Rear, March," will be given, when the manœuvering to the rear and firing will continue as upon the advance. The rifles will be carried on either shoulder when manœuvering to the rear, the muzzles always toward the target. Five halts will be made advancing and five retiring.

For the competitive skirmish firing each hit will be scored 3, 4 and 5 respectively, and five points will be deducted from a competitor's score for his failure to fire one shot at each halt, unless his forty cartridges have been previously expended, for each shot fired before the last note of the signal, "Commence Firing," has been sounded or for each shot fired after the last note of the signal, "Cease Firing." If any cartridge fails to explode, it will be replaced by the scorer with a new one.

One half the sum of the two skirmish runs of each skirmisher will be recorded as his score for the day, half points which may arise in this division being deemed whole points and so recorded.

If a rifle becomes disabled, the competitor will at once submit the piece for the inspection of the nearest range officer. He will not wait until the run is over before submitting the piece for such inspection.

The range officer will at once determine whether or not the competitor is to have a new run or whether he must continue that run with the same piece, under the conditions prescribed by the firing regulations, U. S. A., and decisions thereon by competent authority.

All protests relative to rulings of range officers must be made during the run, or before the succeeding run has been commenced.

4. During the progress of a match or competition, no one except the officers on duty at the range, the competitors and score keepers will be permitted within the ropes without special permission of the officers in charge.

5. During the progress of matches and competitions, no one except the officers on duty, the markers, and such representatives of each state team as

may be deemed essential to insure fairness, will be permitted in the target pit, without the special permission of the officer in charge.

6. The squads of competitors will be stationed at least 5 yards in rear of the firing point, where each competitor must remain until called by the score-keeper to take his position at the firing point, and until he has completed his score.

7. No expressions on the part of competitors of approbation or disappointment, with reference to any score made by themselves or others, must be uttered loud enough to be heard at the firing points.

8. Protests and objections must not be directly submitted to the officers in charge, but to one of the range officers. In case a competitor considers the decision of the latter unwarranted by the facts as presented, he may appeal to the officer in charge. Final appeals from decisions of the officer in charge must be made in writing and forwarded through that officer to the executive committee of the association.

9. These regulations and such special rules or directions as the officer in charge may give, must be rigidly complied with by competitors and all other persons upon the range grounds.

10. All shots fired by the soldier after he has taken his place at the firing point, and it is his turn to fire—the target being ready—will be considered in his score, even if his piece is not directed toward the target, or is accidentally discharged.

11. Shots fired upon the wrong target will be entered upon the score of the man firing as a miss, no matter what the value of the hit upon the wrong target.

12. If two shots strike the target at the same, or nearly the same time, both will be signaled, and if a shot was just fired from the firing point assigned to that target, the hit having the highest of the two values signaled will be entered in the soldier's score, and no record made of the other hit. A similar rule will be applied when scoring hits in competitive skirmish firing.

13. Marking and scoring will be conducted substantially in the manner prescribed in Pars. 484 to 500, Small Arms Firing Regulations, except that no marker or scorer will act as such for his own state team, when the same can possibly be avoided.

14. Before any miss is signaled the target must be turned down from the firing position and carefully examined by a range officer. Whenever the target is reversed and a miss signaled, it will be presumed this examination has been thoroughly made, and no challenge of the value signaled for the shot will be entertained; but on request a re-examination may be made.

15. The scorekeepers will be seated close to and in rear of the firing point stakes, and will, as each shot is signaled, announce in an audible tone, the name of the competitor, and the value of the shot, and, at the conclusion of the score of each competitor, repeat his name and total score.

16. Competitors must pay attention to the score as announced and recorded, so that any error may be promptly investigated.

17. The recorded value of any shot will not be changed after the following shot has been fired, unless some special message with reference to it is received from one of the range officers in the target pit.

18. Any alteration of the scoring card must be witnessed by the officer in charge of the firing point, and indorsed with his initials.

19. The aiming notch or aperture of the rear sight slide may be slightly widened or opened to accommodate individual peculiarities of eyesight, but no

alteration or filing of the regular service sights, or the use of detachable spirit levels, or of temporary shades for the rear sights will be permitted. Regulation sight covers may be used if the competitor desires. The front or rear sights may, however, be whitened, blackened or colored, according to the judgment of the soldier. The use in aiming of orthoptic eye pieces will not be allowed.

20. The trigger pull must always be at least 6 pounds, and will be tested by each competitor, under the supervision of a range officer or scorer, before firing each day and each range.

21. Competitors will submit their rifles for further inspection whenever required.

22. Competitors will wear the prescribed service or fatigue uniform with the service belt issued by the state. Flannel shirts may be worn in lieu of the blouse. The use of a hat or cap other than the forage cap may be permitted in the discretion of the officer in charge.

23. In competition or matches embracing more than one distance, the firing will commence at the shortest distance, and be followed in order by each of the longer distances, the firing at the longest range being held last. Sheds or shelters for the soldiers will not be permitted at any range. Competitors must be present at the firing points punctually at the time or in the order stated on their score cards. No application on the part of the competitor for any alteration in his assignment will be entertained.

24. Targets in fixed distance firing are to be assigned by lot at each distance, just before "Commence Firing" is sounded. The numbers of targets assigned to each state to be consecutive and placed on cards to be drawn by team captains: i. e., if each state is to have three targets, three consecutive numbers are placed on each card and drawn. In all practice and competition the competitors will place themselves at the firing point by twos and will fire alternately, the odd number of each pair being on the right and firing first.

25. If just as a shot is fired the target is withdrawn from the firing position (the match not being at moving targets), the scorer at that firing point will at once report the fact to one of the range officers, who, if upon investigation, is satisfied that the case is as represented, will direct that the shot be not considered, and that the soldier shall fire another shot.

26. Competitors will not be hurried in their firing, but such slight delay permitted after each shot as they may desire, provided the time of firing the score does not exceed an average of one minute per shot.

27. If an accident to a target, or any other cause over which the soldier has no control, prevents him from completing his score within a reasonable interval, he will be permitted such additional time as a range officer may decide.

28. No two competitors shall shoot in any match or competition with the same rifle; nor shall a competitor change his rifle during any competition, unless his first rifle has become unserviceable through an accident, which must be verified by a range officer. Willful, but not unintentional violation of this regulation, will warrant the officer in charge, in his discretion, excluding the soldier from further competition.

29. No sighting shots, or any warning or fouling shots will be allowed in any match or competition.

30. Rifles can be cleaned only upon completion of a score, in competitions at more than one distance, cleaning will be permitted between distances. While with these restrictions, cleaning will be permitted, it will not be required.

31. Except in team matches, no coaching or unnecessary communication of any kind with those actually firing will be permitted.

32. In team matches, the presence at the firing point will be permitted of one team captain and one coach or spotter for each team, who may give to the members of their teams such directions or advice as they may think proper.

33. Any competitor who shall be detected in any evasion of the conditions prescribed for any match or competition shall be excluded from further participation in the firing at that meeting.

34. Any competitor:—

(a) Who shall fire in a name other than his own, or who shall fire twice for the same prize, unless permitted by the conditions of the competition to do so; or

(b) Who shall be guilty of falsifying his score, or being accessory thereto; or

(c) Who shall offer a bribe of any kind to a scorer or marker shall, upon the occurrence being proved to the satisfaction of the range officers and the officer in charge, be reported in writing to the executive committee of the association, who will then direct that the competitor be forever disqualified from taking part in future competitions held by this association.

35. Any competitor refusing to obey the instructions of the officer in charge or his assistants, or violating any of these regulations, or being guilty of unruly or disorderly conduct, or being intoxicated, will be immediately debarred from further competition at that meeting. The officer in charge will also report the facts in the case to the executive committee of the association, who will then take such further action as they may deem proper.

36. All ties will be decided and disposed of in the manner prescribed in Par. 651 and 653, Small Arms Firing Regulations.

37. Any person, whether a competitor or not, interfering with any of the firing squads, or annoying them in any way, will be ordered off the range grounds.

38. Competitors and all others connected with the meetings of military riflemen must make themselves acquainted with the foregoing regulations, as well as with the conditions of any match or competitive firing in which they may be participants, as the plea of ignorance of either of them will not be entertained.

39. All matters pertaining to camp, transportation and subsistence, will be under the direction and immediate charge of the camp commander, and all matters pertaining to the range under the direction of the officer in charge or executive range officer.

Adopted at Chicago, Ill., June 22, 1903.

GENERAL ORDERS NO. 25.

August 31, 1903.

The following changes have taken place in the military forces of the state since the publication of General Orders No. 23, A. G. O., c. s., dated July 31, 1903.

RESIGNED.**First Infantry—**

Joseph C. Strachan, First Lieutenant Company B, honorably discharged August 1, 1903, S. O. No. 33, A. G. O., c. s.

R. Irving Pratt, Second Lieutenant Company B, promoted August 11, 1903, to First Lieutenant.

Robert M. Whyte, First Lieutenant Company F, honorably discharged August 10, 1903, S. O. No. 36, A. G. O., c. s.

Second Infantry—

Frank J. Rensberger, Captain Company F, honorably discharged August 10, 1903, S. O. No. 35, A. G. O., c. s.

First Artillery—

Maximilian E. R. Tolz, Captain Company of Engineers, honorably discharged August 10, 1903, S. O. No. 34, A. G. O., c. s.

COMMISSIONED.**First Infantry—**

R. Irving Pratt of Minneapolis, First Lieutenant Company B, August 11, 1903, vice Joseph C. Strachan, resigned.

Erle D. Luce of Minneapolis, Second Lieutenant Company B, August 11, 1903, vice R. Irving Pratt, promoted.

Second Infantry—

Alfred C. Page of Austin, Regimental Adjutant, with rank of Captain, May 25, 1903, vice Louis G. Vogel, promoted.

APPOINTED.**Examining Surgeons—**

Thomas C. Clark M. D. (retired), Stillwater, August 24, 1903, S. O. No. 41, A. G. O., c. s.

Don. F. Fitzgerald, M. D., of Minneapolis, Aug 12, 1903, S. O. No. 37, A. G. O., c. s.

By order of the Commander-in-Chief,

E. D. LIBBEY,
Adjutant General.

GENERAL ORDERS NO 26.

September 3, 1903.

1. Pursuant to a resolution of the Interstate Rifle Association, and at the request of the Adjutant General of Illinois, Captain Charles C. Smith, Twentieth Infantry, U. S. army, has been detailed by the secretary of war, to act as officer in charge of the Interstate competition for the Washburn trophy to be held at Lake City, September 21, 1903.

2. Captain Melvin J. Wiley, Brigade Ordnance Officer, M. N. G., will report to the camp commander for such duty in connection with the issue of ordnance and the care and supervision of the rifle pit, during the fall competition, as may be assigned to him.

3. The military storekeeper will provide the necessary ammunition, targets, pasters, and other accessories for the competition.

By order of the Commander-in-Chief,

E. D. LIBBEY,
Adjutant General.

GENERAL ORDERS NO. 27.

September 30, 1903.

The following changes have taken place in the military forces of the state since the publication of General Orders No. 25, A. G. O., c. s., dated August 31, 1903.

RESIGNED.

Second Infantry—

Paul M. Glascoe, Captain Company D, honorably discharged Sept. 21, 1903, S. O. No. 44, A. G. O., c. s.

DECORATIONS.

Faithful Service Medals (10 Years)—

George K. Sheppard of St. Paul, First Lieutenant Company C, First Infantry, Sept. 18, 1903.

Nels K. Christopherson of Austin, Sergeant Company G, Second Infantry, Sept. 5, 1903.

By order of the Commander-in-Chief,

E. D. LIBBEY,
Adjutant General.

GENERAL ORDERS NO. 28.

October 12, 1903.

The Commander-in-Chief announces with regret the death, at Red Wing, Minnesota, October 10, 1903, of Lieutenant Colonel John H. Friedrich, M. N. G. In his death the National Guard of Minnesota mourns the loss of a brave and most efficient soldier, and the state proudly adds the name of another son to the Nation's Roll of Honor.

RECORD.

NATIONAL GUARD:

Private Company G, First Infantry.....	March	1, 1887
Corporal Company G, First Infantry.....	April	25, 1888
Sergeant Company G, First Infantry.....	Feb.	25, 1890.
Second Lieutenant Company G, First Infantry.....	June	25, 1891
Captain Company G, First Infantry.....	June	23, 1892
Major First Infantry	Feb.	3, 1897
Lieutenant Colonel First Infantry	June	11, 1900

VOLUNTEERS:

Major Thirteenth Minnesota Volunteer Infantry..	April	29, 1898
Lieutenant Colonel Thirteenth Minnesota Vol- unteer Infantry	Sept.	26, 1898
Honorably mustered out.....	Oct.	3, 1899

By order of the Commander-in-Chief,

E. D. LIBBEY,
Adjutant General.

GENERAL ORDERS NO. 29.

October 30, 1903.

1. The U. S. regulation magazine rifle, cal. .30, with improved sight, is adopted as the official arm of the Minnesota National Guard. The drill and firing regulations and other instructions issued by the war department, governing the use, care and preservation of the magazine rifle and ammunition, will be observed by the National Guard.

2. Commanding officers of the several infantry organizations and the Company of Engineers will immediately invoice and ship to the Military Storekeeper, State Capitol, St. Paul, Minn., all Springfield rifles, cal. .45, bayonets, bayonet scabbards, gun slings, cartridge belts, shell extractors, tumbler punches, wiping rods, screw drivers, sight covers, reloading tools, ammunition, powder, empty shells and primers, and all accessories, appendages, spare parts, etc., belonging to or used in connection with the Springfield rifle, for which they are accountable. The rifles and bayonets will be thoroughly cleaned, oiled, and then securely packed in the original arm chests, and the lids fastened with screws; the use of nails to close the boxes or chests is prohibited.

3. The officer making the shipment, will make and sign an invoice of the property, and on the date of shipment, forward the same with duplicate receipts corresponding to the invoice, to the Military Storekeeper for signature. If upon inspection, he finds the property received to agree with the invoice and the property account of the officer making the shipment, the Military Storekeeper will sign the receipts and return one to the officer and transmit the other to the Adjutant General. Any discrepancy will be brought to the attention of the officer involved, and if not adjusted, the Military Storekeeper will transmit the correspondence and all papers in the case, with his report thereon, to the Adjutant General.

4. The U. S. magazine rifle, cal. .30, complete, with the appurtenances belonging thereto, the necessary number of arm chests, and one thousand rounds of fixed ammunition, cal. .30, will be invoiced in the usual manner, and shipped to the commanding officer of each company of infantry and of the Company of Engineers. The invoices of the company commanders will give the numerical number of each rifle, and in making issue to the men of their command, the number of the rifle received by them will be charged in their property account. The marking of any character on the rifles or gun slings is expressly forbidden.

5. Upon proper showing that the company has satisfactory range facilities, there will be issued annually from these headquarters, on requisition, to each company of infantry and to the Company of Engineers, three thousand rounds of fixed ammunition for target practice.

6. Company commanders will be provided with, and at all times keep on hand, one thousand rounds of riot (multiball) ammunition, as a reserve for emergencies, which will under no circumstances, be expended except in active service. The multiball cartridges are not designed to be fed from the magazine; with these cartridges the arm should be used as a single loader, with the magazine cut off.

By order of the Commander-in-Chief,

E. D. LIBBEY,
Adjutant General.

GENERAL ORDERS NO. 30.

October 31, 1903.

The following changes have been made in the military forces of the state since the publication of General Orders No. 27, A. G. O., c. s., dated September 30, 1903.

RESIGNED.**Second Infantry—**

William F. Pletke, Captain Company C, honorably discharged Oct. 20, 1903, S. O. No. 47, A. G. O., c. s.

Gustave Dietz, Second Lieutenant Company E, honorably discharged Oct. 8, 1903, S. O. No. 45, A. G. O., c. s.

Harry C. Howe, First Lieutenant Company I, honorably discharged Oct. 29, 1903, S. O. No. 50, A. G. O., c. s.

First Artillery—

Gates A. Johnson, Jr., First Lieutenant Company of Engineers, promoted Aug. 17, 1903, to Captain.

Emil C. Schroeder, Second Lieutenant Company of Engineers, promoted Aug. 17, 1903, to First Lieutenant.

DIED.**First Infantry—**

John H. Friedrich, Lieutenant Colonel, Oct. 10, 1903.

RETIRED.**First Brigade—**

Captain Charles H. McGill, Aid-de-Camp, May 25, 1903, S. O. No. 51, A. G. O., c. s.

COMMISSIONED.**General Staff—**

George C. Knoche of St. Paul, Aid-de-Camp, with rank of Colonel, Oct. 26, 1903.

First Artillery—

Emil C. Schroeder of St. Paul, First Lieutenant Company of Engineers, Aug. 17, 1903, vice Gates A. Johnson, Jr., promoted.

Thomas J. O'Leary of St. Paul, Second Lieutenant Company of Engineers, Aug. 17, 1903, vice Emil C. Schroeder, promoted.

DECORATIONS.

Faithful Service Medals (15 Years)—

Frederick E. Resche of Duluth, Major Third Infantry, Oct. 2, 1903.

Henry Larson of St. Paul, Captain Battery A, First Artillery, June 15, 1903.

Ralph L. Slocum of St. Paul, Sergeant Company E, First Infantry, Aug. 26, 1903.

Faithful Service Medals (10 Years)—

Edward H. Whitcomb of St. Paul, Major and Assistant Surgeon, General Staff, Oct. 3, 1902.

Charles A. Allen of Minneapolis, Regimental Sergeant Major, First Infantry, Feb. 27, 1903.

Charles U. Towers of Minneapolis, Sergeant, First Infantry, May 19, 1903.

Harry V. Knocke of St. Paul, First Lieutenant Company D, First Infantry, Jan. 5, 1903.

Carl F. Hoffman of St. Paul, Quartermaster Sergeant Company D, First Infantry, May 12, 1902.

John H. Krch of St. Paul, Corporal Company D, First Infantry, March 1, 1900.

George C. Bookstaver of St. Paul, Private Company D, First Infantry, March 25, 1902.

Louis C. Miss of St. Paul, Private Company D, First Infantry, July 1, 1902.

Frank H. Peters of St. Paul, Private Company D, First Infantry, Oct. 6, 1902.

By order of the Commander-in-Chief,

E. D. LIBBEY,
Adjutant General.

GENERAL ORDERS NO. 31.

November 16, 1903.

1. The report of the Brigade Inspector of Small Arms Practice on rifle practice held at Camp Lakeview during the annual encampment of 1903, in accordance with General Orders Nos. 8 and 13, A. G. O., c. s.; and of the Company and regimental team matches held at Camp Lakeview September 8 and 9, in accordance with General Orders No. 24, A. G. O., c. s.; and the scores of the state teams of Illinois, Iowa and Minnesota in their interstate rifle competition at Camp Lakeview September 23 and 24, 1903, are published for the information of all concerned.

2. The state trophy, donated by the Adjutant General to become the property of the regiment whose team attains the highest score for three successive times, was awarded for the first time to the Third Infantry.

3. On the conclusion of the competitive practice for place, the membership of the Minnesota State Rifle team for the ensuing year was announced as follows:

Team Captain—

Captain Orris E. Lee, First Brigade.

Members—

1. Major Frederick E. Resche, Third Infantry.
2. Major Frank T. Corrison, First Infantry.
3. Major Albert G. Chase, Second Infantry.
4. Captain Edward G. Falk, Adjutant, First Infantry.
5. Sergeant Lemuel C. Bird, Company B, Third Infantry.
6. Sergeant Arthur E. Clark, Company C, First Infantry.
7. Corporal Frederick L. Britton, Company F, Third Infantry.
8. Corporal Stella S. Smith, Company F, First Infantry.
9. Musician Edward E. Price, Company B, Third Infantry.
10. Private Franklin W. Britton, Company F, Third Infantry.

Alternates—

1. Sergeant Leonard Hildeman, Non-Commissioned Staff, Second Infantry.
2. Sergeant Carl Anderson, Company C, Second Infantry.
3. Sergeant Edward G. Simpson, Band, Third Infantry.
4. Private Wilbrod J. St. Amant, Company B, First Infantry.

By order of the Commander-in-Chief,

E. D. LIBBEY,
Adjutant General.

HEADQUARTERS FIRST BRIGADE, M. N. G.
OFFICE OF THE INSPECTOR OF SMALL ARMS PRACTICE.

AUGUST 7, 1903.

The Adjutant General:

SIR: I herewith submit report of small arms practice on state range during the encampment of 1903.

The practice proved very profitable and satisfactory. This season being the last in which we will use the Springfield rifle, the adoption of the U. S. magazine rifle will require practice under General Orders No. 5, Headquarters of the Army, A. G. O., c. s., and will require many changes in our methods.

Company commanders should be directed to obtain ranges that will be available up to 600 yards, and to take extra precautions as to safety.

Practice should begin early as the variations in each rifle are such that a knowledge of the peculiarities of one will not be a guide to the usual firing of another, and it is therefore necessary that the soldier should become thoroughly acquainted with the rifle he generally uses to obtain uniform results.

Enclosed herewith are the following:

Schedule A—Names and scores of distinguished riflemen, sharpshooters and marksmen.

Schedule B—Scores and percentages in volley firing, percentage of individual practice and of efficiency.

Schedule C—Number of men in each class on range.

Schedule D—Revolver scores.

Very respectfully,

ORRIS E. LEE,
Captain and I. S. A. P. First Brigade, M. N. G.

HEADQUARTERS FIRST BRIGADE, M. N. G.
OFFICE OF THE INSPECTOR OF SMALL ARMS PRACTICE.

SEPTEMBER 25, 1903.

The Adjutant General:

SIR: Pursuant to General Orders No. 24, A. G. O., c. s., rifle teams from Companies B, First Infantry; C, Second Infantry, and B, Third Infantry, and regimental rifle teams from the First, Second and Third Infantry, reported at Camp Lakeview on September 7, 1903. Preliminary practice was had on the 7th at all ranges. On the 8th the company team match was held with the following result: Company B, Third Infantry, first; Company B, First Infantry, second; and Company C, Second Infantry, third. On the 9th the regimental team match was contested, the teams finishing in the following order: Third Infantry, Second Infantry, First Infantry.

Nominations for state team were made and practice for place began on Sept. 10. Rain greatly interfered and it was found impossible to get the needed practice. Rain also delayed the completion of the new range to such an extent that we had but two days' practice over it, and as the long range was wholly unfitted, both on account of its roughness and the mud and water standing thereon, we entered the interstate match seriously handicapped.

The interstate match for the Washburn trophy took place on September 23 and 24, teams from Illinois, Iowa and Minnesota competing. After the preliminary practice was begun it was found that the programme was more than could be accomplished in the time limit. It was therefore agreed, at a meeting of the representatives of the states competing, to cut the program to half the original.

At the close of the competition the teams finished in the following order: Illinois, Minnesota, Iowa.

The inability of our team to get the needed practice in the skirmish firing shows plainly in the result. We stood first in the fixed distance and last in the skirmish, but while the other teams fell down in the second skirmish runs, Minnesota increased their score.

While it is to be regretted that we did not bring the trophy back to the state, we feel that the experience is not wholly without benefit to us all. Not the least benefit has been the increased interest awakened in rifle practice in all the states interested and the determination upon the part of all concerned to improve their standing.

Enclosed herewith are the following schedules:

Schedule E.—Company team match.

Schedule F.—Regimental team match and sharpshooters qualifying.

Schedule G.—Scores of state teams, in interstate match.

Very respectfully,

ORRIS E. LEE,
Captain and I. S. A. P. First Brigade, M. N. G.

SCHEDULE A—SMALL ARMS PRACTICE, 1903.

DISTINGUISHED RIFLEMEN.

Second Qualification.

Third Infantry—

Field and Staff—

Major Frederick E. Resche, 1893, 1894, 1895, 1896, 1897, 1899, 1900, 1901, 1902, and 1903.

First Qualification.

First Infantry—

Field and Staff—

Drum Major Wilbur B. Neal, 1885, 1886, 1888, 1902 and 1903.

Company B, Minneapolis—

Artificer James H. Chant, 1895, 1896, 1900, 1902 and 1903.

Company K, Stillwater—

Private George E. Geddes, 1895, 1896, 1897, 1902 and 1903.

Second Infantry—

Field and Staff—

Battalion Sergeant Major Leonard Hildeman, 1897, 1899, 1900, 1902 and 1903.

Third Infantry—

Company B, Anoka—

Corporal Forest H. Hunter, 1897, 1899, 1900, 1902 and 1903.

Musician Edward E. Price, 1899, 1900, 1901, 1902 and 1903.

GENERAL ORDERS NO. 32.

November 18, 1903.

The report of the commanding officer of the Battalion of Artillery on artillery target practice held at Camp Lakeview, in accordance with General Orders No. 9, A. G. O., series of 1902, and General Orders Nos. 13 and 24, A. G. O., c. s., is published for the information of all concerned.

By order of the Commander-in-Chief,

E. D. LIBBEY,
Adjutant General.

HEADQUARTERS FIRST BATTALION ARTILLERY, M. N. G.

ST. PAUL, MINN., October 10, 1903.

The Adjutant General—

SIR: I have the honor to submit to you herewith the result of the target practice of the First Battalion of Artillery for the season of 1903, held in accordance with General Orders No. 9, A. G. O., series of 1902, and General Orders Nos. 13 and 24, A. G. O., c. s.

I regret to say that; while good scores were made, the result was not satisfactory to me, owing to the miserable powder shipped from the U. S. powder depot. Careful preparation had led me to anticipate great benefits for my command from this year's practice. It was found, however, that the powder was of uneven strength and wholly unreliable. The element of chance, thus introduced, destroyed the opportunity for observation, study and demonstration in exterior ballistics. The gunners soon discovered that the powder was acting strangely and the practice resolved itself into a contest of luck rather than marksmanship.

This is especially disappointing in view of the fact that my requisitions as well as the requisitions of the governor upon the war department plainly and minutely specified the kind of powder required, and in every instance other and inferior powder was shipped.

It is a well known fact that, until recently, age and atmospheric conditions have had a marked effect on smokeless powders, and that, as now manufactured, no two lots are of even strength. This fact is well known to the war department and was deemed important enough for an announcement in General Orders No. 77, A. G. O., dated May 23, 1903, that "in retesting smokeless powders which have been in store for a year or more, it has been found that their ballistic qualities have changed."

Smokeless powder was used by the Minnesota team at the interstate artillery contests with Wisconsin in the years 1901 and 1902. In my report of the last contest I used the following language:

"The recommendations made in my report of November 14, 1901, were carried out as far as practicable, but the element of uncertainty incident to age and deterioration of the smokeless powder used by the Minnesota team was not entirely removed. The ordnance department, however, has already taken steps to secure greater stability in these powders by enclosing each

charge in a tin can, hermetically sealed, which is not opened until needed for use at the gun. It is hoped, in this manner, to secure absolute protection against moisture and other atmospheric action, and to minimize the danger in handling and transportation. I would recommend that the next supply of powder be procured in that form."

The Governor of Minnesota in his last requisition for smokeless ammunition, dated February 25, 1903, specified the "service charge, smokeless, for 3.2, 13½ pound projectile, in soldered tin cans, of recent manufacture, and all of the same lot." In filling the requisition, however, these minute instructions were entirely ignored at the ordnance office or the officials at the New Jersey powder depot, and a promiscuous lot of cartridges were shipped us which were stamped "98, lots unknown." The bags were old and dirty in appearance, and when fired, proved to be unreliable and of varying strength. Upon my protest these facts were brought to the attention of the ordnance officer, who authorized the return of the remaining cartridges to be exchanged for the ammunition originally specified in the governor's requisition, it being stipulated that the old cartridges should be first returned.

It was assumed that the tin cans received in exchange would contain powder of recent manufacture and of one lot, as had been requested. But upon opening them at the gun it was found that the same old ammunition which had been discarded and returned had been inserted in these cans and again shipped for our use. Some cartridges would burn so unevenly that, when the breech was opened after the discharge of the gun, the flames of burning powder would flare out of the chamber and in some instances injure the cannoneer.

Practice under those conditions is a mere waste of money from which my command can derive no benefit or instruction. The officers of the Minnesota Battalion of Artillery have taken a keen interest in all matters pertaining to gunnery, and have probably devoted more time and hard work to advance the efficiency of the organization than similar officers of any other state in the Union, and it is discouraging to see their efforts wasted or balked by the seeming unwillingness of the war department to supply them with proper ammunition.

With the permission of the war department, if the law would permit, I would favor such arrangements as would enable us to deal directly with the smokeless powder company which supplies the government. I am sure that in this manner we could secure smokeless powder of uniform strength and recent manufacture, all of one lot and enclosed in sealed packages before it has molded or deteriorated.

Very respectfully,

GEO. C. LAMBERT,
Major Commanding First Artillery, M. N. G.

ARTILLERY TARGET PRACTICE, 1903.

GENERAL ORDERS NO. 33.

November 20, 1903.

1. Pursuant to section 1, article 14 of its by-laws, the Minnesota National Guard Association will meet at the state capitol, in the city of St. Paul, Saturday, January 9th, 1904.

2. The necessary transportation will be provided upon application, by letter, to Captain William H. Hart, Brigade Quartermaster, St. Paul, Minn., on or before January 4th, 1904. Members will attend in service uniforms without side arms.

3. It is earnestly hoped that all members will attend this meeting.

By order of the Commander-in-Chief,

E. D. LIBBEY,
Adjutant General.

GENERAL ORDERS NO. 34.

November 30, 1903.

The following changes have been made in the military forces of the state since the publication of General Orders No. 30, A. G. O., c. s., dated October 31, 1903.

RESIGNED.

First Infantry—

George R. Egbert, Second Lieutenant Company F, promoted Oct. 23, 1903, to First Lieutenant.

Harry M. Howard, First Lieutenant Company K, honorably discharged Nov. 7, 1903, S. O. No. 54, A. G. O., c. s.

Max William Hoppe, Second Lieutenant Company K, honorably discharged Nov. 6, 1903, S. O. No. 53, A. G. O., c. s.

Second Infantry—

John S. Brand, First Lieutenant Company B, honorably discharged Nov. 24, 1903, S. O. No. 55, A. G. O., c. s.

Kelsey S. Chase, Second Lieutenant Company B, promoted Oct. 27, 1903, to Captain.

William W. Kinne, First Lieutenant Company D, promoted Oct. 1, 1903, to Captain.

Edwin H. Vollmer, Second Lieutenant Company D, promoted Oct. 1, 1903, to First Lieutenant.

Fred C. Ormond, First Lieutenant Company F, promoted Sept. 30, 1903, to Captain.

Third Infantry—

James G. Maxwell, Second Lieutenant Company A, honorably discharged Nov. 24, 1903, S. O. No. 56, A. G. O., c. s.

COMMISSIONED.

First Infantry—

George R. Egbert of Minneapolis, First Lieutenant Company F, Oct. 23, 1903, vice Robert M. Whyte, resigned.

Frank A. Jones of Minneapolis, Second Lieutenant Company F, Oct. 23, 1903, vice George R. Egbert, promoted.

Matthew C. McMillan of Stillwater, First Lieutenant Company K, Nov. 12, 1903, vice Harry M. Howard, resigned.

John M. Nolan of Stillwater, Second Lieutenant Company K, Nov. 12, 1903, vice Max William Hoppe, resigned.

Second Infantry—

Edwin H. Vollmer of Northfield, First Lieutenant Company D, Oct. 1, 1903, vice William W. Kinne, promoted.

Irving G. Fremouw of Northfield, Second Lieutenant Company D, Oct. 1, 1903, vice Edwin H. Vollmer, promoted.

Albert Mohn of Faribault, Second Lieutenant Company F, Sept. 30, 1903, vice Herman G. Mindrum, promoted.

First Artillery—

Gates A. Johnson, Jr., of St. Paul, Captain Company of Engineers, Aug. 17, 1903, vice Maximilian E. R. Toltz, resigned.

By order of the Commander-in-Chief,

E. D. LIBBEY,
Adjutant General.

GENERAL ORDERS NO. 35.

December 14, 1903.

The reports of the Inspector of Small Arms Practice on qualifications as marksmen on home ranges, during the seasons of 1901, 1902 and 1903, are published for the information of all concerned.

By order of the Commander-in-Chief,

E. D. LIBBEY,
Adjutant General.

GENERAL ORDERS NO. 36.

December 23, 1903.

1. Major William Gerlach, U. S. army, retired, having reported for duty to His Excellency the Governor of the State of Minnesota, under instructions from the war department, pursuant to section 20, of the act of congress approved January 21, 1903, entitled "An act to promote the efficiency of the militia, and for other purposes," and the act of congress of March 2, 1903, is assigned to duty with the Minnesota National Guard.

2. Major Gerlach will assume the duties of inspecting officer, M. N. G., under section 12, of the Military Code. He is charged with the duty of inspecting and instructing the several organizations of the National Guard in camp, in the field and at home stations, making report thereon at such times as may be designated in subsequent orders from these headquarters.

3. Commanding officers will render him all necessary assistance in the performance of his duties.

By order of the Commander-in-Chief,

E. D. LIBBEY,
Adjutant General.

GENERAL ORDERS NO. 37.

December 31, 1903.

The following changes have taken place in the military forces of the state since the publication of General Orders No. 34, A. G. O., c. s., dated November 30, 1903.

RESIGNED.

 5, 1903.

By order of the Commander-in-Chief,

E. D. LIBBEY,
Adjutant General.

(NOTE—General Orders No. 37 is the last of the series of 1903.)

GENERAL ORDERS NO. 1.

January 2, 1904.

The uniform of the Minnesota National Guard shall be the same as that now prescribed for the United States army, with the following exceptions:

1. The coat of arms of the United States on the collar of the officers' dress coat will be omitted and replaced by the "state designation," to consist of the letters MINN of Gothic design, $\frac{1}{2}$ -inch in height, followed by a period; embroidered in gold or made of gold or gilt metal, to be worn on each side of the collar 1 inch from it's end, or midway of it's height.

2. The officers' overcoat shall be that now prescribed for and worn by the officers of the Minnesota National Guard.

3. The cape of Infantry officers shall be lined with white.

4. The trousers of Engineer officers shall be of light blue cloth, as authorized for other officers of the line.

5. The full dress uniform for officers and enlisted men, including the uniform for evening wear and the mess jacket, will not be required until further orders from these headquarters.

6. Enlisted men not belonging to organizations which have been supplied with the new uniform prescribed for the National Guard are forbidden to wear, either on or off duty, any articles of the new pattern adopted.

This order shall take effect at the convenience of officers until the first day of July, 1904, by which date all officers will be uniformed and equipped as herein provided.

By order of the Commander-in-chief,

E. D. LIBBEY,
Adjutant General.

GENERAL ORDERS NO. 2.

January 21, 1904.

The accompanying Roster of Commissioned Officers of the National Guard, Detail for Examining Board and List of Examining Surgeons, is published for the information and guidance of all concerned.

By order of the Commander-in-chief,

E. D. LIBBEY,
Adjutant General.

ROSTER OF COMMISSIONED OFFICERS, MINNESOTA NATIONAL GUARD.

Commander-in-Chief—

Samuel R. Van Sant, Governor, St. Paul.

Chief-of-Staff—

Brigadier General Elias D. Libbey, Adjutant General, St. Paul.

Staff of Commander-in-Chief—

Inspector General, Brigadier General Gustaf Widell, Mankato.

Dr. Albert C. Wedge, Albert Lea.

By order of the Commander-in-chief,

E. D. LIBBEY,
Adjutant General.

GENERAL ORDERS NO. 6.

March 11, 1904.

1. The annual inspection of the organization of the National Guard named
in General Orders No. 3, c. s., from this office (except the program of drill,
which will be executed during the encampment to be held during the current
year), as provided for in section 113, article 6, Military Code, State of Minnesota,
will take place on the dates specified in the said order.

2. The Brigade Commander and Staff will be inspected at such place and
date as the Brigade Commander may designate.

3. The Field and Staff of the Battalion of Artillery, and the Field, Staff
and Band of the First, Second and Third Regiments of Infantry, will be inspected
during the encampment of their respective organizations.

4. The provisions of article 30 of the Regulations of the National Guard,
relating to inspection of troops, will be strictly observed.

5. Inspection rolls will be carefully prepared in triplicate and delivered to the inspecting officer before inspection. The officers and non-commissioned officers in each grade will appear in the order of their seniority, those in each grade being numbered, commencing with one (1), followed by artificers, musicians, etc. The names of officers, non-commissioned officers, artificers, musicians and cooks, will be entered with the given name first, as "John F. Smith, Captain." Privates will be borne in alphabetical order and numbered, commencing with one (1). The names of privates will be entered with given name last, as "Smith, John F., Private." Care should be taken to have names of soldiers and dates of enrollment correct and to agree with their enlistment papers. The inspecting officer will not receive rolls containing abbreviated names, except as to middle initial. The use of dots and of the word "ditto" is prohibited.

By order of the Commander-in-Chief,

E. D. LIBBEY,
Adjutant General.

GENERAL ORDERS NO. 7.

E. D. LIBBEY,
Adjutant General.

GENERAL ORDERS NO. 8.

April 4, 1904.

1. The following regulations governing small arms practice of the Minnesota National Guard during the current season, are published for the information of all concerned:

2. The season for record practice will begin on April 15th, and end on October 31st.

3. General orders No. 50, Headquarters of the Army, series 1903, will govern as to classification and general regulations and such further orders as may be issued from Headquarters of the Army, governing small arms practice in the National Guard, will be adopted and followed.

4. Before regular practice is begun, there will be one day devoted to instruction of recruits, and each company commander will send to the range in charge of an officer and accompanied by competent instructors, all recruits who have had no previous experience in firing ball cartridges. Each recruit will fire five rounds of ammunition at 100 yards off-hand, and five rounds at 200 yards sitting or kneeling. These shots will be scored, but no official record made thereof, and they will not form any part of the record for decorations.

5. The record practice at the range will commence on the morning following instruction of the recruit class, and will continue until practice is completed.

6. Regimental commanders are directed to see that troops are promptly on hand and ready to begin firing at the opening of the range. The commander of the battalion practicing will be executive officer of the range, and will detail such officers from his battalion, as assistants, as may be necessary, and will have charge of and supervise the practice at the firing point and will be held personally responsible for the accuracy of the record of scores.

7. He will assign one commissioned officer to each company of his battalion, such officer not to be in charge of his own company. These officers shall have immediate supervision of the firing and scoring of the company to which they are assigned, and will be provided with scorers detailed from other companies.

8. Company commanders will see that competent and experienced men are at all times present at the firing points assigned to their companies to coach and instruct the men.

9. Each company commander, on going into camp, will cause to be made, upon blanks to be issued, a complete list of all members of his company in camp and deliver the same to the brigade inspector of small arms practice, who will cause to be issued the necessary score cards to the men entitled to practice. Upon presentation of these cards the necessary ammunition will be issued.

10. When the soldier is called to the firing point, he will deliver his score card to the scorer, and upon completion of his score, will turn over to him the empty shells before receiving his copy of the score.

11. Scorer will note on score cards the return of all shells, and no new score card for future practice will be issued until the previous card is returned showing expenditure of ammunition and return of shells. After scores are completed, the executive officer will deliver the same to the brigade inspector of small arms practice for entry and compilation.

12. Regimental commanders may further provide for a company team match of seven men from each company, allowing to each man ten shots at 200, 300 and 500 yards, and will select and publish, at the close of the encampment, the members of their respective regimental teams who will take part in the annual state match hereinafter provided for.

13. Each infantry company is authorized to draw, during the season of 1904, 3,000 rounds of ammunition for use on home range of company, and upon reports showing proper expenditure of ammunition, an additional 2,000 rounds.

14. The monthly report of companies will show amount of ammunition on hand and amount expended during the month.

15. Each regimental commander will cause a detail of six men to be made to assist the brigade inspector of small arms practice in issuing score cards and compiling records. This detail will serve during the tour of encampment of their own regiment and must be good penmen.

16. All questions of construction or orders and regulations of small arms practice will be determined by the brigade inspector of small arms practice.

17. The above rules will apply, as far as practicable, to the Company of Engineers, First Artillery, who will engage in target practice at such times as may be agreed upon by the commanding officer of the First Artillery and brigade inspector of small arms practice.

By order of the Commander-in-Chief,

E. D. LIBBEY,
Adjutant General.

GENERAL ORDERS NO. 9.

April 28, 1904.

1. The organizations of the National Guard named below will assemble at Camp Lakeview, near Lake City, Minn., for a ten days' tour of duty and instruction as hereinafter designated.

Third Infantry—Colonel Charles A. Van Duzee commanding, Wednesday, June 14th, ending Friday, June 23d.

Second Infantry—Colonel Arthur W. Wright commanding, Tuesday, July 5th, ending Thursday, July 14th.

First Infantry—Colonel Charles McC. Reeve commanding, Monday, July 18, ending Wednesday, July 27th.

First Battalion Artillery—Major George C. Lambert, commanding, Tuesday, July 5th, ending Thursday, July 14th.

2. General headquarters will be stationed at Camp Lakeview from June 14th to 23d inclusive, and from July 5th to 27th inclusive, where all correspondence during the time mentioned will be addressed.

3. The following named officers are ordered into service during the encampment of the several organizations of the National Guard, as stated in the preceding paragraph: Brigadier General Elias D. Libbey, Adjutant General; Major Charles W. Fisher, Assistant Inspector General; Captain Olaff M. Nordly, Military Storekeeper. Major Fisher and Captain Nordly will report to the Adjutant General for duty in connection with their respective departments.

4. Captain William H. Hart, Brigade Quartermaster, will report to the Adjutant General for duty during the encampment, and for the period in which the camp grounds may be in use. He will prepare the grounds, lay out the camp and superintend the pitching and striking of tents; he will also procure and furnish the transportation and pay necessary for the execution of all orders. Captain Orris E. Lee, Brigade Inspector of Small Arms Practice, will also report to the Adjutant General for duty during the encampment.

5. The annual inspection, except as to property, will be held in camp, dates to be hereafter named.

6. Instructions in regard to pay rolls will be published in subsequent orders.

7. No issue of ordnance and ordnance stores or quartermaster supplies will be made while in camp.

8. The commanding officer of the First Artillery will send one gun to camp, in charge of three competent men, on the 13th day of June, 1904, together with the necessary ammunition, for salute firing. The gun will remain in camp during the encampment of the different regiments. When not engaged in salute firing, this detachment will report to Captain William H. Hart, Brigade Quartermaster, for such duty as he may require of them.

9. The senior medical officer on duty with each regiment and with the battalion of artillery will, within ten days after the close of his tour of duty,

make report in writing of his observations to the regimental commander, and also to the surgeon general, who, with his remarks and conclusions indorsed thereon, will forward the same to these headquarters.

10. The taking of "substitutes" is strictly prohibited, and regimental commanders will prosecute violations of this provision under sub-division 8, section 24, of the Military Code.

11. The commanding officer of each regiment will assume general charge of the camp, and be responsible for its appearance during the time his command shall occupy it, and leave the same in a perfect sanitary condition.

12. Enlisted men are strictly prohibited from boarding, or interfering with, trains stopping at or passing through the camp grounds, unless provided with proper transportation. Regimental commanders will cause charges to be preferred against any member of their command who may be guilty of disobedience of these orders.

12. Driving nails in tent poles, defacing tent walls or other public property will not be tolerated. Officers and enlisted men occupying tents or using public property will be held responsible for the proper care thereof, and any damage thereto will be deducted from their per diem at camp. Regimental commanders will cause an inspection to be made on the last day at camp to ascertain if any, and fix the responsibility.

14. Bands of the Minnesota National Guard, when on duty with troops, will not play "Star Spangled Banner" as part of a medley. It will be played only as a selection by itself.

15. In case of accident or wounds, and in case of serious damage to property, the commanding officer of the camp will at once make report thereof direct to the adjutant general. He will also, without further instructions, immediately convene a board of officers to ascertain and determine the injury or damage and to fix the responsibility, and forward the report of the board, with his conclusions thereon, as soon as practical, to the adjutant general.

16. Company commanders will make daily reports to regimental headquarters immediately after the morning roll call, and commanding officers at camp will render to these headquarters, direct, a consolidated morning report of their command on each day.

17. All regimental and company records and files will be taken to camp for inspection. Regimental commanders using blank ammunition in skirmish drill will instruct their men to pick up empty shells and turn the same over to the ordnance officer.

18. A general report from each regimental commander and from the medical director will be made to the adjutant general within thirty days from the close of their encampment.

19. Sections 4 and 5 of an ordinance authorizing the state of Minnesota to lay and maintain water pipes on certain streets, and providing for an adequate supply of water to the state camp grounds and for the protection of said water pipes and other state property within the city of Lake City, Minn., are published for the guidance of commanding officers, who will see that they are complied with.

"Section 4. The officers and men in charge of said camp grounds will only use the necessary water for encampment purposes, and will not permit any unnecessary flowage or waste of water during the encampment period, and will at all proper and seasonable times permit the common council or its duly authorized agent, to enter all places upon said grounds where water is used, for

the purpose of inspecting the same, and none but snap, or self-closing faucets shall be used in connection with said water works; when the season of encampment shall be over, the water shall be shut off from said grounds, and in case of fire in the city of Lake City, the city engineer may order said water shut off until the fire shall be extinguished.

"Section 5. If the officers, or men in charge of said camp grounds, shall violate any of the conditions or provisions of this ordinance, the city reserves the right, after notice in writing to the commanding officer in charge, specifying the grounds of complaint, and failure on his part to apply the proper remedy within a reasonable time, to shut off the water supply from said camp grounds during the encampment of the regiment or other body of troops so offending, or until positive assurance shall be given that no further cause for legitimate complaint shall arise.

"But in no case shall the water supply be shut off until after forty-eight hours' notice by mail direct to the adjutant general at his office in St. Paul, in which notice the estimated amount of the waste shall be specified and opportunity given to make good the damage suffered thereby."

By order of the Commander-in-Chief,

E. D. LIBBEY,
Adjutant General.

MEMORANDUM.

(To be Annexed to General Orders No. 9.)

MOVEMENT OF THIRD INFANTRY, M. N. G. into

LAKE CITY CAMP GROUNDS, June 14, 1904.

Special Train (C., M. & St. P. Ry.)

St. Paul to Lake City Camp Grounds.

Time Schedule—

Lv. St. Paul	8:45 a. m.
Ar. Red Wing	10:15 a. m.
Ar. Lake City Camp Grounds	11:00 a. m.

Equipment—

3 coaches (Eastern Ry. Minnesota)	Duluth to Lake City
1 coach (Eastern Ry. Minnesota)	Princeton to St. Paul
1 baggage car (Eastern Ry. Minnesota)	Duluth to Lake City
1 coach (Northern Pacific Ry.)	Anoka to Lake City
1 colonist sleeper (Northern Pacific Ry.)	Brainerd to Lake City
1 colonist sleeper (Northern Pacific Ry.)	Crookston to Lake City
1 baggage car (Northern Pacific Ry.)	Crookston to Lake City
1 coach (C. G. W. Ry.)	Zumbrota to Lake City
1 coach (C., M. & St. P. Ry.)	Olivia to Lake City
1 coach (C., M. & St. P. Ry.)	St. Paul to Lake City
1 coach (C., M. & St. P. Ry.) Company G.	St. Paul to Lake City
1 baggage car (C., M. & St. P. Ry.)	St. Paul to Lake City

Total equipment, 2 colonist sleepers, 9 coaches and 3 baggage cars.

Companies to be Carried—

F. S. & N. C. S., St. Paul.....	10 men
F. S. & N. C. S. & B., Duluth.....	25 men
Company A, Duluth	45 men
Company C, Duluth	45 men
Company G, Princeton	45 men
Company B, Anoka	45 men
Company F, Brainerd	45 men
Company I, Crookston	45 men
Company H, Olivia	45 men
Company E, St. Paul	45 men
Company D, Zumbrota	45 men
Total estimated	440 men

Itinerary—

Field and Band, Companies A and C, Duluth, leave their station on train No. 17, Eastern Ry. Minnesota, at 11:05 p. m., June 13, 1904, and arrive St. Paul 7:15 a. m., to leave on special train C., M. & St. P. Ry. at 8:45 a. m.

Company G, Princeton, leave their station on train No. 32, Eastern Ry. Minnesota, 10:55 a. m., arriving St. Paul 1:10 p. m., transferring to train No. 58, C., M. & St. P. Ry., 3 p. m., arriving at Lake City Camp Grounds 4:35 p. m.

Company B, Anoka, leave their station on train No. 8, Northern Pacific Ry., at 6:05 a. m., arrive St. Paul 7:25 a. m.—to leave on special train C., M. & St. P. Ry., at 8:45 a. m.

Company F, Brainerd, leave their station on train No. 13, Northern Pacific Ry., at 12:05 a. m., arrive at Staples 1:00 a. m., transfer with coach to train No. 8, Northern Pacific Ry., at 2:05 a. m., arrive St. Paul 7:25 a. m.—to leave on special train, C., M. & St. P. Ry., at 8:45 a. m.

Company I, Crookston, leave their station on train No. 8, Northern Pacific Ry., at 8:25 p. m., arrive St. Paul 7:25 a. m.—to leave on special train, C., M. & St. P. Ry., at 8:45 a. m.

Company H, Olivia, leave their station on train No. 6, C., M. & St. P. Ry., at 3:47 a. m., arrive St. Paul 7:55 a. m.—to leave on special train, C. M., & St. P. Ry., at 8:45 a. m.

Field, Staff, N. C. S. and Company E, St. Paul, leave that station on special train, C., M. & St. P. Ry., at 8:45 a. m.

Company D, Zumbrota, leave their station on train No. 201, C. G. W. Ry., at 7:06 a. m., arriving at Red Wing 8:03 a. m., to transfer with coach to special train, C., M. & St. P. Ry., from St. Paul upon its arrival at Red Wing at 10:15 a. m.

Note—

Three (3) Eastern Ry. Minnesota coaches and one (1) baggage car from Duluth will be attached to special train, C., M. & St. P. Ry., at St. Paul, and run through to Lake City Camp Grounds.

One (1) Northern Pacific Ry. colonist sleeper and one (1) baggage car from Crookston; one (1) N. P. Ry. colonist sleeper from Brainerd; one (1) N. P. Ry. coach from Anoka, will be attached to special train, C., M. & St. P. Ry., at St. Paul and run through to Lake City Camp Grounds.

One (1) C., M. & St. P. Ry coach from Olivia will be attached to special train, C., M. & St. P. Ry., at St. Paul and run through to Lake City Camp

Grounds. One C. G. W. Ry. coach from Zumbrota will be attached at Red Wing to special train, C., M. & St. P. Ry., upon its arrival from St. Paul and run through to Lake City Camp Grounds.

Eastern Ry Minnesota baggage car from Duluth to be used by F. S., N. C. S. & B. and Companies A, C.

Northen Pacific Ry. baggage car from Crookston to be used by Companies I, F, B.

C., M. & St. P. Ry baggage car from St. Paul to be used by Companies E, H, D.

One (1) C., M. & St. P. Ry. coach required on train No. 58 (River Div.) for Company G, Princeton, leaving St. Paul at 3:00 p. m.

MOVEMENT OF THIRD INFANTRY, M. N. G.

out of

LAKE CITY CAMP GROUNDS, June 23, 1904.

Special Train (C., M. & St. P. Ry.)

Lake City Camp Grounds to St. Paul.

Time Schedule—

Lv. Lake City	10:45 a. m.
Lv. Red Wing	11:25 a. m.
Ar. St. Paul	12:45 p.m.

Equipment—

1 coach (Eastern Ry. Minnesota).....	Lake City to Princeton
3 coaches (Eastern Ry. Minnesota).....	Lake City to Duluth
1 baggage car (Eastern Ry. Minnesota).....	Lake City to Duluth
1 colonist sleeper (Northern Pacific Ry.).....	Lake City to Brainerd
1 colonist sleeper (Northern Pacific Ry.).....	Lake City to Crookston
1 coach (Northern Pacific Ry.).....	Lake City to Anoka
1 coach (C., M. & St. P. Ry.).....	Lake City to Zumbrota
1 coach (C., M. & St. P. Ry.).....	Lake City to Olivia
1 coach (C., M. & St. P. Ry.).....	Lake City to St. Paul
1 baggage car (C., M. & St. P. Ry.).....	Lake City to St. Paul
Total equipment, 2 colonist sleepers, 8 coaches and 2 baggage cars.	

Companies to be Carried—

Field, Staff, N. C. S., St. Paul.....	10 men
Field, Staff and Band, Duluth	25 men
Company A, Duluth	45 men
Company C, Duluth	45 men
Company F, Brainerd	45 men
Company I, Crookston	45 men
Company B, Anoka	45 men
Company G, Princeton	45 men
Company D, Zumbrota	45 men
Company H, Olivia	45 men
Company E, St. Paul	45 men

Total estimated 440 men

Itinerary—

Field, Staff and Band and Companies A and C, Duluth, leave special train at St. Paul, transferring with three (3) coaches and one (1) baggage car to train No. 31, Eastern Ry. Minnesota, at 2:35 p. m., arriving at their destination 9:25 p. m.

Company F, Brainerd, leave special train at St. Paul, transferring with colonist sleeper to train No. 7, Northern Pacific Ry., at 8:00 p. m., arriving at Staples 1:12 a. m., transferring with colonist sleeper to train No. 14, N. P. Ry., at 3:05 a. m., arriving at their station 3:55 a. m.

Company I, Crookston, leave special train at St. Paul, transferring with colonist sleeper to train No. 7, Northern Pacific Ry., at 8:00 p. m., arriving at their station 6:51 a. m.

Company B, Anoka, leave special train at St. Paul, transferring with coach to train No. 7, Northern Pacific Ry., at 8:00 p. m., arriving at their station at 9:23 p. m.

Company G, Princeton, leave special train at St. Paul, transferring with Coach to train No. 31, Eastern Ry. Minnesota, 2:35 p. m., arriving at their station 4:42 p. m.

Company D, Zumbrota, leave special train at Red Wing, transferring with coach to train No. 202, C. G. W. Ry., leaving at 7:45 p. m., arriving at their station 8:50 p. m.

Company H, Olivia, leave special train at St. Paul, transferring with coach to train No. 3, C., M. & St. P. Ry. (H. & D. Div.), leaving at 6:15 p. m., arriving at their station 10:30 p. m.

Note—

The following equipment to be transferred at St. Paul to regular trains of the railroads named below:

To Eastern Ry. Minnesota, three (3) Eastern Ry. Minnesota coaches and one (1) baggage car—Lake City Camp Grounds to Duluth.

To Eastern Ry. Minnesota, one (1) Eastern Ry. Minnesota coach—Lake City Camp Grounds to Princeton.

To N. P. Ry., one (1) N. P. Ry. colonist sleeper—Lake City Camp Grounds to Brainerd.

To N. P. Ry., one (1) N. P. Ry. colonist sleeper—Lake City Camp Grounds to Crookston.

To N. P. Ry., one (1) N. P. Ry. coach—Lake City Camp Grounds to Anoka.

To C., M. & St. P. Ry., one (1) C., M. & St. P. Ry. coach—Lake City Camp Grounds to Olivia.

To C. G. W. Ry., one (1) C., M. & St. P. Ry. coach—Lake City Camp Grounds to Zumbrota.

MOVEMENT OF FIRST ARTILLERY, M. N. G. into

LAKE CITY CAMP GROUNDS, July 5, 1904.

Special Train (C., M. & St. P. Ry.)

Time Schedule—

Lv. Minneapolis	7:20 a. m.
Lv. St. Paul	8:55 a. m.
Ar. Lake City Camp Grounds	11:30 a. m.

Equipment—

4 32-foot flat cars.....	to be used from Minneapolis
4 36-foot palace horse cars.....	to be used from Minneapolis
1 large baggage or box car.....	to be used from Minneapolis
2 passenger coaches	to be used from Minneapolis
3 36-foot palace horse cars.....	to be used from St. Paul
2 passenger coaches.....	to be used from St. Paul

To be Transported—

Battery B, Minneapolis	85 men
Battery A, St. Paul	85 men
Company of Engineers, St. Paul.....	60 men
Field and Staff, St. Paul	6 men

Total estimated 236 men

Note—

Horses and flat cars to be loaded in each city in the afternoon of the day preceding, or at least one hour prior to the time set for departure, as the Battery Commander may elect.

Battery B's baggage to be loaded at Minneapolis; Battery A's and Company of Engineers' baggage to be loaded on arrival of train at Union Depot, St. Paul.

MOVEMENT OF FIRST ARTILLERY, M. N. G.
out of
LAKE CITY CAMP GROUNDS, July 14, 1904.

Special Train (C., M. & St. P. Ry.)

Time Schedule—

MOVEMENT OF SECOND INFANTRY, M. N. G.
into
LAKE CITY CAMP GROUNDS, July 5, 1904.

Special Train (C., M. & St. P. Ry.)

Austin to Lake City Camp Grounds via. Owatonna and Red Wing.

Time Schedule—

Lv. Austin	8:00 a. m.
Lv. Owatonna	9:00 a. m.
Lv. Faribault	9:30 a. m.
Lv. Northfield	9:55 a. m.
Lv. Red Wing	11:25 a. m.
Ar. Lake City	12:00 m.

Equipment—

1 coach, C., M. & St. P. Ry.....	to be used from Austin
1 baggage car, C., M. & St. P. Ry.....	to be used from Austin
1 coach, C., M. & St. P. Ry.....	to be used from Owatonna
2 coaches, C. & N. W. Ry.....	to be used from New Ulm
1 baggage car, C. & N. W. Ry.....	to be used from New Ulm
1 coach, C. G. W. Ry.....	to be used from Rochester
1 coach, C. & N. W. Ry.....	to be used from Mankato
1 coach, C., M. & St. P. Ry.....	to be used from Faribault
1 coach, C., M. & St. P. Ry.....	to be used from Northfield
1 coach, C., M. & St. P. Ry.....	to be used from Winona
1 coach, C., M. & St. P. Ry.....	to be used from Fairmont

Total equipment, 10 coaches, 2 baggage cars.

Companies to be Carried—

Field, Staff and Company G, Austin.....	50 men
Company I, Owatonna	45 men
Company A, New Ulm	45 men
Band, New Ulm	30 men
Company F, Rochester	45 men
Company E, Fairmont	45 men
Company H, Mankato	45 men
Company B, Faribault	45 men
Company D, Northfield	45 men
Company C, Winona	45 men

Total estimated 440 men

Itinerary—

Field, Staff and Company G, Austin, leave their station on special train, C., M. & St. P. Ry., at 8:00 a. m.

Company I, Owatonna, leave their station on special train, C., M. & St. P. Ry., at 9:00 a.m.

Company B, Faribault, leave their station on special train, C., M. & St. P. Ry., at 9:30 a. m.

Company D, Northfield, leave their station on special train, C., M. & St. P. Ry., at 9:55 a. m.

Band and Company A, New Ulm, leave their station on train No. 18, C. &

N. W. Ry., 5:40 a. m., arriving Owatonna 8:32 a. m., where they will be attached to special train on C., M. & St. P. Ry., leaving that station 9:00 a. m.

Company E, Fairmont, leave their station on train No. 22, C., M. & St. P. Ry., at 6:39 a. m., arriving St. Paul 1:00 p. m., transferring with coach to train No. 58, C., M. & St. P. Ry. (River Div.), 3:00 p. m., arriving Lake City Camp Grounds at 4:35 p. m.

Company F, Rochester, leave their station on train No. 201, C. G. W. Ry., at 6:15 a. m., arriving Red Wing 8:05 a. m., where they will be attached to special train on C., M. & St. P. Ry., leaving that station 11:25 a. m.

Company H, Mankato, leave their station on train No. 504, C. & N. W. Ry., 6:50 a. m., arriving Owatonna 8:22 a. m., where they will be attached to special train on C., M. & St. P. Ry., leaving that station 9:00 a. m.

Company C, Winona, leave their station on train No. 3, C., M. & St. P. Ry., 8:12 a. m., arriving Lake City Camp Grounds 9:35 a. m.

Note—

C. & N. W. Ry., two (2) coaches and one (1) baggage car from New Ulm; one (1) coach from Mankato. All to be delivered at Owatonna to the special train of C., M. & St. P. Ry., leaving that station 9:00 a. m. and carried through to Lake City Camp Grounds.

One C., M. & St. P. Ry. coach with Company E, to be used on trains Nos. 22 and 58, Fairmont to Lake City Camp Grounds.

One C., M. & St. P. Ry. coach with Company C, Winona, to be used on train No. 3, Winona, to Lake City Camp Grounds.

One C. G. W. Ry. coach with Company F, Rochester, to be transferred at Red Wing to C., M. & St. P. Ry. special train, upon its arrival from Northfield and run through to Lake City Camp Grounds.

MOVEMENT OF SECOND INFANTRY, M. N. G.

out of

LAKE CITY CAMP GROUNDS, July 14, 1904.

fantry, March 1, 1903.
John R. Johnson of Zumbrota, Second Lieutenant Company D, Third In-
fantry, Feb. 28, 1904.

By order of the Commander-in-Chief,

E. D. LIBBEY,
Adjutant General.

GENERAL ORDERS NO. II.

May 16, 1904.

The deferred part (competitive drill) of the annual inspection of the infantry companies of the state will take place while troops are in camp, under the provisions of General Orders No. 9, c. s., from these headquarters.

The following program will be followed:

Form Company (187 S. D. R.) open ranks.

Execute manual of arms by and without the numbers, 12 movements each
Close ranks.

Form column of fours and march.

Right or left oblique.

Resume direct march.

Form line—fours right or left and continue the march.

Form column of fours to front (203 S. D. R.).

Right or left by twos.

Trail arms.

Form fours.

Right shoulder arms, on right or left into line.

Form line of platoons in column of fours and advance.

Form line (238 S. D. R.).

Platoons right.

Put column in march—port arms and return to "Right shoulder arms" while moving.

On right or left into line.

Prepare for deployment in extended order.

From halt—form line of squads on right squad—deploy—assemble squads—assemble company.

Advance to front in column of fours, and go into line of squads in double time.

Deploy.

Continue advance, firing by squad kneeling and lying down.

Cease firing—change direction to the right—and advance—resume fire—cease firing—rally by squad—deploy—resume advance—halt and assemble by squad—and assemble company.

Now send first platoon forward on firing line, with orders to advance firing—at imaginary enemy.

Leave second platoon to act as support, each under its own commander.

Captain in rear sends orders to first platoon to close on right file to 1 pace interval, and directs second platoon (support) to deploy forward at 1 pace interval.

The first platoon halts, continuing fire—the second takes post on its left and joins into the action—cease firing.

Retreat—halt—assemble company.

Return to company parade and dismiss company.

Program for Battalion of Artillery will be communicated later to the battalion commander.

By order of the Commander-in-Chief,

E. D. LIBBEY,
Adjutant General.

GENERAL ORDERS NO. 12.

May 17, 1904.

1. Your attention is called to the fact that by legislative enactment and popular assent, May 30th has long been set apart and designated as Memorial Day, to be observed in honoring the memories of deceased Union soldiers of the War of the Rebellion.

2. It is needless to remind you that this occasion is not only a state and national legal holiday, but that it has become fairly sanctified by the patriotic objects for which it was created, and by its hallowed associations with memories of the soldiers of the Union who served the country from 1861 to 1865. But for the noble endeavors of the gallant spirits our country would fall far short of its present glory and greatness and the entire civilized world would be behind its present station in the march of progress. The one day of the year set apart in honor of those of the old Union army who have received their final earthly muster out and are now bivouacked on "Fame's eternal camping ground" cannot be too well respected; the debt of gratitude which posterity owes them can never be fully repaid.

3. The National Guard of Minnesota, to a man, will desire to contribute to a proper celebration of Memorial Day and to pay fitting honor to the sacred dead to whom it has been dedicated. All members of the Guard are, therefore, earnestly requested to participate in the public or formal exercises to the fullest available extent. In localities where there are complete companies or battalions, they are recommended to turn out in force, under arms and in uniform, being for the time subject to the authorities having charge of the service and ceremonies, and in all respects show a proper appreciation of the occasion.

4. These headquarters will be gratified to learn that every company has participated in the Memorial Day exercises, leading in patriotic demonstration, and setting a worthy example for emulation in the future.

5. At all armories and company stations, the national flag will be displayed at half-staff from sunrise until midday. At noon the flag will be hoisted to top of the staff and will remain there until sunset. When hoisted to the top of the staff, the flag should, when practicable, be saluted by playing one or more national airs, as an appropriate mark of honor and respect to the heroic dead.

By order of the Commander-in-Chief,

E. D. LIBBEY,
Adjutant General.

GENERAL ORDERS NO. 13.

May 31, 1904.

The following changes have taken place in the military forces of the state since the publication of General Orders No. 10, A. G. O., c. s., dated April 30, 1904.

RESIGNED.

Second Infantry—

Frank Wunderlich, Second Lieutenant Company C, promoted March 22, 1904, to First Lieutenant.

Herman G. Mindrum, Second Lieutenant Company F, honorably discharged Sept. 30, 1903, S. O. No. 19, A. G. O., c. s.

Herbert F. Luers, Second Lieutenant Company I, promoted April 25, 1904, to Captain.

Third Infantry—

Frank S. Neptune, Second Lieutenant Company I, honorably discharged May 18, 1904, S. O. No. 18, A. G. O., c. s.

First Artillery—

Henry Larson, Captain Battery A, discharged May 26, 1904, S. O. No. 20, A. G. O., c. s.

COMMISSIONED.

Second Infantry—

Frank Wunderlich of Winona, First Lieutenant Company C, March 22, 1904, vice Clarence W. Freeze, promoted.

William F. Brandt of Winona, Second Lieutenant Company C, March 22, 1904, vice Frank Wunderlich, promoted.

Fred E. Day of Mankato, Captain Company H, March 15, 1904, vice Ernest R. Brown, resigned.

Herbert F. Luers of Owatonna, Captain Company I, April 25, 1904, vice Anton Schaefer, resigned.

Minot J. Brown of Owatonna, second Lieutenant Company I, April 25, 1904, vice Herbert F. Luers, promoted.

Faithful Service Medals (20 Years)—

Arthur W. Wright of Austin, Colonel Second Infantry, May 8, 1904.

Louis G. Vogel of New Ulm, Major and Assistant Adjutant General First Brigade, March 5, 1904.

Faithful Service Medals (10 years)—

Joseph E. Groh of St. Paul, Chief Musician Third Infantry, April 20, 1904.

By order of the Commander-in-Chief,

E. D. LIBBEY,
Adjutant General.

GENERAL ORDERS NO. 14.

June 10, 1904.

The Governor and Commander-in-Chief will review the Third Infantry, M. N. G., on Saturday, June 18th, leaving St. Paul at 3:00 p. m., via. C., M. & St. Paul Ry.

The Brigade Commander will review the several commands of the Minnesota National Guard at Camp Lakeview, at such dates as he may designate by orders.

By order of the Commander-in-Chief,

E. D. LIBBEY,
Adjutant General.

GENERAL ORDERS NO. 15.

June 20, 1904.

1. General Orders No. 9, A. G. O., series of 1902, relating to artillery target practice, except paragraphs 13, 16 and 17, will govern artillery target practice for the current season.

2. Paragraphs 2, 3 and 10, General Orders No. 9, A. G. O., series of 1902, as amended, are further amended to read as follows:

"2. The target practice will be open to all enlisted men who have successfully passed an examination on gunnery and ballistics to be prescribed by the battalion commander. Each officer and successful candidate will fire a record score of five shots at 1,800 yards, one preliminary shot being allowed preceding each score."

"3. Of those securing the highest total score, eight from each battery, and four from the field, staff and non-commissioned staff, will fire one preliminary shot and five record shots at a distance of 2,500 yards, for the decoration of expert gunner. If one or more contestants at 1,800 yards be tied for admission on the 2,500 yard range, all of them, so tied, will be allowed to fire on the longer range."

"10. The expert gunner class will consist of the participants securing a total score of 8, or more, at 2,500 yards. The gunner class will be made up of those securing a score of at least five and less than eight at the same range. State decorations will be awarded for the two classes named."

3. The first Battalion of Artillery, Major George C. Lambert, commanding (except the Company of Engineers), will march from its respective stations to Camp Lakeview, Lake City, Minn., where it will enter camp as provided in General Orders No. 9, A. G. O., c. s. Permission is granted the commanding officer to leave with his command on Saturday, July 2, 1904, or as soon thereafter as practicable.

4. The Company of Engineers will leave its station via. C., M. & St. P. Ry., on the regular passenger train leaving St. Paul on July 5, 1904, at 8:30 a. m.

5. The whole command will return by rail as now provided in orders. General Orders No. 9, A. G. O., c. s. are modified accordingly.

By order of the Commander-in-Chief,

E. D. LIBBEY,
Adjutant General.

GENERAL ORDERS NO. 16.

June 30, 1904.

The Governor and Commander-in-Chief will review the Second Infantry, M. N. G., commanded by Colonel Arthur W. Wright, and the First Artillery, M. N. G., commanded by Major George C. Lambert, on Friday, July 8th, and the First Infantry, M. N. G., commanded by Colonel Charles McC. Reeve, on Thursday, July 21st, leaving St. Paul at 3:00 p. m., on both of the above dates, via. C., M. & St. Paul Ry.

By order of the Commander-in-Chief,

E. D. LIBBEY,
Adjutant General.

GENERAL ORDERS NO. 17.

June 30, 1904.

The following changes have taken place in the military forces of the state since the publication of General Orders No. 13, A. G. O., c. s., dated May 31, 1904.

RESIGNED.

First Infantry—

Judd U. Goodrich, First Lieutenant and Assistant Surgeon, promoted Dec. 29, 1903, to Captain and Assistant Surgeon.

Roy G. Staples, Captain Company K, honorably discharged June 14, 1904, S. O. No. 26, A. G. O., c. s.

Second Infantry—

Albert Mohn, Second Lieutenant Company F, promoted June 8, 1904, to First Lieutenant.

Third Infantry—

James T. Watson, First Lieutenant and Battalion Adjutant, honorably discharged June 14, 1904, S. O. No. 27, A. G. O., c. s.

First Artillery—

Burton E. Allen, First Lieutenant Battery A, honorably discharged June 17, 1904, S. O. No. 24, A. G. O., c. s.

COMMISSIONED.**First Infantry—**

Judd U. Goodrich of St. Paul, Assistant Surgeon, with rank of Captain, Dec. 29, 1903.

Second Infantry—

Albert Mohn of Rochester, First Lieutenant Company F, June 8, 1904, vice Fred C. Ormond, promoted,
Fred A. Root of Rochester, Second Lieutenant Company F, June 8, 1904, vice Albert Mohn, promoted.

Third Infantry—

Roy G. Staples of Stillwater, Battalion Adjutant, with rank of First Lieutenant, June 14, 1904, vice James T. Watson, resigned.
Henry W. Yochem of Zumbrota, Captain Company D, April 27, 1904, vice Edgar F. Davis, resigned.
Fridolph E. Westerberg of Crookston, Second Lieutenant Company I, May 25, 1904, vice Frank S. Neptune, resigned.

First Artillery—

William L. Kelly, Jr., of St. Paul, Captain Battery A, June 3, 1904, vice Henry Larson, resigned.

DECORATIONS.**Faithful Service Medals (10 years)—**

Frank W. Matson of St. Paul, Captain and Regimental Adjutant, Third Infantry, June 21, 1904.
Arthur M. Jacobson of St. Paul, First Sergeant Company E, Third Infantry, June 2, 1903.
John O. Olson of Duluth, Sergeant Company C, Third Infantry, May 18, 1904.
Herman J. Teich of Zumbrota, Sergeant Company D, Third Infantry, April 25, 1904.

By order of the Commander-in-Chief,

E. D. LIBBEY,
Adjutant General.

GENERAL ORDERS NO. 18.

September 9, 1904.

1. In continuation of camp work already performed, under provisions of General Orders No. 9, current series, from these headquarters, the annual

competition of regimental and company teams and for places on state team, also the annual competition for the State Trophy by regimental rifle teams, will take place at the State Rifle Range, Camp Lakeview, beginning September 22d, 1904.

2. The expert gunners' class of 1904, not exceeding twelve in all, will engage in three days' target practice on the State Artillery Range, Camp Lakeview, on September 26th, 27th and 28th, 1904, under such regulations as may be prescribed by the battalion commander. The course of instruction prescribed in G. O. No. 15, c. s., A. G. O., will be completed.

3. Brigadier General E. D. Libbey, Adjutant General, will proceed to Camp Lakeview from these headquarters, in time to supervise personally the work ordered in paragraphs 1 and 2, and on completion of this duty return to his station, St. Paul, Minn.

The travel enjoined in connection with this duty is necessary for the public service.

4. The first day will be devoted to preliminary practice by the regimental and company teams.

5. The forenoon of the second day will be devoted to the company team match, and the afternoon to the beginning of the regimental team match which will be completed upon the following day.

6. After the completion of the regimental match, the team captains of the regimental teams will designate seven men of their teams who, with the team captains, will be candidates for places on the state team. The Brigade Inspector of Small Arms Practice will designate three men, and the Commander of the Battalion of Artillery one man from his battalion, to compete for places on the state team, and from those making the highest score in said competition, a state team of twelve men and four alternates will be selected by the Brigade Inspector of Small Arms Practice.

7. Upon completion of the regular contests, the 800 and 1000-yard ranges will be opened to all present who have qualified as sharpshooters but not as experts, during present season, and they will be permitted to fire four scores at these distances with a view of qualifying as experts.

8. The company team match will be the marksman's course under special course "C," U. S. firing regulations, and the regimental team match will be the sharpshooter's course under the said special course "C."

9. Captain O. E. Lee, Brigade Inspector of Small Arms Practice; Captain W. H. Hart, Brigade Quartermaster and disbursing officer, and Hospital Stewart William D. Kelly, Third Infantry, will report to the Adjutant General at Camp Lakeview, for duty during this encampment.

10. Alternates on regimental and company teams will act as scorers and clerks for the Brigade Inspector of Small Arms Practice. The Battalion Commander of the Artillery will make a detail of eight enlisted men to serve the guns, act as scorers and attend to telephone service during the expert gunners' practice, and order them to report to the Adjutant General for said duty at camp, on September 26, 1904.

11. Regimental commanders of infantry, the Commanding Officer of the Artillery Battalion, and the Brigade Inspector of Small Arms Practice, respectively, will furnish Captain W. H. Hart, Brigade Quartermaster, Globe Bldg., St. Paul, Minn., a list containing the full name, rank, etc., of each member of company and regimental teams, expert gunners and men detailed to assist them, or competitors for the state team, selected by them on or before

the 19th day of September, 1904, in order that transportation may be seasonably provided.

By order of the Commander-in-Chief,

E. D. LIBBEY,
Adjutant General.

GENERAL ORDERS NO. 19.

September 30, 1904.

The following changes have taken place in the military forces of the state since the publication of General Orders No. 17, A. G. O., c. s., dated June 30, 1904.

RESIGNED.

First Infantry—

Tracy H. Hoyt, Second Lieutenant Company E, honorably discharged
Oug. 23, 1904, S. O. No. 30, A. G. O., c. s.

First Artillery—

Frank J. Obst, Second Lieutenant Battery A, promoted June 24, 1904, to
First Lieutenant.

COMMISSIONED.

First Artillery—

Frank J. Obst of St. Paul, First Lieutenant Battery A, June 24, 1904, vice
Burton E. Allen, resigned.

APPOINTED.

Examining Surgeons—

Arthur T. Caine, M. D., Anoka, Sept. 1, 1904, S. O. No. 31, A. G. O., c. s.

DECORATIONS.

Faithful Service Medals (15 Years)—

Harry L. Bullis of Blue Earth, First Lieutenant and Judge Advocate
Second Infantry, May 11, 1904.

James L. Abrams of Minneapolis, Private Company B, First Infantry, May
28, 1904.

Faithful Service Medals (10 years)—

Richard D. O'Brien of St. Paul, First Lieutenant and Judge Advocate Third
Infantry, April 24, 1904.

Lemuel C. Bird of Anoka, First Sergeant Company B, Third Infantry, March
2, 1904.

By order of the Commander-in-Chief,

E. D. LIBBEY,
Adjutant General.

GENERAL ORDERS NO. 21.

November 26, 1904.

1. Pursuant to Section 1, Article IV, of its by-laws, the Minnesota National Guard Association will meet at the State Capitol, St. Paul, on Wednesday, December 28, 1904, at 10 o'clock a. m. Members attending will wear dress uniform without side arms.

2. The necessary transportation will be provided upon application, by letter, to Captain William H. Hart, Brigade Quartermaster, Globe Building, St. Paul, Minn., on or before December 23, 1904.

By order of the Commander-in-Chief,

E. D. LIBBEY,
Adjutant General.

GENERAL ORDERS NO. 22.

December 29, 1904.

The report of the Inspecting Officer on the annual inspection of the National Guard of the state for the year 1904, together with the table of the standing of each company and battery, is published for the information of all concerned.

By order of the Commander-in-Chief,

E. D. LIBBEY,
Adjutant General.

GENERAL REPORT OF INSPECTION.

ST. PAUL, MINN., NOVEMBER 18, 1904.

Adjutant General State of Minnesota.

SIR: Pursuant to G. O. No. 3, c. s., Hdqrs. M. N. G., I initiated the **general** annual inspection of troops comprising the First Brigade, M. N. G., March 19th last. Between this date and April 30, 1904, I visited successively all organizations at their home stations—inspection rolls and reports, as prescribed in existing regulations, giving results of this work, have been already submitted for your action. It having been impracticable during this tour to determine equitably the tactical efficiency of all troops, I completed the inspection (competitive drill) as directed in G. O. No. 11, c. s., while the Guard was in camp under operation of G. O. No. 9, c. s., from your office.

The following summary gives strength of troops at the time of the muster and inspection:

ORGANIZATION	Present at Inspection	Absent		Aggregate.
		With Leave	Without Leave	
First Infantry.....	660	6	666
Second Infantry.....	528	29	1	558
Third Infantry.....	539	28	2	568
First Artillery Battalion.....	222	13	2	237
Total.....	1949	76	4	2029

Having reported to His Excellency the Governor for duty with the organized militia of the state on December 23rd last, I was not yet, when starting out to inspect, as familiar with National Guard conditions as I would have liked to have been before entering upon this important duty. I tried, however, to be absolutely just and impartial, keeping in view at all times the good of the service alone. The following is the result of my observations while with the troops at their stations and in camp:

Ceremonies—

When forming for inspection, troops showed great steadiness, and their deportment in ranks was always creditable; a tendency to disperse in a noisy manner, due no doubt to an exuberance of spirit in a lot of bright young men, rather than want of discipline, was easily checked simply by calling attention to the unmilitary character of this habit.

Guard mounting was well conducted in camp; slight errors noticed during the earlier part of the camp tour of regiments, were quickly corrected, and the work improved from day to day. The performance of guard duty was creditable. In this connection, I beg leave to invite the attention to the need of impressing on all members of the Guard, more especially sentinels on post, that if they would be thoroughly efficient, they would not merely see casually what passes in their vicinity, but rather allow nothing to escape their notice within their sight and hearing. Reviews were well and correctly conducted; the march part of the troops, when they were reviewed by the Commander-in-Chief, left nothing to be desired.

Arms and Equipments—

The arms in hands of troops are well cared for; all aim to keep them as near to original condition, when issued by the Ordnance Department, as practicable. While they are cleaned and cared for by expert workmen at the armories of many organizations, their condition when in constant use, both for drill and target work in camp, shows that the soldiers are properly instructed and careful in their management. Company E, Second Infantry, deserves honorable mention in this direction, their rifles being in remarkably good condition when they left camp.

Equipments were generally found in good order; some canteens and haversacks are somewhat unsightly, but as this is evidently the result of fair wear in service, no discredit attaches thereto.

Uniform, Clothing—

The commissioned personnel of the Guard enjoys the distinction of being dressed alike, thanks to the liberality of the state, which has issued to them a suit each of service and dress uniform of the pattern adopted by the U. S. army. The clothing of the men is in fair condition and well cared for. All are pro-

vided with blue woolen trousers, undress coats and caps, also with khaki coats and trousers and campaign hats. The latter are most all well worn and badly out of shape and a new issue before next camping season is desirable. The undress coat, dark blue cloth, issued by the state, and procured under contract, serves well as substitute for the full dress coat, no longer supplied. The undress blue flannel blouse, procured from the Quartermaster's Department of the regular army, is too light, it soon loses its shape and is therefore unsuitable for wear on parade or other occasions of ceremony. Its use in the Guard ought to be discontinued, as soon as the supply now on hand is exhausted.

Records, Etc.—

Books and records were found in good order. In some organizations, as shown by comparison of inspection rolls with card record in Adjutant General's office, discrepancies in spelling names and entering date of enlistment have crept in. These errors have been corrected, as far as possible, while troops were in camp. More care should be exercised by company commanders, when names are first entered in descriptive books (formerly muster roll), in comparing them with the original enlistment paper. Some errors in form in issuing company orders were noticed by me and corrected by verbal instruction to company commanders.

Public funds were found to be faithfully managed and administered. The manner of keeping accounts, however, differs widely and I would respectfully recommend the adoption of a uniform system. The "Cash Book" of Company "A," First Infantry, is well arranged and might well serve as a model.

Care of Property—

All property in hands of troops was found to be well cared for.

Drill—

When the many obstacles which impede instruction, prominent among them the unavoidably frequent changes in personnel, want of good drill rooms, and the difficulty many members of the Guard experience in getting away from business to attend drills or camp, are taken into account, we are forced to give unstinted praise to all concerned, officers and men, for the proficiency shown by them in tactical work. The energy displayed by all in preparing for the competitive drill program, and the intelligence displayed in its execution are decidedly encouraging. The performance of the troops in camp showed plainly that the younger members of the Guard have derived much benefit from association with their elder comrades, who have seen much active service. All are steadily progressing and getting beyond the mere mechanical stage, and appreciate well the spirit of our present system of handling troops in action. This justifies the confident expectation that if called into active service the Minnesota National Guard will do its duty.

The relative standing of organizations, in general merit and during the competitive drill, is shown in Appendix I. An exact analysis is not attempted for the reason that the inspection was spread over a long period; and the conditions under which troops work at their home stations are so different that a mathematically exact standard cannot be established. The difference in figures in stating result of competitive drill is caused by the necessity under which the judge labors to take into account every omission of or deviation from the text of the drill regulations, even if they do not materially affect the general efficiency. This compelled me in case of otherwise highly efficient companies, to make deductions for the blunders of a few new men in going through the

manual, the omission of right guides to dress rear rank, when ranks were opened, the failure of officers to join groups when rallying, etc.

In view of the desire displayed by all members of the Guard, with whom I have come in contact, since I have been associated with them, that I should criticise freely, and the kind spirit in which every suggestion I have made has been received, I would be remiss in duty, if I failed to point out, guided by my long service experience, how we may together strive for still greater improvement. We are about to take up new drill regulations. Here thorough N. C. officers' school followed by practical work should be our watchword. Rightly the non-commissioned officers may be called the backbone of a company, on their strength depends its efficiency at home and in active service. As squad leaders first, in charge of sections later on, as platoon commanders and even at the head of a company, if their officers fall, they should be prepared to command, to take responsibility without hesitation. The excellent material for N. C. officers so abundant in the Guard, assures a supply of competent men, if company commanders exercise care in selection, and if the rules prescribed for their examination, are observed. After appointment they should be given every possible opportunity to act as instructors, so they may acquire skill and tact in handling men. Such a course, coupled with the patriotic spirit which animates all, should give the Guard a class of N. C. officers of which any service may well be proud. High military men, who have observed our volunteers and other citizen soldiers, have sometimes pointed out the danger to discipline incident to too familiar intercourse between officers and men. We should not pass this criticism too lightly. Discipline is the pillar of efficiency in a military body, we can only build it up by slow, deliberate work; a certain distinction in rank between him who orders and the one who obeys is essential. If we would be good soldiers, we must respect this rank and show our deference, in order that we learn to obey cheerfully and promptly. Now, when we take into account that in our truly National Guard all are prompted by a desire to preserve the integrity of our country and support our lawfully constituted authorities, careful deportment can never become a hard task to us; we will readily respect superior authority and observe all rules established for the common weal. Then we should further consider that having selected from their midst men to command, it cannot be derogatory to the manhood of the electors to honor the subject of their choice and show to him every consideration on or off duty.

On the other hand the officer cannot be too careful in his conduct. He should essay to take the lead in all that establishes professional efficiency. Then he can and should be kind and considerate to his subordinates without loss of power or prestige.

General Efficiency—

The general efficiency of the Guard has increased materially in the past year through the supply of new arms, rifles to infantry, revolvers to officers and mounted troops, the issue of shelter tents and camp cooking ranges. A complete regimental field hospital equipment and two emergency outfits for detachment use, have also been added to the hospital equipment.

Hospital Corps—

All organizations have competent and zealous medical officers, but all, if I correctly understood them, feel the want of a properly organized, trained and permanent Hospital Corps—this should be organized. The man on the firing line should be assured that, if hurt, he will be at least well cared for. The

presence of a body of men trained to perform this duty will give him this assurance. Furthermore, expensive hospital equipment should be well looked after. Peace is the proper time to organize and drill such a force. I am assured that an excellent class of men can be induced to enter it.

I respectfully recommend that an expression of his views on this subject by the Surgeon General of the State be invited and made the basis for appropriate action in the premises.

The Artillery—

The artillery, handicapped by only partial modern equipment, has nevertheless done extremely well, and the engineer company attached to the battalion, is already increasing in efficiency.

The unfortunate condition of affairs which was referred to in my preliminary report in April last, as having existed in Battery "A," is, thanks to the hard work of the Battalion Commander, and Captain since placed in charge, only a matter of the past, and the organization is rapidly approaching its old standard of excellence.

Every possible effort should be made to secure the early issue of modern guns to the artillery force of the State.

General Remarks—

Two subjects, in my humble opinion, are worthy of careful thought and considerate attention:

First. Too large a part of the necessarily limited camp time is now given up to target practice on the State range. The importance of the effective use of his firearm by the soldier, forbids any move to curtail the present course of instruction "C" Special, now laid down in the S. A. F. R. of the army. Hence every effort practicable should be made to have all preliminary instructions, combined, where practicable with short range practice, at the home stations of companies. Sighting drills and gallery practice should be diligently pursued through the winter months.

Would it not be advisable to submit this matter, as well as the subject of providing suitable footwear for the men to a Board composed of the Regimental Commanders?

Second. Already incidentally referred to, is the question of issuing a good serviceable shoe to the Guardsmen. All who have had field experience will agree with me that a command started out on a tramp with the footwear seen in our summer camp, would be seriously crippled in a short time. Its marching capacity could never be correctly estimated, so that any calculation, tactical or strategical might be safely based thereon.

Respectfully submitted,

WM. GERLACH,
Lieut. Col. U. S. A. (Retired), Inspector.

INSPECTION, 1904.

NOTE:—In computing "percentage entire inspection," absent from inspection sick, or absent by proper authority from regimental commander is not considered a demerit. Absent without leave counts against organization, it being a breach of discipline.

Where entire percentage is equal, "figure of merit in target tactics" determines standing of company.

By order of the Commander-in-Chief,

E. D. LIBBEY,
Adjutant General.

GENERAL ORDERS NO. 23.

December 30, 1904.

1. The report of the Brigade Inspector of Small Arms Practice for the season of 1904 is published for the information of all concerned.

2. The State trophy, donated by the Adjutant General to become the property of the regiment whose team attains the highest score for three successive times, was awarded for the second time to the Third Infantry.

3. On the conclusion of competitive practice for place, the membership of the Minnesota State Rifle Team for the ensuing year was announced, as follows:

Team Captain—

Captain Orris E. Lee, First Brigade.

Members—

1. Second Lieutenant Arthur E. Clark, Jr., Company C, First Infantry.
2. Private Franklin W. Britton, Company F, Third Infantry.
3. First Sergeant Lemuel C. Bird, Company B, Third Infantry.
4. Drum Major George Sinclair, Band, First Infantry.
5. Corporal Oscar Reinhard, Company C, Second Infantry.
6. Artificer Francis J. Britton, Company F, Third Infantry.
7. Sergeant Carl A. Anderson Company C, Third Infantry.
8. Major Frederick E. Resche, Field and Staff, Third Infantry.
9. Sergeant Frederick L. Britton, Company F, Third Infantry.
10. Captain Edward G. Falk, Field and Staff, First Infantry.
11. Major Frank B. Rowley, Field and Staff, First Infantry.
12. Sergeant Edwin F. H. Juni, Company A, Second Infantry.

Alternates—

13. Sergeant Ernest M. Chute, Company E, Second Infantry.
14. Second Lieutenant Edson J. Andrews, Company I, First Infantry.
15. Battalion Sergeant Major Leonard Hildeman, Field and Staff, Second Infantry.
16. Sergeant Wesley E. Murphy, Company C, Second Infantry.

By order of the Commander-in-Chief,

E. D. LIBBEY,
Adjutant General.

HEADQUARTERS FIRST BRIGADE, M. N. G.
Office of the Inspector of Small Arms Practice.

Nov. 18, 1904.

The Adjutant General—

SIR: Herewith is submitted the report of small arms practice for the season of 1904.

Interest in this branch has been much greater during this season than ever before, and more than 1,500 men were upon the range, and the amount of ammunition expended has been unprecedented in this State. On the State Range alone more than 139,000 rounds were fired, as against 90,000 last season.

A new class has been added by U. S. Regulations, for which we have no decoration at present, that of "Expert." One should be provided.

Including the Experts with the Sharpshooters for comparison, the increase in that class is nearly fifty per cent, and the increase in the Marksmen class is nearly one hundred per cent over last year.

In the State Matches the Third Infantry again won the Regimental Trophy, and Company F, Third Infantry, the Company Match.

As no trophy is provided for the Company Team Match, I would respectfully suggest that a suitably inscribed badge be awarded each year to the winning team. This will add much to the interest.

Enclosed are the following schedules:

Schedule No. 1—Names and scores of Experts.

Schedule No. 2—Names and years of qualification of Distinguished Riflemen.

Schedule No. 3—Names and scores of Sharpshooters.

Schedule No. 4—Names and scores of Marksmen.

Schedule No. 5—Company Team Match.

Schedule No. 6—Regimental Team Match.

Schedule No. 7—Competition scores and list of State Rifle Team, with order of standing.

Very respectfully yours,

ORRIS E. LEE,
Captain and I. S. A. P. First Brigade, M. N. G.

GENERAL ORDERS NO. 24.

December 30, 1904.

The report of the Commanding Officer of the Battalion of Artillery on artillery target practice for the season of 1904, held at Camp Lakeview, is published for the information of all concerned.

By order of the Commander-in-Chief,

E. D. LIBBEY,
Adjutant General.

HEADQUARTERS FIRST BATTALION ARTILLERY, M. N. G.

ST. PAUL, MINN., November 1, 1904.

The Adjutant General of the State of Minnesota.

SIR: I have the honor to submit to you herewith the result of the target practice of the First Battalion Artillery for the season of 1904, held in accordance with General Orders No. 9, A. G. O., series of 1902, as modified by General Orders Nos. 15 and 18, and Special Orders No. 32, A. G. O., current series.

The following officers and enlisted men qualified under the rules and are entitled to state decorations:

EXPERT GUNNERS.

1. First Lieutenant Nels P. Nelson, Field and Staff.....	3 years
2. Sergeant Albert E. Barnes, Non-commissioned Staff.....	1 "
3. First Lieutenant William Keller, Battery A.....	1 "
4. Second Lieutenant Frank J. Obst, Battery A.....	1 "
5. First Sergeant Meredith Jones, Battery A.....	1 "
6. Sergeant Otto W. Schornstein, Battery A.....	2 "
7. Private Henry R. Longfield, Battery A.....	1 "
8. First Lieutenant Griffith C. Williams, Battery B.....	3 "
9. Second Lieutenant John P. Miller, Battery B.....	1 "
10. Sergeant Joseph M. Kvittum, Battery B.....	2 "
11. Sergeant George W. Pasko, Battery B.....	2 "

GUNNERS.

1. Captain William L. Kelly, Jr., Battery A.....	1 year
2. Sergeant Hugh R. McElhinny, Battery A.....	1 "
3. Sergeant Olof C. Helander, Battery B.....	E. G.

It is interesting to note that out of 113 shots fired at the range of 2,500 yards, 47 went over the target, 25 under, 27 were hits, 3 went to the right and 2 to the left, 1 was left and low, 3 left and high, 2 not located, 2 right and high,

and 1 right and low. The above results show that over 87 per cent of all shots fired were either hits or errors in elevation only. Those to the right and left were shots fired to locate the target, and all preliminary and record shots were correct as to deflection. This is almost conclusive evidence that defective or uneven powder was the cause of nearly all errors in elevation. Notwithstanding my report of last year strongly calling attention to the poor quality of the powder issued by the war department, and showing the inevitable results of its use, the same powder was again shipped to my command during the season just closed. The cartridges which were received for use were stamped "1898, lots unknown." All the statements in my last report apply, with increased force, to the present shipment of powder.

In view of those facts I strongly renew my recommendation that the smokeless powder for artillery target practice be procured directly from some reliable manufacturer, since the government seems to be unable to procure or unwilling to issue any powder which can be used to advantage in our work.

During the last encampment an examination in gunnery and ballistics was prescribed for all enlisted men who desire to participate in the target practice, and only those who passed this examination successfully were allowed to fire on the range. This has in a measure resulted in a more intelligent handling of the gun and sights.

In conclusion I would recommend that, in addition to the firing for accuracy which has heretofore been the main feature of our practice, steps be taken to secure suitable grounds which would permit the execution of the full program laid out for artillery practice in the regular army, and would suggest that the practicability of using the New Ulm range be investigated with a view of securing the same for next season's practice. The Seventh Battalion of Artillery, U. S. A., stationed at Fort Snelling, have just returned from that point and seem to be well satisfied with the conditions there found.

Very respectfully,

GEO. C. LAMBERT,

Major Commanding First Artillery, M. N. G.

ARTILLERY TARGET PRACTICE, 1904.

Gun—3.2 in. B. L. R. model of 1897, with telescopic sight, model of 1897.

Ammunition—Smokeless powder, "Lots unknown, 1898;" 13½ lb. shell, plugged.

Target—U. S. Regulation Artillery Land Target, 10x20 ft.

GENERAL ORDERS NO. 25.**December 31st, 1904.**

The following changes have taken place in the military forces of the state since the publication of General Orders No. 19, A. G. O., c. s., dated September 30, 1904.

RESIGNED.**First Infantry—**

Matthew C. McMillan, First Lieutenant Company K, promoted July 14, 1904, to Captain.

John M. Nolan, Second Lieutenant Company K, promoted July 14, 1904, to First Lieutenant.

Second Infantry—

Walter G. Braden, First Lieutenant Company B, honorably discharged Dec. 2, 1904, S. O. No. 37, A. G. O., c. s.

Alexander W. Bird, Second Lieutenant Company E, honorably discharged Dec. 16, 1904, S. O. No. 40, A. G. O., c. s.

Third Infantry—

Alvinza B. Cole, Major and Surgeon, honorably discharged Dec. 27, 1904, S. O. No. 42, A. G. O., c. s.

Charles T. Josten, First Lieutenant Company C, honorably discharged Nov. 14, 1904, S. O. No. 36, A. G. O., c. s.

DIED.**General Staff—**

James C. Donovan, Aid-de-Camp, with rank of Colonel, Dec. 21, 1904.

RETIRED.**General Staff—**

Brigadier General Charles S. Bunker, Inspector General, Oct. 8, 1904, S. O. No. 32, A. G. O., c. s.

COMMISSIONED.**First Infantry—**

Matthew C. McMillan of Stillwater, Captain Company K, July 14, 1904, vice Roy G. Staples, resigned.

John M. Nolan of Stillwater, First Lieutenant Company K, July 14, 1904, vice Matthew C. McMillan, promoted.

Nelson O. Marsh of Stillwater, Second Lieutenant Company K, July 14, 1904, vice John M. Nolan, promoted.

George I. Ashton of St. Paul, Second Lieutenant Company E, Sept. 20, 1904,
vice Tracy H. Hoyt, resigned.

Third Infantry—

William D. Kelly of St. Paul, Surgeon, with rank of Major, Dec. 27, 1904,
vice Alvinza B. Cole, resigned.

DECORATIONS.

Faithful Service Medals (20 Years)—

Elias D. Libbey of St. Paul, Brigadier General and Adjutant General, Dec.
12, 1904.

Frederick B. Wood of Austin, Major Second Infantry, May 8, 1904.

Faithful Service Medals (10 years)—

William Keller of St. Paul, First Lieutenant Battery A, First Artillery,
Aug. 24, 1904.

Charles A. Kerkow of Austin, Cook Company G, Second Infantry, May
4, 1901.

By order of the Commander-in-Chief,

E. D. LIBBEY,
Adjutant General.

CIRCULARS.

CIRCULAR NO. 1.

January 7, 1904.

1. The recent return shipment of Springfield rifles to this department indicate, with the exception of a few officers, an either almost total disregard or ignorance of orders and regulations.

2. In shipping rifles they should be packed exactly as originally received. Failure to carefully preserve all packing strips and cleats for arm chests, as directed from time to time, has caused a number of rifles to reach this station in bad order, and a heavy expense for repacking for shipment to United States arsenal. Arm chests should receive as much care as any other property; if screw holes are too much worn to retain screws, longer screws should be substituted instead of using nails.

3. All repairs to arm chests will be charged up against the contingent fund of officers responsible, also time occupied in cleaning guns, removing gun slings and correcting other defects in packing.

By order of the Commander-in-Chief,

E. D. LIBBEY,
Adjutant General.

CIRCULAR NO. 2.

February 25, 1904.

Dress and service uniforms, including dress cap, service hat, leggings (strap puttee), saber, saber knot (line and service), service belt and dress belt sling, will be issued for the use of the commissioned officers of the First Brigade, the Battalion of Artillery (including the Company of Engineers) and the First, Second and Third Regiments of Infantry.

The contract for furnishing the above named uniforms and equipment has been awarded the Boston Clothing Co., Robert and Sixth Streets, St. Paul.

Officers stationed at St. Paul, Minneapolis and Stillwater will have their measurements taken by The Boston Clothing Co. Measurement blanks will be enclosed with this circular to officers stationed outside of the cities named, and they will have a reliable tailor in their vicinity take their measure, as per instructions on measurement blanks. The two most particular measures are the exact height and weight.

Measurements should be taken on receipt of blank and returned to The Boston Clothing Co.

By order of the Commander-in-Chief,

E. D. LIBBEY,
Adjutant General.

CIRCULAR NO. 3.

May 16, 1904.

The following extract from General Orders No. 50, series of 1903, Headquarters of the Army, prescribing a special course "C" Small Arms Firing regulations, for the organized militia, is hereby published for the information of all concerned, and will be observed by the Minnesota National Guard during the current target season.

Copies of the new firing regulations recently adopted, have been asked for and will be distributed as soon as received from the War Department.

"SPECIAL COURSE 'C.'" SMALL-ARMS FIRING REGULATIONS, FOR THE USE OF THE ORGANIZED MILITIA OR NATIONAL GUARD.

"This course will be preceded by sighting drills, position and aiming drills, gallery practice, and estimating distance drills, using the methods and rules prescribed in the new firing regulations, United States army, as published in General Orders No. 20, February 26, 1903, Headquarters of the Army, Adjutant General's office, as far as they are applicable. Proficiency in estimating distances will not be requisite for qualification.

CLASSIFICATION.

"The class in firing to which any officer or soldier belongs will be determined at the end of the practice season from the aggregate of the total of the best two full scores of five shots each (not necessarily consecutive) that he has made on the ranges, as follows:

"*Fourth Class*—All who have not fired.

"*Third Class*—All who report for practice and are unable to score 10 out of a possible 25 at 200 yards in any score, or who have fired two or more full scores at 200, 300 and 500 yards, and from the best two have made an aggregate of less than 67.

"*Second Class*—All who have fired two or more scores at 200, 300 and 500 yards, and from the best two have made a total of 67 out of a possible 150.

"First Class—All who have fired two or more full scores at 200, 300 and 500 yards, and from the best two have made a total of 83 out of a possible 150.

"Marksmen—All who have fired two or more full scores at 200, 300, and 500 yards, and from the best two have made a total of 98 out of a possible 150.

"Sharpshooters—All who have fired two or more full scores at 200, 300, 500 and 600 yards, and from the best two in each range have made a total of 160; and have fired two or more full scores, timed fire, at 200 yards (30 seconds firing-interval in each score), and in the best two have made a total of 25; and have made one skirmish run of 20 shots, advancing from 600 to 200 yards; the total of all scores being not less than 235.

"Experts—All who have made the necessary total to qualify as sharpshooters and have fired two or more full scores at 800 and 1,000 yards; and from the best two have made a total of 40 at 800, and 35 at 1,000 yards.

GENERAL REGULATIONS.

"Firing—In slow fire, timed fire, and skirmish fire the rules laid down in the new regular army course will be followed as far as applicable.

"Ammunition—The allowance will be fixed by the state.

"Pistol Firing—The same course as in the regular army, as far as applicable, taking into consideration the allowance of ammunition and facilities.

"General Regulations—The regulations as to range officers, pit regulations, and scoring will be the same as in the regular army.

"Target year will be from January 1 to December 31. Practice season will be from May 1 to October 31.

"Reports—From each state a report of target firing will be forwarded not later than November 20.

"Special Courses 'A' and 'B'—The methods pursued in these courses will be utilized, as far as applicable, when longer ranges are not available. No classification into marksmen, sharpshooters, etc., is possible under these courses.

"Insignia—These will be uniform in general appearance for the different classes of marksmen in the several states; to be prescribed hereafter.

"Figure of Merit—There will be a company, regimental and state figure of merit, to be calculated by the methods laid down in the new firing regulations of the regular army for calculating the individual figure of merit, and published by the War Department, January 1 of each year. The state figure of merit, similar to the department figure of merit, will be a combined figure of merit of its troops. All figures of merit will be computed by multiplying the number of expert riflemen by 200; of sharpshooters by 150; of marksmen by 100; of first classmen by 75; of second classmen by 50; of third classmen by 10; of fourth classmen by zero; and by dividing the sum of the products thus obtained by the total number of officers and enlisted men in the above seven classes.

"Competitions.—There will be two classes of competition, State and National. State competitions, if practicable, will be held annually. The National competition, which will be held each year, will be at such place as shall be designated by the Secretary of War. The State teams visiting National competition may, under section 14 of the act of January 21, 1903, receive pay, subsistence, and transportation from the appropriation for the support of the organized militia. The results of the National competition will be published by the War Department.

"Rules and Regulations for Competitions—These, as far as practicable, will be rules prescribed for department and army competitions of the regular army.

*"Medals—*The medals for competition in the state will be fixed by the state authorities. The medals for the national competition will be fixed by the secretary of war."

By order of the Commander-in-Chief,

E. D. LIBBEY,
Adjutant General.

CIRCULAR NO. 4.

August 15, 1904.

The members of the Minnesota National Guard are permitted to wear the uniform of their respective rank, while in the service of the Minnesota State Agricultural Society, during the annual exhibition of the said society for the year 1904.

By order of the Commander-in-Chief,

E. D. LIBBEY,
Adjutant General.

CIRCULAR NO. 5.

Dec. 21, 1904.

I. The following letter received from the general passenger agent, N. P. R. R., is published for the information of the National Guard.

"ST. PAUL, MINNESOTA, December 20, 1904.

"Adjutant General Libbey, State of Minnesota, St. Paul.

"DEAR SIR: Referring to the attached letter from Colonel Van Duzee. Our rule in regard to fire arms in coaches is as follows:

"Conductors will under no circumstances allow any one to take a gun into a coach unless taken apart and encased."

"This rule is necessary, as many passengers, especially ladies, are very nervous on the subject of fire arms. Where guns are not cased they should be placed in the baggage car. Of course, the above rule would not apply where a company occupied a special coach.

"Yours truly,

"A. M. CLELAND, G. P. A."

2. As the rule established by the railway companies forbidding the taking of guns into the passenger coaches, is a reasonable one and made for the

benefit of the patrons of the road, members of the Minnesota National Guard traveling on railway trains on duty, enroute from or to their stations, which involves the carrying of their rifles, will cheerfully comply with the request of the conductors to place them in the baggage car.

By order of the Commander-in-Chief,

E. D. LIBBEY,
Adjutant General.

REPORT
OF THE
AUDITOR OF STATE

TO THE
LEGISLATURE OF MINNESOTA

FOR THE
FISCAL YEARS ENDING JULY 31, 1903, AND JULY 31, 1904.

TRANSMITTED TO THE LEGISLATURE OF THE
THIRTEENTH BIENNIAL SESSION, 1905.

ROSTER OF STATE AUDITORS.

W. F. Dunbar	From May 24, 1858, to Jan. 1, 1861.
Charles McIlrath	From Jan. 1, 1861, to Jan. 13, 1873.
O. P. Whitcomb	From Jan. 13, 1873, to Jan. 10, 1882.
W. W. Braden	From Jan. 10, 1882, to Jan. 5, 1891.
Adolph Bierman	From Jan. 5, 1891, to Jan. 7, 1895.
Robert C. Dunn	From Jan. 7, 1895, to Jan. 5, 1903.
Samuel G. Iverson.....	From Jan. 5, 1903, to January, 1907.

OFFICIAL FORCE OF THE DEPARTMENT, 1904.

Samuel G. Iverson.....	Auditor and Land Commissioner.
A. W. Thompson	Deputy Auditor.
Claudius Bomback	Accountant.
Mathew J Desmond	Clerk Auditing Department.
W. A. Cowing	Clerk Auditing Department.
George A. Morrow	Clerk Auditing Department.
Wilson L. Gould	Clerk Auditing Department.
Claude S. Brown	Land Clerk.
R. H. L. Jewett.....	Assistant Land Clerk.
Frank G. Pracna.....	Clerk Land Department.
Harvey H. Snure	Clerk Land Department.
Joseph E. Osborne	Clerk Land Department.
Ada J. Iverson	Stenographer.
Daniel E. Elliott	State Land Examiner.
Thomas Fitzgerald	State Land Examiner.
Lafayette Shaw	State Land Examiner.
F. A. Wildes	Inspector of Mines.

STATE OF MINNESOTA,
OFFICE OF AUDITOR AND LAND COMMISSIONER.

To the Legislature: .

GENTLEMEN:—I have the honor to submit the following report, showing the transactions of the state treasury and the business of this department for the fiscal years ending July 31, 1903, and July 31, 1904, also the proceedings of the State Board of Equalization for the years 1903 and 1904, and abstracts of the real and personal property assessments as equalized by the state board.

SAMUEL G. IVERSON,
State Auditor and Ex-Officio Commissioner of the State Land Office.

REPORT OF THE AUDITOR OF STATE

AND EX-OFFICIO COMMISSIONER OF THE STATE
LAND OFFICE FOR THE

TWO FISCAL YEARS ENDING JULY 31, 1904.

PERMANENT TRUST FUNDS.

The proceeds from sales of pine and other timber, minerals, and agricultural lands in the past two years have added the following amounts to our permanent trust funds:

Permanent school fund.....	\$1,662,088.60
Permanent university fund.....	33,603.42
Internal improvement land fund.....	51,891.88
State institutions fund.....	215,560.46
Swamp land fund.....	41,383.82
Total	<u>\$2,004,528.18</u>

The statements following show the total accumulations from all sources, and the investments in those funds.

PERMANENT SCHOOL FUND—JULY 31, 1904.

ACCUMULATIONS.

Sales of lands.....	\$11,294,333.76
Amounts paid on forfeitures, right of way, etc.	182,427.84
Sales of pine timber.....	3,542,636.75
Mineral leases and contracts.....	181,762.27
Royalty on iron ore.....	415,747.10
Profits on sales of bonds.....	361,569.94
Total	<u>\$15,978,477.66</u>

BIENNIAL REPORT

INVESTMENTS.

Cash in treasury.....	\$44,459.36
Land contracts (including \$1,833,920.44, transferred internal improvement land contracts)	5,715,136.31
Bonds as follows:	
Alabama consols, "A" 5 per cent.....	494,200.00
Alabama consols, "B" 5 per cent.....	54,000.00
Alabama consols, "C" 5 per cent.....	16,000.00
Alabama funding (\$143,000) 4 per cent.....	140,755.00
Delaware, 3 per cent.....	4,000.00
Massachusetts, 3½ per cent.....	2,595,000.00
Massachusetts, 3 per cent.....	300,000.00
Minnesota capitols, 3 per cent.....	2,140,000.00
Minnesota, school district, city, county and townships, 4 and 5 per cent.....	2,359,496.99
Louisiana, 4 per cent.....	150,000.00
Minnesota funding, 3½ per cent.....	144,000.00
Tennessee, 4½ per cent.....	270,000.00
Utah, 3¼ per cent.....	100,000.00
Virginia (\$1,635,000), 3 per cent.....	1,451,430.00
Total	<u>\$15,978,477.66</u>

PERMANENT UNIVERSITY FUND—JULY 31, 1904.

ACCUMULATIONS.

Sales of lands.....	\$807,844.05
Amounts paid on forfeitures, right of way, etc.	14,971.91
Sale of pine timber.....	492,823.28
Mineral leases and contracts.....	43,657.00
Transfer from state institutions fund.....	7,292.73
Transfer from internal improvement land fund	150.00
Profits on sales of bonds.....	900.00
Total	<u>\$1,367,638.97</u>

INVESTMENTS.

Cash in treasury.....	\$25,125.04
Land contracts (including \$86,763.48 trans- ferred internal improvement land con- tract)	313,768.88
Bonds as follows:	
Alabama consols, "A" 5 per cent.....	42,800.00
Delaware, 3 per cent.....	131,000.00
Massachusetts, 3 per cent.....	130,000.00
Minnesota funding, 3½ per cent.....	226,000.00

Minnesota county and villages, 4 per cent...	143,200.00
Tennessee, 4½ per cent.....	80,000.00
Virginia (\$355,000), 3 per cent.....	267,245.05
Experimental farm	8,500.00
Total	<u>\$1,367,638.97</u>

INTERNAL IMPROVEMENT LAND FUND—JULY 31, 1904.

ACCUMULATIONS.

Sales of lands (including amount of transfers to school and university fund).....	\$2,732,349.66
Amounts paid on forfeitures, right of way, etc.	20,939.65
Sale of pine timber.....	114,148.94
Mineral leases and contracts.....	650.00
Total	<u>\$2,868,088.25</u>

INVESTMENTS.

Cash in treasury.....	\$32,416.92
Land contracts	227,577.58
Bonds as follows:	
Louisiana, 4 per cent.....	23,000.00
Virginia (\$55,000), 3 per cent.....	52,093.75
Railroad adjustment bonds, destroyed.....	2,533,000.00
Total	<u>\$2,868,088.25</u>

STATE INSTITUTIONS LAND FUND—JULY 31, 1904.

ACCUMULATIONS.

Sales of lands.....	\$295,072.86
Amounts paid on forfeitures, right of way, etc.	853.78
Sales of pine timber.....	181,616.99
Mineral leases and contracts.....	35,394.42
Royalty on iron ore.....	1,527.49
Total	<u>\$514,465.54</u>

INVESTMENTS.

Cash in treasury.....	\$7,529.33
Land contracts	221,956.21
Bonds as follows:	
Louisiana, 4 per cent.....	38,000.00
Minnesota capitols, 3 per cent.....	150,000.00
Virginia (\$100,000) 3 per cent.....	96,980.00
Total	<u>\$514,465.54</u>

SWAMP LAND FUND—JULY 31, 1904.

ACCUMULATIONS.

Sales of lands.....	\$27,485.52
Right of ways.....	2,977.55
Sale of pine timber.....	49,524.58

Total	<hr/> \$80,685.23

INVESTMENTS.

Cash in treasury.....	\$8,789.92
Land contracts	21,895.31
Minnesota capitol certificates, 3 per cent....	50,000.00
Total	<hr/> \$80,685.23

STATE FINANCES.

On pages 57 and 63 will be found a summary of the actual receipts and disbursements of the state treasury for the past two years. For the year ending July 31, 1903, the receipts from all sources into all the funds were \$8,053,396.05, and the payments from all funds were \$8,116,683.62; for the year ending July 31, 1904, the receipts were \$3,757,325.09, and the payments \$9,438,320.63. The total receipts for the two years were \$16,810,721.14, and disbursements \$17,555,004.25. These figures show that \$744,283.11 more was paid out than went into the state treasury. Fortunately the large balance on August 1, 1902, enabled the treasury to stand this severe strain and have \$1,467,313.84 still on hand at the close of business July 31, 1904.

The revenue fund, being the one from which all the general expenditures of the state government is paid, attracts our special attention. The total receipts into that fund for the two years were \$10,000,043.64, and the payments \$10,362,707.63. An excess of \$362,663.99 of disbursements over the income. This was likewise possible owing to the good balance on August 1, 1902, and we had \$355,169.40 on hand July 31, 1904.

As will be learned from an examination of the fund statements, the treasury is in a fairly healthy condition at the present time. It must be readily seen, though, that our funds, and especially the revenue fund, cannot stand a repetition of the experience of the past two years. The new appropriations of the last legislature, added to those fixed by standing laws, were slightly heavier than the fund could bear, but we were able to meet and pay every demand notwithstanding. We were greatly aided in this matter by the liberal use of the latitude given us by chapters 199 and 233 of the general laws of 1903, which authorized an overdraft of \$600,000.00, and gave us the right to borrow \$250,000.00 more if it were needed. Both laws were utilized to the limit.

The statements following contain the estimated receipts and disbursements for 1905, 1906 and 1907. Among the receipts it will be especially noted that the revenue tax rate for the years 1906 and 1907 is placed at one-half of one mill (one-half of the present rate), and the railroad taxes have been reckoned at the increased rate of four (4) per cent. If only three (3) per cent. is paid when the tax is due, and the other one (1) per cent. is hung up by litigation, it will be necessary to cut out \$600,000 from the item of railroad taxes in 1906 and 1907 and add at least \$400,000 to the state tax. With this explanation it was considered advisable to prepare the estimates on the presumption that the increased railroad taxes would be promptly paid when due.

The estimates show a surplus of \$63,062.90, \$526,000.00, \$366,000.00 respectively for the three years, or in all \$955,062.90. Out of that sum the deficit of the past two years should be, at least partially, made up. That would leave a comparatively small surplus to extend over three years. The ordinary demands upon the revenue fund are increasing yearly. Extraordinary appropriations, such as for new buildings, should be kept inside of \$500,000.00, or there will be no escape from an increase in the tax levy. The legislature, which makes the appropriations, must also provide the funds to pay them. A careful consideration of these figures will convince the legislature that rigid economy is imperative at this coming session.

ESTIMATED REVENUE FUND.

RECEIPTS.	1905.	1906.	1907.
Cash on hand July 31, 1904.....	\$255,169.40

OUR TAX LAWS

After many years of active agitation on taxation, something has at last been accomplished. The people, to whom was referred the increase in the railroad gross earnings tax, have endorsed it by a large majority. This will add about \$600,000 a year to the public revenue. It was by far the most important of our recent tax problems, and its adoption is extremely gratifying. It has taken years of insistent work to reach this result. Let us, therefore not despair in well-doing, though the results come so slowly. It is said that it took over twenty years in one state and seventeen in another of continuous discussion before their tax codes were finally acceptable. Reforms come slowly. The people are very conservative, and it is well that they are so; they cling tenaciously to old, time-tried landmarks; when changes in these are offered they must be shown and satisfied that the new idea is better. Our Minnesota tax law has been criticised by many for years, and yet the state and local governments have gotten along fairly well under it, with only a few amendments since the state constitution was adopted.

It is far from perfection and yet it possesses very many excellent features. If critics wished, they could find many commendable features. The machinery for assessment and equalizing, from the listing by the citizen, through town or village, county and state boards of review, is certainly built with the intention of giving property owners a fair and equitable assessment. In detail its provisions are neither too drastic nor too elastic. This is certainly true of those proceedings covering the assessment of real property and items of visible or tangible personalty. It is true our law does not bring out or uncover money, credits and personalty of that nature for taxation. It is doubtful if such property ever has been or ever can be successfully assessed and taxed on a par, valued dollar for dollar, with tangible property. To do so would, in many cases almost amount to confiscation. But the entire system should not be condemned, because it has a few weak places.

The interesting and instructive debates on this subject in the extra legislative session of 1902 will be remembered. Propositions were put forth to amend the constitution; one aiming to remove all restrictions or limitations, giving the legislature a so-called "wide open" or "free rein" policy; the other extended the legislative authority along advanced or modern lines in taxation, and yet fixed certain limitations which seemed wise and prudent. This last proposition was enacted, but it failed to receive the necessary majority vote at the general election in 1902. It is regrettable that this amendment failed. Under it franchises could have been assessed and taxed either on a valuation or gross earnings basis; a registry tax on mortgages and other credits would have been possible, and when the time for it should come, a wisely graduated income tax would have been authorized, and other excellent practical propositions in taxation. The agitation and discussion of recent years have been profitable. The work can be taken up again with clearer and better ideas of what is best for Minnesota. By proceeding cautiously, first, getting the proper constitutional authority, then building a revenue measure which shall be sound, firm and true to all interests, great and small, we shall all have added much to the public welfare.

Meantime, a few amendments could be made to the present law. The schedule of items for assessment as given in section 1524, statutes 1894,

should be changed, many of the articles named, such as working oxen, melodions and knitting machines are very antiquated; the specific or gross earnings taxes paid by corporations, such as telephone, sleeping car companies, and others should receive attention. As railroad companies will from now on pay four per cent, why should not other public utility corporations be given at least a corresponding increase? Your attention is earnestly directed to this, in the hope that such corporations may be made to contribute their just proportion to the public revenue.

RAILROAD TAXES

On pages 70 to 76, inclusive, will be found detailed statements of the taxes paid by railroad companies for the two fiscal years just closed. For the year ending December 31, 1902, the earnings in Minnesota were \$66,193,731.99, on which the taxes were \$1,922,204.22; for the year ending December 31, 1903, the earnings were \$66,800,130.55, and the taxes \$1,971,662.67. In addition to these amounts \$176,561.53 was collected during the two years upon special reports of the Public Examiner and the Railroad and Warehouse Commission, from errors or omissions in statements of earnings heretofore made by some railroad companies, covering a period of several years (pages 75 and 76)..

The law just ratified by the people increasing the tax to four per cent will first take effect upon business in the year 1905. The taxes will be due and payable on March 1, 1906.

TAXATION OF IRON LANDS

The land on the Missabe and Vermillion iron ranges has been assessed in St. Louis county this year at over forty-two million dollars. This includes both the producing or operating mines and the non-shipping properties. In addition to the above there are several developed mines on the range in Itasca county assessed for quite large amounts. Applying the average rate of taxation of the towns where these properties are situated, around two and a half per cent, we can safely estimate that the total taxes on iron lands is not far from one million dollars for the present year.

FIRE INSURANCE TAXES

In 1903 the sum of \$125,000 was received from the two per cent gross premium tax on fire insurance companies. In 1904 it was \$132,000. In 1903, under the law then in force, \$45,449.32 was distributed among the city fire department relief associations and villages that had an organized fire department. That represented one-half of the tax collected in the cities and villages.

Chapter 20, general laws 1903, amends the former law, by providing that the entire two per cent of tax collected on business in municipalities maintaining an organized fire department shall be distributed and paid to the fire department relief associations or cities or villages, as the case may be. Under that law \$91,197.51 was distributed in 1904.

Much can be said in favor of the wisdom of the legislature in thus strengthening and building up local organizations to combat fires, it is a substantial benefit to nearly all property owners.

The state revenue, on account of taxes on fire insurance companies is very low, as the new law giving practically three-fourths of the amount collected for fire protection makes a heavy draft on the treasury. The tax should either be reasonably increased, generally, or a tax specially laid on premium receipts in those municipalities having organized fire departments to be distributed according to our present law. This would very materially relieve the state treasury, and maintain the present high standard of fire departments in the cities and villages of the state.

TAXATION OF INHERITANCES

Three legislatures have passed laws for the taxation of inheritances; chapter 293, general laws 1897, chapter 255, general laws 1901, and chapter 3, general laws extra session 1902. The supreme court found the first two laws to be unconstitutional, and the Attorney General held the 1902 law invalid for the same reason. The state constitution sanctions a tax upon the transfer of property by inheritance; the supreme court has pointed out the defects in the former legislation. A bill can surely be framed which will stand the test of litigation. Such a law once established, even with a very moderate rate of taxation, would become a liberal revenue producer.

ASSESSMENTS

The following table shows the assessments of property for the two years 1902 and 1904 as fixed by assessors, county boards of equalization and the State Board of Equalization. It shows a total increase of \$86,021,144.00 and of nearly 25,000 in the number of persons assessed for personal property. This is a very gratifying exhibition, showing not alone the rapid development and material increase in the wealth of our people, but the good work done by assessors and county and state equalization boards. Personalty represents about twenty (20) per cent of the assessed valuation of taxable property.

REAL PROPERTY.

	1902	1904
Assessment returned by assessors.....	\$532,505,982.00	\$605,178,151.00
Assessment returned by county boards.....	580,197,977.00	652,797,783.00
Assessment returned by state board.....	647,253,261.00	701,066,777.00

PERSONAL PROPERTY.

	1902	1904
Number persons assessed	243,685	268,301
Returned by assessors	\$129,929,309.00	\$147,563,856.00
Returned by county boards	130,100,175.00	149,684,181.00
Returned by state board	137,240,064.00	169,447,692.00

Total real and personal property as fixed by State Board of Equalization:

1902	\$784,493,325.00
1904	870,514,469.00
Increase	<u>\$86,021,144.00</u>

UNIFORM ASSESSMENT BOOKS

On January 12th, 1904, the following circular letter was sent to the county auditors which is self-explanatory, relating to uniform assessment books.

"You will recall that for some time there has been an agitation with a view to adopting uniform assessment books. There is no difference of opinion about the necessity for uniformity, but the precise system or form which would be acceptable to all counties in the state is not so easily arrived at. The executive committee of the County Auditor's Association, with which you are familiar, at a session held in the fall of 1902, considered this question and the majority believed that the so-called "Renville System," or assessments by school districts, was preferable to the township system.

"Mr. Johnson, the public examiner, and myself at that time were inclined to hold with the above committee and favored the school district plan. Before adopting so radical a change, one which would nearly revolutionize the primary steps in our tax laws, it was decided to invite a general discussion among the various county auditors of the state, they being in close touch with the actual work. The discussion has now proceeded for some months and it is apparent that the auditors are far from being united upon either plan. It also brings to light the fact that there are several different forms or systems of the township plan, and likewise several of the school district plan, which are now in use throughout the state. Each auditor is familiar with his system and is disinclined to view any other with favor, unless it can be conclusively shown that it is very much better.

"When the importance of this matter is considered we may be pardoned for having acted cautiously before arriving at a determination. After giving the matter full and fair consideration, I have decided that no change shall be made at this time in the assessment districts, as proposed. In this decision Mr. Johnson, the public examiner, concurs with me. This does not mean that the agitation should cease, for we certainly desire uniformity in our tax assessment books. But before adopting one form or another, let us be certain that the change will be acceptable and deemed wise by at least a majority of the county auditors."

STATE TAX PROPERTY

Real estate on which the taxes remain unpaid and unredeemed, finally becomes what is termed the "absolute property of the state." Under the old law such property can be disposed of under section 1616, statutes 1894 (Sec. 101, chapter 1, G. L. 1878). Under that law such sales were either public or private under the direction of the State Auditor. The last annual sale of taxes under the old law was held in May, 1901. Those tracts bid in for the state and unredeemed became the absolute property of the state three years thereafter or in May, 1904.

Chapter 2, General Laws, Extra Session 1902, makes a radical change in the manner of disposing of the "absolute property of the state." Title 5 of that law outlines the procedure, which is, in substance, that there shall be an annual public sale of such unredeemed real property; the sale shall be advertised in a newspaper in the county, and shall be conducted by the State Auditor, or if he so directs, by his deputy or the county auditor; purchasers at such sale shall receive a certificate of purchase; upon the presentation of the certificate to the governor he shall be authorized to execute a deed in the name of the state to the party purchasing, or legal successor. The first sale held under the 1902 law was on the second Monday in May, 1902, and three years from date of sale becomes the state's property. Thus after May, 1905, such tracts must be disposed of under title 5, as stated above. There are doubtless many tracts in every county in the state still delinquent for the taxes of 1901 and prior years. It is suggested to the legislature that in view of the radical change in the law to be soon in operation, an inducement be given the owners of such property to pay up their arrearages by allowing them to redeem at less than the legal amount fixed by law. The state and local municipalities, would unquestionably receive larger revenue by a fair moderate concession, and property owners would be given an opportunity to remove tax encumbrances. Ordinarily such concessions to tax delinquents should not be encouraged, but under the present condition it seems advantageous to all interests to do so. When the 1902 law becomes operative there will be fewer delinquents, for under it the real estate is actually sold at public sale without redemption and the buyer receives a deed signed by the governor. Tax deeds issued under this law will be regarded as more binding and thus it will naturally follow that there will be fewer delinquents.

STATE DEBT.

\$959,000.00 remains unpaid of the refundment bonds of 1891, The two-tenths of a mill tax levied for the payment of principal and interest is ample to wipe out the entire debt in about six years.

NEW STATE CAPITOL.

The financial transactions with the Board of State Capitol Commissioners up to July 31, 1904, have been as follows:

The sums credited to the capitol from the two-tenths of a mill upon the taxable valuation, as provided in section 7, chapter 2, general laws 1893, are as follows:

1895	\$127,783.20
1896	128,250.00
1897	112,789.13
1898	114,120.00
1899	115,850.00
1900	117,016.66
1901	117,603.32
1902	120,196.12
1903	152,352.04
1904	157,376.96
Total	<u>\$1,263,337.43</u>

In addition to the above sum, certificates of indebtedness, under chapter 232, general laws of 1899, have been issued and sold to the amount of \$2,850,000.00. Of this sum \$500,000.00 have been called in and paid, leaving \$2,350,000.00 outstanding at this date. These bear three per cent interest payable from the revenue fund. Nearly all of the certificates are held and owned by the permanent school fund. Chapter 121, general laws 1903, raised the limit of total cost of the building and grounds to \$4,500,000.00. This sum it is believed is sufficient to complete and furnish the new state house.

STATE PRINTING.

It is gratifying to be able to report that the state printing accounts are all settled to date and that the contracts for printing the five classes for the coming year are made at a very moderate price. The legislature of 1901 appropriated \$30,000 for the year ending July 31, 1902, and \$60,000 for 1903, or \$90,000 for the two years. That sum was far from enough. The printing commission asked for and received from the legislature of 1903 a deficiency appropriation of \$85,000, believing that it would be enough to pay all demands for printing up to the end of the fiscal year. That sum also fell far short. At the end of the fiscal year, July 31, 1903, there were still about \$45,000 of unsettled claims, including the manual of 1903, which had to be met from future allowances. The legislature of 1903 appropriated \$40,000 for the fiscal year 1904 and \$75,000 for 1905, or \$115,000 for the two years. The printing obligations incurred prior to August 1, 1903, had to be met, and they have all been paid out of the \$115,000. The old claims so paid amount to \$44,702.06. That left a balance of about \$70,000 with which to pay all the printing for two years for the several state departments and the legislative printing for the session of 1905. As stated above every old demand has been paid, and the current work needed by the departments and all reports have been printed as required by law, including the primary and general election work of this year. All this has been accomplished, and there remains in the appropriation at this date (December 1, 1904) about \$34,000. The balance remaining will hardly pay for the work needed up to July 31, 1905. The legislative manual of 1903 cost \$21,401.12, and for 1905 it will probably be the same. If a special appropriation is made to take care of the manual it is not improbable that we can get along without any other deficiency appropriation this year.

The commissioners of State Printing, composed of the Secretary of State, State Treasurer and State Auditor, feel that the showing we have been able to make to the legislature is most satisfactory. The state should get good work and should pay a fair commercial price for it, and no more, and the money should be on hand to pay the bills promptly when presented. The printing contracts for each of the past two years have been very advantageous to the state, and it is hoped that future contracts may be equally favorable.

STATE BOUNTY FOR BEET SUGAR.

Chapter 205, general laws 1895, as amended by chapter 307, general laws 1899, offers a bounty of one cent a pound on sugar made within the state from beets, sorghum or other yielding canes or plants grown in the state. The

legislature of 1899 appropriated \$40,000 for each of the years 1899 and 1900 to pay the bounty. On December 7, 1900, State Auditor Dunn requested the opinion of Attorney General Douglas on the constitutionality of the law. On December 31, 1900, the attorney general replied:

"In my opinion it is beyond the power of the legislature to grant a bounty for the manufacture of beet sugar within the state, and that chapter 307 of the laws of 1899 is invalid."

The Minnesota Sugar Company of Minneapolis presented a claim for bounty under the law on sugar manufactured in 1900. Payment was refused in January, 1901. Early in the year 1903 the claim for bounty was again presented to this department, and a formal demand for payment made. The claim was again disallowed and payment refused. The Minnesota Sugar Company then made application to the supreme court for an order to show cause why a writ of certiorari should not issue directed against the State Auditor. The petition was granted on June 12, 1903, and the writ was issued requiring the State Auditor to transmit to the supreme court the entire record of the office relating to the matter. (90 Minn., page 6.) The case was ably presented by counsel for both sides and on December 4, 1903, the court decided that the law was unconstitutional.

The decision is of special importance as it defines two heretofore unsettled legal propositions in our state.

First: It discusses official acts of the State Auditor which are reviewable by the court, and wherein a writ of certiorari may issue;

Second: It fixes the limitations upon the legislature in appropriations which offer bounties in aid of private manufacturing enterprises.

The opinion contains exhaustive discussion of these important subjects, therefore the syllabus is given in full. The case can be found in Vol. 97, N. W. Rep., p. 454:

MINNESOTA SUGAR COMPANY, vs. IVERSON, STATE AUDITOR.

(Supreme Court of Minnesota. December 4, 1903.)

CERTIORARI—WHEN LIES—STATE AUDITOR—SUGAR BOUNTY—CONSTITUTIONAL LAW.

"1. The State Auditor refused to allow and issue warrants for the sugar bounty provided for in laws 1895, p. 490, c. 205, as amended by laws 1899, p. 389, c. 307, for the year 1900, upon the ground that both of the above mentioned acts are in direct violation of sections 5, 10, art. 9, of the constitution. Held, that when the Auditor refused to issue the warrants for the reasons before stated, he acted in a quasi judicial capacity, and in a manner affecting the rights or property of a citizen analogous to the manner in which they are affected by proceedings or decisions of the courts, and that certiorari will lie in such a case to review his acts, and to determine the rights of a petitioner to the bounty before mentioned.

"2. Laws 1895, p. 490, c. 205, as amended by laws 1899, p. 389, c. 307, providing for the payment of certain bounties to manufacturers of sugar from beets grown in this state, is unconstitutional, because in violation of the provisions of sections 5, 10, art. 9, of the fundamental law.

"3. An unconstitutional statute is simply a statute in form, is not a law, and under every circumstance or condition lacks the force of law. It is of no more saving effect to justify legislative action taken under it than as though it had never been enacted. No moral obligation on the part of the state can be predicated upon an unconstitutional statute.

"(Syllabus by the Court.)"

RECEIPTED SUB-VOUCHERS.

On March 21, 1903, the following circular letter was sent to the head of each state department:

"Section 321, statutes of Minnesota, 1894, provides, that the State Auditor shall examine and adjust all claims against the state before the issuance of his warrant upon the treasury.

"I ask your co-operation in the matter contained herein relating to all contingent and other expenses incurred by you as head of your department, or by those employed under your direction in the service of the state, thus assisting me to properly comply with the above law.

"All expense items incurred after the first of next month amounting to one dollar or more must be represented by a duly receipted sub-voucher. There will be no exceptions, whatever, to this rule. It applies to postage, railroad fares, hotel and other expenditures. The voucher or claim presented here for payment should contain an itemized statement of expenses, whether less or more than one dollar, with sub-vouchers attached for the larger sums. The voucher should be verified by the party presenting it, and should be approved by the head of the department.

"Items of one dollar or more not covered by a receipted sub-voucher will be cut out.

"A cheerful compliance with these requirements as to your own and all other expenses of your department will be greatly appreciated.

"Blank receipt books will be furnished by this department."

With hardly an exception the above request has been cheerfully adopted.

EXPERIMENTAL FORESTRY.

The last congress passed an act making a grant of 20,000 acres of land to Minnesota for experimental forestry purposes. The law is as follows:

"An Act to Grant to the State of Minnesota Certain Lands for Forestry Purposes:

'Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled. That the state of Minnesota, through its state land commissioner and state forestry board, is hereby authorized to select for experimental forestry purposes not to exceed twenty thousand acres of vacant public land within said state not heretofore withdrawn or reserved, and as nearly as practicable in one body and from lands which, according to the field notes of the government surveyors, are third or fourth rate; which lands are hereby granted to said state of Minnesota for forestry purposes: *Provided*, That said selection of lands shall have the approval of the Secretary of the Interior: *And provided further*, That no tract shall be included in this grant which, in the opinion of the Forester of the United States Bureau of Forestry, should form a part of any United States forest reserve.

"Sec. 2. That it shall be the duty of the Secretary of the Interior to make accurate lists and plats of all such lands, and transmit the same to the governor of said state, to cause patents to be issued to the said state therefor conveying to said state the fee simple of said lands: *Provided*, That this act

shall not prejudice any adverse claim to any of said lands; *And provided further*, That the land hereby granted shall be cared for and managed by the state of Minnesota, and shall be used for forestry purposes only; and if the said land, or any part thereof, shall cease to be so used the said lands or such part shall revert to the United States and become a part of the public domain.

"Approved, April 28, 1904."

Lands have been selected such as the law contemplated, and patents for them will no doubt soon be received. They are in a body a few miles north of Ely in St. Louis county. The legislature will no doubt recognize this gift from congress by aiding the State Forestry Board in its good work. Reforestation should be tried in Minnesota, and the state should encourage it generously. Forestry experiments are not only very interesting, but may become of material value to coming generations.

FOREST COMMISSIONER.

The counties in this state that contained natural pine forest have an area of 22,000,000 acres. There are now 11,000,000 acres of natural, large or small, dense or scattered, pure or mixed forest. As showing the demands upon our forest products many carloads of tamarac timber—stump and root—were shipped the past year to Maine for ship knees. There are probably two billion feet of spruce which will be manufactured into pulp. It is estimated that there remain about twenty billion feet of pine of the value of one hundred million dollars, but which will be cut in about fifteen years.

The forest preservation law of 1895 (amended in 1903), makes the State Auditor Forest Commissioner and authorizes him to appoint a deputy, to be known as Chief Fire Warden. It makes town supervisors fire wardens, and the Chief Fire Warden may appoint fire wardens for unorganized territory. Fire wardens must post warning notices; caution careless persons against setting fires, and go and control or extinguish any forest or prairie fire, summon help if needed; report each fire to the chief fire warden and in very dry weather patrol their districts. Their pay is \$2 a day for not exceeding fifteen days in a year; but on an average they do not receive a fifth part of this maximum amount. There are 660 organized towns—some including several congressional townships—and about 200 unorganized, having fire warden service. In all the fire warden service covers an area of about 20,000,000 acres. The chief fire warden sends instructions through the chairmen of town boards and directly to fire wardens in unorganized territory. Accounts for service are paid by the county commissioners. The state pays the counties two-thirds of the amount.

Fire warden service was thrust upon town supervisors on grounds of necessity and economy. They are liable to regard it as of secondary importance; and it naturally requires energy and zeal on the part of the chief fire warden to maintain interest. To prevent fires is the leading feature.

The Chief Fire Warden is charged with the enforcement of the forest preservation law. He can mass such fire warden force as may be available at any special point to suppress fires. He must investigate the forests and the means taken for forest reproduction. He must disseminate information on forestry.

Our fire warden service has not yet had to stand the test of any such

universal drought as that of 1894, nor such probably as have recently occurred in some other states. There have, however, been some extremely dry seasons in different portions of the state. According to the reports of fire wardens the damage done by forest fires during the ten years the law has been in operation has not exceeded \$32,000 a year. The system should be strengthened where possible so that it will be able to cope with a drought like that of 1894.

The law carries an annual appropriation of \$5,000, to be expended under direction of the Chief Fire Warden in preventing and extinguishing forest fires in dry and dangerous seasons. In nearly ten years only about \$8,000 of that money has been expended. The rest of it was left in the treasury.

The amount appropriated in the general appropriation act for forest preservation has been only \$5,000 a year. This has to pay the salary and office expenses of the Chief Fire Warden, the printing of 4,000 copies of his annual report, and two-thirds of the expense which counties incur in paying fire wardens and those who help extinguish fires. This amount has been found much too small, and I recommend that for each of the next two fiscal years the appropriation be \$10,000.

The duties of the Chief Fire Warden are important and responsible. Gen. C. C. Andrews has intelligently and energetically filled this position since the law was enacted. The salary is now \$1,200 a year. It should be increased to 1,800 a year.

LOAN AND TRUST COMPANIES.

The following loan and trust companies, in compliance with law, have on deposit in this office first mortgage securities in amounts as below stated:

The Minnesota Loan and Trust Company.....	Minneapolis....	\$105,800.00
The Minnesota Title Insurance & Trust Company, Minneapolis....		100,000.00
The Minneapolis Trust Company.....	Minneapolis....	63,000.00
The Northwestern Trust Company.....	St. Paul.....	102,000.00
The St. Paul Title & Trust Company.....	St. Paul.....	100,750.00
The Security Trust Company	St. Paul.....	101,800.00
*The St. Paul Trust Company	St. Paul.....	50,000.00

Many of the trust companies are now depositing first mortgage coupon railroad bonds, which is permissible under chapter 273, general laws, 1903. The bonds are clean and clear of any endorsements and payable to bearer.

As this department is not provided with adequate protection for such securities they have been kept and are now kept in the vaults of a trust company in St. Paul. No criticism can be made on the quality of such securities, but it will be readily seen that they impose a responsibility on this department not contemplated by the trust company law, and for the safety of which the vaults are not equipped. The law should be amended to place trust company deposits with a state officer having the necessary vault equipments, or changed to permit registered bonds only, in that class of securities, to be used for that purpose.

*Withdrawn by order of court Nov. 22, 1904.

INTERNAL IMPROVEMENT FUND.

This fund is derived from interest on investments in the internal improvement land fund, and also from receipts from the federal government for five per cent upon the cash sales of public lands within the state of Minnesota.

The balance in this fund on December 1, 1904, is \$48,969.23.

There are unpaid appropriations made by the 1901 and 1903 legislature amounting to \$23,400. This makes the balance, amounting to \$25,569.23, available for appropriations to be made by the 1905 legislature. The fund is used exclusively for assisting counties in building roads and bridges.

LIVE STOCK SANITARY BOARD.

In an opinion given to the Statute Revision Commission, the Attorney General finds that the standing appropriation made for the payment of damages caused by killing diseased horses and cattle, by order of the Live Stock Sanitary Board, has been repealed. Acting accordingly, this department has not issued any warrants for that purpose since the opinion was rendered. The repeal was clearly an oversight. As the law expressly directs the board to destroy such animals, the innocent owners should not suffer through a pure inadvertence. A deficiency appropriation should be made by the legislature to pay claims that have and are being incurred, and a sufficient allowance for such claims in the future.

MINNESOTA WAR CLAIMS ON ACCOUNT OF THE WAR WITH SPAIN.

Status July 31, 1904.

The state made disbursements and furnished equipment amounting in the aggregate to the sum of \$190,839.45.

Under the acts of congress, approved July 8, 1898, and March 3, 1899, provision was made to reimburse the states and territories for expenses incurred by them in aiding the United States to raise and organize and supply and equip the volunteer army of the United States for the war with Spain. Under these acts there has been filed with the Auditor for the War Department at Washington, D. C., seven separate installments of claims covering the above amount as follows:

First Installment: Transportation, pay-rolls, subsistence, equipment and general expenses—

Amount of installment (as corrected)	\$137,565.21
Amounts audited and payments received by the state—	
On account of transportation.....	\$5,467.15
On account of pay-rolls	18,933.30
On account of subsistence, equipment and miscellaneous expenses	47,320.22
Total payments	<u>\$71,720.67</u>

Balance on account of pay-rolls suspended by the auditor for the war department transferred to third, fourth and fifth installments	2,939.94
Value of ordnance and ordnance stores and quartermaster supplies received in kind under the acts of replacement.....	59,653.80
Amount disallowed by the auditor for the war department	3,250.80
	<hr/>
	\$137,565.21

Second Installment: Expenses incurred in providing for the return to the state of sick soldiers of the 12th and 14th regiments, Minnesota volunteers, and for their transportation from St. Paul to their respective homes, and their return to the station designated for their muster out of the service of the United States, and for the payment of expenses incurred for their care and treatment, including medical attendance, medicines, nurses and board, during the period in which they were unable to perform military duty, also for transportation furnished the enlisted men of the said 12th and 14th regiments, Minnesota volunteers, during the furlough period—

Amount of installment	\$23,780.27
-----------------------------	-------------

This installment was disallowed by the auditor for the war department on account of the expense being incurred after the muster of the regiments into the service of the United States. At the last session of congress the act approved March 3, 1899, was amended by an act approved April 27, 1904, which act provides for reimbursement for stores furnished or expenses incurred, or transportation furnished after the troops raised had been mustered into the service of the United States, which should cover the amount of this installment, except the amount expended for transportation furnished the enlisted men during the furlough period, which will require further legislation.

Third, Fourth and Fifth Installments: Balance of pay due the enlisted men of the 1st and 3rd regiments infantry, National Guards, who reported at Camp Ramsey for muster into the 12th, 13th and 14th regiments, Minnesota volunteers, who were accepted and mustered into the said regiments, and for the officers and enlisted men who so reported and who were rejected by the medical examiner or mustering officer—

Amount of installments (including \$2,939.94 transferred from first installment).....	\$31,494.48
---	-------------

Payment has been received by the state for the amounts charged in the third, fourth and fifth installments.

Sixth Installment: Balance of pay (service for longevity) due to officers of the 1st, 2nd and 3rd regiments infantry, National Guard, who reported at Camp Ramsey for muster in the 12th, 13th and 14th regiments, Minnesota volunteers—

Amount of installment	\$642.60
-----------------------------	----------

The amount charged in this installment has been disallowed by the auditor for the war department.

Seventh Installment: Miscellaneous expenses—

Amount of installment	\$296.83
-----------------------------	----------

Payment has been received by the state for the amount charged in this installment.

Recapitulation—

Total amount of claims	\$190,839.45
Amounts allowed and payments made to the state	\$103,511.98
Value of ordnance and ordnance stores and quartermaster stores received in kind....	59,653.80
Amount disallowed	27,673.67
	\$190,839.45

The Adjutant General has kindly furnished the foregoing statement. The items making up the sum \$27,673.67 were disallowed because the several acts of congress do not authorize payment of them. The expenses of the hospital train ordered by Governor Clough to bring home the sick soldiers of the 12th and 14th regiments, from the Southern field hospitals, account for the larger part of the rejected claims. Our delegation in congress will urge the passage of a bill to reimburse the state.

BOARD OF INVESTMENT.

The following is a record of the meetings and the business transacted by the Board of Investment, created under section ten (10), chapter 163, general laws 1895. Owing to the large investments made in the purchase of certificates, issued by the Board of State Capitol Commissioners, referred to elsewhere in this report, the board has not been called upon to invest funds to any extent in other securities.

September 8, 1903. Present: Governor Van Sant, Chief Justice Start, Hon. Greenleaf Clark, president Board of Regents, State University; State Treasurer Block and State Auditor Iverson.

Meeting called to consider the question of disposing of Alabama state bonds, which mature 1906. Capt. J. J. McCurdy was invited to be present, and made a statement to the board respecting the purchase of Alabama bonds, and the sale of Massachusetts bonds in their stead. After due consideration, it was unanimously decided not to dispose of the Alabama bonds at the present time.

December 5, 1903. Present: Governor Van Sant, Chief Justice Start, State Treasurer Block and State Auditor Iverson. Meeting called to consider the advisability of investing funds now on hand. State Treasurer was instructed to invite proposals from owners of state bonds to the amount of \$100,000.00.

February 2, 1904. Present: Governor Van Sant, State Treasurer Block and State Auditor Iverson. Having opened bond proposals, pursuant to resolution of December 5, 1903, Mr. Block reported that he had mailed blank proposals to 53 companies, dealers in state bonds. The advertised hour having arrived, several gentlemen representing bidders were present at the meeting. Fourteen proposals were received. On motion an adjournment was taken to enable the State Treasurer to tabulate the proposals, before deciding upon the purchase.

February 3, 1904. Present: Governor Van Sant, State Treasurer Block, State Auditor Iverson. Met for the purpose of further considering the offering of bonds in the proposals opened yesterday. Parkinson & Burr, of Boston, and Blodgett, Merritt & Co., of New York, each offered \$50,000 of Massachusetts three per cent bonds, maturing 1931, at 97¼, which appeared to be the lowest offer on such bonds. On motion, unanimously carried, the above offers were accepted, and the State Treasurer instructed to wire the firms to that effect and complete the purchase.

The constitutional amendment voted upon at the general election of 1904 appears to have been adopted by the people. This increases the limit of the amount that can be loaned to counties, cities, villages, townships and school districts to 15 per cent of the assessed real property valuation. It is extremely doubtful if the proceeds from the sale of agricultural lands and from timber and minerals will hereafter be adequate to meet the demands made upon the state for loans, under chapter 83, general laws 1897. These bonds issued by our own municipalities certainly offer a very attractive and secure investment for our trust funds. On the other hand it enables our municipalities to obtain funds for public improvements at a very low rate of interest (4 per cent), and upon exceedingly advantageous terms and conditions.

AGRICULTURAL LAND SALES.

During the two fiscal years ending July 31, 1904, there were sold 99,673.16 acres of school lands for \$653,494.28, or an average price of \$6.55 per acre; 547.11 acres university lands for \$4,197.19, or an average price of \$7.67 per acre; 6,837.25 acres of internal improvement lands for \$50,625.78, or an average price of \$7.40 per acre; 22,316.36 acres of state institutions lands for \$142,521.36, or an average price of \$6.38 per acre; and 3,505.59 acres of swamp lands for \$27,485.52, or an average price of \$7.84 per acre; making a total sale of all classes of lands amounting to 132,879.47 acres for a total amount of \$878,324.13, or an average price of \$6.60 per acre. On pages 2, 6, 9, 11 and 12 of this report will be seen statements showing the counties wherein the lands are located, that were sold the past two years. The counties are mostly in the northern part of the state. The sales were made in most cases to actual

settlers or parties intending to locate and build homes. The prices obtained compare favorably with sales previously made and this fact is significant. By offering our lands no faster nor in greater amounts than the localities demand, we can hope for very satisfactory results.

SWAMP LANDS.

The grant of swamp and overflowed lands to Minnesota, under the act of congress approved March 12, 1860, will soon be completed. The adjustment of selections made by surveyors general heretofore has been rapidly pushed forward by the officials of the interior department. During the past year alone patents were received for 149,831 acres. From the date of the grant up to June 30, 1904, 5,187,361 acres have been selected. The general land office has rejected 596,707 acres, leaving 4,590,655 acres. Of that amount 4,189,372 acres have been patented to the state. There remains, therefore, 401,283 acres, from surveys heretofore made, for which patents may be expected. On page 18 of this volume will be found a table showing grants of swamp lands made by the state. It will be seen that 3,417,961 acres in all have been granted by the legislature, of which 525,000 were for our state institutions and 2,892,961 to railroad companies. Those grants are all filled substantially except 100,930 acres still due the state institutions grant and 102,644 acres to the Duluth and Iron Range Railroad. If the grants were all filled we would still have of land actually patented to the state 771,411 acres. Adding the 401,283 acres which have been surveyed and selected, but not yet patented, we have a round surplus of 1,172,694 acres. There are forty-four townships surveyed, or under contract to be surveyed, in which the swamp lands have not yet been selected, and ten townships not under contract. These fifty-four townships will no doubt add considerable to the acreage. It is not unreasonable to believe that 1,400,000 acres will remain after all grants are filled, not counting the 140,000 acres which we will receive from the Indian reservation near Leech lake, referred to elsewhere in this report. There will therefore be more than 1,500,000 acres to be divided between the school fund and the educational and charitable institutions of our state, under the provisions of section 2, article 8, of the state constitution. Adding to this the 525,000 acres granted to state institutions in 1865, as shown by the table on page 18, we have 2,025,000 acres of our swamp land saved for the people of the state.

This is indeed a magnificent gift from the national congress. The gift, however, carries with it certain duties and obligations which must be met and performed. The greater portion of the lands lie in the counties of St. Louis, Itasca, Aitkin, Cass, Beltrami and Roseau. Pioneer home builders are rapidly settling the desirable lands in those counties. Our large bodies of swamp lands scattered over nearly every township are in a state of nature, almost without value and, in fact, retard the development of those districts. These lands contribute nothing whatever to the local cost of government. Bridges, roads and school houses must be built, but the state swamp lands do not contribute. Therefore many appeals are heard for help, asking that the lands be sold or drained. Those selected for the state institutions grant cannot be sold for less than school lands, five dollars per acre (Sec. 4030, statutes 1894). Other swamp lands can be sold for one-third less than five dollars per acre. (Sec. 2, Art. 8, Const.) No sales have been made, however, for less than five dollars an acre.

It will be readily seen that the management of our swamp lands is one of the serious problems confronting us. A start should be made looking to a comprehensive system of drainage of these lands. It will cost considerable, but it is safe to reckon that every dollar spent in drainage will be returned ten-fold. Not alone will it be profitable; it will be doing justice to those sturdy, hard-working settlers who are endeavoring to establish homes in those northern frontier townships. The work should be started. Chapter 90, general laws 1901, creates a drainage commission and clothes it with ample authority. An appropriation should be made sufficient to make a general survey of the country effected and to begin the work of reclaiming the lands.

SWAMP LAND SELECTIONS.

After so many years of uncertainty and controversy, it is a great satisfaction to be able to report that our method of identifying or selecting swamp lands under the grant of congress, approved March 12, 1860, has been placed on a sound basis, and restored to the method which prevailed from the date of the grant to December 13, 1886.

In 1860 the Commissioner of the General Land Office requested the state to select one of two ways for designating the lands. First, whether the state would be willing to abide by the field notes of the surveys, as designating the lands; or, second, if the state preferred to furnish evidence of the character of the lands from an examination and survey conducted on its own account. On January 26, 1861, Governor Ramsey sent a special message to the legislature on the subject. In section 48, of chapter 62, of the general laws 1862, we find the following: "The surveys on file in the Surveyor General's office are hereby adopted as the basis upon which will be accepted the swamp lands granted to the state by act of congress of March 12, 1860." That was the undisturbed rule until 1886, when the Secretary of the Interior set aside the old agreement and permitted contests to be made in opposition to the field notes of surveys and went so far as to order that at the hearing the burden of proof was upon the state to prove the character of the land. Such was the rule until March 16, 1903, when the Secretary of the Interior abrogated the order of 1886 and reinstated the main features of the method accepted by the state in 1862. Deeming the matter of great importance the order is given complete.

MINNESOTA SWAMP LAND CIRCULAR.

DEPARTMENT OF THE INTERIOR.
GENERAL LAND OFFICE,

Washington, D. C., April 4, 1903.

REGISTERS AND RECEIVERS OF UNITED STATES LAND OFFICES,

State of Minnesota.

SIRS: There is appended hereto a copy of departmental order of March 16, 1903, giving specific instructions relative to the adjustment of the swamp land claim of the state of Minnesota, and for the disposition of existing contests or controversies involving the claim of the state under the grant.

You will observe that this latest departmental order, in effect, abrogates the circular of December 13, 1886 (5 L. D., 279), in so far as the state of Minnesota is concerned, and you will note that by direction No. 5 all contests

or controversies which had been carried to a hearing—and by this is meant where testimony had been submitted and where decision had been rendered by you prior to March 16, 1903—are to be disposed of as though the direction contained in said departmental order had not been made, viz.: under the decision in case of Lachance vs. State of Minnesota (4 L. D., 479), and the circular of December 13, 1886 (5 L. D., 279).

All other contests or controversies will be disposed of under directions Nos. 1 and 2, and where dismissed under direction No. 2, the departmental order should be cited as authority for the action taken.

You should strictly observe the requirements of the appended departmental order, and use due diligence in disposing of all swamp land controversies now pending before your office.

Very respectfully,

Approved:

A. E. HITCHCOCK,
Secretary.

J. H. FIMPLE,
Acting Commissioner.

DEPARTMENT OF THE INTERIOR,
Washington, March 16, 1903.

THE COMMISSIONER OF THE GENERAL LAND OFFICE.

SIR: Upon consideration of a protest by the state of Minnesota the department, by letter of January 14, 1902, directed your office to suspend all proceedings looking to the determination of the character of certain lands, claimed by the state under the swamp land grant (12 Stat. L., 3), otherwise than by an examination of the field notes of survey, until the department had considered and given final determination to questions involved in the further adjustment of the swamp land grant to that state. Time was allowed all parties in interest within which to show cause why the grant should not be adjusted upon the field notes of survey alone, and your office was directed to transmit to the department such showings and briefs as might be filed within the time allowed.

With your letter of March 20, 1902, were transmitted briefs on behalf of the state, and also other briefs on behalf of Morris Thomas and several other persons who appear to have contests now pending in the local office at Duluth against the state's claim to some of these lands.

The act of March 12, 1860, *supra*, was a present grant, and operated to transfer, as of that date, to the state of Minnesota, all of the swamp and overflowed lands in the state rendered thereby unfit for cultivation, it only being left to identify the lands granted. There were some exceptions in the grant, but they are not here material. The state and the United States were equally interested in the matter of identification. Your office, on May 21, 1860, acting under the direction of the Secretary of the Interior, addressed a communication to the governor of Minnesota, that portion which is pertinent to this inquiry being as follows:

Preliminary to the adjustment of the business with the several states affected by the general grant, two propositions were submitted designed to obtain a plan or basis which should be adhered to and be conclusive in the settlement of the great interests involved, as follows:

First. Whether the states would be willing to abide by the field notes of the surveys as designating the lands, or

Second. Whether in the event of their nonacceptance of these notes as the basis the states should furnish evidence that any lands are of the character embraced by the grant.

The privilege of accepting one or the other of these propositions having been accorded to those states, the same is extended to Minnesota.

Having experience in the adjustment of the grant with those states, it is respectfully suggested by this office that by the adoption of the first proposition the state will receive all the lands to which she is justly entitled, as the field notes of the surveys are very full in characterizing or giving description to the soil; and an important reason for doing so is that she will incur no expense in selecting or designating the lands.

July 14, 1860, the then governor of the state addressed a letter to the Commissioner of the General Land Office, containing, among others, the following inquiry:

If the state of Minnesota should elect to be governed in the selection of the lands allotted to her by the notes and plats of survey in the land office, would the general government also be concluded by this selection? Would a patent issued to the state preclude individuals thereafter taking any of these lands, upon showing that in fact they were not swamp lands?

To this inquiry the Commissioner of the General Land Office, on October 8, 1860, responded as follows:

In reply to your letter of the 14th ultimo, relative to the lands granted to the state of Minnesota, as swamp * * * I have to state, by whichever of the two modes submitted the lands may be selected, the general government reserves to itself the right to supervise the selecting, and holds them subject to its control until they shall have been approved and patented to the state.

Following this correspondence, the state legislature provided, by section 48 of an act of March 10, 1862 (general laws of Minnesota for 1862, chapter 62), that—

The surveys on file in the surveyor-general's office are hereby adopted as the basis upon which will be accepted the swamp lands granted to the state by act of congress of March 12, 1860.

Communicating this action by the state legislature to the department, the governor of the state said:

I have therefore to inform you that the state of Minnesota will, under the act of Congress of March 12, 1860, * * * abide by the field notes of the government surveys, designating the lands, etc., and I have therefore to ask that you will direct immediate steps to be taken to confirm in Minnesota the title to these lands.

December 4, 1877, the Secretary of the Interior, in a letter to your office (see Copp's Public Land Laws, Vol. 2, pp. 1081 et seq.), said:

The action of the legislature of Minnesota, approved by the chief executive of the state, was, as far as the power existed in the grantee, a selection by her of the lands granted. All that remained to be done in the premises, where the lands had been surveyed prior to March 12, 1860, was merely the clerical duty of preparing the lists of lands thus inuring to the state, and the issuing of a patent for the same—duties that in the ordinary course of the administration of the laws pertaining to our land system would take much time. * * *

This department invited the state to adopt a certain method of ascertaining what lands inure to her under a grant. The state having complied with the suggestion exhausted her power to act in the premises, and the department is barred from asserting that, because of its laches and delay in identifying the lands, the selection has not been made within the prescribed time. The government is not in a position to raise that question.

* * * * *

The principles announced in this letter should govern in the adjustment of the swamp grant to the state of Minnesota.

In the case of the Northern Pacific Railroad Company vs. State of Minnesota, decided April 19, 1884 (11 Copp's Land Owner, 75), the land involved was claimed by the company under its grant of July 2, 1864, and the joint resolution of May 31, 1870, and apparently belonged to the company, if it did not pass to the state under its swamp land grant. The field notes of the government survey of the land, on file in your office, recited that the lands were swamp. The company denied that it was in fact swamp, and asked that a hearing be ordered to determine its character. The department, referring to part of the correspondence hereinbefore set out, said that the practice had been to abide by the field notes of the government survey in determining the state's title to the land, and that—

The subsequent grant to said company must be held subject to the adjustment of the swamp grant to the state in the manner provided as aforesaid.

This method of adjustment was adhered to from the time of its adoption until after April 7, 1886, when the department, in the case of Lachance vs. The State of Minnesota (4 L. D., 479), reversing the action of your office in following the field notes in that instance, said:

As I understand the matter, the acceptance of the field notes as the basis of settlement simply makes them prima facie evidence of the condition of any given tract; it is not tantamount to an assertion that the field notes shall govern always and absolutely, irrespective of demonstrated fraud or falsity, but it places the burden of proof of such fraud or falsity on the party alleging it. The grant in question was a grant of swamp land; and if it can be proven affirmatively that any given tract was not swamp land at the date of the grant, then such tract did not pass by the grant. * * *

Under the prevailing practice since that decision either a settler, an applicant to enter the land under the public land laws, or the United States may question the return of the United States surveyors as to the character of lands in this state, and especially in the Duluth district. On the other hand, there does not seem to have been any regulation promulgated or procedure adopted whereby the state may question the surveyor's returns. So that the practical operation of the scheme of adjustment now in force has been to deny to the state title of some lands which were returned by the surveyor as swamp, and at the same time permit the United States to retain all lands returned by the surveyor as not swamp land, without regard to the fact whether they were swamp or not. The state has always protested, and is still protesting, against this scheme of adjustment as manifestly inequitable. It insists, and always has insisted, that its swamp grant should be adjudicated upon the field notes of survey alone.

Under the swamp land grant, as indicated in repeated judicial and departmental decisions, the duty of identifying—that is, determining—what lands were, at the date of the grant, swampy or overflowed in character, and therefore granted to the state, rests upon the Secretary of the Interior and the subordinate officers of the land department, acting under his direction. It is impossible to select any method of ascertaining what lands pass under this grant which will not be attended with some difficulty in its execution. The usual differences of opinion on the part of those who have had observation of the land; the difference in the condition of the lands at different seasons of the year; the uninhabited condition of the country at the date of the grant; the changes which have occurred by reason of the settlement and improvement of the country; the reduction of the timber areas; the improvement in drainage—all tend to make an absolutely perfect identification of the lands which were swamp in 1860 impossible, and to so far burden with expense the matter of their identification as to render impracticable, if not preclude, resort to some methods of identification.

In evident anticipation of this, and with a view to the selection of the best and most practical plan, but not to obligate himself or his successors by any agreement partaking of the nature of a contract, the Secretary of the Interior, through the Commissioner of the General Land Office, submitted to the several states two methods of identifying the swamp lands, and suggested as the more practical method that of identifying them by the field notes of the public surveys. The lands had to be surveyed, and observations and notes of their character in this respect could then be made with but little difficulty and with no additional expense. This method was a fair one for

the United States, because the surveyors were to be selected and paid under the direction of the Secretary of the Interior. Their work was to be done under his direction, and to the satisfaction of the Commissioner of the General Land Office. The state of Minnesota assented to this plan of identification or adjustment, not by way of contract, but because the Secretary of the Interior, the Commissioner of the General Land Office, the governor of the state, and the legislature of the state concurred in the opinion that it was the best and most suitable method. They agreed upon it in the sense that they all concurred in the view that it was the best thing to do. It was uniformly followed for a quarter of a century, and during that time operated quite generally to the satisfaction of the United States and the state.

This method was then departed from, as shown in the Lachance case, not because its original selection had proved to be unwise, or because it had been found by experience to operate injuriously, but because the United States had become lax in its methods of obtaining surveys of its public lands and notations of their character. These surveys are wholly within the control of the Secretary of the Interior and his subordinates; but instead of relying upon his power and ability to prevent the miscarriage and injury which would result from lax surveying methods, by exacting of the surveying officers a faithful performance of their duties, and withholding approval of their surveys and payment therefor until the work was competently and faithfully performed, the Secretary of the Interior, without the concurrence of the state, and against its objection, adopted for the time being the plan of identifying swamp lands by examinations by agents in the field and by contests and hearings in the land department. This he could unquestionably do, under the conviction that the new method was a better one than the one originally adopted. Sixteen years of practice under the new rule has shown it to be cumbersome, expensive, slow, litigious, and generally unsatisfactory. It is indispensable to the orderly and early adjustment of the swamp land grant to this state that this new method be discarded. The actual operation of the two methods has demonstrated the superiority of the plan first tried.

Upon full consideration, it is therefore directed, with respect to the adjustment of the swamp land grant to Minnesota:

(1) That all existing contests and controversies between the state and an actual and bona fide homestead or preemption settler, whether the settlement was made before or after the survey, be disposed of under the rule announced in the Lachance decision, that being the rule under which the settlement was effected and the contests or controversies begun.

(2) All existing contests or controversies in which there is no claim of actual and bona fide homestead or preemption settlement will be disposed of under the original plan of following the field notes, there being nothing in such contests or controversies which would equitably entitle the claimants adverse to the state to have the contests disposed of under the rule announced in the Lachance decision.

(3) In all future surveys of public lands in Minnesota care must be taken by your office and by the surveyor general's office to put the surveys in the hands of capable and honest surveyors, and to exact from them a faithful and efficient performance of their duty, including a faithful and accurate notation of the swampy or nonswampy character of the lands surveyed. After such surveys have been completed in the field, and at the earliest suitable time, especial care must be taken to have them carefully inspected with refer-

ence to the accuracy of the surveyor's notation respecting the character of the land, with a view to having such surveys and notations perfected and corrected, where deficient or inaccurate.

(4) All contests or controversies hereafter begun respecting the swampy or nonswampy character of lands in Minnesota, whether heretofore or hereafter surveyed, must be determined by the field notes of the survey.

(5) No contest or controversy which has heretofore been carried into a hearing and decision will be in any manner disturbed or affected by these directions.

(6) Where there are two or more surveys of the same lands, that survey which has been finally approved, and which is recognized as the existing or subsisting official survey, is the one to the field notes of which alone attention will be given hereunder; and, swamp land being generally the exception and not the rule throughout the public land states having a swamp land grant, and it being the practice in public surveys to make special notation of the swamp lands rather than of the dry or nonswampy lands, the silence of the field notes and surveyor's return respecting the character of the land will be treated as equivalent to a statement that the land is dry or not swampy.

(7) The best energies of the proper divisions of your office should be devoted to obtaining such accurate surveys and notations of the character of the lands which may be hereafter surveyed in this state as will obviate the existing cause of contest and controversy, and such energies should further be devoted to the early and correct disposition of all such pending contests or controversies, and to the prompt and careful prosecution of the adjustment of this grant, so far as the lands in the state have been surveyed.

The papers in this matter are herewith returned.

Very respectfully,

A. E. HITCHCOCK, *Secretary.*

Soon after the order of March 16, 1903, had been issued, many vigorous protests and complaints were lodged with the Secretary of the Interior, alleging that great hardships and injustice would be done numerous actual settlers who had settled or squatted upon swamp lands before the town was opened for entry. To enable settlers to protect their homes the Secretary modified his former order as follows:

Washington, D. C., March 12, 1904.

REGISTERS AND RECEIVERS, UNITED STATES LAND OFFICES.

State of Minnesota.

SIRS: For the protection of *bona fide* settlers, who allege settlement prior to the issuance of Minnesota swamp land circular, dated April 4, 1903 (32 L. D., 88), direction numbered (1) page 6, of said circular (32 L. D., 70), may be so construed as to class such cases among existing controversies between the state and an actual *bona fide* homestead settler; provided such settler, within ninety days after the filing of the plat, made proper homestead application for the land involved, accompanied with proper swamp land affidavit, respecting such of the tracts involved as the plats show to be swamp.

Very respectfully,

Approved:

A. E. HITCHCOCK,
Secretary.

J. H. FIMPLE,
Acting Commissioner.

The state of Minnesota does not wish to deprive any honest settler of his home. On the contrary, he will be protected by the state in the enjoyment of the fruits of his labors. Our state laws (Sec. 4035, G. Stat. 1894), expressly authorizes the governor to relinquish such lands when claimed by actual settlers under the government land laws. This law was passed in 1881, is still in force, and will be cheerfully employed by the officers of the state to assist actual home builders.

STATE SWAMP LANDS IN THE MISSISSIPPI CHIPPEWA INDIAN RESERVATION.

On October 24, 1903, a brief was presented to the Commissioner of the General Land Office in support of the claim of Minnesota to the swamp lands in the Mississippi Chippewa Indian reservation. A prompt consideration was urged on the department officials for the reason that several thousand acres of the land claimed by the state were included in the government timber sales advertised to take place on December 5th and 28th, 1903, at Cass Lake, Minnesota.

The Commissioner of the General Land Office referred the entire question to the Secretary of the Interior on November 14, 1903. On December 3, 1903, the secretary rendered his decision sustaining the contention of the state of Minnesota on every point. It is published in Vol. 32, page 328 of the Public Land Decisions. The decision is very concisely written and of so much value to our state that it is given below in full:

I am in receipt, by reference of November 14, 1903, of the letter of the acting commissioner of the general land office of November 13, 1903, respecting the claim made by the state of Minnesota that the swamp and overflowed lands within the Mississippi Chippewa Indian Reservation passed to the state under the act of March 12, 1860 (12 Stat. 3), and are not subject to disposal for the benefit of the Indians under the act of January 14, 1899 (25 Stat. 642), with request for my opinion upon the matter therein presented.

It appears from the papers transmitted that the lands in question were ceded to the United States by the treaty of February 22, 1855 (10 Stat. 1165), and remained unreserved public lands of the United States until the treaty of May 7, 1864 (13 Stat. 693). By the act of March 12, 1860 (12 Stat. 3), the provisions of the Arkansas swamp land act of September 28, 1850 (9 Stat. 519), were extended to the states of Minnesota and Oregon.

The uniform holding of the supreme court has been that the swamp land grant was one in present of all land then of the character granted, lacking only identification to complete the right of the state to the land so granted.

This construction is the one unvaryingly adhered to by the court from its decision in *Railroad Company vs. Fremont County* (9 Wall. 89), to the present time, in many fully-considered decisions, and is not longer subject of doubt or question. Upon similar facts, in state of Minnesota (27 L. D. 418), the department held that swamp lands within the White Earth Reservation passed to the state under its grant.

Title having passed to the state by the grant, the subsequent reservation did not affect the state's right, though it might delay the identification of the granted land. When such identification is made the right of the state becomes complete.

I am therefore of opinion that upon the facts presented lands, swamp and overflowed and unfit thereby for cultivation, not reserved or granted by the United States, March 12, 1860, passed to the state by its grant, and as property of the state are excepted from the provisions of the act of January 14, 1889. This does not include sections sixteen and thirty-six (see opinion of this date involving status of the four ceded sections in the White Earth Reservation).

Approved.

E. A. HITCHCOCK, Secretary.

Immediately following the decision those swamp tracts which had been included in the lists of the Cass Lake timber sale were withdrawn from sale and a few days thereafter were approved to the state by the Secretary of the Interior in approved lists numbered 153 and 154 special, aggregating 17,474.67 acres. Soon thereafter protests were received by the Commissioner of Indian Affairs from Major G. L. Scott, Indian agent at the Leech Lake agency, and others, claiming that the surveys and field notes were full of

errors, and that the lands embraced in special lists 153 and 154 were, in fact, high and dry pine lands. The protests were submitted to the Secretary of the Interior who, on March 12, 1904, directed that an exhaustive examination of the surveys be made by an examiner of surveys in the field, with special reference to the swampy or nonswampy character of the lands in question. The final patenting of the lands was suspended awaiting the results of the examinations. Permission was granted for a representative of the state to accompany the special examiner appointed for that purpose. Mr. O. H. Case, a practical surveyor, was appointed to represent the state. The work was commenced in June, 1904, and still goes on. There are about 35 townships in the reservation to be examined. The original surveys were made about thirty years ago, but we believe the character of the land has not materially changed since that time. It would be surprising if the examinations of the lands in the field, now going on, do not disclose some errors in the surveys, but probably not enough to effect the result to any great extent. Minnesota has only asked for the lands rightfully belonging to it, under the act of March 12, 1860. The Secretary of the Interior, as quoted above, confirms the state's request. When the examinations are finished and the lands identified, the state will receive title to those lands shown to be swamp. When the status of the tracts carrying pine timber has been fixed the approval and patenting of the remaining lands will be soon completed. The state will receive in all about 141,000 acres in the Chippewa of the Mississippi, White Oak Point and Winnebegoshish reservations, which are included in the secretary's order. The lands are in the townships bordering on and near Leech Lake, one of the most beautiful of our many attractive lakes. Large areas are low, wet marsh lands, but with the application of modern drainage methods they will, in a very few years, become productive agricultural lands. Railroads are now traversing this area which brings them within the salable class of lands as soon as they have been drained. The drainage of these lands should receive the early attention of the legislature.

LOT NO. 1, SECTION 6, TOWN 58 1-2, RANGE 17.

More than ten years ago it was discovered that, when the surveys were made, a triangular tract of land about five miles long, lying between town 58, range 17, and town 59, range 17, had been entirely overlooked. It was surveyed in 1894 by a regularly appointed deputy United States surveyor. The tract contained 156 1-3 acres and was called town 58 1-2, range 17. In the field notes and plat of the survey nearly all of Lot No. 1 of section 6 appeared to be swamp land. Owing to the failure on the part of the surveyor to comply with certain requirements of the departments as to fixing and marking corners the survey was not approved. It remained so until March 14, 1901, when the same deputy surveyor returned to the land with instructions to complete the survey according to the rules of the department. His work was finished and the survey accepted by the general land office October 12, 1901. The field notes of the last work of the deputy surveyor in 1901 did not mention any swamp land, presumably because he was not called upon to re-examine the character of the land. On January 15, 1902, a government plat of the town was filed in this department. There being no selection list for the

swamp land shown by the plat State Auditor Dunn requested the Surveyor General, Hon. E. S. Warner, to prepare the list. On the following day, January 16, 1902, list No. 129 was duly filed, containing the selection of lot 1, section 6. On January 14, 1902, the township was opened for entry at the Duluth land office, at which time homestead applications were made by William R. Wasson for lots 1 and 2, section 5; Charles E. Fay for lots 1 and 2, section 6; Pearl H. Smith for the whole of town 58 1-2, range 17. On the same day Peter E. Bradshaw, as attorney-in-fact for F. A. Hyde & Company, a corporation, applied to have their Sierra Forest Reserve scrip selection of this land made by them on September 28, 1900, adjusted to cover all the descriptions contained in the plat of town 58 1-2, range 17. On June 26, 1902, the general land office rejected all the homestead applications, because they were subsequent to the scrip entry of Hyde & Company. Charles E. Fay appealed, and on November 11, 1902, the Secretary of the Interior affirmed the decision. There remained then only the claim of the state to lot number 1 of section 6 in opposition to the Hyde & Company scrip selection of the entire 156 1-3 acres. The state claimed it as swamp land under the act of congress of March 12, 1860. Hyde & Company denied that it was swamp land, based no doubt on the so-called resurvey of 1901. In March, 1903, the Secretary of the Interior issued the order that the field notes of surveys in Minnesota shall be conclusive evidence of the character of the land. May 7, 1903, the general land office instructed Surveyor General Warner to review the facts upon which he, on January 16, 1902, based his selection of lot 1, section 6 for the state, and if he found his former action unfounded by the field notes of the survey he should so report. If, however, he still adhered to his former selection, he should certify a new list containing that lot. On June 24, 1903, General Warner decided that the tract was swamp land and again certified swamp land list No. 129 to the State Land Commissioner.

Hon. W. B. Douglas, Attorney General, conducted the proceedings on behalf of the state before the department of the interior. A hearing was held before the Commissioner of the General Land Office, in December, 1903. Both sides were represented by able attorneys, who presented lengthy briefs supplemented by oral arguments. On January 20, 1904, the Commissioner of the General Land Office decided in favor of Minnesota. Hyde & Company appealed. On July 20, 1904, the Secretary of the Interior affirmed the decision sustaining the state's contention that the field notes of the survey of 1894 must determine the character of the land, and not the correctional survey made under special instructions in 1901. No motion for reargument or review was made by contestants, so the case was closed and the state of Minnesota won. It was a great victory. Attorney General Douglas was ably assisted in the conduct of the case by Charles W. Somerby, then his assistant.

The patent to the state was duly executed October 19, 1904.

The title is now beyond dispute. This famous lot contains but 36 65-100 acres. It is situated near well known iron mines which perhaps furnishes the motive for this strenuous contest. It now belongs to the state institution fund. On December 30, 1902, a prospecting mineral lease on this lot was issued to Mabel Evans, and on November 20, 1903, a fifty-year mineral contract was issued to her. Coryate S. Wilson, Esq., of Duluth, as attorney for the lessee of the state, rendered valuable assistance in the proceedings before

the interior department. This swamp land contest has been set out quite fully as it is regarded as a celebrated case. The state won on the merits of the case. The land was certainly swamp in 1860 and is so today.

SALES OF PINE TIMBER.

On pages 24 to 37 inclusive will be found statements in detail showing the amounts collected from sales of timber cut under regular permits. Included in the statements are the trespass collections also. For the year ending July 31, 1903, \$333,758.41 was received and for the year ending July 31, 1904, \$677,981.29, a total for the two years of \$1,011,739.70. That is certainly a very gratifying result of two years of timber business. The prices obtained at the annual public sales were very satisfactory. The Surveyors General in their respective districts have co-operated with the state land department in the enforcement of the requirements of the law and as a result a good, fair scale of the merchantable pine timber was returned. The law places positive and stringent duties upon surveyors general and their deputies with regard to scaling timber cut upon state lands. They are all officers of the state and should be equally interested in a rigid enforcement of its provisions. Without such co-operation good results cannot be obtained. The cruisers of the state, however vigilant they may be, cannot do it all. The present law (chapter 163, G. L. 1895), is in the main practicable and is satisfactory. Some features are not easy to fulfill, but it is the law, and parties desiring to purchase timber from the state are presumed to know its requirements, and officers of the state will find complete protection and justification when standing squarely upon its provisions.

The law could be improved in one important matter. At present only one estimate and appraisal of the timber by a state cruiser or land examiner is required. Upon that one examination the state timber board is empowered to offer the timber for sale. It should be amended to absolutely forbid the sale of any timber until two separate and distinct estimates and appraisals have been made. This would, of course, add some to the expenses, but it would be economical in the end.

TIMBER TRESPASS.

It is the duty of every citizen wherever he may be, or whatever may be his station in life, to guard the property of our great trust funds from despoliation. The theft of timber from state lands is a crime against the children of the present and the generations still to come. Every tree stolen impairs our sacred school fund. For a century it has been the settled policy of the United States government to encourage popular education by giving generous grants of land for common schools to the states applying for admission to the Union. At first section 36 only in each township was given and later, about the time Minnesota was admitted, two sections, 16 and 36, were granted. The manner of disposal and care of the lands was left wholly to the several states. Our early law makers were prompt in surrounding our school lands

with almost every possible safeguard. The state constitution restricted the disposal to public sales and by statute the minimum price on agricultural land was made five dollars per acre. Those laws were framed with almost prophetic foresight of the future greatness of our school fund. Laws were also made for the sale of timber on those lands, and for punishing timber thieves. It was, no doubt, well known that timber on school lands was liable to be stolen, and that it would be a physical impossibility to keep an actual guard over our vast timber resources, for to do that would require an army of patrolmen. Therefore it was decided to pass a very stringent law for punishing the stealing of timber and arm the state land commissioner with power to enforce its provisions. It was believed by legislators, evidently, that the rigid penalties enacted, when enforced as contemplated, would be a sufficient safeguard. The present law, chapter 163, general laws 1895, is a great improvement over earlier laws on this subject, but on the whole it follows the main features of earlier legislation.

A rigid enforcement of the law compelling involuntary trespassers to pay two or three times the value of the timber on the stump will tend to make them more careful about their boundary lines and greatly discourage the repetition of such mistakes. And when timber has been wilfully taken with intent to steal, a confiscation of the timber, wherever found, and criminal proceedings against the trespasser will, we believe, stop such crimes entirely. Our state cruisers, though few in number, are representatives of the state government and carry special instructions to cause the arrest of every one caught in the act, and in other cases where conclusive proof is obtainable.

For the two years ending July 31, 1904, the sum of \$63,781.73 was collected from about 160 separate trespass cases. (See pages 22 to 37 inclusive, and page 53.) From a money standpoint the collections are generally satisfactory, but it is nevertheless deplorable that so much timber was taken by so many people without legal permit. It is confidently believed that in the future very little trespassing or timber stealing will be committed. After an experience of nearly two years in attempting to enforce the law in trespass cases, it can be stated that the law is in the main equal to the requirements. One criminal prosecution was made in Aitkin county. About 200,000 feet of timber was seized or confiscated, 75,000 feet of which was stolen from state school land. This was sold at public sale for \$1,459.78, under Sec. 40, Chap. 163, G. L., 1895. The trespasser was arrested, indicted by the grand jury, plead guilty at the trial, and was fined \$100 by the court.

There is, however, one suggestion which it is hoped the legislature will consider and adopt as an amendment to this law. Under section 38 of chapter 163, G. L. 1895, the State Land Commissioner alone is authorized to compromise and settle trespass cases. This should be amended by placing such compromises wholly in the hands of the board of timber commissioners, created by section 18 of the same chapter. That board, consisting of the Governor, State Treasurer and State Land Commissioner, could sit as a court, with the Attorney General as legal adviser, and weigh the evidence and consider all the facts that may be presented. This amendment would greatly strengthen that portion of the law. The timber board at present is only required to designate the lands from which timber should be sold, and consider requests for time extensions of timber permits.

IRON ORE LEASES AND CONTRACTS.

During the year ending July 31, 1903, 504 prospective leases were issued at twenty-five dollars each. Fifty-seven fifty-year contracts were issued. The receipts from these, with annual payments of \$100 each on contracts, previously issued, amounted to \$30,793.00. For the year ending July 31, 1904, 229 leases and 15 contracts were issued which, with annual payments, amounted to \$16,765.00. For the two years \$47,558 (see pages 38 to 50). It should be remembered that these sums represent payments made merely for the privilege of prospecting and holding contracts on state lands. When actual mining and shipping of ore begins a royalty of twenty-five cents a ton must be paid. In addition to these payments, parties holding mineral contracts are required to pay taxes on the land, the same as if owned in fee.

All things considered our laws pertaining to state mineral lands are advantageous to the state. The royalty of twenty-five cents a ton is perhaps low in mines where the ore is of a very high grade, but as it applies to all ore of a merchantable quality it is fair. Some years ago an attempt was made to reduce the royalty. This may never be tried again, but to make it fixed and certain it might be well to put a clause in our state constitution providing that the royalty should never be fixed at a less than the present sum. It might then be raised on future contracts should the times and conditions in years to come make an increase justifiable. At this time there are 150 fifty-year mineral contracts in force, covering 16,360 acres. Of that acreage 2,040 are now bringing in royalty.

LAKE BED MINERAL LEASES.

For a year and a half the question of leasing the land under public waters or meandered lakes for iron ore mining purposes has been under consideration. Briefly stated the proposition is that the land lying beneath the waters inside the meander lines of such lakes is vacant, unoccupied and unclaimed, and therefore it of right belongs to the sovereign people of the state. The United States government surveyed and platted the land and the water; the water was dedicated to the public for its use and enjoyment, and the land specifically described up to the meander line has been disposed of under the government land laws. That leaves the land within the meander lines and underlying the water unclaimed and vacant. The proposition being a new one in Minnesota, it was thought best to delay the issuance of such mineral contracts until the rights of all parties could be made fixed and certain. People inclined to do so would not care to hazard much in opening and developing property under such a leasehold until it could be determined that the state, not only owned the land, but had the right to lease to private parties. On April 24, 1903, applications were presented for prospecting mineral leases on the land lying beneath the water of Longyear Lake, a meandered lake in town 58, range 20, St. Louis county.

The question was submitted to Attorney General Douglas on May 13, 1903, requesting an opinion from him on the two main points: First, if the State

Land Commissioner could issue leases upon such lands; and second, if the general law pertaining to leasing of state lands for mining purposes was applicable to lands of this nature. On May 18, 1903, the Attorney General replied that, in his opinion, the Land Commissioner was authorized to issue mineral leases or contracts upon the bed of meandered navigable bodies of water within Minnesota to the extent of so much of the bed as lies below the present low water mark. The opinion closes with the following: "While the question has never been determined in this state by the courts, and while it is not wholly free from doubt. I am of the opinion that the state should assert its rights in this matter, and thus enable all interested parties, the state, the applicant for the lease and the riparian owners to test this question."

The leases were accordingly issued on July 1, 1903, numbered 3744 and 3745, in the hope that interested parties would ask the courts to determine the question involved. The hoped for litigation on these leases did not materialize. It was then thought best to invite a judicial determination by a refusal on the part of this office to issue a prospecting lease on land under the waters of Snow Ball Lake in Itasca county. On February 26, 1904, a writ of certiorari was issued upon the petition of Richard F. Grant, that the supreme court may review and consider the action of this office in refusing to grant the lease applied for.

It was confidently hoped that the court would by this proceeding take up and decide the main questions at issue. The case was of much interest, and several parties asked permission to present briefs and arguments to the court. Hon. W. J. Donahower appeared for the state. On June 17, 1904, the decision of the court was rendered (100 N. W., 91). The decision quashed the writ for the reason that in refusing to issue the mineral lease, the State Land Commissioner acted neither in a judicial nor quasi-judicial capacity. His act was purely ministerial. The main questions at issue were not referred to. Nothing has been done since. This subject is of vast importance from a monetary standpoint, and of special legal interest. We can hardly comprehend the enormous income which the people of Minnesota would derive from this source should it be finally decided that the state did own and had the right to lease those lake bottoms, and if lands lying under waters of meandered public waters are the property of the people of the state, by right of sovereignty, then it naturally should follow that such ownership could and should be used for the benefit of the people. It should be remembered that the profits or income from such lands would go direct into the general revenue fund for the support of the state government. Thus every citizen of the state would be directly benefited. In this respect these lands differ from the school and other state lands, which are permanent trust lands, dedicated to special uses. The proposition appears perfectly practical. Mining for iron ore under streams and lakes can be carried on subject, of course, to the legal right of the public and riparian owners to enjoy the waters for navigation or other purposes. The surface of the waters would not be disturbed. The doctrine here advocated has been the subject of closely contested litigation, and many very able opinions have been rendered by courts in England and the United States confirming that right in the sovereign, which in England is the king or queen, and the state in this country. Our own supreme court has in several decisions sustained the underlying principle of this doctrine.

Many of the states of the Union have taken an active hold of this question and made good use of it.

The possibilities of great returns are greater in Minnesota than in any other state. There are numerous meandered lakes on the iron ranges on the north shore of Lake Superior, many of them very close to well known iron mines. The department has on file more than 100 applications for such leases. No real development of such property can be expected by lessees from the state until the rights have been fixed, therefore the leases have not been issued. A positive affirmative assertion of ownership and control by the legislature, representing the sovereign people, should be made at the coming session. It should also expressly authorize the State Land Commissioner to issue mineral contracts on such lake bottoms under the existing law. All rights of the public in and to the waters could be safe-guarded in the legislation.

COAL ON STATE LANDS.

On March 4, 1902, an iron ore prospecting lease, No. 3158, in the usual form was issued to Charles F. Hopkins for the term of one year. Before the expiration of the year application was made by the lessee for a contract to mine coal, requesting the State Auditor to fix terms and conditions, as provided in section 7 chapter 105, general laws 1895. On February 14, 1903, reply thereto was made that such a contract would be made under following terms: Royalty of 15 cents a ton for each gross ton mined and shipped; contract to terminate January 1, 1929; and the adoption of the law relating to iron ore contracts as to annual payments, minimum royalty, payment of taxes, etc. These conditions were not accepted by the lessee, and a request was made for the reference of the question to arbitration, as provided in said section 7. The question was accordingly submitted to Hon. George B. Edgerton, appointed by the State Auditor; Hon. Thomas Merritt, appointed by the lessee, and Hon. Fred A. Hodge, chosen by those two gentlemen. On June 23, 1903, the referees reported having agreed upon a royalty of 7½ cents for each gross ton mined and shipped and in other respects substantially the same as the terms and conditions of the fifty-year iron ore contract defined in said chapter 105. On July 10, 1903, such a contract was executed and delivered to the Quodenaw Development Company, the assignee of Mr. Hopkins, the original lessee. The land so leased was the southwest quarter of section 36, town 52, range 26, Aitkin county.

This department has not been advised of the progress of the explorations under this coal contract.

It is hoped that success may crown their efforts.

INSPECTION OF MINES ON STATE LANDS.

On pages 51, 52 and 53 will be found a detailed statement of payments into the state treasury from iron ore royalty. On several contracts royalty on the 5,000 ton minimum output is now being paid, though the mines have

not been actually opened for shipments. During the year 1904 three new mines on state lands became active shippers of ore, and the present indications are that 400,000 tons will be shipped this season.

When we consider the large acreage of school, university and state institution lands located on both the Missabe and Vermillion iron ranges, we can hardly form any idea of the enormous sums which will, in years to come, be derived from those lands. And let us not fail to recognize the wisdom and rare foresight which prompted our legislators and state officers, many years ago, to reserve the minerals, or withdraw such lands entirely from sale. It is, however, a safe estimate that the six active operating mines alone will, before they are exhausted, yield twelve million dollars in royalties, and the mines partially developed and those unexplored will add safely seventy-five millions more. These are fabulous figures, but when we hear of forty-acre tracts alone showing up from five to ten million tons of ore, it brings them within the range of probabilities. This will not all be realized in this nor the next generation, but the ore is there, which time will prove.

A moment's reflection will convince us that the care and management of this vast amount of property is of greatest importance. It is a large business in itself. When the state engages in a strictly business enterprise, like the owning of lands and leasing them for mining purposes, it must adopt those business rules and regulations employed by well governed private corporations or individuals. We have a law which safeguards the state and clothes the State Land Commissioner with sufficient authority. But the law alone is not enough. Every dollar of the royalty received goes into the state treasury to the credit of the permanent funds to which the lands belong, so it is only through an appropriation by the legislature from the general revenue fund that the money can come to enforce the law and keep such a watch on the property as a business man or corporation would do. During the past two shipping seasons a competent mine inspector, with an assistant, has been employed. The work of inspection has been largely confined to keeping an account of the cars loaded and shipped from the several mines, and an occasional survey of the manner in which the state's property was treated. This expense has been cared for from the \$12,000 appropriated for the general care and control of state lands. The needs will increase yearly and a reasonable sum should be specially appropriated for this purpose. It would be wise and economical from every point of view.

MISSABE MOUNTAIN MINE.

The northeast quarter of section 8, township 58, range 17, St. Louis county, belongs to the school fund. On March 2, 1892, a fifty-year mineral contract was issued on that property to the Missabe Mountain Iron Company, under provisions of chapter 22, G. L. 1889. On page 52 of this report will be found a detailed statement of the amount of ore that has been taken out of that mine, up to the end of the last fiscal year. It shows that 1,174,070 tons of ore has been mined and shipped, and \$292,580.17 royalty, at 25 cents per ton, has been paid into the state treasury.

The number of tons mined by years is as follows:

For the year 1892	None.
1893	125,340
1894	503,647
1895	111,037
1896	126,333
1897	140,942
1898	73,479
1899	None.
1900	76,871
1901	5,420
1902	5,131
1903	5,865

It will thus be seen that over one-half of the output was mined in 1893 and 1894, more than ten years ago. This was one of the first mines opened on the Missabe range. It was an open pit mine, at that time a great novelty in iron mining. The ore was likewise new, and had not yet attained the present standing with the iron and steel manufacturers of the country.

Adjoining the Missabe Mountain on the east was the Lone Jack mine, and immediately adjoining the Lone Jack on the south was the Ohio mine. These mines opened upon the same ore deposit, and the pit beginning with the Missabe Mountain property has been extended so that it now covers the Lone Jack and a large part of the Ohio. The pit is today 2,300 feet long, nearly a half a mile, 750 feet wide on an average, and in some places 170 feet deep, the average depth, perhaps, somewhere less than 100 feet. The fee of the Lone Jack and the Ohio was owned by different private parties. For some years after 1892 the Lone Jack was operated under a lease by the interests which controlled the Missabe Mountain. The Ohio was operated by parties entirely separated. The control of the properties changed hands several times, until in 1901 when the United States Steel Corporation succeeded to all the several interests. It will thus be seen that while it was in reality one large open pit, often referred to as the "Oliver mine," it comprised three separate and distinct properties, the Missabe Mountain, Lone Jack and the Ohio.

In 1895, 1896 and 1899 the state, during the shipping season, had a man employed with instructions to watch the interests of the state while mining was in progress, to see that the section corners were properly fixed and that the state received credit for all the ore mined on its land.

The law expressly authorizes the State Land Commissioner to enter upon the premises and make an inspection, survey and measurement of the quantity of ore that has been mined or removed. This had never been done. The peculiar situation of the property, three mines in one pit and mined by three distinct interests a larger part of the time, it was thought advisable to have the measurements made. In June, 1903, Mr. J. Henry Fitz, a civil engineer of St. Paul, was employed for that purpose. To make satisfactory measurements it would, of course, be necessary to make measurements of the entire pit. Special permission was obtained from the United States Steel Corporation to go upon the Lone Jack and Ohio properties for that purpose. The instructions given the engineer were: First to measure the capacity of the entire pit; second, the number of yards of earth removed

from each of the properties; third, the number of tons of ore of all grades taken out of each of the mines; fourth, the number of tons of low-grade ore removed from the mines and stored on the property; fifth, the number of tons of ore which the measurements show to have been mined and shipped from each of the properties.

Mr. Fitz with two assistants, began work on July 7, 1903, and completed the measurements in the field on August 7, 1903. Mr. Fitz obtained from Mr. John D. Lamont, an engineer at Virginia, the field notes, which enabled him to determine the elevation of the original surface of the mines. This was all the assistance Mr. Fitz obtained.

On May 28, 1904, Mr. Fitz made his formal report in detail to this department. It shows, with other information, that from the Missabe Mountain Mine he estimated 1, 513,997 tons to have been mined and shipped, and from the Lone Jack 1, 591,376 tons, and from the Ohio 655,066 tons. He also further estimated that the low-grade ore in the stock piles, of which there were eleven, aggregated 366,634 tons, of which 97,180 tons came from the Lone Jack and the remainder, 269,454 tons, from the Missabe Mountain mine.

In substance, the estimate made by Mr. Fitz indicated that from the Missabe Mountain mine 340,000 tons more had been mined and shipped than had been accounted and paid for to the state, and from the Lone Jack mine his estimate was 375,000 tons less than the amount claimed by the owners to have been mined and shipped from it, and from the Ohio mine 58,000 tons less than the owners had claimed for it. These figures quite naturally raised the presumption that an error had been committed in crediting the output of ore to the several mines. A copy of the estimates and report made by Mr. Fitz was furnished to the legal department of the United States Steel Corporation about the first of June. The general counsel for the company requested time to examine Mr. Fitz's report, and an opportunity to present an answer from the engineering department of his company, which he confidently believed would account for what appeared to be a discrepancy in the output reported for the Missabe Mountain mine. Early in August, 1904, accompanied by Governor Van Sant, a visit was made to the Missabe Mountain mine for the purpose of personally becoming more familiar with the property and its location. On November 21, 1904, a copy of the report or answer of the officials of the United States Steel Corporation was delivered to this office. It showed great care in its preparation, with a manifest desire to meet every point made by the engineer for the state. It purports to be made by the "Oliver Mining Company to the Governor and State Auditor of Minnesota, in answer to report made by John Henry Fitz, dated May 28, 1904."

The answer was at once handed to Mr. Fitz, with instructions to give it careful examination and make a reply of his findings. On November 30 Mr. Fitz submitted a reply in which he stated the conclusions which he had arrived at. It is given below in full:

LETTER OF MR. FITZ.

Copy.

St. Paul, Minn., Nov. 30, 1904.

HON. S. G. IVERSON, STATE AUDITOR,

St. Paul, Minn.

DEAR SIR: At your request, I have carefully examined the report on the Missabe Mountain Mine by Oliver Mining Company, with particular atten-

tion to statements, maps and estimates of the mining engineers in the employ of the company.

The report is very complete and places in your hands and in possession of the state a vast amount of information. The results obtained demonstrate the wisdom of your course of action.

On July 3rd, 1903, when I received the order from you to make an independent examination and survey of the Missabe Mountain Mine, not a single item of information contained in their report was known to me. No data of any description was furnished to me. No field notes of surveys, no maps, plans, cross sections, elevations of ore beds or any other information was accessible to me. In fact, with exception of the notes of original surface shown on Plate 1 of my report, not one word, figure or item of information contained in their report was known to me or offered to me during the progress of my survey, or at any other time, until after my report was completed and turned in to your office.

You have now in my report and in the report of the mining company, with maps accompanying, complete information of the state property which would probably never have come into your possession by any other means than the method you adopted.

I will not make any comments on my own report, but the mining company have admitted the accuracy of the surveys and have complimented the state upon the general character and completeness of the report.

The issue between us as engineers is not one of accuracy or of honesty, but of data and results.

Some of the criticisms they have made I deem to be misleading, and unless viewed in the light of facts would tend to discredit the whole work. The most of their criticism is based on the objection that I did not use certain facts, data, field notes, weights of ore, etc., in my computations and conclusions. My answer is that these data were not in my possession and could not be obtained except from the mining company, and they never offered them to me at any time, prior to the completion of my report.

The quantities obtained by my measurement were not guess work, but were the logical and mathematical result of the facts within my reach and the surveys which I made, and no man, whether surveyor, mining engineer, geologist or what not, using the same data could have arrived at any other result.

The estimates they produce in their report differ from ours, because they are based on original field notes showing the elevations of the surface of the ore beds. The mining company have offered to produce these original notes and I have no doubt that an examination of these notes, and of the methods employed in comparing the estimates, will show that the work was carefully done, and that the figures given can be relied on as being practically correct.

The evidence which they have adduced in support of their statements, and the character and number of the affidavits made by the engineers and others employed in the work, furnish testimony which cannot be gainsayed by any evidence which I can produce in opposition.

The general results must therefore be accepted as correct.

Respectfully,

JOHN HENRY FITZ.

We can realize the stupendous undertaking which confronted Mr. Fitz when he began the measurements of that mammoth hole, practically unaided by any of the field notes or data of any description in the possession of the officials of the mining company. The measurements of the entire mine made by Mr. Fitz for the state, and by Mr. Lamont for the mining company, using separate and different base lines, are as follows: The total contents as measured by Mr. Fitz, 3,323,465 cubic yards; and Mr. Lamont, 3,291,466 cubic yards, or about one per cent apart in a job of that magnitude.

On Monday, November 28, 1904, with Governor Van Sant present, the officials of the mining company formally presented its report, supplemented by photographs of the mine, as it appears at present, and also a model of the entire mine. There were present on the part of the mining company, F. B. Kellogg, Esq., J. B. Cotton, Esq., W. J. Olcott and Hon. E. B. Hawkins of Hibbing. Mr. Hawkins is by profession a mining engineer, and had personal knowledge of the early developments of the three mines in question. On the part of the state there were present Governor Van Sant, J. Henry Fitz and the State Land Commisisoner. Realizing that the subject was one of great importance every detail of the report was analyzed and discussed in order that we might arrive at a thorough understanding of them.

Tuesday evening, the 29th of November, the same officials for the state, with F. N. Dickson, Esq., assistant attorney general, present, further considered the matter. The conclusions arrived at by Mr. Fitz, as stated in his communication of November 30, 1904, appear to be sustained, and the only reasonable and practical conclusion of the controversy.

The foregoing is but a mere reference to the more important features of this large undertaking, which has taken a year and a half of time and some expense to the state. The measurements have been made and we cannot doubt the professional accuracy of the work. The state is now in possession of facts which it never had before, relating to the greatest of our mines, and one of the largest on the Missabe range. The outcome is gratifying and satisfying rather than disappointing. Among other things, we know the quantity and quality of the low-grade ore now lying in huge waste or stock piles upon the state's land. This ore, which was rejected by eastern furnacemen ten years ago, because of chemical impurities, will soon find a market. The 269,000 tons, more or less, will produce 25 cents a ton to the state and this should be done at no far distant day.

It is not necessary for us at this late day to discuss the manner in which this magnificent property has been treated. Being one of the first of the soft ore mines opened and much of its ore of doubtful merchantable value, a partial justification is found. But it can be truthfully said, however, that a private individual or corporation owning that property would not have permitted such work, nor would the state have allowed it if a proper supervision had been exercised while the work was in progress. If the state had done its duty from the start there would have been no cause for the rumors and insinuations respecting this property which, it appears, have been quite freely circulated. The state should, in its mineral, timber and all other business enterprises, conduct its affairs along the safest and best business lines. By so doing it will afford protection, not alone to the state's interest, but will likewise guarantee protection to business men and business interests generally in their dealings with the state.

This department is greatly indebted to Governor Van Sant for valuable assistance and counsel during the examination of the Missabe Mountain mine.

The correspondence, reports, maps, photographs and model of the mine are in the possession of this department.

IN CONCLUSION.

This report of my stewardship of this great department of the state government is respectfully presented to the legislature for its consideration.

Many of the subjects discussed in the foregoing text have been treated at some length because the importance of them seemed to demand it. They discuss business matters of great material importance to the people. And for the further reason that the details given may be of much service to officials and others who may have occasion to refer to these questions in the future.

SAMUEL G. IVERSON,

Auditor of State and Commissioner of State Lands.

December 1st, 1904.

LAND DEPARTMENT

STATEMENT SHOWING CONDITION OF SWAMP LAND GRANTS MADE BY THE STATE OF MINNESOTA TO RAILROAD COMPANIES,
STATE INSTITUTIONS AND OTHER GRANTEEES.

Date of Act Making Grant.	Grantee.	Terms of Grant.	Acres Granted.	Acres Decided by State to Grantee.	Acres Decided to Grantee which have or should be Relinquishd.	Actual Acres with which Grantee should now be charged.	Acres Required to Fill Grant.
Mar. 8, 1861	Lake Superior & Mississippi Railroad Co. (now St. Paul & Duluth Railroad Co.)	Seven (7) full sections of land for each mile of railroad from St. Paul to Duluth (155 miles)	694,400.00	694,399.17	694,399.17	0.83
Mar. 8, 1861	Taylor's Falls & Lake Superior Railroad Co. (now St. Paul & Duluth Railroad Co.)	(As amended by chapter 51, Special Laws of 1875, and others.) Seven (7) full sections of land for each mile of railroad from Wyoming to Taylor's Falls (20½ miles)	91,840.00	91,954.21	124.25	91,829.96	10.04
Mar. 12, 1861	County commissioners of McLeod county, as trustees for Stevens Seminary	(As amended by chapter 114, Special Laws of 1868.) All swamp lands in McLeod county for school at Glencoe, in lieu of state agricultural college, removed	4,684.17	4,084.17	4,084.17
Mar. 7, 1862	Madelia and Sioux Falls wagon road	Swamp lands situated within six (6) miles on either side of road, as located from Madelia to western boundary of state	4,683.71	4,683.71	4,683.71
Mar. 5, 1863	St. Paul & Chicago R'y Co. (now Chicago, Milwaukee & St. Paul R'y Co.)	(As amended by chapter 6, Special Laws of 1865, and others.) Seven (7) full sections of land for each mile of railroad from St. Paul to Winona (103 1-5 miles)	462,336.00	463,949.32	1,613.32	462,336.00
Feb. 11, 1865	Minneapolis & St. Cloud R'y Co. (now Great Northern R'y Co.)	(As amended by chapter 56, Special Laws of 1839, and others.) Ten (10) full sections of land for each mile of railroad from St. Cloud to Hinckley (66.51 miles)	425,664.00	439,185.53	13,583.73	425,601.80
Feb. 11, 1865	Minneapolis & St. Cloud R'y Co. (Austin branch, so-called)	Four (4) full sections of land for each mile of railroad to have been built from St. Cloud to connect with Winona & St. Peter Railroad. Grant declared forfeited by chapter 166, Laws of 1895, because railroad had not been built

Feb. 13, 1865	State institutions	Insane Asylum, 100,000 acres; Deaf and Dumb and Blind Asylum, 100,000 acres; State Prison, 100,000 acres; Winona Normal School, 75,000 acres; Mankato Normal School, 75,000 acres; St. Cloud Normal School, 75,000 acres.....	525,000.00	424,069.67	424,069.67	100,930.33
Feb. 16, 1865	Southern Minnesota Railroad Co.	All swamp land in odd sections in Root River land district and all swamp land in odd sections north of Root River land district, west of range 29, and south of Minnesota river, for railroad from Rushford to western boundary of state (267.92 miles)..... (As amended by chapter 110, Special Laws of 1873, and others.) 275,000 acres for railroad from Red Wing via valley of Cannon river and Lake Elysian to Mankato (93.70 miles)...	36,777.84	- 37,016.70	238.86	36,777.84
Mar. 2, 1865	Minnesota Central Railroad Co. (now Wisconsin, Minnesota & Pacific Railroad Co.)	(As amended by chapter 244, Special Laws of 1877, and others.) 25,000 acres for developing and improving water powers and manufacturing resources of Cannon river.....	275,000.00	273,404.96	3,404.96	275,000.00
Mar. 2, 1865	Cannon River Manufacturers' Association	(As amended by chapter 69, Special Laws of 1883.) Ten (10) sections of land for each mile of railroad from Duluth by shortest and most feasible route to Tower (length of line as built, 94.80 miles).....	25,000.00	24,191.45	1.00	24,190.45	809.55
Mar. 9, 1875	Duluth & Iron Range Railroad Co.	Six (6) sections of land or each mile of railroad from Little Falls via Sauk Center, Glenwood and Morris to western boundary of state. (Railroad company has built line only from Little Falls to Morris, and claims grant for length of line so built—87.70 miles. This claim is denied by the state, and the grant is now considered filled and the company will be required to reconvey to the state 13,691.51 acres, heretofore erroneously decided to it in excess of the amount required under the grant for the two completed divisions of 30 miles each).....	606,720.00	316,656.22	800.00	504,075.73	102,644.27
Mar. 3, 1881	Little Falls & Dakota Railroad Co.	265,856.00	265,856.00	265,856.00
	Totals	3,417,961.72	3,044,961.04	18,766.12	3,213,504.50	204,395.02

Unappropriated swamp lands following constitutional amendment of Jan. 4, 1882, 451,208.04 acres.

PAYMENTS INTO THE TREASURY FROM MINERAL LEASES AND CONTRACTS ON STATE LANDS FOR THE YEAR ENDING
JULY 31st, 1903.

Date of Pay- ment.	From What Source Received.	No. of Drain- age	Revenue.	Per- manent School.	Per- manent Univer- sity.	State Institu- tions.	Swamp Land.	Total.
Aug. 1	Isabel McDonald and Chas. Anderson, annual payment on con- tract No. 384.	47280	\$100.00
Aug. 2	John I. A. Crosby, annual payment on contract No. 399.	47303	\$100.00	100.00
Aug. 5	Onondaga Iron Co., annual payment on contracts Nos. 355 and 356	47281	200.00
Aug. 5	Chemung Iron Co., annual payment on contract No. 443.	47282	200.00	100.00
Aug. 5	Edmund J. Longyear, annual payment on contract No. 460.	47283	100.00	100.00
Aug. 5	James Wauless, annual payment on contracts Nos. 362 and 363.	47284	200.00	200.00
Aug. 5	Adgate Iron Co., annual payment on contracts Nos. 405 to 416 inclusive	47285	1,200.00
Aug. 5	Mesaba Chief Iron Co., annual payment on contract No. 268.	47290	1,200.00	100.00
Aug. 5	Geo. D. Swift, Oliver Iron Mining Co., annual payment on contracts Nos. 448 and 449.	47291	200.00	200.00
Aug. 5	Hansen Smith, annual payment on contracts Nos. 397 and 398.	47292	200.00	200.00
Aug. 5	John G. Williams, annual payment on contracts Nos. 385 and 447	47294	200.00	200.00
Aug. 5	Guy M. Neely, lease No. 3269.	47295	26.00	26.00
Aug. 5	Fred B. Snyder, lease No. 3278 and 3279.	47296	50.00	50.00
Aug. 5	N. C. Agnew, lease No. 3280.	47308	25.00	25.00
Aug. 5	D. C. Rood, first annual payment on contract No. 551.	47309	100.00	100.00
Aug. 5	W. C. Agnew, lease No. 3282.	47314	25.00	25.00
Aug. 6	Clara A. Dahl, lease No. 3275.	47315	26.00	26.00
Aug. 6	C. H. Bradley, lease No. 3276.	47316	26.00	26.00
Aug. 7	John A. Lyons, annual payment on contract No. 441.	47293	100.00	100.00
Aug. 8	S. M. Nichols, lease No. 3283.	47324	25.00
Aug. 11	O. G. Olson, lease No. 3284.	47341	25.00	25.00
Aug. 15	Fred H. White, lease No. 3285.	47343	25.00	25.00
Aug. 16	Benj. C. Neely, lease No. 3290.	47355	25.00	25.00
Aug. 16	Guy M. Neely, lease No. 3289.	47356	25.00	25.00
Aug. 18	J. M. Gray, lease No. 3291.	47358	25.00	25.00
Aug. 19	John H. Ives, lease No. 3286.	47362	26.00	26.00
Aug. 20	Hiram W. Sibley, annual payment on contracts Nos. 239 and 240	47365	200.00	200.00
Aug. 22	A. M. Chisholm, annual payment on contract No. 391.	47374	100.00	100.00
Aug. 23	Geo. D. W. Mandeville, lease No. 3288.	47352	25.00	25.00
Aug. 23	Geo. W. Scott, lease No. 3287.	47353	25.00	25.00
Aug. 23	Fred H. White, lease No. 3296.	47375	25.00	25.00
Aug. 26	Pitt Iron Mining Co., annual payment on contracts Nos. 387 and 388.	47377	200.00	200.00
Aug. 28	A. R. Waller, first annual payment on contract No. 552.	47381	100.00	100.00
Aug. 28	Jos. Geary, lease No. 3293.	47385	26.00	26.00

Aug. 28	O. G. Olson, lease No. 3292.	47387	26.00	26.00
Aug. 28	J. H. Ives, lease No. 3295.	47388	27.00	27.00
Aug. 28	C. M. Simpson, lease No. 3294.	47389	26.00	26.00
Sept. 5	D. E. Woodbridge, annual payment on contracts Nos. 368, 369, 371, 372, 382, 436 and 437.	47409	700.00	700.00
Sept. 9	D. E. Woodbridge, annual payment on contract No. 370.	47439	100.00	100.00
Sept. 9	W. D. Washburn, Jr., first annual payment on contracts Nos. 553 and 554.	47400	200.00	200.00
Sept. 15	R. Maxwell, first annual payment on contract No. 555.	47406	75.00	25.00	100.00
Sept. 15	Jas. H. Baker, lease Nos. 3297, 3298 and 3299.	47420	156.00	156.00
Sept. 18	J. H. Baker, lease Nos. 3297, 3298 and 3299.	47405	75.00	75.00
Sept. 19	C. B. Greer, lease No. 3306.	47425	25.00	25.00
Sept. 24	J. Kirby Jones, annual payment on contract No. 444.	47430	100.00	100.00
Sept. 26	H. C. Nichols, et al, first annual payment on contract No. 556.	47447	100.00	100.00
Sept. 29	A. M. Chisholm, second annual payment on contract No. 452.	47445	100.00	100.00
Sept. 29	John F. Waters, second annual payment on contract No. 440.	47451	100.00	100.00
Oct. 1	Francis W. Sullivan, second annual payment on contract No. 439.	47457	100.00	100.00
Oct. 4	W. B. Pratt, lease No. 3308.	47464	25.00	25.00
Oct. 4	Frank W. Bedford, lease No. 3309.	47465	25.00	25.00
Oct. 7	Herman Krause, first annual payment on contract No. 557.	47467	100.00	100.00
Oct. 10	Jennie I. Irwine, lease No. 3310.	47472	25.00	25.00
Oct. 15	C. H. Bradley, lease No. 3307.	47481	26.00	26.00
Oct. 18	T. J. Monahan, fourth annual payment on contracts Nos. 353 and 354.	47508	200.00	200.00
Oct. 27	J. H. Baker, lease No. 3311.	47512	25.00	25.00
Nov. 3	John J. McAuliffe and M. Hendrickson, lease Nos. 3316 and 3317.	47541	50.00	50.00
Nov. 3	Jas. McKenzie et al, lease Nos. 3312 to 3315 inclusive.	47542	100.00	100.00

Nov. 20	Geo. N. Holland, first annual payment on contract No. 565.	47638	100.00	100.00
Nov. 25	Jeanie I. Irwine, lease No. 3318.	47659	100.00	100.00
Nov. 25	Howard T. Abbott, lease No. 3320.	47697	25.00	25.00
Nov. 28	John Helmer, annual payment on contract No. 453.	47758	100.00	100.00
Dec. 2	L. L. C. Brooks, lease Nos. 3322 and 3323.	47781	50.00	50.00
Dec. 5	Frank Healy, first annual payment on contract No. 569.	47788	100.00	100.00
Dec. 5	L. E. Waterman, first annual payment on contract No. 568.	47789	100.00	100.00
Dec. 5	O. Halden, first annual payment on contracts Nos. 562 and 563.	47790	200.00	200.00
Dec. 5	Robt. Whiteside, first annual payment on contracts Nos. 400 and 401.	47803	200.00	200.00

Date of Pay- ment.	From What Source Received.	No. of Auditor's Drafts.	Revenue.	Per- manent School.	Per- manent Univer- sity.	State Institu- tions.	Swamp Land.	Total.
Dec. 5	Frank Healy, lease No. 3324.	47804	25.00	25.00
Dec. 6	J. C. Flynn, annual payment on contract No. 390.	47834	100.00	100.00
Dec. 8	J. S. Lane and E. Healy, first annual payment on contracts Nos. 566 and 567.	47805	200.00	200.00
Dec. 8	F. B. Lynch, annual payment on contract No. 424.	47835	100.00	100.00
Dec. 9	Chas. F. Hopkins, lease Nos. 3335 and 332.	47841	50.00	50.00
Dec. 13	J. C. Flynn et al, first annual payment on contract No. 571.	47856	100.00	100.00
Dec. 13	J. C. Flynn et al, first annual payment on contract No. 570.	47857	100.02	100.02
Dec. 13	C. H. and E. L. Bradley, first annual payment on contract No. 572.	47860	100.00	100.00
Dec. 16	W. P. Mosher, first annual payment on contract No. 433.	47880	100.00	100.00
Dec. 19	W. F. Street, lease Nos. 3327 and 3328.	47927	50.00	50.00
Dec. 20	Johnson Nickel Mining Co., annual payment on contracts Nos. 338 and 339.	47932	200.00	200.00
Dec. 20	Matt Jensen, lease Nos. 3329 and 3330.	47937	50.00	50.00
Dec. 23	Matt Jensen, lease No. 3331.	47950	25.00	25.00
Dec. 27	A. M. Chisholm, annual payment on contracts Nos. 461 and 473.	47971	200.00	200.00
Dec. 27	A. M. Chisholm, annual payment on contract No. 472.	47972	100.00	100.00
Jan. 2	James McCahill, first annual payment on contract No. 573.	47992	100.00	100.00
Jan. 2	Mabel Evans, lease No. 3332.	47993	25.00	25.00
Jan. 9	R. J. Johnson, first annual payment on contract No. 574.	48020	100.00	100.00
Jan. 12	J. C. Flynn, first annual payment on contract No. 575.	48031	100.00	100.00
Jan. 12	L. T. Flynn, C. H. and E. L. Bradley, first annual payment on contract No. 576.	48032	100.00	100.00
Jan. 13	N. C. McFarland, annual payment on contract No. 434.	48039	100.00	100.00
Jan. 14	Robt. Whiteside, annual payment on contract No. 423.	48028	100.00	100.00
Jan. 20	S. D. Hamilton, lease No. 3333.	48069	25.00	25.00
Jan. 22	Chas. P. Frank, lease Nos. 3334, 3335, 3336 and 3337.	48076	100.00	100.00
Jan. 23	Sam F. Fullerton, lease Nos. 3338, 3339 3340, 3341 and 3342.	48081	125.00	125.00
Jan. 27	F. L. Ryan, lease Nos. 3343, 3344, 3345, 3346, 3347 and 3348.	48090	150.00	150.00
Jan. 27	F. L. Ryan, lease Nos. 3349 and 3350.	48093	50.00	50.00
Jan. 28	F. L. Ryan, lease Nos. 3351, 3352, 3353 and 3354.	48094	100.00	100.00
Jan. 28	John F. Patterson, lease No. 3355.	48095	25.00	25.00
Jan. 29	Geo. A. Flynn, lease No. 3356.	48096	25.00	25.00
Jan. 30	B. N. Johnson, lease No. 3357.	48112	25.00	25.00
Jan. 31	Theo. L. Lammers, lease Nos. 3358, 3359, 3360 and 3361.	48116	100.00	100.00
Jan. 31	John J. McAuliffe, lease Nos. 3362, 3363 and 3364.	48117	75.00	75.00
Feb. 2	John J. McAuliffe, lease No. 3365.	48121	25.00	25.00
Feb. 3	F. R. Leslie, lease No. 3366.	48129	25.00	25.00

Feb. 3	F. L. Ryan, lease Nos. 3368, 3369, 3370 and 3371.....	48133	100.00	100.00
Feb. 3	Geo. H. Gamble, lease Nos. 3372, 3373, 3374, 3375 and 3376.....	48135	125.00	125.00
Feb. 4	P. H. Seymore, lease No. 3377.....	48141	25.00	25.00
Feb. 6	Sam F. Fullerton, lease Nos. 3378 and 3379.....	48144	50.00	50.00
Feb. 6	Sam F. Fullerton, lease No. 3380.....	48152	25.00	25.00
Feb. 6	Sam F. Fullerton, lease Nos. 3381 to 3387 inclusive.....	48152	175.00	175.00
Feb. 7	James T. Hale, first annual payment on contract No. 577.....	48157
Feb. 7	Pilot Mining Co., first annual payment on contracts Nos. 578 and 579.....	48157	100.00	100.00
Feb. 7	A. D. Stephen, lease Nos. 3388 and 3389.....	48158	200.00	200.00
Feb. 9	W. B. Joyce, lease Nos. 3390 to 3401 inclusive.....	48166	50.00	50.00
Feb. 9	Albert Kaiser, lease No. 3402.....	48168	275.00	25.00	300.00
Feb. 9	Thos. A. Merritt, lease Nos. 3403 and 3404.....	48170	25.00	25.00
Feb. 9	John J. McAuliffe, lease Nos. 3405 and 3406.....	48173	50.00	50.00
Feb. 9	John J. McAuliffe, lease Nos. 3407 to 3421 inclusive.....	48173	25.00	50.00
Feb. 10	W. S. McCurdy, lease Nos. 3422.....	48175	300.00	75.00	375.00
Feb. 10	John J. McAuliffe, lease No. 3422.....	48175	25.00	25.00
Feb. 11	Albert P. Hendrickson, lease No. 3423.....	48183	25.00	25.00
Feb. 11	John J. McAuliffe, lease No. 3424.....	48183	25.00	25.00
Feb. 11	R. B. Swift, lease Nos. 3429 to 3440 inclusive.....	48196	300.00	300.00
Feb. 18	B. Magoffen, lease Nos. 3425 to 3428 inclusive.....	48191	100.00	100.00
Feb. 18	B. Magoffen, lease Nos. 3441 and 3442.....	48197	50.00	50.00
Feb. 18	Geo. A. Flynn and Patterson, first annual payment on contracts Nos. 580 and 581.....	48222	200.00	200.00
Feb. 18	W. S. McCurdy, lease Nos. 3443 and 3444.....	48223	50.00	50.00
Feb. 19	John J. McAuliffe, lease Nos. 3445 and 3446.....	48225	50.00	50.00
Feb. 19	Chas. Ridgdon, lease No. 3447.....	48225	25.00	25.00
Feb. 19	C. A. Pidgdon, lease Nos. 3448 and 3449.....	48227	50.00	50.00
Feb. 19	W. C. Swift, lease Nos. 3450 to 3460 inclusive.....	48228	275.00	275.00
Feb. 19	I. C. Patterson, first annual payment on contracts Nos. 582 to 586 inclusive.....	48229	400.00	100.00	500.00
Feb. 19	John J. McAuliffe, lease Nos. 3461 and 3462.....	48231	50.00	50.00
Feb. 21	Oliver Iron Mining Co., first annual payment on contract No. 587.....	48231
Feb. 21	J. Rissatte and J. E. Mannheim, lease No. 3463.....	48235	100.00	100.00
Feb. 21	J. E. Mannheim and R. Pechette, lease No. 3464.....	48237	25.00	25.00
Feb. 21	John J. McAuliffe, lease No. 3465.....	48238	25.00	25.00
Feb. 23	Geo. E. Gibson, lease Nos. 3466 to 3473 inclusive.....	48239	25.00	25.00
Feb. 23	Geo. E. Gibson, lease Nos. 3466 to 3473 inclusive.....	48242	200.00	200.00
Feb. 24	F. R. Leslie, lease Nos. 3474 and 3475.....	48244	50.00	50.00
Feb. 24	J. P. Healy, lease No. 3476.....	48245	25.00	25.00
Feb. 24	W. S. McCurdy, lease Nos. 3477 to 3486 inclusive.....	48248	225.00	25.00	250.00
Feb. 24	Frank P. Hannifin et al, lease No. 3487.....	48250	25.00	25.00
Feb. 24	Sam Olson et al, lease No. 3488.....	48251	25.00	25.00
Feb. 24	B. S. Bennett, lease No. 3489.....	48251	25.00	25.00
Feb. 24	T. T. Ofsthun et al, lease No. 3490.....	48252	25.00	25.00
Feb. 24	Geo. E. Perley, lease No. 3491.....	48253	25.00	25.00
Feb. 25	Harrison E. Fryberger, lease No. 3492.....	48254	25.00	25.00
Feb. 25	Thos. Russell, lease No. 3493.....	48255	25.00	25.00
Feb. 25	H. C. Campbell, lease Nos. 3494, 3495 and 3496.....	48257	25.00	25.00
Feb. 25	O. G. Olson, lease No. 3497.....	48258	75.00	75.00
Feb. 25	W. S. McCurdy, lease Nos. 3588 to 3599 inclusive.....	58259	25.00	25.00
Feb. 26	48261	300.00	300.00

PAYMENTS INTO THE TREASURY FROM MINERAL LEASES AND CONTRACTS ON STATE LANDS, FOR THE YEAR ENDING JULY 31, 1903.—Continued.

Date of Pay- ment.	From What Source Received.	No. of Additions	Revenue.	Per- manent School.	Per- manent Uni- versity.	State Institu- tions.	Swamp Land.	Total.

Aug. 19	C. H. Bradley and Jas. Geary, first annual payment contract No. 613.	51179	100.00	100.00
Aug. 19	Jas. Geary and O. G. Olson, first annual payment contract No. 614.	51180	100.00	100.00
Aug. 19	John McClintock, lease No. 3794.	51178	25.00	25.00
Aug. 20	A. M. Miller, Jr., second annual payment contract No. 550.	51183	100.00	100.00
Aug. 27	Chas. Anderson, lease No. 3795.	51210	26.00	26.00
Aug. 31	H. E. Graham and J. C. Flynn, second annual payment con- tract No. 564.	51215	100.00	100.00
Aug. 31	Chas. H. Maginnis and S. H. Rothermel, leases Nos. 3796, 3797 and 3798.	51214	75.00	75.00

Sept. 2	P. E. Dowling, lease No. 3799	51217	25.00	25.00	25.00
Sept. 5	Jas. H. Weed et al, first annual payment contract No. 615	51229	100.00	100.00
Sept. 5	Jas. H. Weed et al, first annual payment contract No. 616	51230	100.00	100.00
Sept. 5	John A. Lyons, third annual payment contract No. 441	51231	100.00
Sept. 9	L. T. Flynn, lease No. 3800	51236	18.75	6.25	25.00
Sept. 11	John McClintock, leases, Nos. 3801 and 3802	51218	50.00
Sept. 18	Richard Cullen and F. A. Maron, second annual payment contracts Nos. 527 and 528	51249	200.00
Sept. 18	W. D. Washburn, Jr., leases Nos. 3803, 3804 and 3805	51250	75.00
Sept. 15	D. L. Fairchild, leases Nos. 3806, 3807 and 3808	51260	75.00	75.00
Sept. 15	H. J. Grannis, leases Nos. 3809 and 3810	51261	50.00	50.00
Sept. 15	A. M. Chisholm and S. J. McGregor, fourth annual payment tract No. 391	51262	100.00	100.00
Sept. 15	D. C. Road, second annual payment contracts Nos. 496 to 551 inclusive	51263	700.00
Sept. 18	S. E. Atkins, leases Nos. 3811, 3812 and 3813	51267	300.00	75.00
Sept. 21	J. H. Foley, lease No. 3814	51269	25.00
Sept. 21	J. F. Whalen, leases Nos. 3815, 3816 and 3817	51290	75.00	75.00
Sept. 23	S. E. Atkins, leases Nos. 3818 to 3823 inclusive	51292	75.00	150.00
Sept. 26	Anna Warner, second annual payment contract No. 452	51297	100.00
Sept. 29	J. Kirby Jones, second annual payment contract No. 444	51303	100.00	100.00
Sept. 29	J. M. Gray et al, second annual payment contracts Nos. 484, 486 and 508	51304	300.00	300.00
Sept. 29	D. C. Road, second annual payment contract No. 442	51307	100.00	100.00
Sept. 29	A. W. Taussig, first annual payment contract No. 547	51308	100.00
Sept. 29	H. J. Grannis, leases Nos. 3824 and 3825	51309	100.00	50.00
Sept. 29	Geo. P. Knowles, leases Nos. 3826, 3827 and 3828	51312	50.00	75.00
Sept. 30	Jas. T. Hale and Francis W. Sullivan, second annual payment contracts Nos. 455 to 459 inclusive	51319	500.00
Sept. 30	Edward H. Windom, second annual payment contract No. 530	51320	400.00	100.00
Sept. 30	R. B. Whiteside, second annual payment contract No. 548	51318	100.00	100.00
Oct. 2	F. B. Lynch, second annual payment contracts Nos. 424 and 465	51305	200.00	200.00
Oct. 3	A. M. Chisholm, second annual payment contracts 474 to 545 inclusive	51327	400.00	600.00
Oct. 5	Richard Cullen, leases Nos. 3829 and 3830	51330	50.00	50.00
Oct. 5	Herman Krause, second annual payment contract No. 557	51333	100.00
Oct. 5	J. F. Whalen, lease No. 3831	51334	25.00	25.00
Oct. 10	P. H. Rahilly, lease No. 3832	51346	25.00	25.00
Oct. 14	F. J. Chapman, lease No. 3841	51355	25.00	25.00
Oct. 16	F. J. Evans, leases Nos. 3833 to 3840 inclusive	51352	191.67	8.33	200.00
Oct. 17	P. Hammel, lease No. 3842	51375	25.00	25.00
Oct. 19	E. F. Blackman, leases Nos. 3843 and 3844	51376	50.00	50.00
Oct. 20	A. M. Miller et al, fourth annual payment contracts Nos. 387 and 388	51380	200.00	200.00
Oct. 20	E. F. Blackman, lease No. 3845	51399	25.00	25.00
Oct. 20	Phlot Mining Co., fifth annual payment contracts Nos. 353 and 354	51400	200.00
Oct. 21	P. Hammel, lease No. 3846	51402	25.00	25.00
Oct. 23	F. J. Zoberlin, lease No. 3847	51438	25.00	25.00
Nov. 3	N. J. Hendricksen, leases Nos. 3848 and 3849	51470	50.00	50.00

July 30	54969	200.00	200.00
Totals	\$50.00	\$9,809.00	\$3,545.75	\$3,025.17	\$335.08	\$16,765.00

PAYMENTS INTO THE TREASURY FROM ROYALTY ON IRON ORE FOR THE TWO YEARS ENDING JULY 31, 1904, AS PER SECTION 4, CHAPTER 105, GENERAL LAWS OF 1895.

Rathbun Iron Mining Co.—

Minimum royalty paid on contracts Nos. 218, 219, 221, 224, as follows:

Quarter ending Sept. 30, 1902.....	\$1,250.00	
Quarter ending Dec. 31, 1902.....	1,250.00	
Quarter ending March 31, 1903.....	1,250.00	
Quarter ending June 30, 1903.....	1,250.00	
Quarter ending Sept. 30, 1903.....	1,250.00	
Quarter ending Dec. 31, 1903.....	1,250.00	
Quarter ending March 31, 1904.....	1,250.00	
Quarter ending June 30, 1904.....	1,250.00	
	<hr/>	\$10,000.00

Mountain Iron Co.—

Minimum royalty paid on contract No. 85, as follows:

Quarter ending Sept. 30, 1902.....	\$312.50	
Quarter ending Dec. 31, 1902.....	312.50	
Quarter ending March 31, 1903.....	312.50	
Quarter ending March 31, 1904.....	312.50	
	<hr/>	1,250.00

Oliver Iron Mining Co.—

Minimum royalty paid on contract No. 59, as follows:

Quarter ending March 31, 1903.....	\$312.50	
Quarter ending June 30, 1903.....	312.50	
Quarter ending March 31, 1904.....	312.50	
Quarter ending June 30, 1904.....	312.50	
	<hr/>	1,250.00

Louis W. Hill—

Minimum royalty paid on contracts Nos. 174 and 346, as follows:

Quarter ending March 31, 1903 (174).....	\$312.50	
Quarter ending June 30, 1903 (174).....	312.50	
Quarter ending March 31, 1904 (174).....	312.50	
Quarter ending June 30, 1904 (174).....	312.50	
On first 1,000 tons required to be mined (346).....	250.00	
From Sept. 15, 1903, to Oct. 1, 1903 (346).....	48.00	
Quarter ending Dec. 31, 1903 (346).....	312.50	
Quarter ending March 31, 1904 (346).....	312.50	
Quarter ending June 30, 1904 (346).....	312.50	
	<hr/>	2,485.50

Total \$14,985.50

STATEMENT F.

STATEMENT OF ANNUAL STANDING OR CONTINUOUS APPROPRIATIONS.

Supreme Court—

Clerk, chap. 115, 1874.....	\$1,500.00
Deputy Clerk, chap. 160, 1881.....	1,000.00
Marshal, chap. 222, 1887; chap. 286, 1889; chap. 341, 1893.....	800.00
Janitor, chap. 222, 1887.....	900.00
Reporter, chap. 270, 1899.....	3,000.00
Stenographers, chap. 190, 1901.....	4,000.00
Contingent, chap. 222, 1887; chap. 525, 1889.....	750.00

Supreme Court Judges—(5)—

Chap. 97, 1881; chap. 98, 1885; chap. 155, 1897.....	25,000.00
--	-----------

District Court Judges—(35)—

Chap. 97, 1881; chap. 98, 1885; chap. 155, 1897.....	122,500.00
--	------------

Governor—

Chap. 70, 1878; chap. 40, 1885.....	5,000.00
Private Secretary, chap. 261, 1874.....	1,500.00
Executive Clerk, chap. 344, 1887; chap. 287, 1889; chap. 341, 1893.....	1,800.00
Stenographer, chap. 287, 1889.....	900.00
Messenger, chap. 163, 1891.....	720.00
Contingent, chap. 222, 1887.....	3,000.00

Auditor—

Chap. 70, 1878.....	2,000.00
Land Commissioner, chap. 36, 1885.....	1,600.00
Deputy Auditor, chap. 234, 1887.....	2,500.00
Accountant, chap. 46, 1883; chap. 285, 1903.....	1,800.00
Clerks, chap. 114, 1874; chap. 222, 1887; chap. 287, 1889; chap. 163, 1891; chap. 241, 1893.....	3,900.00
Land Clerk, chap. 31, 1878.....	1,500.00
Ass'tant Land Clerk, chap. 146, 1883.....	1,200.00
Contingent, chap. 222, 1887.....	600.00

Adjutant General—

Chap. 213, 1887.....	2,000.00
Clerk, chap. 289, 1901.....	1,500.00
Stenographer, chap. 163, 1891.....	800.00
Contingent, chap. 222, 1887; chap. 287, 1889; chap. 163, 1891.....	450.00

Military Storekeeper—

Chap. 149, 1883.....	1,200.00
----------------------	----------

Attorney General—

Chap. 55, 1903.....	4,800.00
Assistant, chap. 508, 1899.....	2,000.00
Second Assistant, chap. 159, 1899.....	2,000.00
Stenographer, chap. 287, 1889.....	900.00
Contingent, chap. 222, 1887; chap. 287, 1889.....	1,500.00

Insurance Commissioner—

Chap. 175, 1895.....	2,500.00
Deputy, chap. 175, 1895; chap. 285, 1903.....	1,800.00
Clerks, chapter 175, 1895.....	1,200.00
Contingent, chap. 222, 1887; chap. 163, 1891, and chap. 241, 1893.....	800.00

Librarian—

Chap. 272, 1903.....	2,000.00
Assistant, chap. 272, 1903.....	1,500.00

PROCEEDINGS OF STATE BOARD OF EQUALIZATION

PROCEEDINGS OF
STATE BOARD OF EQUALIZATION
SESSION OF 1904.

FIRST DAY.

ST. PAUL, Minn., Sept. 6, 1904.

Pursuant to provisions of law, the State Board of Equalization met at the capitol with the following members present:

F. I. Johnson, Goodhue county, representing First judicial district.
H. W. Fagley, Ramsey county, representing Second judicial district.
J. G. Lawrence, Wabasha county, representing Third judicial district.
Emerson Cole, Hennepin county, representing Fourth judicial district.
Louis G. Nelson, Steele county, representing Fifth judicial district.
Nels J. Nelson, Watonwan county, representing Sixth judicial district.
C. M. Sprague, Stearns county, representing Seventh judicial district.
Fred Greiner, Carver county, representing Eighth judicial district.
Hans Mo. Brown county, representing Ninth judicial district.
Truels Paulson, Houston county, representing Tenth judicial district.
J. E. Cooley, St. Louis county, representing Eleventh judicial district.
I. L. Philley, Lac qui Parle county, representing Twelfth judicial district.
A. H. Fowler, Murray county, representing Thirteenth judicial district.
John Petterson, Polk county, representing Fourteenth judicial district.
Geo. W. Knox, Aitkin county, representing Fifteenth judicial district.
G. C. Thorp, Hancock county, representing Sixteenth judicial district.
C. H. Draper, Faribault county, representing Seventeenth judicial district.
Daniel Anderson, Isanti county, representing Eighteenth judicial district.
Also Samuel R. Van Sant, governor, ex-officio; S. G. Iverson, state auditor, ex-officio; W. J. Donahower, attorney-general, ex-officio.

The members from the various districts having taken and subscribed to the oath, prescribed by law, Gov. S. R. Van Sant called the board to order at 10 o'clock A. M.

Mr. C. M. Sprague was elected as chairman of the board and J. E. Cooley, and I. L. Philley were chosen as recording and reading clerk, respectively.

State Auditor Iverson laid before the board the abstracts of the assessment of real and personal property from the various counties of the state for the year 1904; also the special returns from the auditors of the various counties of the assessments in the various counties in Classes 16, 17, 18 and 27 of the personal property schedule, amounting to \$2,000 and over, which he was by resolution of the State Board of Equalization of 1901 requested to secure and present to this board.

On motion, the chairman was authorized and directed to appoint committees for consideration of following classes of assessment, viz.:

Goods and merchandise.

Logs and lumber.

Banks and credits.

Manufacturers.

Public service corporation.

Real estate.

And to announce the same at an early date.

Recess taken until 2 o'clock P. M.

At 2 o'clock P. M. the board was called to order by its chairman and listened to remarks from State Auditor Iverson and Gov. S. R. Van Sant.

Chairman Sprague announced his appointment of committees as follows:

Goods and Merchandise—L. G. Nelson, chairman; G. W. Knox, Truels Paulson, I. L. Philley, Hans Mo.

Logs and Lumber—Fred Greiner, chairman; J. E. Cooley, John Petterson, G. W. Knox, Truels Paulson.

Banks and Credits—J. G. Lawrence, chairman; C. G. Thorps, C. H. Draper, C. M. Sprague, A. H. Fowler.

Manufacturers—I. L. Philley, chairman; C. H. Draper, John Petterson, C. G. Thorpe, Daniel Anderson.

Public Service Corporation—J. E. Cooley, chairman; H. W. Fagley, Emerson Cole, J. G. Lawrence, C. M. Sprague.

Real Estate—F. I. Johnson, chairman; Daniel Anderson, Nels J. Nelson, Emerson Cole, H. W. Fagley.

On motion, the board adjourned until Wednesday morning at 10 o'clock A. M.

SECOND DAY.

Wednesday morning, Sept. 7, 1904, at 10 o'clock; quorum present.

The following resolution was adopted:

WHEREAS, It has been the rule of this board for many years to equalize the assessment of bank stock at fifty per cent of its value, therefore, be it

RESOLVED, That the board at its present session use fifty per cent of the value of all other personal property as a basis for equalization.

It was accordingly decided that the basis of value to be used for the equalization of the assesment of the following classes of property be as follows:

Horses, one year old, \$10 and upwards, each.

Horses, two years old, \$17 and upwards, each.

Horses, three years old and over, \$30 and upwards, each.

Cattle, one year old, \$5 to \$6, each.

Cattle, two years old, \$8 and upwards, each.

Cows, \$14 and upwards, each.

Oxen, \$20 and upwards, each.

All other cattle, \$15 and upwards, each.

Sheep, \$1.50 and upwards, each.

Hogs, \$2.50 and upwards, each.

Wagons, carriages, bicycles, \$15 and upwards, each.

Automobiles, \$200 and upwards, each.

Sewing machines, etc., \$6 and upwards, each.

Watches and clocks, \$4 and upwards, each.

Melodeons and organs, \$15 and upwards, each.

Pianos, \$80 and upwards, each.

Household goods, \$40 per capita and upwards.

Dogs, \$5 and upwards, each.

Balance of the day was spent in committee of the whole, and adjournment taken to Thursday morning at 10 o'clock.

THIRD DAY.

Thursday morning, September 8th, 1904, 10 o'clock; quorum present.

The day was spent in committee of the whole, and adjournment taken to Friday morning at 10 o'clock.

FOURTH DAY.

Friday morning, September 9, 1904, at 10 o'clock; no quorum present. Adjourned to Saturday morning at 10 o'clock.

FIFTH DAY.

Saturday morning, September 10th, at 10 o'clock; no quorum present. Adjourned to Monday morning at 10 o'clock.

SIXTH DAY.

Monday morning, September 12, 1904, at 10 o'clock; no quorum present. Adjourned to Tuesday morning at 10 o'clock.

SEVENTH DAY.

Tuesday morning, September 13, 1904, at 10 o'clock; quorum present. Mr. Petterson moved that Class 5 "A" in Polk county be reconsidered and offered the following resolution:

RESOLVED, That Class 5 "A" under reconsideration be amended so that the town of Crookston be raised one hundred per cent and balance of the county forty per cent.

Which was adopted.

Balance of the day was spent in committee of the whole and adjournment taken to Wednesday morning, September 14, 1904, at 10 o'clock.

EIGHTH DAY.

Wednesday morning, September 14, 1904, at 10 o'clock; quorum present.

The following resolution was offered by Mr. Cooley:

RESOLVED, That the State Auditor be instructed to ask the County Auditor of Ramsey County to replace upon the assessment rolls the one million dollar assessment of credits of the Northern Pacific Railway Company, which was returned for taxation by the assessor of the City of St. Paul in 1904, and which assessment was cancelled by the County Board of Equalization at a recent session.

Which resolution was adopted.

Balance of the day was spent in committee of the whole and adjournment taken to Thursday morning at 10 o'clock.

NINTH DAY.

Thursday morning, September 15, 1904, at 10 o'clock; quorum present.

The day was spent in committee of the whole, and adjournment taken to Friday morning at 10 o'clock.

BIENNIAL REPORT

TENTH DAY.

Friday morning, September 16, 1904, at 10 o'clock; quorum present.

The day was spent in committee of the whole, and adjournment taken to Saturday morning at 10 o'clock.

ELEVENTH DAY.

Saturday morning, September 17, 1904, at 10 o'clock; no quorum present.

Adjourned to Monday morning at 10 o'clock.

TWELFTH DAY.

Monday morning, September 19, 1904, at 10 o'clock; no quorum present.

Adjourned to Tuesday morning at 10 o'clock.

THIRTEENTH DAY.

Tuesday morning, September 20, 1904, at 10 o'clock; no quorum present.

Adjourned to Wednesday morning at 10 o'clock.

FOURTEENTH DAY.

Wednesday morning, September 21, 1904, at 10 o'clock; quorum present.

The day was spent in committee of the whole, and adjournment taken to Thursday morning at 10 o'clock.

FIFTEENTH DAY.

Thursday morning, September 22, 1904, at 10 o'clock; quorum present.

The day was spent in committee of the whole, and adjournment taken to Friday morning at 10 o'clock.

SIXTEENTH DAY.

Friday morning, September 23, 1904, at 10 o'clock; quorum present.

The day was spent in committee of the whole, and adjournment taken to Saturday morning at 10 o'clock.

SEVENTEENTH DAY.

Saturday morning, September 24, 1904, at 10 o'clock; quorum present.

The day was spent in committee of the whole, and adjournment taken to Monday morning at 10 o'clock.

EIGHTEENTH DAY.

Monday morning, September 26, 1904, at 10 o'clock; no quorum present.

Adjourned to Tuesday morning at 10 o'clock.

NINETEENTH DAY.

Tuesday morning, September 27, 1904, at 10 o'clock; quorum present.

Committee on banks and credits reported and their recommendations were adopted.

Mr. Lawrence offered the following resolution:

RESOLVED, That the State Auditor be required to instruct the county auditors to take proper and efficient steps that the property of state and private banks, which have been omitted in their respective counties be assessed at their proper value and placed upon the tax list or the year 1904.

Adopted by unanimous vote.

TWENTIETH DAY.

Wednesday morning, September 28, 1904, at 10 o'clock; quorum present.

Committee on goods and merchandise reported and their recommendations were adopted.

State Auditor Iverson submitted to the board a communication from the auditor of Ramsey county in regard to the resolution adopted September 14, 1904, in regard to the assessment of the Northern Pacific Railway Company.

Mr. S. G. Iverson,
State Auditor, Capitol Building,
St. Paul, Minn.

St. Paul, Minn., Sept. 28, 1904.

Dear Sir:

Your letter of Sept. 16th, notifying me of the action of the State Board of Equalization concerning the tax of the credits of the Northern Pacific Railway Company received. For convenience, I quote the resolution of the State Board of Equalization which you incorporate in your letter. It is as follows:

RESOLVED, That the State Auditor be instructed to ask the County Auditor of Ramsey County to replace upon the assessment rolls the one million dollar assessments of credits of the Northern Pacific Railway Company, which was returned for taxation by the assessor of the City of St. Paul in 1904, and which assessment was cancelled by the County Board of Equalization at its recent session.

I appreciate the importance of placing upon the rolls all taxable property so that the taxes may bear as nearly equally as possible upon all tax payers, whether they be corporations or individuals, and I would gladly comply with the request expressed in the foregoing resolution if I felt that I had the authority so to do. The assessor of Ramsey County assessed the Northern Pacific Railway Company one million dollars upon its credits after receiving returns of that company of its taxable personal property. That return is a matter of record in Ramsey County and shows that the Northern Pacific Railway Company had debts and obligations exceeding by millions of dollars its credits, and there is no doubt that the return was absolutely true in that respect, for it is a well known fact that the bonds and mortgages of the Northern Pacific Railway Company amount to something like one hundred and sixty million dollars, and its credits are less than one-tenth of this sum, the statement of the exact amount being set out in figures in that return.

Under these circumstances, the Northern Pacific applied to the Board of Equalization of Ramsey County to have the assessment struck from the lists. This was carefully considered by that Board and by a committee appointed consisting of Mr. Conley, the assessor, Mr. Moriarity, a member of the Board of Alderman, and myself, and we presented the matter to the County Attorney, who, together with his assistant, carefully examined the whole situation, and after taking time to deliberate upon the question, advised our committee that this tax could not be collected, and the Board of Equalization ordered the assessment struck from the rolls.

Should we place this amount upon the rolls illegally, and fail to collect the tax therefrom, it will result in a deficiency in our taxes of something like thirty thousand dollars.

Last year's tax against the Northern Pacific on similar credits is now being litigated, but at that time, no return of any kind or description was made by the company. If that tax is determined to be legal, our deficiency will be twenty thousand dollars more; and, on the other hand, if in the litigation involved in last year's tax the courts indicate the law to be such that we are entitled to tax the company on its credits we can then levy the assessment on what we have omitted and the county and state will be fully reimbursed. I do not see that there is any chance for the Northern Pacific Railway Company to escape its responsibility on these taxes if they prove to be just and legal in the litigation now pending. But, on the contrary, if they are taxes illegally assessed, the County of Ramsey will find itself in a very difficult position by reason of the deficiency that would occur in its taxes thereby.

Under all of these circumstances, I do not feel that it is my duty to comply with the resolution of the State Board of Equalization unless I am bound by law to do so, and I will ask you, if you please, to either point out the law, or show me by any means, that the State Board has authority to direct me, as in the resolution indicated. If so, of course, I will most cheerfully comply, because the responsibility of the matter will then rest with the State Board, and with the law as it exists and my duty will be fulfilled.

Yours truly,

EDW. G. KRAMER,
Auditor, Ramsey County.

The above communication was taken under consideration.

The balance of the day was spent in committee of the whole, and adjournment taken to Thursday morning at 10 o'clock.

TWENTY-FIRST DAY.

Thursday morning, September 29, 1904, at 10 o'clock; quorum present. Committee on manufacturers and logs and lumber reported and their report was unanimously adopted.

The balance of the day was spent in committee of the whole and adjournment taken to Friday morning, September 30, at 10 o'clock.

TWENTY-SECOND DAY.

Friday morning, September 30th, at 10 o'clock.

The board submitted the following request to the attorney general for this ruling:

Hon. W. J. Donahower,
Attorney General.
Dear Sir:

The State Board of Equalization respectfully submits the enclosed communication from the Auditor of Ramsey County to the Attorney General and requests an opinion upon the following questions:

1st.—Was it legal for the County Board of Equalization of Ramsey County to cancel the assessment made by the assessor?

2nd.—What is the present duty of the County Auditor of Ramsey County, especially with regard to the resolution adopted by the State Board, Sept. 16th, 1904, included in the County Auditor's letter.

Your opinion at an early day is respectfully requested.

Yours truly,

C. M. SPRAGUE, Chairman.

After which the board went into committee of the whole for balance of day and adjourned to Saturday morning at 10 o'clock.

TWENTY-THIRD DAY.

Saturday morning, October 1st, at 10 o'clock; no quorum present. Adjourned to Monday, October 3, 1904, at 10 o'clock.

TWENTY-FOURTH DAY.

Monday morning, October 3, 1904, at 10 o'clock; no quorum present Adjourned to Tuesday, October 4th, 1904, at 10 o'clock.

TWENTY-FIFTH DAY.

Tuesday morning, October 4, 1904, at 10 o'clock; quorum present.

Mr. Cooley offered the following resolution:

RESOLVED, By the State Board of Equalization, acting upon and by virtue of Chap. 376, G. L. 1903, for the purpose of assessing the property owned and used in Minnesota by freight line companies, that the true value in money of the entire property of the following named freight line companies taxable in Minnesota for the year 1904, be and the same is hereby determined to be and the same is hereby fixed as follows:

Swift Refrigerator Transportation Company, Union Stock Yards, Chicago.....	\$4,600.00
Arms Palace Horse Car Company, Chicago	400.00
Merchants Despatch Transportation Company, New York	6,500.00
Streets Western Stable Car Line, Chicago	11,700.00
American Refrigerator Transit Company, St. Louis, Md.	2,500.00
Cudahy, Milwaukee Refrigerator Company, Milwaukee	400.00
Morrill Refrigerator Car Company, Ottumwa, Ia.	100.00
National Car Company, St. Albans, Vt.	400.00
St. Louis Refrigerator Car Company, St. Louis, Mo.	400.00
National Car Line Company, Chicago	400.00
Provision Dealers Despatch, Chicago	100.00
Lipton Car Line, Chicago Union Stock Yards	400.00
Chicago, New York & Boston Refrigerator Company, Chicago.....	1,400.00
Cudahy Packing Company, Chicago	1,800.00
Armour Car Lines, Chicago	7,900.00
Continental Fruit Express Company, Los Angeles, Cal.	400.00
American Tank Line Company, Cleveland, O.	1,000.00
Mather Horse & Stock Car Company, Chicago	1,000.00

Nelson Morris & Co. (Refrigerator and Tank Line), Chicago	1,000.00
New England Car Company, Boston, Mass.	1,000.00
Peerless Transit Company, Cleveland, O.	1,000.00
Union Tank Line Company, New York	20,000.00
Union Refrigerator Transit Company, St. Louis, Mo.	5,500.00
Western Refrigerator Line, Chicago	500.00
American Cotton Oil Company, Chicago	400.00
Cornplanter Refining Company, Warren, Pa.	500.00

Which was adopted by a unanimous vote.

Balance of the day was spent in committee of the whole, and adjournment taken to Wednesday morning at 10 o'clock.

TWENTY-SIXTH DAY.

Wednesday morning, October 5, 1904, at 10 o'clock; quorum present.

Mr. Cooley offered the following resolution:

RESOLVED, That the State Board of Equalization fix the assessment upon the property of telegraph companies in Minnesota for the year 1904 as follows: Western Union Telegraph Company, one million dollars; and North American Telegraph, one hundred thousand dollars.

Which was adopted by unanimous vote.

The real estate committee reported, and its recommendations were adopted.

The balance of the day was spent in committee of the whole and adjournment taken to Thursday morning, October 6, 1904, at 10 o'clock.

TWENTY-SEVENTH DAY.

Thursday morning, October 6, 1904, at 10 o'clock; no quorum present.

Adjourned to Friday morning, October 7, 1904, at 10 o'clock.

TWENTY-EIGHTH DAY.

Friday morning, October 7, 1904, at 10 o'clock; no quorum present. Adjourned to Saturday morning, October 8, at 10 o'clock.

TWENTY-NINTH DAY.

Saturday morning, October 8, 1904, at 10 o'clock; no quorum present. Adjourned to Monday morning, October 10, 1904, at 10 o'clock.

THIRTIETH DAY.

Monday, October 10, 1904, at 10 o'clock; quorum present.

Mr. Draper offered the following resolution:

RESOLVED; That it is the sense of this board that hereafter it will be advisable to divide item number 16, "goods and merchandise" into two subdivisions "Wholesalers and Jobbers" and "Retail Dealers" and that the State Auditor be directed to obtain this addition to the assessment blanks if it can be done.

Which was adopted by unanimous vote.

The attorney general submitted to the board his opinion in regard to the matter of the Northern Pacific Railway assessment, which follows:

October 6, 1904.

Hon. C. M. Sprague, Chairman,
State Board of Equalization,
St. Paul, Minn.

Dear Sir:

Replying to your favor of the 30th ult., in which you inquire as to the legality of the action of the County Board of Equalization for Ramsey County in striking from the assessment list certain property of the Northern Pacific Railway Company, which had been placed thereon by the Assessor of Ramsey County, would say: That we understand the facts with reference to this matter to be as follows:

The Assessor of Ramsey County assessed the Northern Pacific Railway Company in the sum of one million dollars upon certain credits to-wit: Mortgages and land contracts after receiving the return of the company of its taxable property in which they claim an offset against these credits by reason of their bonded indebtedness.

Thereafter the Board of Equalization of Ramsey County assumed to investigate the question as to the legality of this assessment and as to whether or not the company was entitled to offset its bonded indebtedness against these credits, and by resolution ordered the assessment to be stricken from the list.

I am of the opinion that the action of the Board of Equalization of Ramsey County in assuming to strike this property from the lists as reported by the Assessor was without authority, illegal and void.

The County Board of Equalization has authority to equalize assessments of classes of property and in individual cases to raise or lower as the case may require, aggregate valuations of personal property, but in my judgment they have no authority whatever to make any abatement of personal taxes, and their action in this instance will amount to an abatement.

The Board of Equalization has nothing to do with the question as to what or how much taxable property any individual possesses, that matter is for the Assessor to determine and report.

When he has done so the Board of Equalization reviews his judgment as to values and can raise or lower his valuation of classes of property or raise or lower his aggregate valuation of the taxable property of individuals.

But I can find nothing in the statutes conferring on the Board of Equalization any power to decide whether property confessedly owned by an individual is taxable or not or that any individual may or may not be entitled to an abatement of taxes by reason of offsets or otherwise.

In my judgment, exclusive jurisdiction of such questions resides in the first instance in the State Auditor and thereafter becomes a question for the courts.

The action of the Ramsey County Board of Equalization can be in no sense an equalization of taxes; they have not raised or lowered the Assessor's aggregate valuation of the company's taxable property as found and reported by him for taxation, but they have assumed to decide that the company has no taxable property whatever and to wholly abate the tax, this can only be done upon application to the State Auditor through the favorable recommendation of the county board.

The General Statutes of 1894, Sec. 1652, provide as follows:

"The Auditor of the State shall hear and determine all matters of grievance relating to taxation on account of excessive valuation of property or for any other cause when submitted to him.

He shall decide all questions that may arise with reference to the true construction of this act and in accordance with the advice and opinion of the attorney-general and such decision shall have force and effect until annulled by decree of court of competent jurisdiction."

Our Supreme Court in the case of the State against The London and the Northwest American Mortgage Company, 80 Minn. 277, in construing this act have held: "This is a general statute making no exception, but covering all cases where abatements or deductions are desired and obtainable and it seems to be clearly applicable to the City of St. Paul as well as all other parts of the state, make it necessary to have the approval of the State Auditor, before the action of the board provided for by said act could become operative."

In view of this decision it seems clear that abatements can only be secured through an application to the State Auditor, and that the action of the Board of Equalization in attempting to abate this tax was entirely beyond their powers and void.

The action of the Board of Equalization in this respect is also illegal and void for the further reason that it is a direct violation of the fifth subdivision of Section 1552, of the revised statutes of 1894, which provides:

"They shall not reduce the aggregate value of the real property or the aggregate value of the personal property of their county below the aggregate value thereof as returned by the assessor with the additions made thereto by the auditor as hereinbefore required."

I am informed that by their action in regard to the Northern Pacific assessment and certain other assessments the Board of Equalization has reduced the aggregate value of personal property in Ramsey County more than a million and a half, below the aggregate value as returned by the Assessor, such reduction is clearly illegal and a direct transgression of the mandate of the statute. Boards of equalization possess only such powers as are conferred upon them by statutes, and any action they take which transcends the power so conferred, is absolutely void.

Replying to your second inquiry would say:—That it follows as a conclusion from the foregoing that the County Auditor of Ramsey County should obey your resolution of September 16th 1904, and restore the assessment to the lists as made up and returned by the Assessor, if the action of the Board of Equalization of Ramsey County in directing this property to be struck from the lists is void the County Auditor should so treat it and restore the property to the lists and return it to the State Board of Equalization as it was reported and returned by the County Assessor.

Signed respectfully,
F. N. DICKSON,
Asst. Attorney General.

Mr. L. G. Nelson offered the following resolution:

RESOLVED, That the resolution offered by Mr. Cooley instructing State Auditor to instruct County Auditor of Ramsey County to place the one million dollar assessment of the Northern Pacific Railway Company upon the assessment rolls in accordance with the opinion of the Attorney General be adopted.

Which was adopted by a unanimous vote.

The balance of the day was spent in committee of the whole and adjournment taken to Tuesday, October 11, at 10 o'clock.

THIRTY-FIRST DAY.

Tuesday, October 11, 1904, at 10 o'clock A. M.; quorum present.

After a time spent in committee of the whole, the committee arose and reported, recommending that the values shown in the abstracts of the personal and real property assessment of the several counties of the state be changed as follows, viz.:

The figures in the following table denote the percent of increase ordered on each class or item, except in cases where dark (full faced) figures are used; in which case the figures denote the percent of decrease.

The following resolution was adopted:

RESOLVED, By the State Board of Equalization, that the State Auditor be, and he hereby is, requested to secure from the auditors of the various counties in the state, and to present to this Board at its session in 1905, lists of the assessments made in each county in the year 1905, in classes 16, 17, 18 and 27 of the personal property schedule, amounting to two thousand dollars (\$2,000) and over, and any other information relative thereto.

The report of the committee was accepted, and on motion the same was adopted, and it was ordered that the value of the personal property in the state be changed as recommended by said report and that the resulting values, together with the values which have not been changed, hereby be adopted as the established values of the personal and real property in the state for the year 1904.

There appearing to be no further business to be transacted, the board then, on motion, adjourned *sine die*.

PROCEEDINGS OF STATE BOARD OF EQUALIZATION

SESSION OF 1903.

FIRST DAY.

ST. PAUL, Tuesday, Sept. 1, 1903.

In accordance with the laws of the State of Minnesota the persons comprising the State Board of Equalization met at the state auditor's office in the capitol building this day, the following being present:

F. I. Johnson, Cannon Falls, Goodhue county, representing First judicial district.

Joseph McKibben, St. Paul, Ramsey county, representing Second judicial district.

J. G. Lawrence, Wabasha, Wabasha county, representing Third judicial district.

Emerson Cole, Minneapolis, Hennepin county, representing Fourth judicial district.

L. G. Nelson, Owatonna, Steele county, representing Fifth judicial district.

N. J. Nelson, Sveadahl, Watonwan county, representing Sixth judicial district.

C. M. Sprague, Sauk Center, Stearns county, representing Seventh judicial district.

Fred Greiner, Chaska, Carver county, representing Eighth judicial district.

Thos. Hodson, Nicollet, Nicollet county, representing Ninth judicial district.

Truels Paulson, Spring Grove, Houston county, representing Tenth judicial district.

J. E. Colley, Duluth, St. Louis county, representing Eleventh judicial district.

I. L. Philley, Louisberg, Lac qui Parle county, representing Twelfth judicial district.

C. E. Dinehart, Fulda, Murray county, representing Thirteenth judicial district.

N. S. Gordon, Crookston, Polk county, representing Fourteenth judicial district.

F. M. Shook, Aitkin, Aitkin county, representing Fifteenth judicial district.

G. C. Thorpe, Hancock, Stevens county, representing Sixteenth judicial district.

A. H. Strong, Jackson, Jackson county, representing Seventeenth judicial district.

Daniel Anderson, Cambridge, Isanti county, representing Eighteenth judicial district.

Also, Gov. S. R. Van Sant, State Auditor S. G. Iverson, and Attorney General W. B. Douglas, members ex-officio.

The members from the various districts having taken and subscribed to the oath prescribed by law, Gov. Van Sant called the board to order at 2 o'clock P. M.

Mr. C. M. Sprague was elected as president pro tem. of the board and Messrs. J. E. Cooley and I. L. Philley were chosen as recording and reading clerks, respectively.

State Auditor Iverson laid before the board the abstracts of the assessment of personal property from the various counties of the state for the year 1903, also the special returns from the auditors of the various counties of the assessments in the various counties in Classes 16, 17, 18 and 27, of the personal property schedule, amounting to \$3,000 and over, which he was, by resolution of the last board, requested to secure and present to this board; also the reports of such freight line companies as had filed their reports, as provided for in chapter 376, Laws of 1903. He also reported that the telegraph companies had not as yet made report to his office as required by law for the consideration of this board in fixing their assessment.

On motion, the president pro tem. was authorized and directed to appoint committees for consideration of following classes of assessment, viz.:

Goods and merchandise,

Logs and lumber,

Banks and credits,

Freight line companies,

Public service corporations,

and to announce said committees not later than Tuesday, September 8th.

On motion, the board adjourned to Wednesday morning, September 2, 1904, at 10 o'clock.

SECOND DAY.

Wednesday morning, September 2d, at 10 o'clock; no quorum present. Adjourned to Thursday morning at 10 o'clock.

THIRD DAY.

Thursday morning, September 3d, at 10 o'clock; no quorum present. Adjourned to Friday morning at 10 o'clock.

FOURTH DAY.

Friday morning, September 4th, at 10 o'clock; no quorum present. Adjourned to Saturday morning at 10 o'clock.

FIFTH DAY.

Saturday morning, September 5th, at 10 o'clock; no quorum present. Adjourned to Tuesday morning at 10 o'clock.

SIXTH DAY.

Tuesday morning, September 8th, at 10 o'clock; quorum present. The following were appointed to the standing committees by the president, viz.:

Goods and Merchandise—F. I. Johnson, chairman; D. Anderson, Jos. McKibben, L. G. Nelson and I. L. Philley.

Banks and Credits—J. C. Lawrence, chairman; G. C. Thorpe, N. J. Nelson, C. E. Dinehart and C. M. Sprague.

RESOLVED, By the State Board of Equalization that State Auditor be and he is hereby requested to secure from the auditors of the various counties in the state and to present to the Board at its session in 1904 lists of assessments made in each county in the year 1904 in classes 16, 17, 18 and 27 of the personal property schedule, amounting to \$2,000, and over, and any information relative thereto.

Which was adopted by a unanimous vote.

The balance of the day was spent in committee of the whole and adjournment taken to Wednesday morning at 10 o'clock.

TWENTY-FIFTH DAY.

Wednesday morning, September 30th, at 10 o'clock; quorum present. Mr. Cooley, chairman of the committee on public service corporations, for and in behalf of said committee, offered the following resolution and moved its adoption by the board, viz.:

RESOLVED, By the State Board of Equalization of the State of Minnesota that the property of the WESTERN UNION TELEGRAPH COMPANY be and the same is hereby assessed for taxation for the year 1903 at the sum of \$1,000,000 and the property of the North American Telegraph Company, be and the same is hereby assessed for taxation for the year 1903 at the sum of \$100,000; and that the rate of taxation for the year 1903 upon said assessments is hereby fixed at 24 mills on the dollar; provided, however, that should the average rate of taxation general, municipal and local levied throughout the state for the year 1903 (as shown by the abstracts of tax lists of the several counties) be less than the rate of 24 mills herein fixed, then and in that case State Auditor shall make a draft upon said company based upon said average rate for the entire state so ascertained and in the event that the average rate of taxation throughout the state as aforesaid be more than the rate of 24 mills, herein fixed, then, and in that case the State Auditor shall make his draft upon said company based upon such average rate for the entire state as ascertained.

Which was adopted by a unanimous vote.

In the matter of the assessment of the Minneapolis Gas Light Company, Mr. Cooley, chairman of the committee of the public service corporations, for and in behalf of said committee, offered the following resolution and moved its adoption by the board, viz.:

RESOLVED, By the State Board of Equalization of the State of Minnesota that the assessment and valuation of the capital stock of the MINNEAPOLIS GAS LIGHT COMPANY, a corporation, created, organized, and existing under the laws of the State of Minnesota assessed in the County of Hennepin, State of Minnesota, be and the same is hereby increased to and fixed by the State Board of Equalization at \$1,000,000, subject to a deduction therefrom of the value of the property specified in items 6 and 7 of Section 1530 of the General Statutes of the State of Minnesota of 1894, the property in said items being subject to a specific taxation as provided by said section and by the laws of the State of Minnesota; and the State Auditor of this State is directed to transmit to the County Auditor of the said Hennepin County, a duly certified copy of his resolution.

Which was adopted by a unanimous vote.

In the matter of the assessment of the Minneapolis General Electric Company, Mr. Cooley, chairman of the committee of public service corporations, for and in behalf of said committee, offered the following resolution, and moved its adoption by the board, viz.:

RESOLVED, By the State Board of Equalization of the State of Minnesota, that the assessment and valuation of the capital stock of the MINNEAPOLIS GENERAL ELECTRIC COMPANY, a corporation created, organized and existing under the laws of the State of New Jersey assessed in the County of Hennepin, State of Minnesota, be and the same is hereby increased to and fixed by the State Board of Equalization at \$712,500, subject to a deduction therefrom of the value of the property specified in items 6 and 7 of Section 1530 of the General Statutes of the State of Minnesota of 1894, the property in said items being subject to specific taxation as provided by said section and by the laws of the State of Minnesota; and the State Auditor of this State is directed to transmit to the County Auditor of said Hennepin County, a duly certified copy of this resolution.

Which was adopted by a unanimous vote.

In the matter of the assessment of Minneapolis Street Railway Company, Mr. Cooley, chairman of the committee of public service corporations, for and in behalf of said committee, offered the following resolution and moved its adoption by the board, viz.:

RESOLVED, By the State Board of Equalization of the State of Minnesota that the assessment and valuation of the capital stock of the Minneapolis Street Railway Company, a corporation created, organized and existing under the laws of the State of Minnesota, assessed in the County of Hennepin, State of Minnesota, be and the same is hereby increased to and fixed by the State Board of Equalization at \$4,750,000, subject to a deduction therefrom of the value of the property specified in items 6 and 7 of Section 1530 of the G. S. of the State of Minnesota of 1894. The property in said items being subject to specific taxation as provided by said section and by the laws of the State of Minnesota; and the State Auditor of this state is hereby directed to transmit to the County Auditor of said Hennepin County a duly certified copy of this resolution.

Which was adopted by a unanimous vote.

In the matter of assessment of the St. Paul Gas Light Company, Mr. Cooley, chairman of the committee on public service corporations, for and in behalf of said committee, offered the following resolution, and moved its adoption by the board:

RESOLVED, By the State Board of Equalization of the State of Minnesota, that the assessment and valuation of the capital stock of the St. Paul Gas Light Company, a corporation created, organized and existing under the laws of the State of Minnesota, assessed in the County of Ramsey, State of Minnesota, be and the same is hereby increased to and fixed by the State Board of Equalization at \$900,000, subject to a deduction therefrom of the value of the property specified in items 6 and 7 of Section 1530 of the General Statutes of the State of Minnesota of 1894, the property in said items being subject to specific taxation as provided by said section and by the laws of the State of Minnesota; and the State Auditor of this state is directed to transmit to the County Auditor of said Ramsey county a duly certified copy of this resolution.

Which was adopted by a unanimous vote.

In the matter of the assesment of the St. Paul City Railway Company, Mr. Cooley, chairman of the committee on public service corporations, for and in behalf of said committee, offered the following resolution, and moved its adoption by the board, viz.:

RESOLVED, By the State Board of Equalization of the State of Minnesota, that the assessment and valuation of the capital stock of the St. Paul City Railway Company, a corporation created, organized and existing under the laws of the State of Minnesota, assessed in the County of Ramsey, State of Minnesota, be, and the same is hereby increased to and fixed by the State Board of Equalization at \$3,325,000, subject to a deduction therefrom of the value of the property specified in items 6 and 7 of Section 1530 of the General Statutes of the State of Minnesota of 1894, the property in said items being subject to specific taxation, as provided by said section and by the laws of the State of Minnesota; and the State Auditor of this state is directed to transmit to the County Auditor of said Ramsey County a duly certified copy of this resolution.

Which was adopted by a unanimous vote.

In the matter of the assessment of the St. Paul and Suburban Railway Company, Mr. Cooley, chairman of the public service committee, for and in behalf of said committee, offered the following resolution, and moved its adoption by the board, viz.:

RESOLVED, By the State Board of Equalization of the State of Minnesota, that the assessment and valuation of the capital stock of the MINNEAPOLIS, ST. PAUL and SUBURBAN RAILWAY COMPANY, a corporation created, organized and existing under the laws of the State of Minnesota, assessed in the County of Washington, State of Minnesota, be and the same is hereby increased to and fixed by the State Board of Equalization at \$175,000, subject to a deduction therefrom of the value of the property specified in items 6 and 7 of Section 1530, of the General Statutes of the State of Minnesota of 1894, the property in said items being subject to specific taxation as provided by said section and by the laws of the State of Minnesota; and the State Auditor of this state is directed to transmit to the County Auditor of said Washington County, a duly certified copy of this resolution.

Which was adopted by a unanimous vote.

In the matter of the assessment of the Duluth, Superior Traction Company, Mr. Cooley, chairman of the committee on public service corporations,

for and in behalf of said committee, offered the following resolution, and moved its adoption by the board, viz.:

RESOLVED, By the State Board of Equalization of the State of Minnesota, that the assessment and valuation and capital stock of the Duluth-Superior Traction Company, a corporation, created, organized and existing under the laws of the State of Connecticut, assessed in the County of St. Louis, State of Minnesota, by and the same is hereby increased to and fixed by the State Board of Equalization at \$475,000, subject to a deduction therefrom of the value of the property specified in items 6 and 7 of Section 1530 of the General Statutes of the State of Minnesota of 1894, the property in said items being subject to specific taxation as provided by said section and by the laws of the State of Minnesota; and the State Auditor of this state is directed to transmit to the County Auditor of said St. Louis County, a duly certified copy of this resolution.

Which was adopted by a unanimous vote.

Mr. Cooley, chairman of the public service corporation committee, for and in behalf of said committee, offered the following resolution, and moved its adoption by the board, viz.:

RESOLVED, By the State Board of Equalization acting under and by virtue of Chapter 376, G. L. 1903, for the purpose of assessing the property owned and used in Minnesota by freight line companies, that the true value in money of the entire property of the following named freight line companies taxable in Minnesota for the year 1903, be and the same is hereby determined to be and the same is hereby fixed as follows:

- Yellow Medicine County Class 24—(in Otis) assessment of shares of stock of Granite Falls Bank, increased 25 per cent.

The report of the committee was accepted, and on motion the same was adopted, and it was ordered that the value of the personal property in the state be changed as recommended by said report, and that the resulting values, together with the values which have not been changed, hereby be adopted as the established values of the personal property in the state for the year 1904.

There appearing to be no further business to be transacted, the board then, on motion, adjourned *sine die*.

We hereby certify the foregoing (from page 150 to page 166, both inclusive) to be a true record of the proceedings of the State Board of Equalization for the session begun on September 1st, 1903, and ending October 1st, 1903.

C. M. SPRAGUE,
Chairman.

Attest:
SAMUEL G. IVERSON,
Secretary.

INDEX.

AN ACT

To Create a State Board of Control, and to Provide for the Management and Control of the Charitable, Reformatory and Penal Institutions of the State, and to Make an Appropriation Therefor, and to Abolish the State Board of Corrections and Charities.

GENERAL LAWS 1901—CHAPTER 122.

Be it enacted by the Legislature of the State of Minnesota:

Section 1. Nomination—Term of office—Salaries—Removal—Vacancies.—The governor shall, prior to the adjournment of this session of the legislature, appoint, by and with the consent of the senate, three electors of the state, as members of a board, to be known as a “Board of Control of State Institutions.” Said members shall hold office, as designated by the governor, for two, four and six years respectively. Subsequent appointments shall be made as above provided, and, except to fill vacancies, shall be for a period of six years, and until their successors are appointed and qualified. The board shall at all times be subject to the above limitations and restrictions. The chairman of the board for each biennial period shall be the member whose term first expires, and each member thereof shall receive a salary of three thousand five hundred (3,500) dollars per annum. The governor may remove any member of the board for malfeasance or nonfeasance in office, or for any cause that renders him ineligible to appointment, or incapable, or unfit to discharge the duties of his office, and his removal when so made shall be final. When, for any cause, a vacancy occurs, the governor shall appoint an elector to fill the vacancy for the unexpired term, subject, however, to the action of the senate when next in session.

Sec. 2. Oath—Bond—Examination—Witnesses.—The members of the Board of Control, before entering upon the duties of their office, shall take and subscribe the oath or affirmation to support the constitution of the United States and that of this state, and to faithfully discharge the duties required of them by law, and each shall devote his whole time to the duties of his office. Before entering upon the duties of his office each member shall give an official bond in the sum of twenty-five thousand (25,000) dollars, conditioned for the faithful discharge of his duties under this act, signed by sureties, to be approved by the governor, and, when so approved,

said bond shall be filed in the office of the secretary of state. The acceptance by any member of said Board of Control of any other lucrative office in the state during his term of service shall operate as a forfeiture of his said office as member of said Board of Control, and create a vacancy therein. The said Board of Control shall be subject to the examination of the public examiner of this state. The claim that any testimony or evidence sought to be elicited or produced on such examination may tend to criminate the person giving, or producing it, or expose him to public ignominy, shall not excuse him from testifying or producing evidence, documentary or otherwise; but no person shall be prosecuted or subjected to penalty or forfeiture for or on account of any matter or thing concerning which he may testify or produce such evidence, provided that he shall not be exempted from prosecution and punishment for perjury committed in so testifying. Within ten days after the appointment and qualification of the members of the board, it shall organize and assume the duties vested in said board, but shall not exercise full control of the institutions until Aug. 1, 1901.

Sec. 3. Conference—Recommendations.—The board shall, after its creation, meet in conference, as often as it may determine, the superintendents, wardens and other executive officers of each of said institutions, or as many thereof as it deems practicable, and consider in detail all questions of management, and the methods to be adopted to secure the economical management of the several institutions, and shall send to such officers such recommendations in regard to the management and improvement of the institutions as may be necessary or advisable, and the board is vested with power to enforce such recommendations and directions. The chairman of the Board of Control shall preside at such meetings, and full minutes thereof shall be preserved by the secretary of such board, who shall be secretary of such meetings.

Sec. 4. Official seal.—The board shall have an official seal, and every commission, order, or other paper executed by the board shall, under its direction, be attested with its seal affixed by the secretary, or any member of the board.

Sec. 5. Offices—Secretary—Salary—Supplies—Reports.—The board shall be provided by the proper authorities with suitably furnished offices at the seat of government, and shall employ a competent secretary, who shall receive a salary not to exceed two thousand (2,000) dollars per annum; and may also hire a stenographer and such other employes as may be necessary. The board shall, by the proper authorities, be also furnished with all necessary books, blanks, stationery, printing, postage stamps, and such other office supplies as are necessary. The members of said board shall report to the governor in **August** of each **alternate** year, and before the meeting of the legislature, and as much oftener as the governor may require, or they may deem necessary, the condition and wants of

the several institutions under their charge. The biennial report shall be accompanied by the reports of the superintendents, stewards and treasurers of the several institutions. They shall account for the disbursements for the biennial period just ended, and submit an estimate of the current expenses of the several institutions for the ensuing biennial period, and an estimate of the appropriations needed for building, repairing, and other purposes.

Sec. 6. Institution officers—Term of office—Removal—Qualification.—It shall be the duty of the board to appoint a superintendent, warden, or other chief executive officer of each institution under the control of the board; the superintendent, warden or other chief executive officer of any of the institutions named, may be removed by the board for misconduct, neglect of duty, incompetency or other proper cause, showing his inability or refusal to properly perform the duties of his office, but such removal shall be had only after opportunity is given to such person to be heard before such board upon preferred written charges, but the removal, when made, shall be final. The superintendent, warden or other chief executive officer now in charge of the several institutions placed under the control of this board, and who is now holding under a contract, for a definite term, shall continue in office until the expiration of such term or contract, unless removed by said board for some cause which would make the continuance in office of such warden or chief executive officer detrimental to the public service. No such removal shall be made until the employe concerned shall be given a hearing before the said board; the decision of said board, when made, shall be final. The officers of the several institutions shall have the qualifications and perform the duties now or hereafter imposed by law, or the rules to be prescribed by said Board of Control. In case of an apparent conflict between the powers conferred by law upon any executive officer of a state institution and the powers conferred by this act upon the said Board of Control, there shall be a conclusive presumption that the power belongs to the said board unless the same is delegated by it to said executive officer.

Sec. 7. Assistants—Discharged—Institution Salaries.—The superintendent, warden or other chief executive officer of the several institutions shall appoint all assistants, guards and employes required in the management of the institution, the number of whom shall be determined by the board. The chief executive officer may discharge any person employed, but shall keep in the record of employes the date of such discharge, and shall place opposite his name his reason therefor. Any member or officer of the Board of Control, or any officer or employe of a state institution, subject to this board, who, by solicitation or otherwise, exerts his influence, directly or indirectly, to induce other officers or employes of the state to adopt his political views or to favor any particular person or candidate for office, or to contribute funds for campaign or political pur-

poses, shall be removed from his office or position by the proper authorities.

The board shall fix the annual or monthly salaries of all the officers and employes in the several institutions, except such as are fixed by the legislature. The board shall classify the officers and employes into grades, and the salaries to be paid any grade shall be uniform in similar institutions in the state. The salaries and wages shall be included in the monthly estimates, as hereinafter provided, and paid in the same manner as other expenses of the several institutions.

Sec. 8. The board shall advertise for and receive competitive bids from architects, to prepare plans, specifications, estimates and details for buildings, betterments, equipment exceeding five hundred dollars in value, which may be necessary in any of the institutions, and supervising the work of construction on all buildings, betterments and improvements done at institutions under the control of the board. The architect whose plans, specifications and estimates shall be adopted by said board shall receive such compensation as said board may specify in its advertising for such bids.

Sec. 9. **Official bonds.**—It shall be the duty of the Board of Control to require its secretary and each officer and employe of said board, and of every institution under its control, who may be charged with the custody or control of any money or property belonging to the state, and who is not now required by statute to give bond, to give an official bond to the State of Minnesota, properly conditioned and signed by sufficient sureties, in a sum to be fixed by the board, which bond shall be approved by the board and filed in the office of the secretary of state.

Sec. 10. **Traveling expenses—Governor's approval.**—In addition to the salaries paid the members of the board and the secretary or other employes, they shall be entitled to the necessary traveling expenses, by the nearest traveled and practicable route, incurred in going from St. Paul to places in the state when on official business. No expenditure for traveling expenses to other states, except as authorized by law, shall be made by the board, or by any officer or agent thereof, or by any officer, employe or agent of any state institution subject to this board, unless the authority to make such trip is granted at a meeting of the Board of Control upon a written resolution, adopted by the board, which shall state the purpose of such trip, and the reason the same is deemed necessary. Said resolution, if adopted, shall then be submitted to the governor for his written approval, and if he does not approve the same, such trip shall not be made at the expense of the state.

Sec. 11. **Itemized statement—Verification—Payment of Salaries.**—Before any expenses of the members of the board, any officer or agent thereof, or before any expenses incurred by others under the direction of the board, or the expenses of any officer or employe of

any institution under the charge of the board, shall be paid, a minutely itemized statement of every item of expenditure, accompanied by duly receipted sub-vouchers, shall be presented to the state auditor, duly verified, which verification shall aver that the expense bill is just, accurate and true, and is claimed for cash expenditures, or cash disbursements, truly and actually made and paid to the parties named, as shown by said statement. Unless the statement is so verified, and duly audited, payment thereof shall not be had. The expense bills of the members of the board, the secretary and its other employes, when so verified, shall be presented to the state auditor for his written audit, before payment is made. The salaries and such actual expenses of the board, and of the secretary and other officers, and the salaries of other employes, shall be paid monthly by the state treasurer upon the warrant of the state auditor.

Sec. 12. Rules—Additional duties.—The Board of Control is hereby authorized to formulate and prescribe reasonable rules and regulations defining the duties and providing for the government of the superintendent, officers and employes of the several institutions, and the said board is authorized to make its own rules for the proper execution of its powers, and may require the performance of additional duties by the officers of the several institutions, so as to fully enforce the requirements, intents and purposes of this act, and particularly so much thereof as relates to the making of the estimates and furnishing proper proofs of the expenditures or use of all stocks of subsistence and supplies.

Sec. 13. Books and accounts.—The board shall keep at its office a proper and complete system of books and accounts with each institution, which shall show every expenditure authorized and made thereat, and said books shall exhibit an account of each extraordinary or special appropriation made by the legislature, with every item of expenditure thereof.

Sec. 14. Uniform system of records and accounts—Expert help.—The board shall prescribe forms of records and the kind of accounts to be made and kept by the institutions specified in section nineteen of this act. In providing for the books of accounts the said board shall establish as uniform a system as possible, compelling similar institutions to keep similar books in the financial operations of such institution; and the board shall institute the keeping of a perfected system of accounts, and requisitions showing the purchase, storing and consumption of supplies for subsistence, construction or other purposes. For the purpose of establishing said system of accounts the board is authorized to employ competent and expert help, and to inaugurate in the institutions on August 1, 1901, the most modern and complete method of accounts.

Sec. 15. Collection of information—Bulletins—Forms.—The board shall gather and present information embodying the experi-

ence of charitable, reformatory and penal institutions in this and other countries, regarding the best and most successful methods for caring for the insane, delinquent and criminal classes. And it shall encourage and urge the scientific investigation of the treatment of insanity and epilepsy by the medical staffs of the insane hospitals, and the Minnesota Institute for Defectives, and shall publish from time to time bulletins and reports of the scientific and clinical work now done in said institutions, or which it may require to be done therein. It shall also provide for the several institutions the forms for statistical returns to be made by them in their annual and other reports. Provided, however, the expense authorized in carrying out the provisions of this section shall not exceed five hundred (500) dollars per annum.

Sec. 16. Biennial report.—The board shall make reports to the governor and legislature of its observations and conclusions respecting each and every of the institutions named, including the regular biennial report to the legislature covering the biennial period ending July 31st preceding the regular session of the legislature. Said biennial report shall be made not later than November 15th in the year preceding the meeting of the legislature, and shall also contain the reports which the executive officers of the several institutions are now or may be by the board required to make; also a statement of the visitations to the several institutions, and when and by whom made.

Such biennial report shall be published under the direction of the state expert printer, to be paid for out of the appropriation for public printing.

Sec. 17. Contents of biennial report—Daily record.—The board shall publish in its biennial report to the legislature the name and salary of every employe of said board, the name and salary of each officer and employe in the several institutions subject to its control. It shall be the further duty of the board to require the proper officer of each institution to keep in a book prepared for the purpose a daily record, to be made each day, of the time and number of hours of service of each employe, and the monthly pay roll shall be made from such time book, and shall be in accord therewith. When an appropriation is based on the number of inmates in or persons at an institution, the board shall require a daily record to be kept of the persons actually residing at and domiciled in such institution.

Sec. 18. Institutions under Board of Control—Powers.—The Board of Control shall supersede and take the place of the State Board of Corrections and Charities, the Board of Trustees for the Hospitals and Asylums for the insane, the Board of Directors of the Minnesota Institute for Defectives, so far as said board has power and control over any institution other than the schools for the deaf and the blind, the Board of Managers of the State Training School for Boys and Girls, the Board of Managers of the Minnesota Reform-

atory and the Board of Managers of the State Prison. The Board of Control shall have full power and authority to perform all the duties according to existing laws, now devolving upon the above mentioned boards, which are not inconsistent with, or repealed by, this act. The Board of Control have full power, to manage, control and govern, subject only to the limitations contained in this act, the Minnesota State Prison, Minnesota State Training School for Boys and Girls, Minnesota State Reformatory, the state hospitals and asylums for the insane, the Minnesota Institute for Defectives, except the schools for the deaf and the blind. The Board of Control shall have and exercise full authority in all financial matters of the State University, the State Normal Schools, the State Public School, the Schools for the Deaf and the Blind. The said Board of Control shall disburse all public moneys of the several institutions named, and shall have the same authority in the expenditure of the public moneys appropriated therefor, as in the other institutions named in this bill, except as hereinafter otherwise provided, and such board shall appoint a purchasing and disbursing officer or officers for such institutions. Said Board of Control shall also have supervision of the construction of all buildings and betterments erected at the cost of this state, but shall co-operate with the local boards of the different institutions in the preparation of plans and specifications therefor. Such Board of Control, however, shall not have control over or authority to disburse any private donations or bequests made by gift or devise by any private individual, to any educational institution of this state, but said private gifts or donations or bequests shall, unless otherwise directed by the terms of such gift or bequest, be applied by such various boards of the said educational institutions, to the use proposed by the terms of the gift. But the various boards now in charge of the several educational institutions shall have and retain the exclusive control of the general educational policy of said institution, of the courses of study, the number of teachers necessary to be employed, and the salaries to be paid; and such various boards shall have the exclusive right to employ or dismiss the teachers and others engaged in carrying on the functions of said institutions, and shall also have the exclusive control of the grounds, buildings and other public property of their several institutions, and of all other matters connected with said institutions, except as herein specifically reserved to said Board of Control. All contracts with employes of said educational institutions and a concise statement of all supplies needed shall be reported by the board in charge of said several institutions to the said Board of Control, and provision shall be made by said Board of Control, by suitable rules, for the payment of the salaries of such employes, and any expenses incurred by the members of said local board and for the purchase of all necessary supplies by such purchasing agent to be appointed as herein provided, as in the case of the other public institutions of this state.

Sec. 19. Powers—Duties—Annual Statement—Repeal—Uniform system of books.—The boards of trustees, boards of control and commissioners, now charged with the government of the institutions named in section eighteen hereof and the State Board of Corrections and Charities shall, on and after August 1, 1901, have no further legal existence. All trustees now in office shall continue in office until Aug. 1, 1901. The Board of Control shall establish a uniform system of books and accounts for state institutions, as hereinbefore provided, and cause the same to be examined at least once in each year by the public examiner and annually require settlement with the officers of each state institution. Nothing herein contained shall limit the general supervisory or examining powers vested in the governor by the laws or constitution of the state, or that vested by him in any committee appointed by him. The Board of Control shall prepare annually for publication a statement of the cost for the preceding year of maintaining each of said institutions, including improvements, itemized so far as practicable, and so arranged as to show the cost of the various kinds of provisions and supplies. This statement shall be published under the direction of the state expert printer, to be paid for out of the appropriation for public printing.

Sec. 20. Investigation—Witnesses—Contempt of court.—It shall be the duty of said board, or a committee thereof, to visit and inspect at least once in six months, the institutions named, and investigate the financial condition and management of such institutions; and in aid of any investigation the board shall have the power to summon and compel the attendance of witnesses; to examine the same under oath, which any member thereof shall have the power to administer; and shall have access to all books, papers and property material to such investigation, and may order the production of any other books or papers material thereto. Witnesses other than those in the employ of the state shall be entitled to the same fees as in civil cases in the district court. The claim that any testimony or evidence sought to be elicited or produced on such examination may tend to criminate the person giving or producing it, or to expose him to public ignominy, shall not excuse him from testifying or producing evidence, documentary or otherwise; but no person shall be prosecuted or subjected to any penalty or forfeiture for and on account of any matter or thing concerning which he may testify or produce such evidence, provided that he shall not be exempted from prosecution and punishment for perjury committed in so testifying. And it shall be the duty of the board to cause the testimony so taken to be transcribed and filed in the office of the secretary of the board at the seat of government, within ten days after the same is taken, or as soon thereafter as practicable, and when so filed the same shall be open for the inspection of any person. Any person failing or refusing to obey the orders of the board

issued under the provisions of this section, or to give or produce evidence when required, shall be reported by the board to the district court, or any judge thereof, and shall be dealt with by the court or judge as for a contempt of court.

Sec. 21. Monthly visitation—May appoint a woman.—The board by committee or its secretary shall visit each hospital or asylum for the insane once each month. If the board deem it prudent, it may appoint a woman who resides within the state, whose duty it will be to visit such hospital or asylum, when directed by the board, and to report to the board, and who shall be paid such compensation from the funds hereby appropriated as is deemed reasonable by the board, upon proper audit of the bill for such services and expenses.

Sec. 22. Board to inspect—What—Examination of Witnesses.—The board, or any member thereof, at the stated visits to any of the institutions under its control, shall inspect every part of each institution, and all places, buildings and grounds belonging thereto, or used in connection therewith. They shall make an examination of the general and special dietary, the stores and methods of supply; as far as circumstances may permit, they shall see every inmate of the charitable institutions, especially those admitted since the preceding visit, and shall give such as may require it suitable opportunity to converse with the members of the board, apart from the officers and attendants. They shall, if deemed necessary, examine under oath the officers, attendants, guards and other employes, and make such inquiries as will determine their fitness for their respective duties.

Sec. 23. Report to governor—Failure ground for removal.—The board shall investigate and report to the governor any abuses or wrongs which exist in the said institutions referred to in this act, and any failure to comply with the provisions of this act shall be good ground for removal, and any failure or neglect to faithfully comply with the provisions of this section shall be sufficient reason for removing any member of said board from office.

Sec. 24. Triplicate estimates—Revision—Purchase of supplies.—The superintendent, warden, or other managing officer, as may be designated by the Board of Control, shall on or before the fifteenth day of each month, cause to be prepared triplicate estimates in minute detail, including estimated cost of each item, of all the expenditures required for the institution for the ensuing month. Such estimates shall also include a statement of the sources and amount of all the revenues received by the said institution and accounted for to the state treasurer on the first day of each month. Two of such triplicate estimates shall be sent to the office of the board, and the third shall be kept by said superintendent, warden, or other managing officer. The board may revise the estimates for supplies or other expenditures either as to quantity, quality, or the estimated cost thereof, and shall certify that it has carefully

examined the same, and that the articles contained in such estimate as approved by it are actually required for the use of said institution. When the estimates have been so certified and revised, a copy of such revised estimate, duly certified, shall be sent to the institution, and another copy retained by the board. The certified copy sent to the institution shall be sufficient authority to the management of the institution to purchase the supplies enumerated in said estimate at prices not to exceed those therein named and not otherwise. Said supplies shall be so purchased as to permit at least thirty days' time to pay therefor, and the steward, clerk or other officer of the institution designated by the board, shall require itemized bills to be rendered by the persons who furnished supplies, in duplicate, for all purchases, whether made upon contract or otherwise, which shall be in the following form:

The State of Minnesota, on account of the
Institution.

(Date.)

ToDr. (here insert an itemized account
 of the goods or property purchased.)

State of.....

ss.

County of.....

I, on oath say that the foregoing bill of account is correct and just, and wholly unpaid; that exact consideration therein charged for was received by said institution; that neither the same nor any part thereof has since been commuted; and that neither bonus, commission, discount, nor any other consideration, directly or indirectly, has been given or stipulated, within my knowledge or belief, because of the purchase thereof, as therein set forth, or for any other reason. (To be signed by the person having personal knowledge of the facts therein set forth.)

Sworn to and subscribed before me this day of

I hereby certify that the above account is correct, and that the articles therein charged have been received in good order by the
 Institution.

Steward, clerk or other designated officer.

It shall be endorsed as follows:

NoInstitution.

\$.....

Passed upon by the Board of Control on the.....day of
 and ordered paid.

Secretary of the Board of Control.

Sec. 25. **Monthly statement—Affidavit.**—The steward, clerk or other officer, who may be designated by the board, shall prepare a monthly statement showing purchases and expenditures of every kind for the preceding month, which shall be signed by such officer, approved by the chief executive officer of the institution, and filed with the board on a day certain to be fixed by said board. Attached thereto shall be the affidavit of such steward, clerk or officer, as the case may be, stating that the goods and other articles therein specified were purchased and received by him or under his direction at the institution, and were purchased at a fair, cash, market price, on credit not exceeding thirty days, and that neither he nor any person in his behalf had any pecuniary or other interest in the purchases made, or received any pecuniary or other benefit therefrom, directly or indirectly, by commission, percentage, deductions, or in any other manner whatever, and that the articles contained in such bill conformed in all respects to the invoiced goods received and ordered by him, or the samples from which the goods were purchased, both in quality and quantity. If any invoice or statement, or part thereof, is found objectionable, the board shall indorse its disapproval thereon, with its reasons therefor, and return it to the management of the institution, and when the matter complained of is corrected, said statement and invoice shall be returned to the board.

Sec. 26. **Pay roll—Triplicate abstract.**—When the monthly statement is so made, approved and verified, it shall be forwarded to the Board of Control, together with the original invoices of the purchases, and a complete and itemized statement of every expense of said institution, including the receipted pay roll, for the examination and auditing of the board, which board shall fix a regular time for the auditing of the accounts of the institution for the preceding month. The monthly pay roll of each institution shall show the name of every officer and employe, when first employed, the monthly pay, time paid for, the amount of pay, and any deduction for the careless loss or destruction of property. This requirement shall be observed in all cases, and in no event shall a substitute be permitted to receive compensation in the name of the employe for whom he is acting. When the said accounts are audited, the secretary of the board shall, under the seal of the board, prepare in triplicate an abstract showing the name, residence and amount due each claimant, and the institution and the fund thereof on account of which the payment is made. He shall deliver one copy thereof to the state auditor, another to the state treasurer, and the third shall be retained in the office of the board. Upon such certificate the state auditor shall, if the institution named has sufficient funds, issue his warrant upon the state treasurer for the gross amount, as shown by such certified abstract. Said last named officer, upon being furnished by the board with a certified copy of such abstract

as herein provided, shall send checks of the state treasurer to the several persons for the amounts of their respective claims, as certified by the Board of Control. The state treasurer shall preserve in his books a record of each check and remittance in the proper manner, showing the date of the issuance of each check, the name of the person to whom it was made payable, and such other data as may be evidence for the state showing the payment of such indebtedness. The pay roll for each institution can be paid by a single check sent to the steward, clerk, or other officer designated by the Board of Control. If the state treasurer shall require more clerical help because of this enactment, he is hereby authorized to employ an assistant.

Sec. 27. Biennial estimates of special appropriations.—The board shall prepare, for the use of the legislature, biennial estimates of appropriations necessary and proper to be made for the support of the said several institutions, and for the extraordinary and special expenditures for buildings, betterments, or other improvements.

Sec. 28. Suggestions for Legislation.—The board shall incorporate in its report to the legislature suggestions respecting legislation for the benefit of the several institutions, or for the dependent, defective or criminal classes of the state. The board and its secretary shall, on request, attend the meetings of legislative committees to which such questions may be submitted for consideration and furnish such committees such information in regard to its doings and the conduct of such institutions as may be demanded.

Sec. 29. All plans and specifications limited to amount of appropriations—Penalty.—The board shall prepare plans for all betterments, improvements or buildings costing more than one thousand dollars (\$1,000), for which it may recommend an appropriation, but when an appropriation for any amount has been made, there shall be no expenditure thereof until the board has secured suitable plans and specifications, prepared by a competent architect, and accompanied by detailed statement of the amount, quality and description of all the material and labor required for the completion of said structure; and no plan or plans shall be adopted, and no betterments, improvements or buildings constructed, that contemplate the expenditure of more money for completion than the amount appropriated by the legislature therefor, unless exempted from the provisions of this act by the act making such appropriation. In no event shall the board direct or permit an expenditure for any such purpose in excess of the amount appropriated by law or contemplated by the statute, and the members of the board, its officers and agents, violating this provision, shall be guilty of a misdemeanor, and on conviction the offender shall be fined in any sum not less than two hundred dollars, nor more than five thousand dollars, in the discretion of the court, or imprisoned in the county jail not exceeding one year, or by both such fine and imprisonment.

Sec. 30. **Contracts.**—Contracts may be entered into under the direction of the Board of Control by the proper officers of one or more of the institutions for staples and other articles of supplies, as may be found feasible by the board for the institutions to purchase in bulk for use or consumption for periods longer than thirty days. Such contracts shall not, however, be made except in conformity with the provisions of this act relating to estimates. The Board of Control may, whenever it deems it for the best interests of the state, contract for the purchase of staples or other articles of supplies, in bulk or otherwise, for any or all of the institutions under its control, and nothing elsewhere provided in this act shall be held to restrict or limit the power of the said board to so contract.

Sec. 31. **Purchase of Supplies.**—It shall be the duty of the board to make specific rules and regulations respecting the manner in which supplies shall be purchased and contracts made for the several institutions, so as to insure the competition and publicity necessary to secure the economical management of each institution. Jobbers or others desirous of selling supplies to an institution shall, by filing with the chief executive officer of such institution, and with the secretary of the board a memorandum showing their address and business, be afforded an opportunity to compete for the furnishing of the supplies under such limitations and rules as the board may prescribe. In purchasing all supplies Minnesota dealers shall have the preference, when such can be given without loss to the state. When samples are furnished, the same shall be properly marked and preserved for six months after purchase of such merchandise.

Sec. 32. **Letting of contracts—Labor of inmates utilized.**—Contracts for the erection, repairs or improvements of buildings, grounds, or properties of the institutions under the charge of this board, and for which appropriations have been made or may be made by the legislature, must be let for the whole or for any part of the work to be performed, by the chief executive officer of the institution, subject, however, to the same rules and regulations as herein provided for the furnishing of estimates by said institution to, and the approval and revision thereof by, the Board of Control.

If the cost of the erection or betterment is not in excess of three hundred (300) dollars, the board may permit the management of the institution to construct the same by day's labor, without contracting the work. All plans or specifications for the said erections, repairs and improvements shall be prepared under the board's direction.

The board shall determine to what extent and for what length of time, and by what means advertisements are to be inserted in newspapers for proposals for the said erections, repairs or improvements.

All contracts shall be awarded by the management of the institution to the lowest responsible bidder, subject to the provisions of this act, and the approval of the board, prior to the execution of the contract. The management of the institution has the right to reject any and all bids, and to readvertise, upon the approval of the board. A preliminary deposit of money or certified check upon a solvent bank in such amount as the board may prescribe, shall be required as an evidence of good faith, upon all proposals for the construction of said buildings, repairs and improvements, which deposit or certified check shall be held by the management of the institution, under the direction of the board. The provision of this section which requires all work to be let by contract shall not be mandatory as to the labor on the construction work at the penitentiaries, but the board shall establish such rules and enforce the provisions of this act so that the construction work at the penitentiaries shall be performed in a manner agreeable thereto, with the strictest accountability exacted in the consumption of all supplies for construction purposes, and in the expenditure of the public moneys.

On proper representations the board is authorized to so construct the erections, betterments and improvements at other institutions, that the work of inmates may be utilized, if it is found to be advantageous to the state, and a substantial saving made, but the attempt to use such labor shall not permit a substantial departure from the requirements of this section; and in no case shall any expenditure be made except on estimates submitted to and approved by the board as provided herein. No payment shall be authorized for construction purposes until satisfactory proof has been furnished to the Board of Control, by the proper officer or supervising architect, that the contract has been complied with by the parties; and all payments shall be made in a manner similar to that in which the current expenses of the several institutions are paid.

Sec. 33. **Record—Transfer—Managing officer.**—The board shall keep in its office, accessible only to the members, secretary and proper clerks, except by consent of the board or on the order of a judge or court of record, a record showing the residence, sex, age, nativity, occupation, civil condition and date of entrance or commitment of every person, patient, inmate or convict in the several institutions governed by the board, the date of discharge of every such person from the institution, and whether such discharge was final, and the condition of the person at the time he left the institution.

The record shall also indicate if a person is transferred from one institution to another, and to what institution; and if dead, the date and cause of death. This information shall be furnished to the board by the several institutions, and such other obtainable facts as the board may from time to time require.,

It is the duty of a managing officer of each institution, who shall be named by the board, within ten days after commitment or en-

trance of a person, patient, inmate or convict to the institution, to cause a true copy of his entrance record to be made and forwarded to the office of the Board of Control. When a patient or inmate leaves or is discharged, transferred, or dies in any institution, the superintendent or person in charge shall, within ten days thereafter, send such information to the office of the board, all of which information shall be furnished on forms which the board may prescribe.

It shall be the duty of all officers of said institutions whose duty it is to make reports to the governor or other officer, at the present time, to make them hereafter to the Board of Control.

Sec. 34. Power to transfer.—The board may transfer the inmate in any hospital or asylum to any other hospital or asylum at the expense of the state, and shall see that proper record thereof is made at the hospitals or asylums, and in the office of the board.

Sec. 35. Questionable commitment.—The superintendents for the hospitals for the insane and the Minnesota institute for defectives are required to immediately notify the board if there is any question as to propriety of the commitment or detention of any person received at such institutions, and said board, upon such notification, shall inquire into the matter and take such action as may be deemed proper in the premises.

Sec. 36. Funds of inmates—Care of.—It shall be the duty of each superintendent or managing officer of the several institutions named in this act to have the care and custody of any funds belonging to inmates of the said institutions, which may come into his hands, to keep accurate accounts of such funds in books provided for that purpose, and to pay out such funds under such rules and regulations as may be established by law or prescribed by the Board of Control, taking proper vouchers therefor in all cases; and every such superintendent shall give bond in such sum as may be required by law, or prescribed by the Board of Control, conditioned upon the faithful performance of his duties, and the due accounting for the funds entrusted to his care.

Sec. 37. Moneys remitted to state treasurer.—It shall be the duty of every officer and employe of the several institutions named in this act, to pay over to the superintendent of the institution without delay any funds which may come into his hands belonging to any inmate of the institution, and to pay over to the accounting officer of the institution without delay any funds which may come into his hands belonging to the institution. It shall be the duty of the accounting officer of each institution, at the close of each month, or oftener, to forward to the Board of Control a statement of the amount of the same and the sources from which it has arisen.

It shall be the duty of the Board of Control upon receiving such statement to transmit the same to the state auditor, who, upon receipt thereof, shall place in the hands of the state treasurer a draft for the amount upon the accounting officer specifying the fund to

which the same is to be credited, and upon payment of such draft to place the amount so received to the credit of such institution, adding it to any appropriations that may have been previously made by the legislature for the said institution, distributing it to the several appropriations from which it may have been received, or to the current expense appropriation, according to his discretion.

Sec. 38. Protection against fire—Means of escape.—It shall be the duty of the board to compel the superintendent, warden, or other chief executive officer of each of the institutions under the control of the board to provide at each institution adequate and ready means of protection against fire, and to construct proper means of escape for the inmates and attendants where the same are not already constructed, and to establish and enforce rigid rules and regulations, by which the danger of fire shall be minimized, and prevent, as far as possible, injury to the persons of the inmates, and the loss or destruction, by any cause, of the property of the state.

Sec. 39. Inventory of stock and supplies.—The board shall require on or before Sept. 1, 1901, the chief executive officer of each institution under its charge to make a complete, minute and accurate inventory of the stock and supplies on hand, the amount and value thereof, which inventory shall be under the following heads: Live stock, produce of the farm on hand, carriages and vehicles, agricultural implements, machinery, mechanical fixtures, real estate, beds and bedding in inmates' departments, other furniture in inmates' departments, personal property of the state in superintendents' department, ready-made clothing, dry goods, provisions and groceries, drugs and medicines, fuel, library and all other property under such other heads as the board may deem proper. A like inventory shall be submitted by the proper officer of each institution to the board when the annual report of said officer is submitted to the board.

Sec. 40. Gifts or gratuities—Penalties.—No member of the Board of Control, or other officer, agent or employe thereof, and no superintendent, officer, manager or employe of any of the institutions under the charge and control of said board shall, directly or indirectly for himself or any other person or for any institution under the charge of said board, receive or accept any gift or gratuity from any person or persons, firm or corporation who are dealers in goods, merchandise or supplies which may be used in any of said institutions, or from any employe, servant or agent of such person or persons, firm or corporation.

Any person violating the provisions of this section shall be deemed guilty of a misdemeanor, and upon conviction be punished as provided in section thirteen (13) of the Penal Code, and such violation shall be cause for his removal from office.

Sec. 41. Contingent fund.—The Board of Control may permit a contingent fund to remain in the hands of the accounting officer thereof, from which expenditures may be made in case of actual

emergency requiring immediate payment to prevent loss or danger to the institution or its inmates, and for the purpose of paying freight, purchasing produce, live stock and such other commodities requiring a cash settlement, and for the further purpose of discounting merchandise bills for cash when a saving to the state can be made, such bills in all cases to be subject to the provisions of section 25 of this act. A full, minute and itemized statement of every expenditure made during the month from such fund shall be submitted by the proper officer of said institution to the board, under such rules and regulations as may be by said board established. If necessary, the board shall make proper requisition upon the state auditor for a warrant on the state treasurer to secure the said contingent fund for each institution.

Sec. 42. **Blanks and forms.**—The Board of Control shall formulate and furnish to each institution proper blanks and forms for all statements and accounts necessary to furnish the information required of such institution.

Sec. 43. **Appropriation.**—There is hereby annually appropriated from any funds in the state treasury not otherwise appropriated sufficient thereof to pay salaries and expenses of the board authorized by this act.

Sec. 44. **Repealed.**—All acts and parts of acts creating the boards of managers, boards of trustees or boards of control of the following named institutions: Minnesota State Prison, Minnesota State Training School for Boys and Girls, Minnesota State Reformatory, the several state hospitals and asylums for the insane, and also the State Board of Corrections and Charities, and all acts amendatory thereof, so far as they create any or either of said boards, and all acts and parts of acts inconsistent herewith, are hereby repealed as of the date when by the provisions of this act said boards are to cease to exist.

Sec. 45. This act shall take effect and be in force from and after its passage.

Approved April 2, 1901.

An Act to Provide for the Appointment by the Board of Control of State Institutions of a State Agent for the Aid and Supervision of Paroled or Discharged Prisoners.

General Laws 1903, Chapter 286.

Be it enacted by the Legislature of the State of Minnesota:

Section 1. The Board of Control of State Institutions may at any time when it deems it necessary appoint a state agent for the aid and supervision of paroled or discharged prisoners. The said state agent shall receive such salary as it shall fix and determine, together with the necessary traveling expenses incurred in the discharge of his duties, and he shall perform such duties as it may

prescribe in behalf or in supervision of prisoners paroled or discharged from the state prison, the state reformatory, or any other public prison in this state, including the return of paroled prisoners to such institutions. It shall be his special duty to assist discharged or paroled prisoners in obtaining employment. The salary and expenses of said state agent shall be paid from the current expense fund of such institutions, and shall be divided between them in proportion to the appropriation made by the legislature for their current expenses. Before entering upon the duties of his office he shall take oath and file a bond in such sum as said board shall prescribe for the faithful performance of his duties. Such bond and oath shall be filed in the office of the secretary of state. He shall hold office at the will of said board.

Sec. 2. All acts and parts of acts inconsistent herewith are hereby repealed.

Sec. 3. This act shall take effect and be in force from and after its passage.

Approved April 20, 1903.

An act to provide for the execution of contracts relating to state institutions under the control of the Board of Control of State Institutions.

General Laws 1903, Chapter 335.

Be it enacted by the Legislature of the State of Minnesota:

Section 1. All contracts relating to state institutions under the control of the Board of Control of State Institutions shall be made by it in writing, and signed by its chairman.

Sec. 2. All acts and parts of acts inconsistent herewith are hereby repealed.

Sec. 3. This act shall take effect and be in force from and after its passage.

Approved April 21, 1903.

SECOND BIENNIAL REPORT

OF THE

BOARD OF CONTROL

OF STATE INSTITUTIONS.

When we transmitted our first biennial report, two years ago, the question had not yet been determined as to whether the law abolishing the many boards and creating the Board of Control of State Institutions, was a wise enactment. There were those who professed to believe that the members of a single board could not possibly be endowed with those qualities of mind and heart essential to a proper consideration of the welfare of the wards of the state from a humanitarian standpoint; that between keen desire on the part of the board to save money, make a record, and justify its right to be continued in office, the inmates of our institutions would be clothed in rags, scantily provided with unsuitable food, and without proper care and attendance; that neither jails, lockups, nor poor houses would be inspected, nor non-resident dependents deported; that no matter what amount of money might be saved, it would always be at the expense of efficiency, that the creation of a Board of Corrections and Charities to serve as general guardian of the Board of Control, would in some indefinable manner work a much needed reform in its management of the institutions.

During the three years of the Board of Control the general public has been keenly alive to the situation, and, uninfluenced by local clamor, has watched the work of the board, noted the development of plans, and influence upon the institutions, and, if we may judge from the newspaper world in general, and the personal assurances we receive from time to time as to the character of our work, it has become at least reasonably well satisfied with results obtained. It also appears that whatever mistakes have been made have very properly been charged to the errors in judgment on the part of the members of the board, and not to the Board of Control system.

VISITING INSTITUTIONS, ETC.

The visiting of institutions, cooking and serving food, character of supplies furnished, and proper treatment of inmates, being the most important subjects with which we have to deal, have received their full share of our attention. While there is still improvement to be made along these lines, we feel that much has been accomplished during the past two years.

DEPORTATIONS.

The enforcement of the law providing for the deportation of non-resident paupers, insane and feeble-minded people is of the utmost importance to the state, and far reaching in its results from a financial standpoint. During the period covered by this report, we have caused to be investigated 209 cases of alleged non-resident dependents, 141 of which were deported. This is by far the largest number of cases either investigated or deported during any other biennial period in the state's history. Had the 141 persons deported remained in the state, and been supported by it for an average period of life of five years, it would have cost the state upwards of \$100,000.

INSPECTION AND CONDEMNATION OF JAILS, LOCKUPS AND POOR HOUSES.

This important subject has not been neglected. The necessity for such inspection and condemnation is apparent from the reports made and the number of condemnations required. The following table covering the biennial period just closed, speaks for itself:

Poor houses inspected.....	17
Jails and lockups inspected.....	144
Lockups condemned	42

COST OF MAINTENANCE.

The policy of the board from the inception of its work has been to maintain the several institutions under its control at the least possible expense to the state consistent with humane care of inmates, a sufficient supply of wholesome, palatable food, and whatever of plain, decent clothing was necessarily required. That we have materially decreased the cost, and at the same time provided all these, has happily passed the point of discussion.

In carrying out this policy we have been handicapped by the constantly advancing market price of supplies, in some instances aggregating fifty per cent, as well as by poor crops on institution farms occasioned by unfavorable weather conditions. When it is considered that the expenditures for supplies, exclusive of salaries and fuel, aggregates upwards of four hundred and fifty thousand dollars per annum, it becomes apparent that an average advance of ten per cent, which is well within the actual figures, amounts to the large sum of forty-five thousand dollars annually.

In assuming charge of the institutions on Aug. 1, 1901, we found the salary list of employes generally much below what it should have been, taking into account the cost of living and salaries paid in the business world. We have advanced them from time to time, as means were provided for so doing, until the total increase amounts to twenty per cent, or an additional annual outlay for salaries of seventy-five thousand dollars more than had previously been paid. The last advance was made in cases where meritorious services seemed to require it and aggregated about ten per cent. We believe salaries now approximate those paid for similar services elsewhere, that the maximum cost therefor has been attained, and that no further advance will be necessary. The following table will more clearly demonstrate the trend of salaries during the life of the Board of Control:

Average salary paid per employe for the year 1900-01 (being year prior to Board of Control).....	\$407.09
1901-02	428.00
1902-03	460.00
1903-04	486.00

Another obstacle to reduction of expenses has been the continuous advance in price of coal, culminating in the year 1903-4 in a clear advance of one dollar per ton over market price paid in the year 1900-1. This compelled an additional outlay for the year of forty thousand dollars more than that previously paid.

From the foregoing it will be seen that the board was compelled by circumstances over which it had no control to pay during the year just closed an excess for

Additional salaries	\$ 75,000.00
Additional market price of supplies.....	45,000.00
Additional cost of fuel.....	40,000.00
Or a total of.....	<u>\$160,000.00</u>

It is with some degree of satisfaction that we are able to say that notwithstanding all this, we are still within the average per capita cost of maintenance by the old management.

That we have been able to accomplish these results is almost entirely due to our methods of purchase. These were fully explained in our former report, and it does not seem necessary to repeat here. Suffice to say, we are still continuing the methods therein outlined, and two years more of experience and the success we have attained confirms us in the belief that they should be continued, and such will be the policy of the board.

WHERE SUPPLIES ARE PURCHASED.

In this connection it is worthy of note that in the purchase of supplies our local dealers have obtained contracts for most of the business. Out of a total purchase of over \$1,200,000 worth of supplies, more than 90 per cent has been purchased within the state. Notwithstanding this fact, non-resident bidders are in all cases treated fairly in making awards.

APPROPRIATIONS.

To the recommendations of appropriations for new buildings and repairs, we have devoted much time and careful attention. We have endeavored to consider the question from the standpoint of the state uninfluenced by local interest or personal preference, and believe we have done so. The aggregate amount asked for by all the institutions for which we report is not only excessive, but absolutely beyond the ability of the state to grant, unless the legislature in its wisdom shall determine to materially increase the tax levy. For this reason we have decided to recommend, in their order, only those appropriations which we deem to be of paramount importance, ignoring every other consideration.

We believe the first duty of the state is to its dependent population; that above and beyond all other considerations or interests it should first comfortably house, feed, clothe and care for those whom it deprives of their personal liberty for the public good, and to do this, it must also properly pay and feed, as well as comfortably shelter those whom it employs to administer such care; that until this is done, all other institutions should be willing to wait until such time as the revenues of the state will warrant it in granting their requests.

We have asked for appropriations for repairs and improvements at all institutions, including small, ordinary repairs, of \$157,800. We believe that before entering upon the construction of new buildings, the state should first preserve and protect what it already has by putting them in proper repair; hence sincerely and earnestly recommend that the carefully considered appropriations for repairs and improvements herein asked for be granted.

We yield to no one in our loyalty to, or admiration for, our educational institutions, which have been so generously provided for by the state, and believe that all new buildings asked for by their respective boards are desirable and could be utilized in accomplishing much good, but we firmly believe it to be the duty of such boards to unselfishly and uncomplainingly bide their time until other institutions, more deserving by reason of what is required of them, be placed upon at least an equal footing with them.

REPEAL OF STANDING APPROPRIATIONS AND SPECIAL LEVIES.

In our first biennial report, we recommended, among other things, "that all standing appropriations for current expense of public institutions be abolished, and biennial appropriations made for full amount required." In the light of experience and a more careful study of the question, we are constrained not only to reiterate this recommendation, but to add to it "all special levies and standing appropriations for every purpose," excepting alone the State Capitol.

Standing appropriations were confessedly inaugurated and are continued for but one purpose, that of keeping from the general public and many members of the legislature, as well, the actual amount of money being expended annually by the institutions. The generous public, who cheerfully and uncomplainingly pay from their, in many cases, scanty earnings to support the state government, are justly entitled to be dealt honestly with, and no board or institution intrusted with the expenditure of public moneys has the right to oppose an annual appropriation of the full amount allowed, that all may see and understand.

SPECIAL LEVIES.

The special levy for the support of the University is along the same line as standing appropriations, and while we do not question

the motive of those who were instrumental in its inception and consummation, yet we believe the system should be abolished for the same reasons as set forth in regard to standing appropriations.

In addition to the objections already mentioned, the system does not work well in the financial management of the institution. For six months of the year it has practically no funds with which to do business, and must either borrow money or allow its teachers to go unpaid, and its bills for supplies to practical protest. It should have an annual appropriation for the full amount allowed, available on the first day of the fiscal year, and those who have its financial management in charge should so regulate its expenditures that the institution may be run during the full year within such appropriation.

The special levies of 1903 "for buildings and other equipment for the Department of Agriculture" should not be continued. It is admitted that an appropriation of \$250,000 for this purpose could never have become a law had it been embodied in the General Appropriation Act, or had the general public been allowed or permitted to understand that it was, in fact, a raise in the tax levy. We believe that a special levy of this character is the entering wedge for a class of legislation not only unnecessary, but which cannot be defended on moral or political grounds.

GRADUATES OF DENTAL DEPARTMENT OF THE UNIVERSITY IN THEIR RELATION TO THE STATE BOARD OF DENTAL EXAMINERS.

We have been astonished to learn that the graduates of the Dental Department at the University are not allowed to appear before the State Board of Dental Examiners in this state for examination unless the University becomes a member of the National Association of Dental Faculties; that the University is not considered reputable and in good standing by the Dental Board unless it becomes a member of the N. A. D. F. and retains such membership therein.

We quote the following from a letter written by Dean Dickinson, head of this department at the University, now in our office:

"If our school was not a member from choice, in order to be a part of the organized teaching force of the profession, and be benefitted by the experience of the older and larger schools, it would be incumbent upon us to be allied with it, for none of the State Dental

Examining Boards recognize diplomas or admit to examination graduates from any college except those of the N. A. D. F.

Also, from a letter written by Frank E. Moody, one of the vice-presidents of said association, residing at Minneapolis:

"I refer you to Sec. 5 of the Act of 1889 of the Dental Laws of Minnesota where it specifies that 'in order to be eligible for such examinations such person shall present to said Board his diploma from some dental college in good standing and shall give satisfactory evidence of his rightful possession of the same.' This term 'good standing' has been defined by recent decisions of the Supreme Court of Wisconsin and others that the college must be a member of the National Association of Dental Faculties in order to be reputable.

* * * *

"Candidates of colleges that stand outside of N. A. D. F. have been refused examination before our State Board. It has been the action in the past and will be so in the future. As to whether the Board would take the same stand with Minnesota I should say that it undoubtedly would as we have never at any time made a discrimination between states. We would not admit one and debar another college." * * * *

"I am sure that you enjoy with me the distinction that our college is one of the foremost in the country."

We have been informed by an officer of the State Dental Board that their position is correctly stated as above.

From the foregoing it will be seen that while "our college is one of the foremost in the country," it will at once cease to be in "good standing" or "reputable" should it fail to pay twenty dollars per year to this association as annual dues, and an assessment of fifty dollars; that while the University is maintained at an annual expense of more than six hundred thousand dollars, yet our own Board of Dental Examiners will not recognize its reputability or standing, or the reputability or standing of its graduates, unless it adds a further sum of seventy dollars as a contribution to the association in question.

The graduates of the Law Department of the University are admitted to practice law without examination; the graduates from the Pharmacy Department are admitted to examination before the Pharmacy Board without question; graduates of the Medical Department are admitted to examination by the State Board of Medical Examiners whether the University is a member of any national association or not. It remains, therefore, for the Dental Examining

Board alone to require from the University a certificate of good character from the National Association of Dental Faculties before permitting its graduates to appear before it for examination. We earnestly recommend legislation that will compel this Board to admit graduates of the Dental Department of the University to an examination without prejudice, whether the University is a member of said association or otherwise or that such students be admitted to practice, on receipt of diploma from the University, without submitting to an examination by the Dental Board, as the graduates of the Law Department are now permitted to do.

We do not feel that the State of Minnesota should be compelled by a board of its own creation to seek a certificate as to the reputation and standing of any department of the University from any national association.

FIREPROOF BUILDINGS.

It is the policy of the board, in so far as appropriations will permit, to construct only fireproof buildings with modern sanitary equipment. We believe that the state cannot afford any other class of construction. The safety of inmates, the protection of its property, the good name of the state, all demand that its buildings should be built for Time. It is more economical, more satisfactory. It has been well said that "a state may be judged by the character of its buildings." We trust the legislature in making appropriations for public structures of all kinds, will provide sufficient funds, that the present policy may be continued.

FIRE ESCAPES.

We have constructed at the School for the Deaf at Faribault a Kirker-Bender fire escape, which has given splendid satisfaction in all trials to which it has been subjected, and has been pronounced by all who have seen it in operation as the most speedy and safe escape that has so far been devised. It cost, completed, ready for use, \$1,326.34.

Some of the superintendents recommend fire-proof corridors connected with some suitable detached building through which patients could be rushed without danger, and be housed all of the time instead of being delivered from the burning building into the open air. Others have suggested a brick tower to be erected at some distance from the building, and connected by covered iron balconies

with each floor; the patients to be delivered into the tower, and thence into the open air.

We shall recommend an appropriation of \$10,000 for the construction of such fire escapes as in the judgment of the board are best calculated to afford safe and quick exit in case of fire, and at such institutions as may be most in need of the same. Due regard for the safety of inmates of our institutions would seem to require favorable consideration of this subject.

INSURANCE.

The three-year period for which the state property was insured at a flat rate of one per cent, expired on Aug. 1, 1904. The fires at the different institutions during the period occasioned a net loss to the companies carrying the risk, which fact, coupled with the disastrous year in the insurance world generally, rendered it impossible to renew the insurance at the previous rate. After many conferences with a committee of the Board of Underwriters, an average advance of twenty-five per cent was agreed upon, and the insurance now in force is written upon that basis, except at the prison, where a yearly rate prevails. The board is of the opinion that the advance in rates conceded was justified for reasons previously stated.

The amount of insurance now in force upon all of the institutions under this board, including the two capitol buildings, aggregates \$4,947,165, and will be increased by other insurance between now and December 31 to \$5,000,000. The amount will be still further augmented as new buildings are constructed.

The former appropriation of \$15,000 per year was insufficient to pay the premium on the necessarily large increase in the amount of insurance carried, and there was not enough money to the credit of this fund to pay a three-year premium on the same. As the insurance for a three-year period saves the state 33 1-3 per cent over the cost of annual periods, we applied to the underwriters, requesting permission to pay one year's premium on the insurance and attach a rider to the policies, providing that, upon the payment of a second annual premium on or before April 1, 1905, the policies would be continued in force until Aug. 1, 1907, and they consented to this arrangement. Such additional premium must be paid on or before the date mentioned, or the policies will lapse on Aug. 1, 1905. The amount necessary to meet the second annual premium, as above, will be \$24,000, and we respectfully recommend an appropriation therefor, to be immediately available.

It will also be necessary to provide for the premium on \$800,000 insurance expiring at the University and Experiment Station between now and Aug. 1, 1907. This insurance will be rewritten at a pro rata premium to expire on Aug. 1, 1907, calling for premiums of about \$5,400. We recommend an appropriation for this amount, to be available on Aug. 1, 1905.

The insurance period in question will expire on Aug. 1, 1907, and the amount necessary to meet the premium on the renewals at the present rate and amounts, will be not less than \$64,000. We recommend the appropriation of \$32,000 to be available on Aug. 1, 1906, and the same amount to be available on Aug. 1, 1907, or one appropriation for the full amount, to be available on Aug. 1, 1907, as the legislature in its wisdom may deem best. If the two periods in question are provided for, an annual appropriation of \$21,500 will undoubtedly be sufficient to meet all requirements in this line.

We respectfully suggest that in lieu of an annual appropriation for insurance, the board be authorized to provide insurance upon the state's property in such amount as in its judgment may be necessary, and appropriate an amount sufficient therefor. If it is deemed best to limit the amount of insurance to be carried, there will be no objections on the part of the Board of Control.

We believe it to be a sound business policy on the part of the state to keep its property insured in a reasonable amount, and so recommend.

WATER AND LIGHTS.

We earnestly recommend that all state institutions be thoroughly equipped for supplying their necessary water and lights. At some of the institutions this is now provided for; at others, either one or both are purchased at great expense over cost of production, and in some cases at the sacrifice of efficiency. At Faribault the state is paying an exorbitant price for water used at all three institutions, amounting in the aggregate to nearly three thousand dollars per year. The water is furnished to these institutions at a pressure so low that it cannot be used effectively for fire protection. The fire at the School for Feeble-Minded on Dec. 20, 1902, would have resulted in the total destruction of the central building and contents, and a consequent loss to the state of upwards of one hundred and twenty-five thousand dollars, had they been obliged to rely upon the water pressure as furnished by the Faribault Water Works

Co. Fortunately the School for the Deaf is equipped with excellent fire pumps and a fair supply of deep-well water, and as soon as these pumps could be brought into action and this amount of water added to the supply furnished by the company the fire was under control and soon extinguished. Is further experience necessary to demonstrate the necessity for immediate action in this matter? The board should have an open appropriation for this purpose.

At Red Wing the state is buying gas from a private corporation. The board has succeeded in getting a reduction in the price per thousand cubic feet from a dollar and a half to one dollar. Yet for the first twelve months after the reduction of 33 1-3 per cent in price went into effect, the cost was increased 33 1-3 per cent without apparent or explainable reason why. No line of economy is more urgent than the supply of light at this institution.

At the Fergus Falls Hospital the situation as to water must also be considered. We are paying annually for water used at this institution \$3,000, delivered at so low a pressure that we are obliged to pump every gallon used, still further largely increasing its cost. The supply is also precarious, and last spring the dam through which the supply was obtained was carried away on two different occasions, and for some days our supply was cut off, and we were compelled to draw water in wagons for the institution. Had a fire occurred at this time, the consequences would have been deplorable. Surely this situation should not be allowed to continue. We are now building a reservoir with a capacity of 750,000 gallons, being about a ten days' supply for the institution. We are also putting down an artesian well, hoping to get a permanent supply of water from this source. If this fails, we shall be compelled to look elsewhere, and to take the matter up with the legislature in a supplemental report.

ADDITIONAL LANDS.

More land is needed at several state institutions. This Board does not agree in all respects with the recommendations of the Superintendents as to what should, or should not be, acquired, but believe that purchase should be made at some places.

If appropriations are granted to buy land at a particular institution, that fact becoming known to those having property to sell, the price is usually materially advanced on the theory that the State is compelled to take it. It would therefore seem to us more prudent that a sum be appropriated for the purchase of land for state insti-

tutions without designating the particular place, leaving the Board to make the investment where most needed, or where it can be done to the best advantage of the state. In accordance with this plan, we recommend an appropriation of \$25,000 for each year of the biennial period, to be used in acquiring additional land for state institutions.

DORMITORIES FOR NURSES AND ATTENDANTS.

There is, perhaps, no one subject to which we could call attention of more importance from a humanitarian standpoint than that of a properly constructed and cheerfully furnished building as a resting place, a home, for nurses and attendants. The building should be sanitary in its appointments, well lighted and ventilated, fireproof, plain, but substantial. Such buildings should be erected at the three Hospitals for the Insane and School for Feeble-Minded. Those first built should be for female nurses and attendants, to be followed by similar ones for males, as fast as the revenues of the state will permit.

It seems hardly necessary to advance arguments in support of this recommendation. The arduous duties, the exacting service, the long hours of nervous strain, the menial character of the labor demanded, coupled with the fact that when the day's work is at last finished, they have no alternative but to lie down in the very midst of their labor, with no possible separation from it while they remain in the service of the state, demand for this subject more than ordinary consideration. Private hospitals deem this subject of great importance, and apply the remedy. Should the state do less?

Were business men required to seek rest side by side with their business entanglements; the mechanic amidst the whirl of his tools and machinery; the doctor by the bedside of his suffering patient; or the lawyer with his books, our hospitals would be full of nervous prostration, and our cemeteries filled with its victims. Yet we ask and expect nurses and attendants, exposed month after month to a greater nervous strain, to submit to an imposition that none of these would tolerate for a moment. It is time that the state, recognizing the valuable, devoted service of these willing workers, do something to ameliorate this condition. If a raise in the rate of tax levy can ever be justified, it would be for the purpose mentioned.

The space made vacant by the removal of nurses and attendants from the institutions proper would be available for a still larger number of inmates, and decrease in proportion the demand for additional buildings for their accommodation.

STATE TRAINING SCHOOL FOR BOYS AND INDUSTRIAL
SCHOOL FOR GIRLS.

We sincerely trust that the legislature at the coming session will provide for the removal of the girls now committed to the State Training School to an institution to be provided for and known as "State Industrial School for Girls." The legislature of 1901, without opposition, inserted in the General Appropriation Act a paragraph directing and empowering the Board of Control of State Institutions to establish such school, and appropriating money therefor.

The board called for proposals for sites for such school, receiving many desirable responses thereto, and were about to establish the same upon one of such sites, when prevented from so doing by action in court commenced by the citizens of Red Wing. We especially regret this action on their part, as the law did not contemplate, or the board intend to remove any buildings or property from Red Wing, simply the wayward girls and their personal belongings. The court, however, decided that the paragraph in question was unconstitutional because of defective title to the act, and so prevented further action on the part of the board.

The proximity of the girls' department to that of the boys is not only detrimental, but a positive hindrance to the success of either. They should be entirely and effectually separated from each other by long distance, so that a meeting between the sexes, while inmates of the institution, or in going to or returning from the same, would be a physical impossibility. So positive are we that our conclusions in this matter are correct, we do not hesitate to recommend that either the departments be separated, as stated, or that for the girls be abolished.

The building now occupied by the girls can be used to good advantage after it is vacated by them. A hospital and guard house for the boys' department is needed badly, but is not asked for in this report for the reason that we believe the legislature will take favorable action on the question of separation. There is also a crying necessity for more dormitories for the boys, that the vicious class may be absolutely separated from those for whom there is hope of reform.

DETENTION HOSPITALS.

Chapter 317, Laws of 1901, providing for detention hospitals in cities of 50,000, or more, inhabitants, should be repealed. The law

is mandatory, requiring the Board of Control to establish in St. Paul, Minneapolis and Duluth, a place to be known as "A place of detention for alleged insane." It also provides that such place of detention shall consist of a ward in the city or county hospital, or some other suitable place, which place shall be under the charge, supervision and control of the Board of Control. The board has conscientiously endeavored to carry out the provisions of the law in question, but results are not, and cannot be, what the framers of the law evidently intended, while in its present form. The neglect and refusal of judges of probate to make the necessary report to this office, prevent us from offering statistics on the subject. If the law is to be continued, we recommend that power be given the Board of Control to compel the proper officers to make such reports from time to time, as, in its judgment, may be necessary.

City and county hospitals and, where none such exist, private hospitals will not surrender for the use of the state a ward over which the Board of Control "shall have charge, supervision and control," as such action on their part might, on account of the number and character of the patients committed thereto, nullify the object and intention of the authorities in establishing such hospital by rendering it unfit for hospital purposes. In case they could be prevailed upon to do so, it would be at a prohibitive rental.

To rent or erect a building in these cities suitable for the intended purpose, and properly equip the same, employ proper medical attendance and nurses skilled in the care of the insane, would entail an expense upon the state not contemplated, we feel sure, in the enactment of the law. We have made arrangements with some hospitals that have worked fairly well, at a perhaps not excessive cost, but with unsatisfactory results. Other hospitals, after learning the character of patients committed, have positively refused to continue to receive them. Hence the difficulty in carrying out the provisions of the law.

If detention hospitals are to be established, separate and apart from the hospitals for the insane, they should be established by the cities in which they are located, and the expense of maintenance should be borne by such cities. If the state is to continue such institution, it should be in connection with one of the hospitals for the insane already established, and be under the care of the superintendent thereof. If this course is not satisfactory, and a place of detention is to be established by the state, separate and apart from the present hospitals, it should consist of but one institution, estab-

lished at some point between St. Paul and Minneapolis, provided a suitable site could be obtained at a reasonable price, and be fully equipped for its work, and under the charge of a competent medical superintendent and skilled nurses. Whatever plan is adopted for the establishment of a detention hospital, if it is to be under the control of the state, a sufficient charge should be exacted from the counties from which patients are committed to fully reimburse the state for cost of maintenance. It should also provide for reimbursement of counties by individuals except in indigent cases. We are firmly convinced, however, that but one of two courses should be pursued by the state: Either the establishment in connection with some hospital, or the repeal of the law altogether.

We do not deem it necessary to offer argument as to why such an institution, if established, should be under the immediate superintendence of one who is skilled in the treatment of insanity in all its forms, or why skillful nurses should be provided for the same. It must be evident to all who give the subject consideration that, if there is ever a time when skilled medical attendance and careful nursing are required, it is when the patient is standing upon the border line of insanity.

DEPARTMENTS FOR TUBERCULOUS PATIENTS.

It is imperatively necessary that separate buildings for tuberculous patients be provided at the three hospitals for the insane. Patients, nurses and attendants enter these institutions entirely free from all traces of this disease and may soon become its victims because of compulsory association with it under unfavorable conditions that cannot be even mitigated on account of present surroundings. The disease is so insidious in its character that the constant efforts put forth by superintendents to suppress it are void of satisfactory results. Opportunity for isolation of such patients under the most approved sanitary conditions is absolutely demanded by every sentiment of humanity. A previous legislature has recognized the importance of this subject by establishing at the School for Feeble Minded, Faribault, a hospital for this purpose. We trust that the present legislature will take similar action at the hospitals for the insane.

There should also be provided contagious wards at these institutions where cases of smallpox, diphtheria, etc., can be isolated and properly treated without endangering the entire institution. The

hospital at St. Peter has been under quarantine for three months on account of diphtheria and no patients received during that time. Opportunity for isolation would have prevented these conditions and many cases of the disease as well. We believe that all contagious cases could be safely provided for in the same building, if properly constructed.

COUNTY SUPPORT OF THE INSANE AND FEEBLE-MINDED.

In our former report we recommended that a law be enacted under which the state would be reimbursed for one-half the expense incurred in the care and maintenance of these classes by the counties from which they are committed, the counties, in turn, to be reimbursed by estates and individuals now legally liable for maintenance under our statutes. This practice prevails in many other states, and is not only satisfactory, but works no hardship to individuals or communities. A law of this character, properly safeguarded, would not only reduce the number of commitments to this class of institutions, resulting in better accommodations for those who can be benefited by treatment therein, but allow more time and opportunity to devote to the personal care and observation of such patients, and so make possible a larger percentage of recoveries and discharges from the institutions.

We believe a careful study of the table of commitments will demonstrate that the direct expense to any one locality by reason of the enactment of the law in question, will in no instance be increased over the indirect expense now levied against it for such support. On the contrary, the amounts paid into the county treasuries by persons and estates properly and justly chargeable with the same will materially reduce taxes now necessarily levied for this purpose.

Again, there seems to be no reasonable argument that may be advanced as to why parents, children, or estates are not under the same obligation, moral and pecuniary, to meet the expense incurred in the care of those dependent upon them for support, who are afflicted with a mental ailment, as they are now under to care for them on account of physical ailment.

We believe this subject to be of so much importance, and that so much good may be accomplished by the passage of a law on the lines indicated, that we again urgently recommend the subject to your careful investigation.

SANATORIUM FOR CONSUMPTIVES.

The legislature of 1903 passed a law providing for the "Minnesota Sanatorium for Consumptives," to be located near Walker, Cass county, and empowering the Board of Control, with the approval of the Advisory Commission, to purchase a suitable site therefor, and in other respects to carry out its provisions.

On consultation with and approval of such commission, we have purchased 616 acres in sections 34 and 35, township 142, range 31, at an aggregate cost of \$7,565. There is another tract, containing some 40 acres, adjoining, and belonging to the government, which we hope to acquire without further cost.

The site is a beautiful one, situated about two miles from the village of Walker upon a high elevation overlooking and sloping gradually to the shore of Cass Lake, and covered with a heavy growth of pine and other varieties of timber. We have had about 26 acres cleared of underbrush and such trees as were undesirable, cut into cordwood, at a cost of about \$700. This clearing will net the state about 500 cords of wood, valuable as fuel for the institution, and easily worth the cost of clearing and cutting for this purpose. It will be necessary to clear some 15 acres more in the spring, at a cost of about \$200, yielding wood in the same proportion as above. The site will then be ready for buildings.

As but \$25,000 was appropriated to carry the act into effect, there will be but \$16,000 left for buildings and equipment, after paying for site, clearing the necessary land, building road, grading, etc. The board will expend this amount early in the spring in the construction and equipment of such buildings as this amount will admit of. It would seem necessary that a reasonable additional appropriation must be made before the object of the act can be attained.

SALE OF LIQUOR.

The sale of liquor to paroled inmates of the Prison, Reformatory and State Training School is an evil that calls for speedy action on the part of the legislature. In a large majority of cases the first step toward the breaking of the parole, and the consequent return of the prisoner to the institution, is occasioned by the sale of liquor to him. In many cases they are enticed into saloons and furnished liquor for the sole purpose of persuading them, while under its influence, to again enter upon a criminal career. A law should be enacted prohibiting the furnishing, selling or giving away of intoxicat-

ing liquors in any form to any paroled inmate of the institutions named, and making the violation thereof a misdemeanor punishable by both fine and imprisonment.

STATE PRISON.

BINDING TWINE.

This industry at the prison is in a very prosperous condition. The quantity manufactured has been gradually increased from 1,100,000 pounds in 1891-2 to 10,057,000 pounds in 1904, and we expect to manufacture approximately the same amount the coming year. We believe that the maximum quantity that should be manufactured by the state has been reached, and that no further attempt should be made by the state to increase its output of twine. The quantity manufactured now means an annual business of \$1,000,000 and is, in our judgment, the limit that should be risked by the state in any one industrial enterprise, and of responsibility that should be placed upon the Board of Control or warden of the prison.

As a rule, the enterprise so far has been uniformly successful. The present year we bought raw material early, and are now able to sell the manufactured twine to consumers at a less price than that at which the raw material can be purchased, and, in addition thereto, make a reasonable profit to the state. But had the price of such material declined after our purchase, and so enabled twine manufacturers to sell at less than the state's cost, or should a general failure of crops compel the state to carry its annual output, or a large amount of it, over to the following year, requiring either the closing down of the plant, or the building of a large amount of additional storage, the loss might be very serious, as well as call for the investment of an additional large sum of money which might not be available. We append the following table, which will be of interest, showing amount of twine manufactured each year since the installation of the plant:

1891-2.....	1,100,000 lbs.
1893-4.....	2,358,053 lbs.
1895.....	3,792,366 lbs.
1896.....	3,597,726 lbs.
1897-8.....	8,415,459 lbs.
1899.....	5,570,135 lbs.
1900.....	6,119,465 lbs.
1901.....	5,626,385 lbs.
1902.....	5,467,185 lbs.
1903.....	7,056,380 lbs.
1904.....	10,057,000 lbs.
	<hr/>
	59,160,154 lbs.

This table shows that almost 60,000,000 pounds of twine have been manufactured. The state has made a net profit on the twine so manufactured of upwards of \$500,000. This twine having been sold to consumers at an average of at least two cents per pound less than they could have purchased it from the outside manufacturers it has also netted a profit to them of \$1,200,000.

NEW INDUSTRIES.

The rapid increase in population necessitates the introduction of some new industry, or industries, at this institution in the immediate future. This will require the building of additional shop and store room, which will be taken up with the legislature when in session.

In executing a new contract for the employment of prison labor in the shoe industry, we refused to contract for more than 225 men, although more could have been employed with profit to the state. We felt, however, that those engaged in this industry in the outside world should be treated with consideration and fairness by the state, and that our action was justified. As before stated, this policy will necessitate immediate action by the legislature to enable us to provide facilities for employing the surplus prisoners in other lines, as it is admitted that they must not remain idle.

ADDITIONAL ACCOMMODATIONS.

Necessary provision for care and custody of the rapidly increasing population of the prison is of such vital importance that it cannot be longer delayed. It is estimated by the warden that during the next five years the number will be increased to nearly 900, while he has but 664 cells in which to confine them. The present location of the prison precludes its enlargement to any extent. It would seem, therefore, that it is absolutely necessary to immediately determine the future policy of the state in this regard. We refer you to the warden's report for further and more specific information on this subject.

LOCAL BOARDS AT FARIBAULT AND OWATONNA.

We earnestly recommend the abolishment of the Board of Directors of the Schools for the Blind and Deaf, and the Board of Control of the State Public School at Owatonna, for the reason that such boards are not necessary for their successful management, and for the further reason that the highest attainments possible at those institutions can only be reached under a single management.

While the schools for the deaf and blind are recognized by a law passed in 1901 as educational institutions, yet they cannot be, and are not, in fact, recognized as a part of the public educational system of the state. Their methods of instruction are so dissimilar, the qualifications of their teachers so at variance with those required of teachers in the public schools, together with the fact that it requires years of special study and training to qualify a person for the successful superintendence of these institutions, absolutely forbids their classification with the public educational system of the state, hence the exception made by the state in their favor. It not only provides buildings, teachers and superintendents for them, as for other educational institutions, but it cares for, feeds, and in some instances clothes, the attending students. None but the superintendents of the schools for the deaf and blind are capable either of selecting the text books, formulating the course of study to be pursued, or determining the character and qualifications of teachers, and they should be permitted to exercise their technical ability in such matters unhampered by any local or state board, and should be held to strict accountability for the success of their respective institutions. This would be the policy of the Board of Control, had it the exclusive management.

The issue has been raised in some quarters as to whether this board was qualified by education and training to take full charge of these institutions. This is a question we do not feel called upon to determine. We can, however, consistently say that the same information now imparted by the superintendents thereof to the local board, conferred upon a board capable of their financial management, would place both boards upon the same footing so far as a technical knowledge of their educational requirements is concerned.

The State Public School at Owatonna is in no sense an educational institution. The act under which it was created says of it: "It is declared to be the object of this act to provide for such children a temporary home only in said school until homes can be secured for them in good families." If we read the language correctly, the word "school" as used therein, is a misnomer. It is true that a school is maintained for the benefit of the child while sheltered there, yet it is collateral to the institution, an incident in the migration of the child from no home "to a home in a good family." A local board is not essential to its proper management.

These recommendations are made because we believe them to be strictly in line with the duty of the Board of Control. In making them, we wish to disavow any feeling of hostility towards either of the boards mentioned herein. We have been treated with the utmost courtesy by them upon all occasions when we have been brought together in a business way, and we hereby make public acknowledgment of the same.

UNIVERSITY AND NORMAL SCHOOLS.

Our relations with the University and Normal Schools are personally pleasant, and but little friction has developed between their respective boards and the Board of Control. When we consider the complex character of a dual management of these institutions, and the few disagreements that have arisen, we believe that we are justified in saying that the individual members of all the boards in question have made an honest effort to comply with the provisions of law, and make the best of the situation. We believe the new methods introduced and suggestions made by the board from time to time, and the changes in the accounting system, including estimates, approvals, vouchers, sub-vouchers, etc., have all been along the line of bettering the service. In many cases the restrictions imposed have been irksome, and the delay necessary in carrying out a new system, however intelligent and desirable such system may be, has not been entirely satisfactory to those who have for years been accustomed to other ways, but, on the whole, we believe they will admit that we have been of some practical service to them in a business way, and that they have received more and better returns for the appropriations expended under our service than formerly.

We desire to extend to the boards in question and the individual members thereof our sincere thanks for the uniform courtesy with which we have been treated by them.

CONDITION OF UNIVERSITY FINANCES.

ON AUGUST 1, 1903.

On the first day of August, 1903, when the Board assumed financial management of this institution, there was a balance on hand in the Support Fund, including School of Mines, Crookston and Grand Rapids, of.....		\$11,503.19
Received subsequently delayed taxes.....		12,033.49
Actual balance remaining of Support Fund, Aug. 1, 1903...		<hr/> \$23,536.68

There were, however, outstanding debts which were not taken into account in making up the balance sheet (which were afterwards paid by the Board of Control) amounting to \$35,836, thus converting an apparent balance on hand of \$23,536.68 into an actual deficit for the year of \$12,299.32.

ON AUGUST 1, 1904.

The balance on hand Aug. 1, 1904, the end of the first year's management by the Board of Control, was.....	\$10,024.67
If we were to add for comparative purposes the amount of actual deficiency of the previous year paid by the board.....	12,299.32
<hr/>	
There would appear as balance on hand Aug. 1, 1904, shown by books in our office.....	\$22,323.99
had such old indebtedness not been paid.	
From this amount should be deducted unpaid bills for the year (estimated)	3,000.00
<hr/>	
Leaving	\$19,323.99
Which would have been the actual balance on hand Aug. 1, 1904.	

Such indebtedness of the previous year having been paid, however, and the outstanding accounts for supplies for the year being also paid, the actual balance on August 1, 1904, after the payment of all outstanding indebtedness for the year, and, as well, for the previous year, above stated, was \$7,024.67.

It should be borne in mind that the provisions of Chapter 122, Laws of 1901, do not confer upon the Board of Control any jurisdiction over seventy-five per cent of the expenses of the university. We quote: "But the various boards now in charge of the several educational institutions shall have and retain the exclusive control of the general educational policy of said institutions, of the courses of study, the number of teachers necessary to be employed and the salaries paid." It is therefore apparent that the limited jurisdiction conferred by said chapter does not admit of any saving on the part of the Board of Control in the running expenses of the university or any other educational institution as an increase in the number of teachers or in salaries paid would easily absorb any such attempted savings.

The following tables speak for themselves:

RECEIPTS.

SUPPORT FUND UNIVERSITY OF MINNESOTA, INCLUDING SCHOOL OF MINES, CROOKSTON AND GRAND RAPIDS, YEAR 1903-04.

Appropriation	\$45,000.00
Morrill bill	25,000.00
Hatch bill	15,000.00
Fees and tuitions	125,048.50
Interest	53,589.50
Taxes	168,259.72
School of Agriculture (sales and fees).....	14,971.30
Dental infirmary	10,676.23
Miscellaneous	1,622.75
School of Mines, support appropriation.....	5,000.00
School of Mines, instructors' appropriation.....	4,500.00
Crookston, support appropriation.....	6,000.00
Crookston, miscellaneous	1,706.64
Grand Rapids, support appropriation.....	4,000.00
Grand Rapids, miscellaneous	761.56
Total	<u>\$481,136.20</u>

DISBURSEMENTS.

SUPPORT FUND UNIVERSITY OF MINNESOTA, INCLUDING SCHOOL OF MINES, CROOKSTON AND GRAND RAPIDS, YEAR 1903-04.

Salaries and wages	\$344,602.40
Fuel, light and water.....	37,183.35
Postage, telegraph and telephone.....	3,864.11
Stationery and printing	5,839.50
Instruction	32,152.91
Apparatus	7,239.78
Farm supplies.....	12,523.80
Miscellaneous	15,406.36
Total	<u>\$458,812.21</u>

If the recommendations of the Board of Regents are approved, and the one-half mill special levy for Experiment Station is continued, the total expenditures for all purposes of the university and branches for the coming biennial period will aggregate \$970,000 per year, or nearly two million dollars for the period.

QUARTERLY CONFERENCES WITH SUPERINTENDENTS.

The quarterly conferences with superintendents of the institutions referred to in previous report, are still continued, the respective superintendents being assembled at the office of the board at the beginning of each quarter for that purpose. The meeting covers two days; the first being devoted to reading papers and discussing matters of interest pertaining to state institution management; the second, to the selection of the quarterly supplies by the superintend-

ents, samples, proposals, etc., having previously been arranged by the office force. These meetings are very helpful to all participating and much good results therefrom.

DEATH OF HON. C. A. MOREY.

Mr. Morey was one of the first members of this board, having been appointed on April 3, 1901. After serving three brief months, he was compelled to resign his position, owing to a severe accident. He died suddenly at Winona, Minnesota, on the 26th day of September, 1904. Brief was his term of service on the board, yet there was time to impress his personality upon its work; time to aid by his superior judgment and fearless decision of character in placing it upon a sure foundation; time to endear himself to his colleagues in many ways.

CHANGES IN THE PERSONNEL OF THE BOARD.

On the 22d day of July, 1902, Honorable William E. Lee, one of the original members of the board, tendered his resignation to the governor for the reason that private business interests demanded his attention. His resignation was not accepted until November 14, 1902. Mr. Lee was a valued member of the board, eminently qualified for the position he filled, and had the confidence and esteem of his colleagues to a marked degree.

James A. Martin, of St. Cloud, was on the 14th day of November, 1902, appointed to serve out the remainder of Mr. Lee's term. He, in turn, resigned on January 1, 1904, after having served a little more than one year. On the same day of his resignation J. F. Jacobson, of Madison, was appointed to the vacancy.

ACKNOWLEDGMENTS.

We are indebted to the superintendents of the various institutions for the substantial support they have given us from the inception of our work, and for the counsel and advice that have proven so valuable on many occasions. In this connection the employes of the institutions, and of our own office, as well, are entitled to consideration. They have been faithful to their trust, loyal to the state, and should receive a fair share of credit for whatever of good has been accomplished.

In closing permit us to again thank you, Governor, for your unshaken confidence in the system we were called upon to inaugurate, for the loyal support you have at all times given us in your official capacity, and still more for the pleasant personal relations that have existed between us since we became members of your official family.

BUILDINGS AND BETTERMENTS.

Two years' longer experience, study and observation in the construction of buildings for state institutions, confirms our opinion that it is unwise, from an economic standpoint, to put up cheap, inferior structures, especially those for occupation by human beings, and we therefore renew the recommendations made in our last biennial report, that in making provisions for public buildings, such amounts should be appropriated as will allow the construction of substantial and fireproof structures.

Labor and material have continued high during the two years last passed. The so-called eight-hour law has operated against economy in building operations for the state as compared with similar work done for private parties. It is impossible to accurately estimate the influence of these two causes in augmenting the expense of state work, but it is manifestly not inconsiderable. Contractors must always take these things into consideration when submitting bids, and no doubt add enough to what they would otherwise do the work for to make them safe in these respects.

We desire to call attention to the advisability of making appropriations for each institution in the lump sum rather than so much for this, that and the other thing, since it is practically impossible to tell in advance what is necessary for each particular piece of work to be done, and it sometimes happens that the appropriation for a particular purpose is found less than necessary, and in other cases more than required, while there is no authority for supplying the deficiency of one by the surplus of the other. If a gross sum could be appropriated for buildings and betterments at the several institutions, the board would then be able to adjust the expenditure for the different objects so as to overcome the objection above indicated.

During the biennial period covered by this report, we have constructed, or have now in process of construction, under appropriations heretofore made, the following buildings:

ANOKA.

The \$40,000 appropriated in 1901 for a cottage at this institution is now being expended for that purpose, the building being well

advanced towards completion, and it is expected same will be ready for occupancy about February 1, 1905. It is substantially constructed of brick and stone, with terra cotta trimmings, and slate roof; and the interior work is what is known as the Expanded Metal System, consisting of a combination of iron and cement, so as to be substantially fireproof. Accommodations will be afforded for about fifty female patients in this cottage.

Under appropriations made in 1901 for laundry and in 1903 for heating, water supply, water tower, etc., we are having under construction a power house and laundry, with connecting tunnels, and have erected a smoke stack adequate to the present and prospective needs of the institution. We are also having installed an additional boiler, pump, dynamo, and water tank, with proper connections by tunnel, or otherwise, to the several parts, to make the same a complete system. We have also constructed here a substantial root house and workshop over the same. The capacity of the root house, however, is not adequate to the needs of the farm, and further appropriations for extending the same are deemed advisable.

There was an appropriation of \$2,500 made in 1901 for the sewer system at this institution, in contemplation of constructing a sewer through the City of Anoka to a point below the dam in the Rum river. After making surveys and estimates of the cost, it was found impossible to do the work within the amount of the appropriation. A portion of the fund was thereupon used to put in filter beds at a suitable distance from the buildings, connecting the same with proper pipes. This scheme has proved unsatisfactory since the enlargement of the population at the institution, and after conferring with the State Board of Health and other competent authority, we have begun the construction of what are known as septic tanks, with connecting filter beds for the disposal of sewage, which are now in process of construction, and will be completed early in the fall. The septic tank has been successfully introduced at a number of Eastern institutions, as well as in the State of Iowa, and we have reason to believe will successfully dispose of the sewage of this institution. These tanks are located about one thousand feet from the main building with which they are connected by sewer pipe.

HASTINGS.

We have under construction at this place a cottage for women similar to the one being built at Anoka, and of about the same capac-

ity. When completed, the two cottages will accommodate about one hundred women, to be taken from the overcrowded hospitals.

We are also erecting a power house, laundry and water tower at this place, have completed two silos of large capacity, and a well has been drilled 850 feet deep, in which water rises nearly to the surface, and it is believed will afford an ample supply for the use of the institution. A tunnel is being constructed, connecting the power house with the main building, for the purpose of carrying the various pipes and electric wires. The laundry is also being connected by tunnel with the woman's cottage. These improvements we anticipate will be ready for use about the first of January, 1905.

As is generally known and understood, the institutions at Anoka and Hastings are asylums for the care of custodial cases of insanity transferred from the hospitals. They have no medical superintendent or medical staff. Hitherto only men have been thus provided for, but the new cottages are constructed for the accommodation of women patients, and we renew our former recommendation that an appropriation be made for one or more additional cottages at each of these institutions.

The main buildings at Anoka and Hastings are constructed on identical plans, having a center, or administration building, with a wing at each side. In the construction of the center building, no adequate provision has been made for housing the nurses and employes required at the institution, and no provision has been made for any general assembly hall, or meeting place. By an expenditure of an amount which we estimated at \$15,000 in each case, the center building could be enlarged by raising the roof and extending it somewhat to the front, so as to meet the requirements above indicated, and we recommend that such an appropriation be made. Minor repairs and improvements at each of the asylums will be found set out in detail in another part of this report.

ST. PETER HOSPITAL.

Attention is called to the report of the Superintendent of the Hospital at St. Peter regarding the reconstruction of the administration, or main center building, for which the sum of \$40,000 was appropriated in 1903. On removing the interior work, it was found that many of the walls, which it had been supposed could be utilized in reconstruction, were poorly built, of inferior material, and unsuited to carry the fireproof construction, thus necessitating their removal, and the substitution of a new structure. This condition of

things could not be foreseen, and has enhanced the outlay necessary for the proper reconstruction of the building, making necessary for the purpose of fully completing and furnishing the same, an additional appropriation of at least \$10,000, which we recommend should be made. The superintendent favors an appropriation of twice this amount, with a view of removing the present useless but expensive front steps, and substituting a porch and fire escape across the front of the building. We think this recommendation of the superintendent has merit, but feel that the work of substituting the new porch can be deferred until another biennial period.

The appropriation of \$10,000, made in 1903 for improvement of the heating apparatus at this institution, has been employed in putting in a new battery of boilers of the type known as Stirling, and in the improvement of the various pipes and connections. There should be another battery of boilers put in, and still further improvements made in the distributing system, all of which is very old and complicated. For this purpose an appropriation of \$10,000 is asked. We also agree in the recommendation of the superintendent that there should be an appropriation for a new dynamo at this institution.

Since our last biennial report the work of reconstructing the north detached ward at this hospital has been completed, and the building may now be said to rank among the best of its kind in the country.

An octagonal root house, 100 feet in diameter, built of stone, and covered with felt and gravel roof, has been built, and affords extensive storage for the large supply of farm produce.

The barns at this institution are very old and unsuitable for their purpose. There is no granary, and very inadequate storage for corn. A suitable appropriation for the construction of necessary new buildings for these purposes is recommended.

Other appropriations for this institution are elsewhere set forth.

ROCHESTER.

We have installed one large Galloway boiler at this institution, as foreshadowed in our last report, and have made minor improvements, but there have been no general building operations there.

By connecting the main building with the west detached ward by means of a suitable building with corridor, accommodations could be obtained for the considerable number of inmates without an ex-

cessive expenditure of money, the end walls being already provided. We recommend an appropriation of \$16,000 to carry out this plan, making the same available during the years 1906 and 1907.

Other appropriations for this institution are elsewhere set forth.

FERGUS FALLS.

No new buildings have been put up at this place during the biennial period, but the laundry has been enlarged and supplied with additional modern machinery and facilities. A material extension and improvement has been made of the cold storage facilities used in connection with the kitchen.

As indicated in our last biennial report, the practice of slaughtering meat for the use of this institution at the place was inaugurated in the fall of 1902 by converting an old barn, or shed, into a temporary slaughter house. The plan of butchering their own meat at the institution seems to operate favorably with regard to both the quality of the material and the cost thereof. We therefore recommend that a suitable slaughter house, with necessary cold storage, be erected and supplied with suitable equipment, and for this purpose ask an appropriation of \$7,000, which we estimate will be the minimum cost of such an establishment as will be adequate for the present and future needs of the institution.

The question of water supply at this institution has been treated in another part of this report.

At each of these hospitals provision should be made for the isolation of contagious cases by the erection of separate buildings for that purpose. The tuberculous cases should also be provided for in a separate building. The need of a home for nurses is set forth in another part of this report.

SCHOOL FOR FEEBLE-MINDED.

Owing to the rapid growth of the population of this institution and the number of cases awaiting admission, considerable building has been done there during the biennial period. The cottage for girls, which was under construction when our last report was written, has been completed, and one for low-grade defective boys erected immediately in the rear of the Sunnyside building. These two cottages accommodate from about eighty to ninety inmates. A farm cottage for epileptics has also been put up during the present year, and the barns have been enlarged and another silo built in

connection therewith. At the main building a stone tower shaft to accommodate the plumbing has been built, and the bath room, closets and other plumbing concentrated therein, as provided by the appropriation of 1903.

In December, 1902, a fire occurred in the main center building whereby the roof and attic were destroyed, and the lower stories of the building injured so as to require rebuilding. The loss was covered by insurance, which was adjusted in the sum of \$9,674.77, which, together with a considerable part of the repair fund, was used during the season of 1903 in the reconstruction of this building, several changes and improvements being made therein which has greatly enhanced its convenience and made it more secure against fire.

The appropriations made in 1901 and 1903 for improvement of Assembly hall, porches, etc., were applied to that use by raising the roof of that part of the building, and entirely reconstructing the porches and interior of that portion so that the institution is now provided with a very neat and commodious place for general gathering.

Appropriations have already been made for another cottage and for a tuberculous or contagious ward of the hospital. Plans for these constructions have been prepared, and it is expected to begin their erection early next season.

Additional accommodations will be required in the near future. At the present time there are some twelve separate kitchens, with as many cooks and cooking outfits, these being located in the numerous buildings on the grounds, and requiring a distribution of supplies to each. We concur in the opinion of the superintendent, as explained in his report published herewith, that it would be in the interests of economy to establish one central, properly equipped kitchen at a suitable central place on the grounds, and in a building erected especially for that purpose, and we recommend an appropriation of \$15,000 to carry out this purpose.

We also approve of the superintendent's statement as to the need of additional shop room and equipment, and an appropriation of \$20,000 is asked for that purpose, as well as \$5,000 for the enlargement and equipment of the laundry, which is now quite inadequate.

TRAINING SCHOOL, RED WING.

No new buildings have been erected at this place during the period covered by this report, but under appropriations made by the

last legislature extensive improvements and repairs have been made in the heating plant and plumbing. The old boilers, which had become seriously impaired, have been removed and new ones substituted. The steam pipes leading to the buildings have been removed, and larger ones put in; new water mains laid to the girls' cottage, thereby giving better fire protection; and sundry other repairs and betterments accomplished.

Other appropriations now needed at this institution are set forth elsewhere. In this connection it may be said that future appropriations are dependent in a considerable degree upon whether the girls' department of this institution is removed, as desired by many of the people of the state, and elsewhere recommended in this report.

REFORMATORY, ST. CLOUD.

A number of important buildings and improvements have been going forward at the State Reformatory during the last two years. In the season of 1903 and 1904 the work on the administration building was continued, the granite walls being erected to the second story, and the steel floor construction placed in position. The rapid increase in the number of inmates of the institution, however, made the demand for additional cell room more important than the construction of the administration building. We have therefore suspended operations on the latter during the present season, and put all force on the new (south) cell wing, for which an appropriation of \$10,000 was made by the legislature in 1903. This work is progressing favorably, and it is hoped to have the building enclosed by January 1st next, and to put in the cells and other interior work, heating, plumbing, etc., during the winter, so as to have the building ready for occupancy in the spring or early summer of 1905. To carry out this purpose, an additional appropriation, sufficient to complete the building, is needed, to be made immediately available. We estimate the amount thus required to be \$30,630. To enable us to proceed with the work, as above indicated, advantageously, the appropriation of \$10,000 for the administration building has been applied to this work, the two structures being in effect, when completed, one building.

The large stone-cutting shop, which was being erected at the date of our last report, has been completed, and affords excellent accommodations for the work for which it was designed. The great demand for stone in the construction of buildings, however, has

made more shop room necessary, and a cheap frame structure has been put up and fitted with tracks and other devices for handling the stone.

A large stock barn, built in a substantial manner and along modern lines, has been erected.

Prior to 1902 the water supply at this institution had been entirely inadequate and precarious insomuch that at times it was necessary to bank the fires under the boilers and limit the use of water for bathing and other purposes, to the great embarrassment of the management and danger to the institution. Much time and care was given to the finding of a source of supply, the buildings being located on the crest of a granite ridge, but at length it was found that there was an apparently inexhaustible amount of water under the soil on the bottom or prairie lands within half a mile of the buildings. By sinking a series of well points connected with a header, and putting in two large gasoline pumps, an abundance of good water was obtained, which was forced through a line of mains to the tank in the building, since which time there has been no trouble either as to the quality or sufficiency of the water supply.

The site of this institution is by nature very hilly, rough and bleak. Under the skillful management of the present superintendent and the labor of inmates, a large amount of grading, terracing, sodding and tree-planting has been accomplished, whereby the general appearance of the place has been greatly improved and beautified, as well as rendered more convenient in many respects.

The enlargement and improvement of the heating plant, owing to the extension of the buildings and wearing out of old equipment, is now a necessity, and we recommend a suitable appropriation for this purpose. The further construction of the work on the administration building, so-called, during the next biennial period, should be provided for with adequate appropriations. Other improvements needed at the institution, and estimated cost thereof, are elsewhere set forth.

STATE PRISON.

Under the appropriation made by the last legislature, an enlargement of the cell house by the extension of two of the returns of the main building has been made, giving some ninety-six additional cells. There has also been erected, additional to the hospital, a building for the custody of insane criminals. The chapel has been

improved by the construction of a balcony across one end, and the placing of suitable ventilators therein.

The increase of the population of the prison makes additional buildings for cell and shop room in the near future an imperative necessity. The site on which the prison is situated does not lend itself to any considerable enlargement of the buildings upon it.

STATE PUBLIC SCHOOL, OWATONNA.

The only building operations at this institution since the date of our last report are the reconstruction of the center and north wing of the main building, which were burned out January 25, 1904, the fire originating apparently in the attic, supposedly from the electric wiring. As soon as the loss was adjusted with the insurance companies, plans for rebuilding were prepared, and in April a contract was let for rebuilding the burned portion. The insurance collected amounted to \$35,671.23, and under the provision of Section 1, Chapter 316, Laws of 1899, an additional sum of \$10,000 was secured, to be used in order to make the reconstructed building fireproof. This work is now going forward, and it is expected that same will be done in time for the building to be occupied early this fall.

A new laundry is greatly needed at this institution, for which we recommend an appropriation of \$5,000.00. Various other repairs and betterments are needed, which will be found itemized elsewhere in this report.

SCHOOL FOR THE BLIND.

A dormitory for boys is now being erected at this institution for which an appropriation of \$18,000.00 was made in 1901. This building is a commodious structure of brick, with fireproof interior construction, and makes a creditable addition to the group of buildings housing this unfortunate class of people.

There are several other buildings and important improvements needed at this institution, but in consideration of other demands on the Treasury, we feel same should be postponed. Our recommendation for appropriations appears elsewhere.

SCHOOL FOR THE DEAF.

A handsome school house, provided for by the last legislature has been erected and occupied. It is thoroughly constructed of brick and stone, and is connected for the purposes of heating, light-

ing, water supply, sewage, etc., with the other buildings of the group. The plumbing in Barron Hall and the South Wing of the Main Building, has been overhauled, and much new work and repairing of old work has been done.

A fire escape of a new and novel pattern, known as the Kirker Bender, has been erected, and although fortunately there has been no occasion for its use to save life, it has been experimentally operated to such an extent as to indicate marked efficiency.

NORMAL SCHOOLS.

A provision made in the last Appropriation Act for acquiring a site for the Ladies' Home at Winona, and improving the same, has been carried into effect by the purchase of a block of ground on which are located two good-sized dwellings, which have been rebuilt and rearranged for the object contemplated. The roof of the Main Building at this school is, and long has been, in bad condition, and should be replaced by a new one, for which plans and specifications have already been prepared. The building is heated by twenty-eight hot-air furnaces which, besides being wasteful of fuel, endanger the safety of the building. A modern steam-heating plant should be put in as soon as possible. An appropriation for the heating plant and roof at this institution is earnestly recommended.

No new buildings have been constructed at any of the State Normal Schools during the biennial period, although more or less repair work has been done, and a new boiler has been placed in Lawrence Hall at St. Cloud, with proper piping and connections.

UNIVERSITY.

In something over a year since the financial affairs of the University came under the management of this Board, there have been several buildings erected under its direction. At the Agricultural School and Station a Boys' Dormitory, Machine House, and a Stock Pavilion have been constructed and completed, adding materially to the convenience of the institution, and presenting a creditable addition to the appearance of the campus. The total cost of these buildings and equipments is approximately \$75,000.00. At the University proper the Mines Building has been completed, an addition built to the Law Building, an extensive system of pipe tunnels put in, and the Medical Building, which had been partially destroyed by a fire, has been rebuilt and improved.

Without taking up here the discussion of the needs of the University in the way of buildings and betterments, a subject quite fully considered in the report of the Regents, our recommendations for appropriations for these purposes, both at the University and the Normal Schools, will be found in the appropriate place in this report.

LEGISLATION RECOMMENDED.

As required by Section 28, Chapter 122, Laws of 1901, we respectfully recommend changes in the statutes, as follows:

CRIMINAL SENTENCE.

“Provide by law that any person arrested and held for trial on a criminal charge for an offense punishable by imprisonment in the state prison or state reformatory, and who admits his guilt and desires to plead guilty thereto, may be admitted on his own application to enter such plea, in term or vacation before the judge of the district court of the county where the offense is alleged to have been committed, which appearance and plea shall be duly recorded in the records of such district court, and said district judge shall thereupon take evidence and investigate the facts in like manner as a grand jury, and if satisfied from such examination that the alleged offense has been committed in said county and that the person so admitting his guilt did in fact, commit such offense, such judge may thereupon accept such plea, commit said accused person to the state prison or state reformatory, as the case may be, in the same manner and with like effect as though said person had been indicted, tried and convicted of said offense. A copy of the record including the appearance, plea and evidence shall be sent with the commitment and prisoner to the place of commitment, and no further indictment, trial or conviction shall be had in such case.”

COUNTY SUPPORT.

“That in case of all institutions under charge of the Board of Control where the inmates are lodged and fed by the state, except the state prison and reformatory, the counties from which such inmates are sent or received respectively shall be required to pay into the state treasury toward the support of such inmates, upon such commitment being made or inmate received, and annually thereafter, the sum of seventy-five dollars, an amount which is approximately one-half of the per capita current expense of such support. At the present time the state assumes the entire burden of supporting these dependent people, which fact furnishes an inducement for sending to the public institutions persons who only require care and attention, who cannot be benefited by treatment

and who could be properly provided for in their own families or community. In the state hospitals for instance, the numbers have become so great that those who are amenable to treatment, and for whom there is some hope of restoration to health are deprived of proper room and attention by the great influx of mere custodial cases.

The practice here suggested prevails in our neighboring states of Wisconsin and Iowa and many others, and, in our judgment, is not only just but would have the effect of lessening the burden of the state.

Such a law should contain provision for the counties recovering from the property of the persons committed or received into the state institutions, or those who are responsible for their support, the amount so paid into the state treasury, wherever such recovery can be had. This would relieve the counties in great measure, of the burden, and place it where it belongs. There is no propriety in the state's supporting persons who have the means for their own support."

This subject is treated at length elsewhere in this report and we add nothing further here.

APPROPRIATIONS.

"We would recommend that all standing appropriations for current expenses of public institutions be abolished and biennial appropriations made for the full amount required. In this way the legislature and the public will keep fully informed as to the cost of maintaining all state institutions.

There should also be a law authorizing the Board of Control to transfer a portion of the appropriation for current expense at any institution to the support fund of any other institution, when by reason of increase in population or any other unforeseen circumstances, such transfer becomes necessary."

TRANSPORTATION OF INMATES.

"Under the present system, when a person is committed to any state institution, one or more officers are sent to convey such person to the place designated at the expense of either the state or county for per diem, for mileage, or both. Under this plan frequent abuses occur. Thus, where one person would be sufficient as an attendant, two or more are employed, and where several

persons are to be committed at the same time, each is taken separately instead of all together in order to increase the mileage or per diem of the officers. During the fiscal year 1901, the state paid for taking persons to the state prison and reformatory \$14,482.74, one sheriff alone receiving \$2,888.80. Of course this includes railroad fares and expenses, but it is safe to affirm that the profit to officers in this matter is largely in excess of a fair and proper compensation. For the biennial period ending July 31, 1901, the total amount paid by the state was \$17,950.26 and for the biennial period ending July 31, 1902, it was \$24,500. In addition to this amount paid by the state, the several counties pay large sums annually for taking children to the state training school, the state public school and the hospitals for the insane, aggregating upwards of \$50,000.

We recommend that the law be so changed as to require that, when a person has been sentenced to the prison or reformatory, the warden or superintendent be notified of the fact and it shall then be made his duty to send a guard of his institution to accompany the person to the place of imprisonment; and in case of the other institutions named, that the superintendents be notified of commitments to their institutions, respectively, and that they then be required to send a nurse or attendant to get the person so committed.

The advantages of this plan are, among others: First, that the guard, nurse or attendant, as the case may be, sent from the institution would be a person trained in the handling of the class of persons to be placed under his charge. Second, it would further enable the person sent out to collect information concerning the prisoner or ward for purposes of record at the institution. Third, the guards, nurses or attendants being already in the service of the state at fixed salaries, there would be nothing further to pay for their services and the only expenses would be the actual cost of transportation and necessary hotel bills.

It is believed that by this system a better service could be had at much less expense."

We are aware that this recommendation is not popular in some quarters, and that strong, organized efforts have been made, and will continue to be made, to defeat the proposed legislation. Nevertheless the best interest of public service will be promoted by its enactment, and we trust it may receive the consideration it certainly merits.

STATE TRAINING SCHOOL.

“Investigation shows that children guilty of no crime and without criminal tendency have been committed to this school for some trifling offense that any child might have committed under the same circumstances, and are thus legally separated from their natural parents during their minority. In many cases the proceedings under which this is done are the merest matters of routine, and do not rise to the dignity of an ordinary suit in which a few dollars are involved. We recommend that the law governing commitments to this school be so amended that only children guilty of incorrigible and vicious conduct can be sent there, and that the particular offense, conduct or habits of the child be as fully set forth in the complaint and as satisfactorily proven as in cases of criminal procedure. We are also of opinion that authority to discharge inmates in this school when it is clearly desirable to do so should be lodged in the Board of Control.

“A transcript of the evidence taken upon the trial should, in all cases, be sent with the commitment in order that the board may be advised as far as possible of the nature of the offense and the character of the offending party. The law should be further amended so as to provide for the transfer of inmates of the training school to the state public school in suitable cases. Section 5, Chapter 153, Laws of 1895, except a proviso at the end thereof, should be repealed and the minimum age at which commitments may be made should be raised to ten years and the maximum age to sixteen years and it should be further provided that no person should be held at the school after attaining the age of eighteen years.”

It is a great injustice to commit a child, possibly at an early age, to this institution for a minor offense, no provision being made for discharge and return to its parents, however much the best interests of the child may demand such action. For reasons that must be apparent, it also seems to us that eighteen years should be the maximum age at which any boy or girl should be retained at this institution.

The foregoing recommendations were contained in our first biennial report, and we deem them of sufficient importance to renew them here. The suggestions here made are all along the lines of progressive legislation, and if enacted into laws, will work great good, as well as result in saving hundreds of thousands of dollars to the state.

We further recommend the following legislation, as previously set forth herein on pages 5, 13, 17, 19 and 40.

Forbidding the sale or giving away of intoxicating liquors in any form to paroled inmates of the Prison, Reformatory and State Training School.

Repealing all standing appropriations and special levies.

The removal of the girls from the State Training School at Red Wing, and the creation of an "Industrial School for Girls" in some other part of the state.

Abolishment of the Board of Control of the State Public School at Owatonna, and the Board of Directors of the Schools for the Blind and Deaf at Faribault.

Section 15, Chapter 122, Laws of 1901, provides that "The board shall gather and present information embodying the experience of charitable, reformatory and penal institutions in this and other countries, regarding the best and most successful methods for caring for the insane, delinquent and criminal classes. And it shall encourage and urge the scientific investigation of the treatment of insanity and epilepsy by the medical staffs of the insane hospitals, and the Minnesota Institute for Defectives, and shall publish from time to time bulletins and reports of the scientific and clinical work now done in said institutions, or which it may require to be done therein." * * *

The section ends with the proviso that the expense of carrying out its provisions shall not exceed five hundred dollars.

The provisions of this section are important, and should be carried out, but the limiting of expense to five hundred dollars renders it impossible to do so. The opportunities for scientific research along the lines referred to are abundant, and we owe it to ourselves and to the scientific world in general to improve them. A thoroughly competent bacteriologist must be employed, some additional apparatus provided, and the results published from time to time. A department of this character established at one of our hospitals could be made very efficient, other institutions being required to forward specimens for examination. The results of such investigations, discussed at our quarterly meetings of superintendents and published to the world in quarterly bulletins, would be both interesting and instructive. We recommend an appropriation of \$5,000 for the purpose of carrying said section into effect.

The General Appropriation Bill of 1903 contains a provision authorizing the Board of Control, by and with the approval of the Au-

ditor of State, to transfer a portion of the Current Expense Fund of the Insane Hospitals, Asylums, Prison, Reformatory, State Public School, State Training School, School for Feeble-Minded, and Schools for the Deaf and Blind, to the use of any other of the afore-said institutions. It further authorizes the board, by and with the approval of the Auditor of State, to use sums not exceeding in the aggregate five thousand dollars, where necessary, to supplement the appropriations for the current expense of any of the above-named institutions.

It also contains a further provision that "said Board of Control may, without such consent and approval of the Auditor of State, use the balance of any appropriation made for a specific purpose at any institution for any other specific purpose in and about such institution, after the purpose for which such appropriation was made has been accomplished."

We recommend that the provisions herein referred to be enacted into a general law, and thus obviate the necessity of inserting them in the General Appropriation Act from year to year.

The first two provisions supply necessary funds in case of an unexpectedly large increase in the population of any of the institutions in question without tying up appropriations therefor, and usually the amount necessary, if any, can be transferred from some other institution where, by a reduction in population or other reason, the amount is available. The last provision referred to is self-explanatory.

RECOMMENDATION FOR APPROPRIATIONS FOR ALL STATE INSTITUTIONS.

DIRECTORY OF INSTITUTIONS.

FIRST STATE ASYLUM. (Opened 1900.)

Postoffice, Anoka. Stations, G. N. Ry., N. P. Ry.
Superintendent, John Coleman.
Physician (visiting), J. H. Frank, M. D.
Steward, J. M. Tierney.
Visiting days, every day from 2 to 4 p. m., except Sundays.
Population, July 31, 1904, 246 males.

SECOND STATE ASYLUM. (Opened 1900.)

Postoffice, Hastings. Station, C., M. & St. P. Ry.
Superintendent, William J. Yanz.
Physician (visiting), A. M. Adsit, M. D.
Steward, A. C. Dorr.
Visiting days, every week day from 2 to 4 p. m.
Population, July 31, 1904, 257 males.

FERGUS FALLS STATE HOSPITAL. (Opened 1890.)

Postoffice, Fergus Falls. Station, G. N. Ry., N. P. Ry.
Superintendent, George O. Welch, M. D.
Assistant Superintendent, Franklin S. Wilcox, M. D.
Assistant Physicians, Thomas M. Thayer, M. D., J. G. Purmout, M.
D., Frank R. Sedgley.
Steward, O. C. Chase.
Visiting days, week days from 2 to 4 p. m.
Population, July 31, 1904, 784 males, 584 females. Total, 1,368.

ROCHESTER STATE HOSPITAL. (Opened 1879.)

Postoffice, Rochester. Stations, Winona & Western Ry., C. & N. W.
Ry.
Superintendent, Arthur F. Kilbourne, M. D.
Assistant Superintendent, Robert M. Phelps, M. D.
Assistant Physicians, O. C. Heyerdale, M. D., C. L. Chapple, M. D.,
Laura Linton, M. D.
Steward, R. A. Baker.
Visiting days, week days from 2 to 5 p. m. Sundays by special per-
mission.
Population, July 31, 1904, 562 males, 541 females. Total, 1,103.

ST. PETER STATE HOSPITAL. (Opened 1866.)

Postoffice, St. Peter. Stations, C., St. P., M. & O. Ry., C. & N-W. Ry.
Superintendent, Harry A. Tomlinson, M. D.

Assistant Superintendent, Walter H. Darling, M. D.

Assistant Physician, Donald A. Nicholson, M. D., Clark F. Tuomy,
M. D., Mary P. Hopkins, M. D.

Steward, William M. Crane.

Visiting days, every day, except Sundays, from 9 to 11 a. m. and 2
to 5 p. m.

Population, July 31, 1904, 522 males, 439 females. Total, 961.

SCHOOL FOR THE BLIND. (Opened 1874.)

Postoffice, Faribault. Stations, C., M. & St. P. Ry., C. G. W. Ry., B.
C. R. & N Ry.

Directors, Gov. S. R. Van Sant, ex-officio; Hon. John W. Olson, ex-
officio; Benj. B. Sheffield, Faribault; Dr. John F. Fulton, St.
Paul; Chas. D. McKellip, Faribault; E. H. Loyhed, Faribault;
George P. Flannery, Minneapolis.

Superintendent, James J. Dow.

Steward, Bernice A. Parshall.

Visiting days, all week days, preferably forenoons.

Population, May 31, 1904,* 46 males, 37 females. Total, 83.

*Close of school year.

SCHOOL FOR THE DEAF. (Opened 1863.)

Postoffice, Faribault. Stations, C., M. & St. P. Ry., C. G. W. Ry., B.,
C. R. & N. Ry.

Directors (Same as school of the blind).

Superintendent, James N. Tate.

Steward and Storekeeper, R. O. Eggebrecht.

Visiting days, every day from 8 a. m. to 4 p. m., except Saturdays,
Sundays and holidays.

Population, May 31, 1902,* 147 males, 127 females, Total, 274.

*Close of school year.

SCHOOL FOR THE FEEBLE-MINDED. (Opened 1882.)

Postoffice, Faribault. Stations, C., M. & St. P. Ry., C. G. W. Ry., B.
C. R. & N. Ry.

Superintendent, Arthur C. Rogers, M. D.

Assistant Physicians, Howard A. La Moure, M. D., E. Paul Camp-
bell, M. D.

Steward, W. A. Richards.

Visiting days, all days except Thursdays and Sundays, from 9 to 12
and 2 to 4.

Population, July 31, 1904, 513 males, 444 females. Total, 957.*

*Includes 200 temporarily at home.

STATE PUBLIC SCHOOL. (Opened 1886.)

Postoffice, Owatonna. Stations, C., M. & St. P. Ry., C. & N-W. Ry.,
B., C. R. & N. Ry.
Board of Control, C. N. Cosgrove, Le Sueur; O. W. Shaw, Austin;
B. S. Cook, Owatonna.
Superintendent, Galen A. Merrill.
Assistant Superintendent and Agent, Frank Lewis.
Visiting Physician, J. H. Adair, M. D.
Steward, R. H. Naylor.
Visiting days, every day, except Sundays, from 8 a. m. to 6 p. m.
Population, July 31, 1904, 129 males, 62 females. Total, 194.

STATE TRAINING SCHOOL. (Opened 1868.)

Postoffice, Red Wing. Stations, C., M. & St. P. Ry., C. G. W. Ry.
Superintendent, Frank A. Whittier.
Assistant Superintendent, H. W. George.
Steward, Amilie E. Willard.
State Agent, Grace Johnston.
Visiting days, every day.
Population, July 31, 1904, 293 males, 79 females. Total, 372.

STATE REFORMATORY. (Opened 1889.)

Postoffice, St. Cloud. Stations, N. P. Ry., G. N. Ry.
Superintendent, Frank L. Randall.
Principal Keeper, Fred H. Whitney.
Steward, A. H. Gates.
Visiting days, every day, except Sundays and holidays, from 7 a. m.
to 4 p. m.
Population, July 31, 1904, 279 males, 1 female. Total, 280.

STATE PRISON. (Opened 1851.)

Postoffice, Stillwater. Stations, C., St. P., M. & O. Ry., C., M. & St.
P. Ry., N. P. Ry.
Warden, Henry Wolfer.
Deputy Warden, J. S. Glennon.
Assistant Deputy Warden, M. C. Colligan.
Chief Clerk, Horace W. Davis.
Prison Physician, B. J. Merrill, M. D.
Visiting days, 8 to 12 and 1.30 to 4:30 every week day, except holi-
days.
Population, July 31, 1904, males, 623; females, 11. Total, 634.

BIENNIAL REPORT

OF THE

SUPERINTENDENT

OF THE

Anoka State Asylum for Insane.

 PERIOD ENDING JULY 31, 1904.

OFFICERS.

JOHN COLEMAN Superintendent
 J. M. TIERNEY Clerk
 DR. J. H. FRANK Physician

Board of Control of State Institutions.

Gentlemen: The report of the Anoka State Asylum for the biennial period ending July 31, 1904, is herewith submitted.

REQUIREMENTS.

Owing to the increased number in population and the prospects for still further increase both in patients and employes it will be necessary to make some provision for extra quarters for employes, and for this we would suggest building an addition to our main building and raising the roof another story. This, I think, would give sufficient room as well as give a place to receive visitors and friends of patients who wish to visit them, and there being no place but the office for this purpose it is sometimes very annoying and hard to do work here. This, with some provision made for additional room in our main kitchen, which is entirely too small, the work being done now for nearly twice as many as was originally intended. The estimated cost for the above changes is \$16,000.

BARN, GRANARY AND STORAGE FOR IMPLEMENTS.

On account of the increase in our herd it is necessary to have additional barn room; also some place for the storage of grain, as we have no place whatever for the storage of grain or implements. Estimated cost, \$6,000.

VEGETABLE CELLAR.

Our vegetable cellar is entirely too small for the storage of vegetables for an increase of patients, and would recommend additional room. For this the estimated cost is \$1,500.

FIRE PROTECTION.

We would earnestly recommend the installing of a fire pump, hydrants and hose, as at present the only protection we have is the chemical fire extinguishers installed here. The estimated cost for above is \$2,500.

LAUNDRY MACHINERY.

The work in our laundry, of course, increases with the additional numbers, and it will be necessary to install more machinery. For this we would ask \$2,000.

SEWERAGE.

Work on the construction of the new sewer system is progressing quite rapidly, and we think, when completed, this system will be from a practical as well as from a sanitary standpoint, a success.

NEW COTTAGE.

The new cottage here in course of erection is nearing completion. This building is admired by all who see it, especially as to its being so perfectly fire proof, and reflects much credit upon the board and its architect. We presume it will be ready for occupancy about Jan. 1, 1905.

HEALTH OF INMATES.

The health of the inmates here has been exceptionally good during the past two years, speaking from a physical standpoint.

VISITING COMMITTEE.

Your visiting committee has visited the institution each month during this period, inspecting its condition and to the members of the board I wish to express my sincere thanks for counsel and generous support given us.

Respectfully submitted,

JOHN COLEMAN,
Superintendent.

STATISTICAL TABLES.

Average daily population for the year ending July 31, 1903.....	142.75
Average daily population for the year ending July 31, 1904.....	214.4
Average daily population for the biennial period.....	178.58
Number discharged during the biennial period.....	13
Number escaped and not returned during the period.....	4
Number of deaths during this period.....	10
Number of deaths since opening the institution.....	20
Number present July 31, 1904.....	246
Number present July 31, 1903.....	197

CAUSE OF DEATHS.

The cause of deaths reported in the foregoing table was, in every instance, due to chronic or long standing ailments contracted before being transferred to this institution. Eight out of the ten deaths reported being from tuberculosis. There are also quite a few more remaining in the institution afflicted with this disease.

CIVIL CONDITION.

BIENNIAL REPORT

OF THE

SUPERINTENDENT

OF THE

Hastings Asylum for Insane.

PERIOD ENDING JULY 31, 1904.

OFFICERS.

WM. J. YANZ.....Superintendent
 A. C. DORR.....Bookkeeper and Clerk
 DR. A. M. ADSIT.....Physician

To the Board of Control of State Institutions.

Gentlemen: I have the honor to submit herewith for your consideration the third biennial report of the Hastings State Asylum for the period ending July 31, 1904.

IMPROVEMENTS AND REPAIRS.

We have the west wing completed, which accommodates 150 more inmates. The interior of the east wing has been all repainted.

SILOS.

We have constructed two stone silos, 16 feet diameter and 28 feet deep, one connected with each barn.

The new heating and lighting plant as well as the laundry and cottage are now in course of construction, which we hope to have completed by Dec. 1.

In connection with the above heating plant, we have completed the well, 874 feet deep, 8-inch hole, in which the water is within 5 feet of the top.

CHANGES IN THE MAIN BUILDING.

The present quarters of the employes and attendants are too small, under the present arrangement most of the employes room on the wards. At the present time we have no hall where we can have amusements of any kind for the patients.

Our present office quarters are too small, neither have we a vault or safe for keeping our records.

I would recommend that the present administration building be extended 20 feet further out, which would give us ample office room, also raising same another story, which would enlarge the employes quarters, and raise the roof of the present diningroom, making an assembly hall over the diningroom. Estimated cost, \$15,000.

If the cottage plan is to be continued as intended we would recommend that additional appropriation be made for one or more cottages to be erected during the next two years.

FARMER'S COTTAGE.

Our farmer at the present time is living about a mile from the institution, which is very unsatisfactory and inconvenient. The farmer should live on the grounds.

I would recommend that \$2,500 be asked for same.

HORSE BARN, GRANARY AND MACHINE SHED.

In our last report we recommended the erection of horse barn, granary and machine shed. It is almost impossible to properly care for our stock, grain and machinery without having some place to take care of them. At the present time we are storing over one-half of our grain in an old granary about one-half mile from the institution; we have practically no place to keep our machinery nor have we barn room enough to keep our stock, which is increasing as the increase in size of our institution demands.

The estimated cost of the above, combined, \$5,000.

I wish to express my appreciation of the faithful labors of the employes, which has assisted so materially towards the success of the institution.

To the members of your honorable board I wish to express my appreciation for the kindness and courtesy extended to me and the friendly counsel and advice you have so readily accorded me upon all occasions.

Respectfully submitted,

WM. J. YANZ,
Superintendent.

STATE HOSPITAL FOR INSANE, FERGUS FALLS

ADMISSIONS AND DISCHARGES.

It would almost seem that the old name "Asylum" is coming to be a more appropriate appellation than "Hospital" for our state institutions for the insane. A reference to the statistical tables will show that about eighty per cent of the patients admitted during the past two years are cases of chronic forms of insanity. While the majority leave the institution in an improved condition and are able to take up their work successfully outside, most of them will in time come back to the hospital and finally become merely custodial cases. A large proportion of these patients are either foreign born or of foreign parentage. The increase in the degenerate class is more noticeable every year and an examination of the records shows that a very large percentage of these patients were born within a year or two after immigration of the parents to this country. It is to be expected, as this section of the country becomes more settled and the struggle for existence becomes less acute, that the children of coming generations will be of a higher mental type. We certainly could not find a stronger and more rugged stock upon which to build than comes to us from the countries of Northern Europe. The difficult problem before us at present is to keep as far as possible the degenerate offspring of the older generations from procreating until in the natural course of time this undesirable material passes away. Very little, however, can be done to solve the problem until society is educated to a fuller knowledge of the danger that menaces it.

The general health of the patients has been good during the period. Tuberculosis, especially pulmonary tuberculosis, is gradually increasing in the hospital, about thirty-five per cent of the total death rate being due to this cause. Certainly the first care in providing for the surplus population of our institutions for the insane should be to see that some arrangement is made to separate the tuberculous patients from the others and segregate them in buildings by themselves. It is true that in establishing the sanitarium at Walker the legislature expected in some degree to relieve the hospitals for the insane from the care of this class of cases, but I am confident the result will be that the management there will only find room for the sane applicants for admission.

A number of the patients discharged during the period have gone out under what is known as the "Johnson" law, which provides that a patient may be taken from the hospital under a written agreement signed by a relative to be responsible for the care of said patient. I have found that there is a frequent tendency to take undue advantage of this law by relatives who, as soon as the patients are legally discharged after the six months' parole limit, turn them over to the probate court for recommittal in order to escape the expense of returning them to the institution. I would recommend that the law be amended so that any person removing a patient from the

hospital under the provisions of this law shall be required to pay the expenses of recommittal in case he is returned to the hospital within one year of his removal therefrom.

PROVIDING FOR SURPLUS POPULATION.

This is a topic that becomes of more and more importance every year. The plan of accomplishing this to some extent by building nurses' cottages and thus making room on the wards for more patients has been frequently brought forward. As it is now an acknowledged fact that the cottage system is much superior to the congregate system in caring for the insane, might it not be a feasible plan to remodel the two detached wings for nurses' homes, making the first floors into workshops, and building the contemplated cottages for patients? This plan would undoubtedly cost the state more than to erect cottages for nurses, but it is the only method of breaking away from the congregate plan in an institution already completed, and the greater comfort and better classification of the patients might warrant the adoption of the plan even at an increased expense to the state.

Whatever plan is adopted for increasing the capacity of the hospitals, I think the time has arrived when the welfare of employes should receive greater consideration than heretofore. The board from the very beginning has showed a deep interest in them and the action of the last legislature indicated that that body had finally been aroused to the fact that some consideration was due to nurses in the state hospitals. I therefore present again remarks made in former reports, hoping thus to keep the subject before the coming legislature that they may find means to accomplish what their predecessors began.

In hospitals for the insane the most important work, that which stands out pre-eminently above everything else, is of course the care and control of the inmates; consequently the maintaining of an efficient nursing force is perhaps the most vital problem that confronts the hospital superintendent.

As a matter of course superintendents have the interest of their institutions at heart. Each one endeavors to raise his charge to the level of the best, and to keep it there. Alone he cannot do much to carry out his ideas; he must have the willing help of his subordinates, or his efforts will prove more or less of a failure. Upon the efficiency of the nurses depends not only much of the success of the institution as a hospital, but also its success financially, a point which probably appeals more to the general public than the cure of patients.

The applicants for positions on the wards of a hospital are numerous and of varied characteristics and attainments. The majority of those selected prove to be willing and conscientious workers,

honest and faithful, but the true nurse is born with the instincts of the profession which education simply trains and develops. Lacking this faculty, the beginner who shows conscientiousness, earnest attention to duty, power of observation, and a charitable and kindly spirit, may accomplish much in the cultivation of these qualities and become a fairly efficient and reliable nurse.

It is much to be desired that the doors of every institution be closed to one class of applicants, that is the tramp attendant, one of the worst nuisances with which a hospital has to do. The tramp attendant is in some respects like his brother on the road, restless, discontented and never holding to one position long. He is usually a person of good presence, intelligent and apparently possessed of all the virtues that go to make up a good nurse, but in reality he has most of the vices than can be acquired from years of observation and cultivation in various institutions. The patients under his charge are quiet and well behaved, but this condition is often brought about by rough and unkind methods, for he is a master in the art of ill-treating and abusing patients without leaving marks of injury as witnesses to his system of control. It is employees of this class who are responsible for most of the abuse of patients in institutions for the insane and who keep alive that feeling of abhorrence towards such places in the mind of the general public. Moreover, employees of this class are prone to immorality, always disloyal and fault-finding in an underhanded way, and altogether detrimental to good discipline and the well-being of an institution. One or two such can, in a very short time, make the entire nursing force discontented, disloyal and passively insubordinate.

Frequently nurses apply for positions who have worked in other institutions where the character of their work has been satisfactory, but even in these cases it is very doubtful if it is to the best interests of a hospital to employ them. I am strongly of the opinion that it is always wisest to select ward employees from the inexperienced applicants. This can usually be done, but in Minnesota where many employees come from the neighboring farms there is an exodus every spring lasting until after the harvesting of the crops, which deprives us of much of our best material, and it therefore frequently becomes necessary to fill vacancies with boys and girls too young to have the proper comprehension of the character and importance of the work. There are consequently several months in the year when the work of the hospital, as far as progress is concerned, is at a standstill. It has become rather a custom to look upon the hospital as a pleasant place to spend the winter season when there is no work to do on the farm. It is manifestly impossible to obtain the best results with such material, coming as it does with no intention to take up nursing as a permanent profession.

Just here I wish to express my appreciation of those nurses who faithfully carry on the work year in and year out. On them falls the heaviest pressure when the institution is short handed, and the

labor is carried on willingly and cheerfully with rarely a complaint. Whatever is done to benefit the condition of the nursing force they should receive a double measure.

We continually see in other lines of work good, faithful and loyal workers who consider it worth while to hold their positions year after year. Why can we not secure the same in our hospitals? We have some it is true and we do obtain much good material, but the problem is to retain it. It is easy to theorize on the best way to secure what we desire, and to keep and improve it, but the application of theory to practical problems has not yet brought about a marked success.

One frequently hears the claim made that if nurses were paid higher wages it would be easy to obtain just the class of employes desired and to retain them. The question of wages is becoming a serious one. Our state already expends a large amount annually for the care of its insane, and a marked increase in the hospital pay roll would add materially to the expense, and I very much doubt if such an action would result in a noticeable improvement in the character of the service. It certainly would not if done indiscriminately and alone without other changes as well. The general hospitals obtain all the material they desire and yet pay a much smaller amount for service during the training course than the hospitals for the insane. The claim is also made that the payment of higher wages would induce men and women who have had better educational advantages to seek the employment we offer and we would thus obtain a higher grade of nurses. To a certain extent this may be true, for education of course broadens an individual's conception of the work and renders it easier to acquire the necessary details of the profession; but the fundamental requirements of a good nurse, earnest purpose, undivided interest in the work, and above all, loyalty to the charge intrusted are as a rule inherent in the individual and not acquirable through education.

To accomplish the best work in an institution requires the united efforts of all the employes. In union there is strength and the cement that binds the parts into a perfect whole is Loyalty. Going through the various departments one finds as a rule a commendable spirit of loyalty and faithfulness in the heads of departments. They are anxious to further the best interests of the institution and are actively working towards that end. But among the subordinate employes the true spirit of loyalty is frequently lacking. I believe this is really due more to ignorance than to intention; they have never been taught to appreciate the true meaning of the word and until they do learn this, self interest will always take precedence of interest in the duty required.

Loyalty can be cultivated, but in the beginning there must be the inherent possibilities, and then with a sufficient incentive to arouse the desire to do better work it can be developed. The incentive of higher wages is of course a powerful inducement, but

GRADUATING CLASS NURSES TRAINING SCHOOL, STATE HOSPITAL, FERGUS FALLS.

U.S.A.

the sort of loyalty that is aroused solely by pecuniary reward is apt to prove an active principle only while the individual is under close observation.

There is much about an institution for the insane to discourage the desire to do good work, or for long service. If an employe is criticised for the quality of his work his first thought is apt to be—how will it benefit me if I do better work? He is apt to feel discouraged at the outlook. He is on duty nearly thirteen hours daily under a severe mental strain, he sleeps, or attempts to sleep in the wards with patients who are frequently excited and noisy, where he is liable to a call for assistance at any moment, so that during the whole night there is no real sense of relaxation. He has no special place when off duty to which he can retire for recreation and rest, so that he is really under the strain of his work almost constantly. If he is without friends in the neighborhood, the only place he can go for a full sense of freedom is to the city streets, or possibly the bar room. It is constantly impressed on his mind that everything about the institution is for the patients. Consequently he comes to feel that he is held in very little consideration and he gives half-hearted work in return. Is it not possible, without sacrificing the interests of the patients, to give more consideration to the well-being of our nurses?

Higher wages alone will never secure the best work. The nurse should be made to feel that his work is appreciated, that the success of the institution is in part directly due to his faithful service, that his official superiors are interested in his welfare, that whatever privileges are granted—pleasant rooms removed from the patients, places for recreation and social intercourse to which he can retire when off duty, a better dietary, extra time occasionally, advancement to more responsible positions—these he will receive if the character of his work warrants. Perhaps this appeal to self-interest is not a highly moral one, but it will certainly bring results, and when the employe becomes thoroughly impressed with the fact that loyalty and faithful service bring definite personal advantages, higher motives may be appealed to with a reasonable certainty of inducing further improvement.

If our institutions were hospitals throughout in the true sense of the word it would be easier to arouse in the nurses a deeper interest in the work and to secure a class of employes similar to that in the general hospitals, who come with the purpose of making nursing a life work and not simply as a means of earning a living during a dull season—a too frequent reason for seeking employment in a hospital for the insane.

A good deal has been said and written about the improvement in the care of the insane during the last twenty years, and the name "Asylum" is gradually giving place everywhere to that of "Hospital," and continuous and earnest effort is being made to make them really hospitals, but we cannot shut our eyes to the fact that at

least sixty per cent of the population of the state institutions is of the asylum type, chronic cases in fair physical health that require principally custodial care. Consequently our institutions, in spite of the name we may apply to them, are to a great extent still asylums, for a class that is simply kept there because there is no suitable place to care for it elsewhere. It therefore seems almost inevitable that the nurses who have the care of the chronic patients, whose work is largely a daily routine, much of it of an exceedingly disagreeable nature, keeping their charges cleanly, seeing that they are kindly treated, their necessities looked after, and interesting them in work and amusements, after a while show a lack of interest in the work and fail to acquire a true hospital spirit. This I believe is a very cogent reason why we are unable to secure the class of employes found in the general hospitals, and I am almost convinced that until we depart from the present congregate plan of hospital and asylum combination we shall never gain the best results in caring for the insane. If patients suffering from acute and chronic forms of insanity require different methods of treatment, most certainly those employed to look after them require different methods of training. The nurses engaged in the true hospital work should be trained the same as is done at present. Those employed to look after the custodial cases should be trained more along the lines of kindergarten and trade school work. The powers of observation should be especially cultivated, how best to secure the comfort of the patients, and how best to encourage and successfully urge each individual into taking part in some helpful employment or amusement, for under intelligent stimulation the demented mind can frequently be aroused and the individual gradually instructed in the rudiments of some handicraft suited to the gradually awakening mind.

To sum up, an indiscriminate increase of wages would not result in a proportionate increase in the efficiency of the nursing force. Your board has, since it has been in office, made a general increase of wages to a marked extent, and I think the salaries now paid are, as a whole, as high as could be expected. I believe a slight increase in a few directions would result in benefit to the institution and also a length of service increase as a reward for efficient work and an incentive to employes to remain in the employ of the state. The hours of work should be made shorter, the nurses should have better quarters and more homelike surroundings when off duty, certain privileges could be granted to nurses above a given grade, who by efficient work had been advanced to responsible positions, without detriment to the institution, and above all, the nurses should be classified as far as possible and trained in accordance with the class of patients with which they had to do.

Let us come more into touch with the nurse as a human being, give him appreciation and his due, train him properly and the result in time will be better service and a more loyal spirit.

TRAINING SCHOOL.

The Nurses' Training School held its eighth and ninth commencement exercises on June 9th, 1903, and May 20th, 1904. Sixteen nurses graduating the first and twenty-two the second year, making the total number of graduates one hundred and seventy, eighty-six men and seventy-one women, of whom twenty-six men and twenty-five women are still in the employ of the hospital.

APPROPRIATIONS RECOMMENDED.

Cottage for male nurses	\$35,000.00
Cottage for female nurses	35,000.00
Cottage for contagious diseases	5,000.00
Morgue	3,000.00
Addition to cow barn	3,000.00

The present quarters in our cow barn are much too small for our needs, and the health of the herd is seriously menaced by overcrowding.

Fireproofing and repairing west detached wing.....	\$5,000.00
--	------------

The floors and ceiling of this wing are in bad repair and will have to be renewed in the near future. The whole wing needs overhauling and putting in good repair. There is ample space in the basement for dining room purposes, thus providing room for twelve more patients in the building.

Completing tower of administration building	\$6,000.00
Improving roads and grounds	800.00
Purchasing land	5,000.00

There are over sixty acres of land east of and adjoining the state property, most of which we have rented for several years. This is excellent land, under cultivation, and should be owned by the state. The state will not be able to rent this land for a much longer period in all probability, as it is within the city limits and land so located is in good demand.

A balance of about \$10,000 remains in the state treasury of the appropriation for building the east detached wing. There is also in the treasury the sum of \$10,000 for building a superintendent's cottage and making over a section of the administration building for patients. This appropriation was never recommended by the board or the superintendent. The administration building was not planned for ward purposes and could not be made over for that purpose economically or satisfactorily. Such an arrangement would never be anything but a makeshift. Patients overhead would be a constant source of disturbance to the work of the institution, as **the business offices** are situated on the first floor, and the only possible way for persons to pass to and from the upper stories is through the hall of the business offices, through other wards or through the

basements. The arrangement contemplated by the appropriation is unsatisfactory and a useless expense to the state. I would therefore recommend that the legislature be requested to transfer this appropriation and the balance of the appropriation for the east detached wing so that these funds may be used for some of the purposes recommended above.

CURRENT EXPENSES.

For the year ending July 31, 1906.....	\$205,000.00
For the year ending July 31, 1907.....	205,000.00

The above amounts include the annual standing appropriation, \$25,000.00.

REPAIRS AND BETTERMENTS.

For the year ending July 31, 1906.....	\$5,000.00
For the year ending July 31, 1907.....	5,000.00

STAFF.

Dr. Bertha Frost resigned May 5th, 1903, to enter into general practice.

Dr. H. M. Pollock resigned April 23d, 1904, having been appointed superintendent of the new insane hospital at Norwich, Connecticut.

Dr. N. F. Doleman resigned April 30, 1904, to enter into general practice.

Dr. Jennie G. Purmort was appointed assistant physician May 1, 1903.

Dr. Frank R. Sedgley was appointed assistant physician April 28, 1904.

Dr. Franklin S. Wilcox was appointed first assistant physician May 6, 1904.

Dr. Irving H. Kiesling was appointed pharmacist and interne June 6, 1904.

ACKNOWLEDGMENTS.

To the officers and employes who have labored faithfully in the discharge of the duties I wish to extend my thanks in appreciation of their work.

I wish also to take this occasion to express my appreciation of the work of Dr. H. M. Pollock, who for nearly five years filled the position of assistant superintendent. With congratulations that he has been selected to fill a position of such importance and trust are mingled feelings of regret that the state has lost the services of a loyal and faithful official.

And finally to your honorable board I wish to express my appreciation for the kindness and courtesy extended towards me during the past two years.

Respectfully submitted,
 GEORGE O. WELCH,
 Medical Superintendent.

BOARD OF CONTROL OF STATE INSTITUTIONS:

Gentlemen:

The thirteenth biennial report of the Rochester State Hospital is herewith respectfully submitted.

MOVEMENT OF POPULATION FOR THE BIENNIAL PERIOD.

	Men.	Women.	Total.
Total number connected with Hospital July 31st, 1902	650	552	1,202
Number out on trial.....	36	34	70
Number remaining in Hospital July 31st, 1902..	614	518	1,132
Coming in During the Period—			
Number admitted (new).....	247	198	445
Number readmitted	57	59	116
Number returned, out at beginning.....	3	4	7
Number transferred from other hospitals.....	1	...	1
Total number coming in.....	308	261	569
Going Out During the Period—			
Number sent away or eloped, and discharged before end of period.....	115	99	214
Number sent away on trial, not discharged nor returned	43	50	93
Number eloped, not discharged nor returned before the end of the period.....	4	...	4
Number transferred to Hastings Asylum.....	111	...	111
Number died during the period.....	87	89	176
Total number going out.....	360	238	598
Total number remaining in hospital July 31, 1904	562	541	1,103
Number out on trial July 31, 1904.....	47	50	97
Total number connected with Hospital July 31st, 1904	609	591	1,200
Legal Discharges and Deaths—			
Number discharged, recovered, during period...	57	21	78
Number discharged, improved, during period....	71	85	156
Number discharged, unimproved, during period..	19	22	41
Number discharged, not insane, during period...	1	1	2
Number transferred to Hastings Asylum.....	111	...	111
Number died	87	89	176
Total number discharged and died.....	346	218	564
Miscellaneous—			
Average daily population during period.....	585.11	531.3	1,116.41
Average annual percentage of deaths on the number treated	5.82	6.79	6.275
Percentage recovered on number admitted.....	18.68	8.17	13.88
Percentage recovered and improved on number admitted	41.98	41.25	41.61
Number eloped during period, returned.....	27	3	30
Number eloped and discharged during period...	12	1	13
Number eloped and out at end of period.....	4	...	4
Number sent out on trial and returned during the period	26	43	69
Number sent out on trial, out at end of period..	43	50	93

Seventeen hundred and one (1,701) patients have been under treatment during the period, the daily average being 1,116; the largest number present on any one day was 1,166, and the smallest number 1,085. The number of men decreased 52, while the number of women increased 23, the decrease of men being due to the fact that 111 were transferred to Hastings, making a total of 269 men transferred to that institution since its opening. This decrease in the number of men enabled us to remove the men who have occupied ward A4 on the women's side for several years past. This ward, after a complete renovation, is now occupied by feeble old women who are enabled to spend a great deal of time out of doors by reason of their being on the ground floor. This room was very much needed for women as their department is largely overcrowded, forty women sleeping on beds made up on the floor.

In the past four years there has been a decrease of 79 in the number of men and an increase of 60 women, this being due to the fact that men only have been transferred to Hastings.

Of the 562 cases admitted during the period, 104 were discharged recovered or improved, 15 unimproved, 9 men were transferred to other hospitals, 75 died, 2 were not insane, 80 are out on trial, and 277 still remain in the institution.

Of those discharged 15 were deported, six to Europe, one to Canada, and eight to their homes in other states. The prognosis, on admission, in 55 per cent of these cases was decidedly unfavorable.

According to the Census of 1890, 35.7 per cent of the State's population was of foreign birth, while the percentage of that class admitted to the hospital in that year was 54.3 per-cent. In 1900 the Census shows 28.9 per cent of the population foreign born, with a percentage of 49 in admissions to this hospital. This shows a proportionate increase in the admission of foreign born to this hospital. The percentage of admissions of foreign born in 1902 and 1904 was 45.2 and 47.7 respectively.

Table No. 12 shows the number of admissions in each year since the opening of the hospital.

The opening of the ward at Stillwater for their insane population has enabled the prison management to care for cases whose condition may have necessitated their removal to this hospital. This is a long step forward in the proper custody and care of these cases. Of the twenty-five transfers from the prison, at various times, and present during the biennial period, two, life prisoners, were returned to Stillwater, three were discharged from the institution, one was transferred to Hastings, and 19 still remain. In 14 of these latter cases the sentence has expired, 3 men sentenced under

the reformatory plan, one for life and one for twenty years, sentence not yet expired.

Four men, homicides and committed by the Court as insane at the time of the commission of the act, are inmates of the institution. It would seem that provision for the care of this class might be made in connection with the department for insane at Stillwater.

From March to August, 1904, an epidemic of paratyphoid prevailed. This is a disease closely simulating typhoid, and only distinguished from it by bacteriological means. The first case diagnosed was taken ill March 29th. Six cases among the patients and five among the employes were fairly typical of typhoid. The Widal reaction was obtained in 115 cases, 88 women and 12 men patients, and 12 employes, the last reaction being obtained August 28. There were three deaths. The disease appeared on C. I. West, and was confined to the two upper flats of the women's department. The greatest number confined in bed at any one time was thirteen. Every means was taken to confine the disease to the wards mentioned. The prophylaxis was that for typhoid fever and involved an immense amount of work, and much credit is due the nurses for their unflagging zeal under the most trying circumstances. Live steam was supplied to these wards, the clothing was boiled before going to the laundry, dishes steam sterilized, and the most rigid prophylaxis carried out. We are under obligations to Dr. Wessbrook and Dr. Wilson of the State Board of Health for assistance during this epidemic.

Seventy-two cases of *Spirillum Vincent*, affecting the gums and mucuous membranes of the mouth, were under treatment during 1904.

One unfamiliar with the conditions cannot realize the difficulty of controlling and suppressing such epidemics in an institution like this, and the fact that isolation wards are needed is most strongly emphasized.

TRAINING SCHOOL FOR NURSES.

The work of this school has been carried on by the medical staff with unflagging interest and zeal. At the time of its organization in 1890 there was little call for trained nurses outside of the hospital, but the demand has increased until it exceeds the supply, and those of our graduates in private work are kept busy.

One hundred and twenty-three (123) women and eighty-one (81) men have received diplomas. Thirty-four women and nineteen men are rendering valuable service in this hospital. Thirty-nine women graduates are ministering to the cares of their own households, their diplomas not having proved a bar to matrimony.

The number, particularly of women, seeking admission to the school increases yearly, giving us a large number of applicants to select from, and we now have a nursing staff that does us credit.

Your Board has encouraged every effort to make the service attractive, an increase of 25 per cent in the wages being not the least of your efforts in that direction, and it is through no fault of yours that we still are obliged to house our nurses on the wards, the appropriation for a nurses' dormitory not being granted. As to the advisability of furnishing separate quarters for them, there can be no argument; humanity, if nothing else, demands that proper provision be made for those, who, under such trying circumstances, labor day in and day out for the State in the interest of its wards committed to their care. Their work may not be worthy a pension in old age, but they are certainly entitled to the best the State can afford while in its employ.

We have met with continued encouragement from your Board in our endeavors to furnish employment for our patients. The work among the women has increased under the supervision of Miss Bosworth to such an extent that it is advisable to furnish her with an assistant. . . . She has made an effort to interest all classes in some useful and pleasing employment. Appended is her report.

In order to employ more men than the regular work of the institution calls for, it will be necessary to erect shops where they can be employed and taught along such lines as will interest them, benefiting themselves and the institution.

PROVISION FOR THE CARE OF INEBRIATES.

Inebriates were cared for in this hospital from its opening in 1879 till 1897, when the law authorizing their commitment to this hospital was repealed. While experience has found it unsatisfactory to attempt their proper treatment in such an institution as this, the fact remains that some provision should be made for their custody, treatment and employment. Very few of those addicted to drink will aid in their own recovery by a voluntary commitment to a private institution, while, if provision were made for a legal commitment to a well appointed institution, many a man might be reclaimed and again made a useful member of society, instead of being allowed to drift deeper and deeper into alcoholic dementia. Inebriety is a disease that from its nature renders an individual powerless to cope with it, and as such its treatment should be taken in hand by the state.

NEEDS OF THE INSTITUTION.

In enumerating the wants of this institution, we have endeavored to confine ourselves to those most essential to its proper conduct.

ELECTRIC MOTORS TO REPLACE STEAM POWER.

As your board is about to install an additional engine and dynamo for day use, it is necessary for the carrying out of this plan to furnish and set up the proper electric motors, and furnish the laundry with electric sad irons. This would cost \$2,500 and the appropriation should be made available during this fiscal year.

Should you deem it advisable to replace the two large steam pumps with a triplex pump with electric motor, and the two steam air compressors with a motor driven compressor, the cost would be \$3,500 additional. I quote from an expert's opinion in 1898 on this steam plant, as follows:

"The present steam pumps that are used to pump water into the reservoir to supply the daily needs of the institution consume a very large amount of steam annually, and the same may be said of the direct acting steam pumps that are used to feed the boilers. There are also used two Westinghouse direct acting air pumps on the sewage system which also consume a large amount of steam. There are also used a slide valve engine for driving the machinery in the laundry and machine shop. also a separate engine for operating the kitchen fan, and also another engine for driving the ventilating fan in the 'A' East section. A large saving in annual expense of fuel could be effected by substituting for the direct acting steam pumps above referred to triplex power pumps operated by electric motors direct connected to same. The Westinghouse air pumps could be replaced with an Ingersoll-Sergeant belt driven air compressor operated by an electric motor. The throttling engine used to drive the machine shop and laundry could be replaced by an electric motor of sufficient capacity to drive the present machinery. The same may be said of the engines that are used to drive the kitchen fan and fan in section 'A.'

The steam consumption of the steam pumps, the Westinghouse Air Pumps, and the three throttling engines herein mentioned, on the basis of ten (10) hours per day, coal costing \$4.50 per ton amounts to, per day.....	\$8.10
While the same amount of work could be done by an automatic engine at a daily cost of.....	5.20
Making a daily saving by substituting electricity of, per day.....	\$2.90
Which amounts in one year to the sum of.....	\$1,058.00"

ADDITION TO LAUNDRY.

Our laundry is entirely inadequate to the demands made upon it. We had hoped to be able to build a new one, but the appropriation we asked for was not forthcoming. We now recommend an addition to the present building with soft water cistern underneath of 3,000 barrels capacity. This will cost \$4,500.

WARDS FOR THE ISOLATION AND CARE OF PATIENTS SUFFERING FROM CONTAGIOUS DISEASES.

In the 10th and 11th biennial reports, we asked for an appropriation of \$6,000 for the above purpose. I renew the recommendation and can only repeat that this is one of the greatest needs of the institution. It is impossible to properly care for tubercular cases upon a crowded ward, and the recent epidemic of paratyphoid demonstrated the necessity of some means for the isolation of such cases.

ICE HOUSE.

The present ice house, a frame one, is so badly dilapidated that it will hardly hold together another season. A new frame house 30x80 feet will cost \$2,000.

PLUMBING.

In order to carry on the work of renewing the plumbing, an appropriation of \$5,000 should be asked for. Much of this plumbing has been in place for twenty years and has been condemned by every official whose duty required its inspection.

CONNECTING CORRIDOR.

Between main building and the west detached ward.

When the west detached ward was built in 1890 a subway connecting the same with the main buildings was placed with the intention of erecting thereon connecting corridors. This plan has not yet been carried out, and the demand for it has increased yearly. The population of our "C" halls has long been in excess of their accommodations.

The erection of this building would give us 48 additional single rooms with an increase in the size of the dining rooms, which are entirely too small, besides furnishing a ready means of exit from both the detached ward and the main building in case of fire.

The estimate of \$16,000 is for a fire proof building.

NURSES DORMITORY.

Two years ago your board asked for an appropriation of \$75,000 for a nurses' dormitory. We hope that at the coming session of the legislature this request will be granted.

In making these recommendations, I realize the fact that all state institutions will be asking appropriations, some of them large ones, but we hope that the representatives of this state will see to it that the needs of its hospitals are first provided for.

SUMMARY OF APPROPRIATIONS ASKED:

Electric motors	\$2,500
Electric pump and air compressor.....	3,500
Wards for contagious diseases.....	6,000
Addition to laundry.....	4,500
Connecting corridor	16,000
Nurse's Dormitory	75,000

Since the last biennial report we have installed a 200 H. P. Gallo-way boiler, increasing our capacity to 800 H. P. The rock crusher purchased a year ago has proved very efficient, and a large amount of crushed rock is now on hand.

An appropriation of \$800 has been expended in the erection of a much needed paint shop.

The wooden stairway at the junction of the "B" and "C" East halls has been replaced by one of iron and slate.

The numerous repairs and improvements have required the constant attention of the carpenters and painters, and a steady demand upon the repairs and betterment fund. It would be well if this fund could be increased to \$10,000 a year, as the repairs and betterments in an institution of this kind steadily increase with years.

FARM.

Appended is the report of Mr. James showing the farm products for the biennial period. This report conforms to the fiscal year, and the report of each year necessarily includes portions of two harvests.

The potato crop of 1903 was a partial failure, requiring the purchase of 3,500 bushels. The crop for this year is estimated at 11,000 bushels.

The strawberry beds have yielded abundantly of fruit most acceptable to our household.

The lease of the Hurlbut farm of 300 acres was renewed Oct. 1st, 1902, for a period of five years.

The Peters' forty, contiguous to our slaughter and soap houses, has been leased for a period of six years with the privilege of purchasing at \$49 per acre. It will be of great advantage to the institution to secure this land, and it should be purchased before the expiration of the lease.

The lease on the Harvey farm of 400 acres expires Nov. 1st, 1904; satisfactory arrangements can be made for its renewal.

CHANGES.

There have been very few changes in the official staff. Mr. F. P. Bath, steward, resigned his position and was succeeded by Mr. R. A. Baker, who assumed the duties of the office Dec. 4th, 1902. Mr. Joseph Marum was succeeded as storekeeper by Mr. John Miner. We are pleased to say that there has been no change in the medical staff, Drs. Phelps, Heyerdale, Chappel and Linton continuing their zealous labors in behalf of those intrusted to their care.

ACKNOWLEDGMENTS.

To all officers and employes, who, by faithful attention to duty, have contributed so much to the successful conduct of the institution, I tender my sincere thanks.

I wish to thank the many friends of the institution who have contributed of their time and means for the entertainment of our patients. We are under continued obligations to many of the newspapers of the state for their publications, and we would be much pleased to have the list extended to embrace every paper in the state.

To the Doctors Mayo, who have given, for so many years, their most valuable services in the surgical work of this hospital, we tender our sincere thanks.

We appreciate most heartily the encouragement and co-operation of your board in all that pertains to the welfare of the institution.

Respectfully submitted,

ARTHUR F. KILBOURNE.

August, 1904.

Total admissions	305	257	562

Note.—“Mania-a-potu” is a term used in our tables to designate an insanity caused by the drinking of alcoholic liquors. This is thoroughly distinct from delirium tremens, as a rule, is also not at all like “chronic alcoholism.” It is usually a confusional state, more often maniacal in form, but occasionally of a melancholic character. It is peculiarly brief in duration, and the termination is almost always in recovery. These cases are separated from the “acute manias” and the “acute melancholias” therefore in order to recognize an important clinical fact. They separate into a class more easily than do some of the other classes.

Aug. 1, 1903, to Aug. 1, 1904..	155	129	284	9	8	1	1	32	1	62	170
Totals	3,647	2,502	6,149	558	78	156	41	111	176	2	97	1,103

Note.—This table shows graphically that all changes of condition (including "recoveries," "improvements" and "deaths") occur during the first few years of the hospital life of the patients. The average stay in the hospital of those discharged or died, of the 562 cases admitted during the two years, was one year. Of the 453 cases discharged or died during the two years, 196 were from these new admissions, as were 80, or 45 per cent, of the deaths. Three hundred and sixty-seven of these 453 changes occurred among the 1,089 patients admitted during the past four years.

TABLE NO. 12.

SHOWING NUMBER INSANE AND NUMBER INEBRIATES COMMITTED
EACH YEAR SINCE OPENING OF THIS HOSPITAL TO JULY 31, 1904.

	Insane.		Inebriates.		Total.	
	Men.	Women.	Men.	Women.	Men.	Women.

Aug. 1, 1901, to Aug. 1, 1902	156	120	156	120
Aug. 1, 1902, to Aug. 1, 1903	150	128	150	128
Aug. 1, 1903, to Aug. 1, 1904	155	129	155	129
Total admissions	3,647	2,502	536	41	4,183	2,543

Note.—It will be noted that the total of insane admitted to this hospital is different in this table than that shown in the preceding. This is due to the fact that in the earlier years, and up to Aug. 1, 1902, the inebriates who were admitted were mingled with the insane in all the tables made out. In this enumeration they are separated.

REPORT OF SUPERVISOR OF INDUSTRIAL TRAINING

To the Superintendent:—

In considering this, the first report of the industrial department, it is to be remembered that, although first begun systematically December 4th, 1902, the work is still in the experimental stage.

Previous to this time, the Ladies' Industrial Society, composed of the most intelligent women of the different wards, supervised by the head nurse and her assistant, had undertaken different kinds of fancy work, including the making of pillow lace.

This work has since been continued and other lines, such as raffia, bead work and the like have been added.

It has been our aim to keep apace with the development in needle work and allied arts wherever it has been found possible to adapt new ideas to our needs. For, while many patients are proficient only in the common household arts, such as plain sewing, knitting, crocheting and the braiding of rugs, and cannot be persuaded to undertake anything new, many others demand constant variety in order to ensure their interest.

In assigning work it has been found necessary to consider not only the mental and physical condition, but the capacity and taste; in a word, the individuality of the patient must be studied. Work of practical utility, simple in design, that can be quickly executed, appeals to some; others again find pleasure in more intricate things, something that will arouse dormant mental activities and appeal to the aesthetic sense.

In the planning, beginning and distributing of work, to say nothing of individual instruction, our time and energy has been taxed to the utmost. On the average one-third of our women patients have been occupied for a portion of each day. During the past year our efforts have been largely directed toward the beautifying of the wards for both the men and women. Washable table mats and covers for sofa pillows have gradually replaced the old flimsy ones of wool and chenille, and the improved appearance of the wards attests to the value of energy spent in this direction.

While the personal benefits derived by the patients through their employment in various ways has been quite marked in some cases, yet we feel that much more might be accomplished in this direction, especially among the acutely insane; could more time be devoted to each individual, and while we deeply appreciate the generous provision made by the Board of Control in the way of raw materials furnished, yet if education along industrial lines is to be made a feature in the treatment of the insane, we would urge that increased facilities for work be provided, these to include an industrial room, and at least one assistant to co-operate with the supervisor of industrial work.

Respectfully submitted,

INEZ BOSWORTH.

GRADUATING CLASS NURSES TRAINING SCHOOL, STATE HOSPITAL, ST. PETER.

St. Peter State Hospital.

BIENNIAL REPORT

OF THE

SUPERINTENDENT,

PERIOD ENDING JULY 31, 1904.

To the Board of Control of State Institutions.

Gentlemen: The following statistics show the movement of the population of the St. Peter State Hospital for the biennial period ending July 31, 1904:

	Men.	Women.	Total.
Number connected with the hospital July 31, 1902.	517	532	1,049
Out on parole	30	38	68
Number present July 31, 1902.....	487	494	981
Number admitted during the biennial period.....	259	201	460
Number readmitted during the biennial period....	55	62	117
Number returned	58	34	92
Whole number treated during the biennial period.	859	791	1,650
Daily average for the year 1903.....	474.91	496.16	971.07
Daily average for the year 1904.....	433.17	504.83	938
Daily average for the biennial period.....	454.04	500.49	954.53
Left during the biennial period.....	242	186	428
Transferred to Faribault School for Feeble-Minded	2	...	2
Transferred to Hastings Asylum	30	...	30
Transferred to Anoka Asylum	40	...	40
Transferred to Rochester State Hospital.....	1	...	1
Died during the biennial period.....	73	63	136
Present in the hospital July 31, 1904.....	439	522	961
Number out on trial, parole, 18; escaped, 8.....	26	35	61
Number connected with the hospital July 31, 1904.	465	557	1,022
Discharged recovered	69	83	152
Discharged improved	108	71	179
Discharged unimproved	43	21	64

The question is frequently asked by visitors and others: "Do any of the patients ever recover sufficiently to go home?" It is questions like these that discourage us in our work; because they argue the persistence of preconceived ideas with regard to insanity, and the nature of the work done in hospitals for the insane. Reference to the statistics given in this report, will show that there has been very little variation in the population of this hospital during the biennial period. The fact that there was no increase is explained by the transfer of seventy men to the asylums for the chronic insane. Nevertheless, between these two periods there were admitted, readmitted, and returned to the hospital 669 persons. If only a small number of those admitted recovered sufficiently to leave the hospital, the increase in the institution population would be enormous. And, when it is taken into consideration, further, that during the past ten years over 3,000 new patients were admitted to the hospital—very nearly as many as the present population of all the hospitals—it will be readily understood that the proportion of recoveries approximates very nearly that of the general hospitals; when it is taken into consideration that we keep our unrecovered patients in the hospital. During the biennial period 152 patients were discharged as recovered, and 179 improved, which means that so many were restored to complete usefulness, and so many more sufficiently restored to be able to get along comfortably in the world and to care for themselves. That, if there was no overcrowding, sufficient facilities, and enough help, this number might be largely increased, is the belief of all those who have had experience in the care and treatment of the insane.

Unfortunately, there are no standards in use by the Board of Control, and the public, whereby they can estimate, or judge of the

medical care required in the treatment of the insane. In spite of declarations to the contrary, the preconceived idea that the insane man requires only custodial care, is still paramount, and forms a hopeless obstruction to the proper consideration of the subject. It is thought quite proper, and the duty of those concerned, to provide in a general hospital every facility for the care and treatment of the patients; but the insane, who require more care, and who obstruct instead of assisting those who have to do for them, are considered well provided for with only a fraction of the facilities and help provided in a general hospital. Besides, medical care and treatment, especially of the insane, is largely in the nature of personal service, the results of which cannot be measured in money or formulated in accounts. Therefore, it does not receive the consideration that it ought to, and the efforts of those engaged in this work, to improve the care of the insane, and make some progress in the study and treatment of insanity, are looked upon as visionary and impractical; especially if money is asked to provide more help and better facilities. And yet, unless the state is content to provide merely custodial care, and is willing that its institutions should remain at a standstill; scientifically sterile and without interest in the future, some consideration must be given to these aspects of the subject.

In the schedule of employes adopted by the Board of Control, on a per capita basis, making no distinction with regard to those engaged in the care of patients, there was a considerable reduction in the number of nurses allowed in this institution. Because, in dividing the employes among the different departments, the institution economy had to be maintained, or else a deficiency would have resulted that would have been apparent in a money equivalent. Whereas the personal welfare of the patients might be sacrificed, and their chances for recovery lessened, without any evidence of it appearing in the financial accounts of the institution.

When it is further taken into consideration that the necessary absence of nurses from duty reduces their number by 10 per cent, the significance of the small number on duty during the day may be appreciated. In the wards for men there are only 30 nurses on duty in the day time to care for 434 patients, or an average of one to fifteen. Besides, 56 of these patients are filthy; require bathing and a change of clothing once or several times a day; 66 are destructive, and 51 are suicidal. There are nine wards in the main building, and two large wards in the detached building, thus giving an average of less than three nurses on duty in each ward at any one time. In the wards for women there are 45 nurses to care for 524 patients; making an average of one nurse to 12 patients, or about four to a ward. But when it is taken into consideration that women always require more personal care than men, that there are 100 filthy patients, 102 destructive, and 54 suicidal, it will be seen what scant care and attention must be given to the majority in order to give the absolutely necessary care and attention to this small number. We should be

allowed one day nurse to every ten patients as a minimum; so that we might give these unfortunate people placed in our care the attention and nursing that they need.

I incorporate here in the narrative part of my report a statistical resume of the medical work done in this hospital during the biennial period, because I want to call attention to the facts as here presented in contradistinction to the generally accepted idea that the insane only require clothing, housing, feeding and restraint; also that the demented and feeble minded are healthy and do not need any medical care or treatment:

RECORD OF MEDICAL WORK—MEN.

Number of patients in bed at beginning of period:		
Recent cases	6	
Other patients	10	
		16
Number of patients requiring medical treatment while in bed:		
Recent cases	311	
Other patients	447	
		758

First year	8		
Second year	18		
			26

FURNITURE.

The increase in the cost of living, and the price of fuel during the past five years, has made it difficult for us to live within our income. Therefore, we have curtailed expenditures in every way possible, and, because it was not an absolute necessity, we have bought practically no furniture for a long time; so that the wards look bare, and some of them shabby. It is therefore recommended that an appropriation be asked for the purpose of renewing our furniture.

ADMINISTRATION BUILDING.

We have had the same experience in the reconstruction of this building, provided for by the legislature two years ago, that we have had on previous occasions and with like enterprises. After tearing out the interior of the building, many defects in structure were found that could not be anticipated; so that the fire proof construction, which was absolutely necessary, was rendered much more expensive, and a great deal of material in the building which we had expected to use again was found to be unfit for use. The roof which we hoped to retain as it was, has been found to be insecure and will have to be reconstructed. Therefore, the amount appropriated for the purpose has not been sufficient. Besides, it will be necessary to build a combined porch and fire escape on the front of the building;

and no provision has been made for the furnishing of the building when it is completed. As this building is to be our hospital for the care of recent cases, will contain the operating room and diet kitchen, as well as the sick wards, it is important that it be properly furnished for the purpose, and that all the facilities be provided that may be necessary for the thorough and systematic treatment of the people placed in our care.

NURSES' HOME.

In 1894, and again in 1900, attention was directed to the importance to the welfare of the hospital of proper provision for the housing of our women nurses outside of the hospital buildings. Each year that passes makes this provision more imperative and the reasons for the change more apparent. These reasons are here restated for the consideration of the Board of Control, and the information of the legislature.

Economical.—The room occupied by the nurses in the different buildings would be much more useful for the purpose for which it was intended, and, besides, room for dormitory purposes for the nurses can be provided more cheaply.

Disciplinary.—No one who spends the entire 24 hours with his work can have the same interest in or enthusiasm for it, that he would have if he was away from his work a part of the time. Besides, it is greatly in derogation of good discipline to have those who are off duty constantly in association with those who are on duty. It is also a serious strain on the nurses to never have any relief from the sights and sounds by which they are surrounded, unless when out doors. This too intimate association with the patients also has a tendency to blunt the sensibilities of the nurse, and to make him less sympathetic and considerate. Another evil arising from the necessity for the nurses to sleep on the wards, is the temptation, so hard for the conscientious to resist, and so irresistible for the rest, to retire to their rooms while on duty, whenever they believe they are not watched. Where a large number of people are gathered together in one place, whose condition not only makes them irresponsible, but deprives them of their liberty and the opportunity to care for themselves, it is important that those who have their welfare in charge should be held to a rigid responsibility for the performance of duties, that are always irksome and trying, and that the defencelessness of the patient increases the temptation to shirk; because the service is personal.

Ethical and Humanitarian.—The onerousness of the duties involved in nursing the insane, demands greater consideration for those employed in their care, than is usually given to those whose day's work is confined to certain hours, whose occupation is mechanical and does not involve mental strain and anxiety. Again, the

fact that their occupation involves the nurses living with their work, throws upon the institution the onus of the regulation of their social intercourse and the definition of their privileges; thus making necessary the assumption of a responsibility that ordinarily rests with the family, is regulated by the customs of the community, and social convention. The state takes a grave responsibility and does not properly appreciate its duty, when it turns these young people, from whom it demands such exacting service, into the street for amusement and social intercourse. We are each year demanding more from our nurses; holding them to a stricter responsibility and a higher sense of duty. We should recognize these facts and what they imply. If we would attract to the work intelligent young men and women, we must show them more consideration. It is manifestly unfair that an occupation of such responsibility, where tact, judgment, patience and intelligence, more than is usual, are required, should be classed with simple manual labor. Nursing the insane is and should be considered as a profession, and those who engage in the work should be shown the consideration due their vocation and qualifications. If we are to get intelligent and competent young people into our hospitals, there must be something to attract them to their work; which, from any other standpoint than that of professional enthusiasm, is certainly not attractive, and by most people regarded as repulsive. If the occupation is looked upon only from the standpoint of manual labor, it will always be difficult to get any one to engage in it, and impossible to secure the services of the intelligent and the conscientious that alone should compose our nursing staff; for only they can separate the human from the bestial aspect of the work. And, if we are to have order, decent conduct, cleanliness, and good manners among our patients, we must have to care for them people to whom such characteristics are natural or easily acquired.

For the reasons here given the provision of a nurses' home is again recommended. The building should be sufficiently large to accommodate one hundred employes, and should be provided with proper facilities for their comfort and the decorous entertainment of their friends.

STAFF HOUSE.

The fact that the administration building is to be put to other uses makes it necessary to provide accommodations for the medical staff and subordinate officers. Two years ago a separate staff house was recommended. Such provision has already been made in other states, and the arrangement has been found to be much more satisfactory than that of having the domestic establishment of the staff in the administration building. The former recommendation is therefore renewed.

REPAIRS TO SOUTH WING.

Two years ago a plan was suggested to the legislature for the fire proofing and reconstruction of the south wing, and it is here again called to your notice. As it would be impossible to vacate any of the buildings in the wing while the work was being done, these repairs could not be made in the ordinary way. That is, the work would have to be done with the people in the building. Therefore, if the legislature will, like the general government, make an annual appropriation for the purpose, a certain portion could be done each year, with due consideration of the fact that the building would have to be occupied while the work was going on.

INDUSTRIAL BUILDING AND STORE ROOM.

The recommendation made two years ago, to turn the present store room and steward's office into an industrial building, and build another store room, more conveniently located and better adapted than the present one, is herewith renewed. Unlike the newer institutions we have no place for our patients to work, and therefore need an industrial building badly.

GRAIN HOUSE.

We have no proper place to keep our grain, so that we have to distribute it about in places not suitable, and where much of the grain is wasted. It is therefore recommended that an appropriation be asked for this purpose.

CORN CRIB.

By utilizing the crib we now have as one side, we can build a double shed crib which will hold our corn, and furnish storage for farm implements.

HORSE BARN.

The partial reconstruction of our horse barn has become necessary, so that we may have sufficient stable room. By building an "L" extension toward the south, we can provide room for all of our horses on the grade level of the barn, and use the old underground stable room for vehicle storage.

PURCHASE OF LAND.

Two pieces of land have been leased with the privilege of purchase, one containing 28 and the other 26 acres. We need this land and it can be bought to better advantage now than in the future.

STEAM PLANT.

The money appropriated for the steam plant repairs has been expended to advantage, but much remains to be done, so that another like appropriation should be asked to continue this work.

SOUTH DETACHED WARD.

The reconstruction of the south detached ward on the same plan as that followed in rebuilding the north detached ward, should also be undertaken as soon as possible, as the building is in very bad condition, especially from the sanitary standpoint.

DYNAMO.

A new dynamo will have to be purchased to replace one of the small ones now in use, to make the necessary increase in our generator capacity. Besides, we need the small dynamo for a motor.

PLUMBING REPAIRS.

We should also have an appropriation to renew the closet and lavatory fixtures in the main wings, that have been in use many years, and are either broken or worn out. We expected to buy this material from our repair and improvement fund, but there are so many calls upon this fund for repairs to outbuildings that it will not be sufficient.

The appropriations for the administration building, steam plant, dynamo and plumbing repairs, should be made immediately available.

Summary of appropriations asked for:

Completion and furnishing administration building.....	\$20,000.00
Building and furnishing nurses' home.....	55,000.00
Staff house	6,000.00
Steam plant	10,000.00
South detached ward	25,000.00
Changing present storeroom into industrial building.....	2,500.00
Furniture for wards	1,500.00
New store room	5,000.00
Horse barn	5,000.00
Grain house	2,500.00
Corn crib	600.00
Farm land	3,300.00
Dynamo and fittings	1,200.00
Plumbing repairs	1,500.00
Total	\$139,100.00

I wish to express to the Board of Control my appreciation of their interest in the welfare of the hospital and the patients under our care, and to thank the members of the board for their uniform courtesy and consideration. It is because I have felt sure of your consideration, that I have spoken so frankly in this report about what I believe to be the duty of the state towards its wards and employes. Also, because I have felt sure that when the Board of Control fully understood what I have always had so much at heart, they would at least sympathize with the desire for the betterment of our facilities

for medical work, and might join us in trying to stimulate the interest of the general public, and the active co-operation of the legislature.

H. A. TOMLINSON,
Superintendent and Physician-in-Chief.

TABLE NO. 1.

ADMISSIONS AND DISCHARGES SINCE OPENING THE HOSPITAL.

	Men.	Women.	Total.
Admitted since opening the hospital.....	5,102	4,092	9,194
Discharged recovered	1,290	1,019	2,309

REPORT
OF THE
SUPERINTENDENT
OF THE
Minnesota School for Feeble-Minded.

BIENNIAL PERIOD ENDING JULY 31, 1904.

OFFICERS AND TEACHERS—1902-1903.

ADMINISTRATIVE DEPARTMENT.

Superintendent—A. C. Rogers, B. S., M. D.
Secretary and Stenographer—Miss Bertha Jensen.

MEDICAL DEPARTMENT.

First Assistant Physician—Wm. P. Baldwin, M. D.
Second Assistant Physician—Daniel Kriedt, M. D.
Hospital Matron—Miss Mabel Worthington.
Oculist and Aurist—A. F. Pringle, M. D.

FINANCIAL DEPARTMENT.

Steward and Storekeeper—F. H. Grane (to Oct. 22, 1902), C. E.
Harkens (to Feb. 1, 1903), W. A. Richards.
Bookkeeper and Clerk—Miss Katherine Jellineck.
Stenographer—Miss Jean Monty.
Usher and Postmistress—Miss Eva Ober.

EDUCATIONAL DEPARTMENT.

Principal Teacher—Miss Margaret McLean.

Teacher Boys' Industrial—H. G. Moser.

Band and Orchestra Teacher—Wesley E. Steppan.

Sloyd Teacher—Miss Georgia Sunstrom (to Jan. 25, 1903), Miss Edith Wagner (after May 1st).

Articulation Teacher—Miss Emily Sauter.

Music and Gymnastic Teacher—Miss Elizabeth La Selle.

Teachers—Mrs. Emily Tracy, Miss Addie B. Johnston, Miss Maud Stewart, Mrs. Anna La Grave, Miss Bertha B. Park, Miss Agnes Dillingham, Miss Nelly H. Pickard, Miss Zulma Requier (to Jan. 1, 1903), Miss Grace Blalock (after Jan. 1st), Miss Alice E. Smith, and Mrs. Margaret Cranbrook.

Printing Teacher—Miss Nellie Wittaus.

ENGINEERS' DEPARTMENT.

Chief Engineer—E. B. Dickinson.

Electrician—A. R. Tracy, E. E.

CARETAKERS' DEPARTMENT.

General Matron—Miss Margaret Wood.

Assistant Matrons—Mrs. Eugenia Wylie and Mrs. Belle Jackson.

Chaplain—J. C. Black.

DOMESTIC DEPARTMENT.

Housekeepers—Miss Bettie Clements (to Oct. 18, 1902), Mrs. S. V. Avery, Mrs. May B. Stewart, and Miss Ella M. Weikel.

FARM DEPARTMENT.

Head Farmer and Wife—Mr. and Mrs. Jos. Thom.

EPILEPTIC DEPARTMENT—COTTAGE NO. 1 (BOYS).

Charge Attendants—Wm. Dickey and Chas. Rand.

COTTAGE NO. 2 (BOYS).

Charge Attendants—A. A. Swanbeck and N. A. Veit.

COTTAGE NO. 1 (GIRLS).

Supervisor—Mrs. Margaret M. Hatch.

OFFICERS AND TEACHERS—1903-1904.

ADMINISTRATIVE DEPARTMENT.

Superintendent—A. C. Rogers, B. S., M. D.
Secretary and Stenographer—Miss Bertha Jensen.

MEDICAL DEPARTMENT.

First Assistant Physician—H. A. La Moure, M. D.
Second Assistant Physician—Daniel Kriedt, M. D. (to Oct. 13, 1903),
P. Eugene Campbell, M. D. (after June 24, 1904).
Hospital Matron—Miss Mabel Worthington.
Oculist and Aurist—A. F. Pringle, M. D.

FINANCIAL DEPARTMENT.

Steward and Storekeeper—W. A. Richards.
Bookkeeper and Clerk—Miss Katherine Jellineck.
Stenographer—Miss Jean Monty.
Clothing Clerk—Guy M. Robie.
Usher and Postmistress—Miss Eva Ober (to May 1, 1904), Miss
Marie Dummer (after May 1st).

EDUCATIONAL DEPARTMENT.

Principal Teacher—Miss Margaret McLean.
Teacher Boys Industrial—H. G. Moser.
Band and Orchestra Teacher—Wesley E. Steppan.
Sloyd Teacher—Miss Alberta B. Herrick.
Music and Gymnastics—Miss Elizabeth La Selle.
Music—Miss Marian Johnston.
Teachers—Mrs. Emily Tracy, Miss Addie B. Johnston, Miss Maud
Stewart, Miss Mary I. Douglass, Mrs. Margaret Cranbrook, Miss
Agnes M. Dillingham, Miss Nelly Pickard (to Jan. 1, 1904), Miss
Elizabeth Bass (after Jan. 1st), Mrs. Anna La Grave, Miss Dora
McRoberts, Miss Alice E. Smith, and Miss Grace E. Blalock.
Printing Teacher—Miss Nellie Wittaus.

ENGINEERS' DEPARTMENT.

Chief Engineer—E. B. Dickinson.
Electrician—A. R. Tracy, E. E.

CARETAKERS' DEPARTMENT.

General Matron—Miss Margaret Wood.
Assistant Matrons—Mrs. Eugenia Wylie and Mrs. Belle Jackson.
Chaplain—C. F. Carson.

DOMESTIC DEPARTMENT.

Housekeepers—Mrs. Ella Sanborn, Mrs. May B. Stewart, and Miss Ella M. Weikel.

FARM DEPARTMENT.

Head Farmer and Wife—Mr. and Mrs. Jos. Thom.

EPILEPTIC DEPARTMENT—COTTAGE NO. 1 (BOYS).

Charge Attendants—A. W. Logghe, Wm. Dickey (to Feb. 1st), G. W. Gillispie.

COTTAGE NO. 2 (BOYS).

Charge Attendants—A. A. Swanbeck and N. A. Veit.

COTTAGE NO. 1 (GIRLS).

Supervisor—Mrs. Margaret Hatch.

Board of Control of State Institutions,
St. Paul, Minn.

Gentlemen:

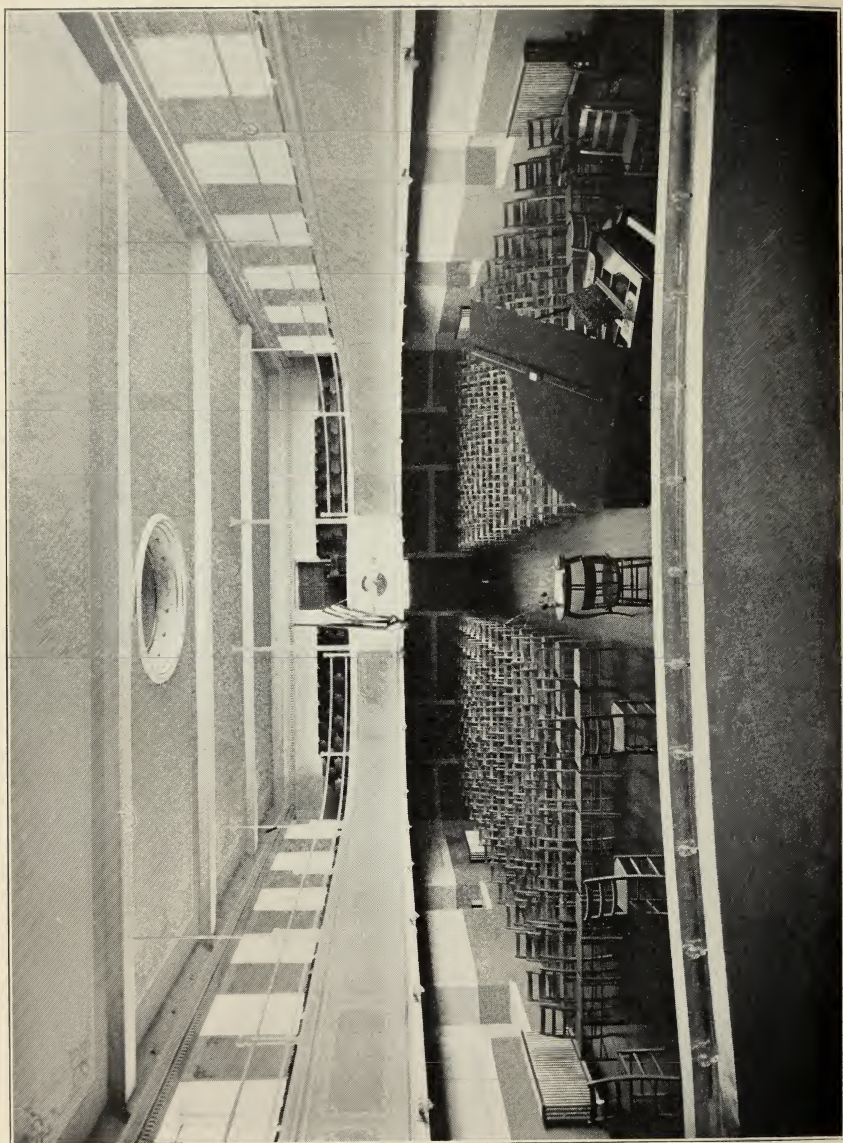

I have the honor herewith to submit the thirteenth biennial report of the administration of the Minnesota School for Feeble-Minded as follows:

The movement of population at the school from July 31, 1902 to Aug. 1, 1904, was as follows:

	Males.	Females.	Total.
Present August 1, 1902	382	304	686
Absent for the time (summer vacation).....	118	83	201
Admitted during the two years	161	145	306
Readmitted during the two years.....	4	5	9
Totals	665	537	1,202
Discharged and dropped	79	43	122
Died	47	33	80
Absent for the time (summer vacation).....	112	80	192
Present July 31, 1904	427	381	808
Totals	665	537	1,202

The total attendance was: 1902-1903, 975; 1903-1904, 1,050.

The average attendance was: 1902-1903, 826; 1903-1904, 872.

ASSEMBLY HALL SCHOOL FOR FEEBLE MINDED, FARIBAUT,

APPLICATIONS.

Applications have been received as follows:

	Males.	Females.	Total
1902-1903	96	59	155
1903-1904	86	69	155
Totals	182	128	310
Applications previous	1,116	858	1,974
Total received to July 31, 1904.....	1,298	986	2,284

HEALTH AND MORTALITY.

There has been no serious epidemic during the period, and about the usual sickness and mortality—4.8 per cent during the first year and 3.1 per cent during the second. The following table shows the

MORTALITY.

Table showing causes of death during the biennial period:

	Males.	Females.	Total.
Accident (railroad)	1	...	1
Asphyxia	1	1
Bronchitis and pleurisy	1	1
Broncho-pneumonia	3	2	5
Burn, accidental	1	1
Cancer of stomach	1	...	1
Cerebral hemorrhage	1	...	1
Chorea and tuberculosis	1	...	1
Diabetes	1	...	1
Dilatation of heart, acute	1	1
Drowning, accidental	1	...	1
Endocarditis	1	...	1
Enteritis, Acute	1	...	1
Epilepsy	5	3	8
Fracture of Spine	1	...	1
Gastro-Enteritis, Acute	1	...	1
Gangrene of foot.....	1	...	1
General paralysis and tuberculosis of genito-urinary tract	1	...	1
Heart failure	2	2
Intussusception	1	...	1
Meningitis, tubercular,	1	1	2
Marasmus	1	1
Pneumonia	1	1	2
Pulmonary Oedema	1	1	2
Pulmonary tuberculosis	20	17	37
Pyemia	1	...	1
Suicide by poison	1	1
Valvular disease of heart	2	...	2
Totals	47	33	80

THE SCHOOL DEPARTMENT.

What shall a feeble-minded child study? As to this, in theory at least there seems to be no question. He should study that which he can comprehend, assimilate and use for the good of himself and others.

Everything that a feeble-minded child can do well is a part of his education. Learning to dress properly, developing cleanliness of person and correct habits, are fundamental. The play room (family) life and the school room life should be done in direction and purpose. The education of a feeble-minded child should be a preparation for the life he must lead and he should be taught to be a good citizen in his community. It is true that his community, in a majority of cases, will be that of the public institution but the course of training should be the same.

Our schools endeavor to make the children healthful, cheerful, helpful, trustworthy and industrious.

The schools are classified as follows:

First Kindergarten.

Second Kindergarten.

First Primary.

Second Primary.

First Intermediate (Class B).

Second Intermediate (Class A).

In the kindergartens the training of the work or play may be two or even three fold: for example, a ball game will exercise the body and train the sense of sight (mind) and in the way it is played may bring in incidentally lessons in order, courtesy, and so on.

Marches, dance steps, rhythmical exercises, calisthenics, games, etc., are given for physical exercise, precision and grace.

Games for sense training, songs and rhymes for language and memory training.

Stories, talks, representative games, care of plants and animals, and the kindergarten life itself, afford training of the heart, give material for thought, and teach habits of industry, order, promptness, accuracy, neatness, independence, gratitude, thoughtfulness and unselfishness.

Gift lessons, give elementary ideas of number, size, form, color, etc.

Occupation work, training head to control hand so far as possible, but the hand to work even though mechanically.

Free play, developing individuality.

The kindergarten is the basis of all school work—the ideas brought out there are carried into all grades.

The most advanced work is done in Class A, where the Fourth Reader is completed, supplemented with reading from magazines and papers.

Spelling, penmanship, arithmetic, language, oral geography, and United States History are taught.

Special attention is given to articulation in all classes.

The majority of the children are as lacking physically as they are mentally—a vigorous, healthy body that can ward off disease is rarely met with among them, hence the necessity for physical training.

GYMNASTIC WORK.

Special classes (twenty minutes in gymnasium).

Special exercises are conducted for deformed children, paralytics, etc.

Marching, special free exercises, running, mat work, use of chest weights and ladders, use of bean bags, soft rubber balls, basket balls, foot balls and medicine balls are employed. The gymnasium is used by all the children in the school department. Work is given as they require it and are capable of taking it, along the following course:

FIRST YEAR.

Free developing exercises, marching, elementary drills in rings, simple gymnastics, plays and games.

SECOND YEAR.

Marching, figure marching, elementary drills with wooden dumb bells and rings, exercises on jump stand, Swedish free gymnastic games.

THIRD YEAR.

Marching and figure marching, free developing exercises, advanced drills with wooden dumb bells, elementary work in Indian clubs and balls, use of rings, jump-stand, elementary dancing, and gymnastic games.

FOURTH YEAR.

Facing and marchings in military drill, free developing exercises, light gymnastics, including advanced drills in wands, wooden dumbbells, Indian clubs and bounding balls, dancing steps (Delsarte), gymnastic games, including basket ball, touch ball, and hand ball.

Class room work is conducted by teacher of room, for five minutes each session.

SLOYD.

This continues to furnish valuable training for fifty children. The sloyd teacher also has classes in wood-carving, basketry, pyrography, etc.

OTHER MANUAL TRAINING.

Sewing.—The sewing and lace classes are large and doing excellent work.

Net Class.—A most valuable training for lower grades—making of hammocks, tennis nets, laundry bags, shopping bags, fly nets, etc.

Printing Office.—In this is published the Journal of Psycho-Asthenics and the North Star, and nearly all the printing required in the institution.

Music.—All the children are taught chapel songs, etc. A chorus class has special drill daily, and this class furnishes all the musical entertainments, operettas, etc.

Our band and orchestra have increased in number and play a better grade of music than ever before. Their work is above that of the average amateur band or orchestra.

INDUSTRIAL EMPLOYMENT OUTSIDE OF THE SCHOOLS.

FARM.

The farm, garden and dairy afford, as usual, the most satisfactory employment for our older boys. The action of the Board in renting the Winter farm in Jewett's Valley has enlarged the possibilities and usefulness in this department. The desirability of extending this department is well understood by your Board and referred to elsewhere in this report.

SHOP.

As a step beyond the sloyd training, the carpenter, brush, furniture repair work, mattress-making and shoe repairing, afford diversified employment for the boys, giving them additional training and directing their efforts along practical constructive lines. The work here is under practical mechanics, but falls short of its greatest possibilities for the pupils and patients, for lack of room and facilities, as will be explained under recommendations.

TAILOR SHOP.

The girls' dresses, and the boys' suits, are manufactured here by the older girls, under trained instructors, and it is one of our most useful and successful departments.

SUNDAY EXERCISES.

Sunday School is held from nine to ten a. m. The chaplain addresses the children in the evening, at which time about five hundred children assemble from all departments. Music of a high order is always given at this service.

MISCELLANEOUS.

The weekly dances are held on Tuesday and Thursday evening of each week. Once each month a musical entertainment is provided by the pupils of our music classes.

Band concerts are frequent, out of doors whenever the weather will permit, and are always greatly enjoyed.

The Amusement Fund provides lectures, etc., on occasion.

AMUSEMENT FUND AND ACKNOWLEDGMENTS.

Our Amusement Fund, provided by (1) surplus from the Christmas donations, (2) profits from the sale of candy and notions at the Children's Store, and (3) from private donations, affords the means for numerous entertainments and amusements that could not well be provided otherwise.

I take pleasure in acknowledging the following:

June 15, 1903, H. N. Schwallen, Roberts, Wis.....	\$26.38
June 19, 1903, D. Tapper, Young America, Minn.....	.38
Sept. 3, 1903, Mrs. M. Jones, Virginia, Minn.....	25.19
Oct. 7, 1903, Visitors.....	1.00
Jan. 25, 1904, John Elliott, Eyota, Minn.....	15.55
Jan. 26, 1904, O. R. Berkness, Willmar, Minn.....	3.45
Jan. 27, 1904, Edw. Aalia, Summit, S. D.....	.98
Jan. 30, 1904, Miss Flora B. Merrill, Tiburon, Cal.....	1.94
Jan. 30, 1904, Chas. Martin, Manaanah, Minn.....	10.00
Mar. 10, 1904, S. Lang, Minneapolis, Minn.....	1.00
Apr. 19, 1904, Mrs. N. Schon, St. Paul, Minn.....	2.00

I wish to acknowledge the kindness shown by some of the young people of Faribault in presenting a play "Under Difficulties," to our family, February 12, 1903, also some of the Christian Endeavor Young People for their entertainment "A Scrap of Paper" on April 27, 1903. Both entertainments were highly appreciated.

We are also under obligations to the publishers of the following periodicals sent to the institution gratis: The Farmers Tribune, Minneapolis; Our Visitor and Dispatch, St. Paul; the Mantorville Express, the Democrat and Pilot, Faribault.

Some of the amusements or entertainments which the Amusement Fund has furnished, are as follows: A round of sleigh rides each winter; a play "David Garrick" by the North Bros., in the assembly hall (Jan. 12, 1903); two visits to the Gentry Bros.' dog and pony show (June 15, 1903, and May 25, 1904); admission of forty children to the Faribault theatre, for "Shore Acres" (Nov. 24, 1903); and a stereopticon entertainment in the assembly hall by J. H. Brookes-Smith on "Children in other Countries." We have also purchased a shetland pony for the children's use, besides some gold fishes and aquarium for the kindergarten.

Children's Store.—This has paid for itself and added \$100.00 to the Amusement Fund.

FIRE.

On the morning of December 20, 1902, at about 1:30 o'clock, a fire was discovered in the attic of the Center building by one of the lady night watches, and by a lady employe sleeping on the floor directly underneath. The flames had involved the whole attic and its contents of clothing and storage, and was breaking through the roof when discovered. The City fire department responded promptly to the call and the children were removed from the entire building and wings. The furniture was entirely removed from the center portion of the building which was directly under the fire. Although the night was windy, the fire walls assisted in limiting the flames to one section of the building.

Our own fire system was inadequate for the lack of water pressure, but after some delay, (a special messenger was dispatched, telephones being useless for the purpose), the engineer at the School for Deaf started the fire pump at that place and thus gave us sufficient water pressure to enable the firemen to quickly control the flames.

The roof and attic floor were burned and the balance of the wood work beneath ruined or badly injured by the water.

The employees of the school, with rare exceptions, displayed courage and energy in looking after the children and saving state property. The Faribault fire company did most excellent service and without their assistance I do not believe our own force could have controlled the fire.

Fortunately, no one was injured, and no particular suffering experienced, although the grounds were covered with snow. The weather, fortunately, was not severely cold. The children were removed to Sunnyside and Skinner Hall until daylight and the Center building was safe from further danger.

We do not know the origin of the fire but I am inclined to think that it started from contact of a live, high voltage electric current with the telephone system, as the switchboard drops during the evening previous were constantly falling, showing that some foreign currents were passing through the board.

Advantage was taken of the condition of the Centre building, after the fire to make a number of changes from the original plan, the most important of which was the moving of the former tower entrance to the north side of the building and the fitting out of two offices in the tower in its place for the superintendent and physicians. Both offices are pleasantly located and furnished, and they are very highly appreciated by the officers interested.

The work of reconstruction has been charged to the insurance fund, and the funds for improvements and betterments.

IMPROVEMENTS.

The construction and completion of a second cottage for epileptic women near Skinner Hall, with capacity for sixty patients, and of an Annex to Sunnyside with a capacity for fifty persons, have increased the total capacity of the institution to that extent. The reconstruction of an assembly hall in the main building, involving the raising of the walls and the construction of a gallery, with a seating capacity for two hundred and fourteen persons and the reconstruction of the adjacent corridors have provided the institution with a most beautiful audience room, of sufficient capacity to allow practically all of the available patients and children to witness or take part in the various entertainments and chapel exercises of the school.

The completion of the farm boys' cottage, now under process of construction, will increase the capacity of this colony about fifteen

beds, besides giving the boys a very pleasant, and comfortably equipped building in place of the much overcrowded room that they have heretofore occupied.

RENTED FARM.

The experiment of renting additional land this year is proving satisfactory. The Winter property, consisting of three hundred twenty acres, and located about five miles from the school, has been profitably cultivated during the current year, the staple crop of corn, oats and potatoes have predominated, leaving a good meadow and pasturage of young and dry stock. A small dormitory for nine boys afford quarters to that extent for the colony from the Centre, who are engaged in working this place from time to time.

NEEDS OF THE INSTITUTION.

1. Additional Land.

If it had not been well understood for many years by all conversant on the subject that farming, gardening and dairying were appropriate occupations for our feeble-minded boys who had had school training, the experience of this institution has abundantly demonstrated it. Under judicious management, our farm boys form a happy, contented family of valuable workers. In my judgment, the central features of an institution farm for the feeble-minded should be dairying and gardening. These, of course, involve the support of a large amount of stock and miscellaneous crops upon the farm, would therefore be required to support the stock. This means a large acreage for corn, oats, meadow and pasture, in addition to that required for vegetables, among which potatoes, in this climate, naturally require the largest acreage. I earnestly urge upon the Board the desirability of recommending to the legislature the purchase of another large addition of land for the use of the school.

I would also suggest that instead of enlarging the capacity of the institution at this present time beyond the construction of the building for which appropriations are now made, the legislature be requested to provide the institution with the following much needed improvements for the present plant. Some of these features have been ample, but are much outgrown by the present institution.

2. Shop and equipments for boys.

The necessity for additional shop and equipment is very urgent. The present accommodations are very limited for the boys under school training. In addition to this, we have quite a number of epileptic men for whom it is essential that there should be some

form of agreeable employment. Out of door employment is preferable for epileptic patients, yet there is a percentage who so utterly dislike that kind of occupation, but who are fond of mechanical work, that ample provision should be made for them. Again, in this climate, the long winters preclude the possibility of that extended out door employment which can be maintained in other latitudes.

This improvement also contemplates provision for storage of lumber and material for repairs. A much larger amount of repair work could be done by the mechanics regularly employed, and that more economically, by having our lumber worked by power in a well equipped shop. This also contemplates provision for mattress-making which is carried on at the present time in any odd corner of basement or cellar, that can be made available, with poor light and at much inconvenience to those employed, besides rendering it difficult to care for the material used. A shoe-maker shop could also be provided for in this building.

This would also provide a place and facilities for handling steam and water pipes—cutting and threading all sizes to six inches by power, and for doing ordinary forge and iron repair work.

In this connection it should be stated that the engine which supplies power for our shop, and for the lighting of the farm buildings, is now inadequate for the power required, to say nothing of the increasing demands upon it, and it should be replaced by a larger one.

The most desirable location for a shop is at or near the boiler house.

3. Reconstruction of and equipment for laundry.

It is unnecessary to explain the necessity for the very best facilities for laundering in an institution of this kind, and while we have been well provided for in the past, the institution has entirely outgrown the present laundry equipment.

Additional machines are required and much of the building and counter shafting should be discarded and replaced by electric motors, and the dry room should be entirely reconstructed and built of metal. To afford the required room, an extension of the building is required.

4. Construction and equipment of a central kitchen.

The necessity for this arises from the fact that we find from experience that many separate kitchens involve an extra amount of work, both in issuing of supplies and their care after being issued, and increasing unnecessarily the cost of preparing and serving of food. I am satisfied that a central kitchen, well equipped and in charge of thoroughly competent help, would not only insure the

very best of dietary service, but would reduce the expense of this department materially. Experience has demonstrated that there is no serious difficulty about distribution of food after its preparation, from a central kitchen.

5. A residence for the engineer and at least two cottages for other employes.

We have reached the period in the growth of this institution when some provision should be made for the employees with families. At the present time we have a number of them, who not being able to secure residences near the grounds, are obliged to live at a distance of from one to one and one-half miles from the school and, consequently, they are not available many times when needed to meet emergencies arising in their departments. I think it is a serious matter for an engineer to be forced to reside at such a distance from the institution that he cannot be obtained promptly in case of fire. On the other hand, the state cannot afford to lose the services of an honest, faithful man because he has a family, and supply his place by a young, inexperienced person. Again, no officer or employee feels like building a home at or near the institution without some guarantee from the state that he be recompensed for his investment in the event of his leaving the service. It seems to me the wisest and best plan is for the state to provide a few residences of appropriate but modest character for employees of this class, adjusting compensation for the services of such employees with reference to rental and care of said property.

6. Large cistern and connections.

We have a very insufficient cistern capacity so that all but a very small portion of the rain water upon our roofs is lost. The necessity for a cistern is too evident to require explanation.

7. Green-house.

We need a properly equipped place, not only for early vegetables and a starting house for gardens, but proper provision for the growth of flowers during the entire year.

8. Bakery enlargement and equipment.

Our bakery should be enlarged and provisions made for better storage and handling of flour.

9. In addition to the above, I wish to heartily second the suggestion of your Board that our present barns and dairy be removed and relocated at a greater distance from the building for epileptics. A very excellent site is the hill side about one-third mile from the Farmer's Cottage.

10. The Superintendent's Cottage requires some **reconstruction** for which no funds have been available during the last two years.

11. Concert Grand Piano.

Our Assembly Room piano has been in constant use for something over sixteen years and a new instrument of larger design would be very acceptable.

SUMMARY OF IMPROVEMENTS SUGGESTED.

Additional land	\$25,000.00
Shop and equipment, including engine, pipe, machinery and coal carrying apparatus	22,000.00
Center kitchen and equipment	15,000.00
Enlarging laundry and equipment.....	5,000.00
Engineer's residence and two employees cottages.....	7,500.00
Cistern and connections.....	3,000.00
Greenhouse	1,500.00
Bakery	1,500.00
Moving and repairing barns.....	4,500.00
Superintendent's cottage.....	1,500.00

CHANGES IN OFFICIAL CORPS.

There have been the usual number of changes in the staff, but I am glad to note that at the present time the institution has a complete and efficient corps of officers and teachers.

I wish to express a deep sense of gratitude for the cordial support of your Board in the administration of the institution.

Very respectfully submitted,

A. C. ROGERS,
Superintendent.

REPORT

—OF THE—

SUPERINTENDENT

To the Board of Control of State Institutions.

Gentlemen:—

This institution is essentially a school and home where the wayward, criminal and criminally inclined children of the state may be taught how to live.

For eight and one-half years before coming here I was the State Agent for the State Prison and State Reformatory, and in that work I visited many localities that are prolific fields for filling an institution of this kind. But, seeing, as I did, the conditions existing, the parentage, the entire absence of moral teachings, the misery, the debauchery and the sin, I wonder not that we have so large a number here, but that it is so small. It proves to me that there is a something in the human being that tends towards better things, and many, very many, times brings the individual up to a better standard than one would expect from either their parentage or their environment.

It shows, too, that the work of our kindergartens, our schools, our churches, our societies, and all the agencies for human betterment are not laboring in vain.

In these sinful and depraved conditions children are born and naturally there are some stragglers on the roadway to better lives, and these find their way to institutions such as ours.

In talking with the misguided children here one is struck with the large number coming from families where one of the parents is dead, and the remaining parent married, where parents are divorced, or, if living together do not live happily, and emphasizes the fact that humanity has much to learn relative to the sacred institution of marriage. If the time ever comes when men and women enter the marriage state, not as a matter of convenience, but prompted only by the sacred feelings of love and affection, then we will find the necessity of training schools lessened to a large degree.

Receiving children from all localities and having all nationalities and religions represented, we naturally accumulate a very heterogeneous population. Many of them raised in squalor, most of them having been deprived of school privileges, some having lived as tramps, others as thieves—the task imposed upon us of changing their way of thinking and living, and getting them well started on toward better things is not an easy one.

Parents usually look upon this institution as a place of punishment for some particular offense, nor is the general public free from this idea, and naturally expect an inmate to be released after so long a period without much, if any, regard as to whether he has progressed, remains stationary or gone backward. They are apt to expect us to change a bad boy or girl into a good one in a few months, when they have been years in acquiring their bad habits and bad traits. We frequently get children in their teens that know more of actual crime and sin than some men found in the state prison. If children are so bad as to necessitate committing them

here, then let me plead that they be left alone and allow us a fair chance to help them and not bring pressure to bear for their release, thereby hindering the children, as well as us in our efforts by creating in the mind of the child the idea that he is being unnecessarily kept or unjustly dealt with.

COMMITMENTS.

The whole system of committing children to this institution is faulty and in my judgment will remain so until the law is radically changed. Children are nearly all committed by justice, police or municipal courts. Minnesota should have a juvenile court. This court should be a court of record and the matter of committing a child here be a much more serious one than at present. The inconsistency of clothing a justice of the peace with authority to take a child from its natural guardian and send him here, perhaps for a long period, is apparent. I cannot see by what reasoning a court should have authority to deprive a parent of its child, when the same court would be incompetent to deprive the same parties of a horse for lack of jurisdiction. The child is more than a chattel, but not so well guarded and protected by our courts. Under our law now, many courts commit a child here on the very broad charge of incorrigibility without a word of information as to what the incorrigibility consists of. All the evidence taken should be reduced to writing and sent with the commitment, together with a full report of the case by the probation officer.

The juvenile court law should provide that no child less than sixteen years old could be confined in a lockup or county jail, and the children thus saved the additional degradation such confinement entails.

The procedure as now practiced is crude, unjust and in many cases illegal, and the matter deserves the serious consideration of our lawmakers at this time.

Let there be a law framed that will force upon parents more of the responsibilities of parentage, and this could be done and yet protect the public and the children better than is done at present.

The raising of the age limit a few years ago from sixteen to seventeen years was, in my opinion, a mistake, and should be amended so as to be as it was before such change.

SEPARATE SCHOOL FOR GIRLS.

Another and the most important change in the existing laws governing this institution that I would recommend and urge is that of separating the girls from the boys. It is unfair to the girls and boys and unfair to the officers to send children of both sexes to the same institution, and the time has come for our state to correct a bad mistake that was made when it inaugurated the sending of boys

and girls to the same institution for reformation. In many articles that have been written and addresses that have been made in support of the founding of a separate training school for girls, things have been said that were not true and evils have been painted that do not exist. I do not purpose to answer these arguments, nor enter into a discussion of the matter in this report, but am free to say that the project will meet with no opposition from this institution, believing that more good could be accomplished for the girls elsewhere and more good accomplished for the boys with the girls elsewhere than here.

I assumed the duties of superintendent of this institution on Dec. 16, 1902. This report covers the period from Aug. 1, 1902, to Aug. 1, 1904, all of the time I have held the position and four and one-half months of my predecessors' supervision. Let me say at the outset that what I may say as to the conditions as I found them is not to be construed as criticism of my predecessor, for, no doubt, many of the things I may mention were as unsatisfactory to him as to myself.

DISCIPLINE.

I found upon assuming charge, the discipline both among the inmates and officers to be poorly maintained.

As to the officers, there seemed to be much dissatisfaction and petty jealousies, and the work of restoring confidence and good feeling was not a small undertaking. This was probably caused by a feeling of insecurity for their positions that at the time seemed to prevail. Quite a number of officers resigned, a few were removed, and in the nineteen and one-half months I have made thirty-three new appointments; this out of a nominal number of about fifty employes. I can now say that these unsatisfactory and unnecessary conditions have materially improved, and that a very much improved feeling exists, and that I am surrounded by a loyal and industrious staff, each realizing his responsibility and the necessity of prompt and efficient service.

It is needless at this time to discuss the causes of the poor discipline I found among the inmates, but a feeling of general discontent and uneasiness existed that was somewhat hard to overcome. This gradually wore away and little of it remains except such as would be natural where human beings are detained against their wills.

The heating plant was in such bad condition that during the winter of 1902-1903 we suffered much, as the boilers and, in fact, the whole heating system was so out of order as to be impossible to properly heat the buildings.

The legislature appropriated \$10,000 to repair this and same was done during the autumn of 1903 at an expense of \$9,422.27. Our heating plant is now in good shape and we expect a material reduction in our fuel expense for the coming year.

The original boilers, four in number, were replaced by three, somewhat larger and of the same total capacity of the old boilers. These were placed in improved settings of the designs approved by the boiler insurance company in which they are insured. A new steam pipe header, of very substantial construction, connects these boilers to the system of piping, supplying steam to the various engines and to the heating system. New steam mains were laid to the detached buildings. These mains were of best wrought iron pipe and laid in vitrified sewer pipe and covered with approved covering. Proper provision was made for expansion and manholes provided where the expansion joints were located, making them easily accessible. Owing to the limited amount of appropriation and approach of cold weather these were made for the use of high pressure steam, being reduced at the different cottages to proper working pressure through a reducing valve.

The greenhouse, which suffered somewhat from the severe winter, on account of the need of repairs to its heating plant, has been during the past summer entirely repiped throughout for the use of low pressure steam (being formerly arranged for high pressure). The piping has been divided up into separate coils and arranged so that the amount of radiation in use can be suited to the outside temperature. Provision was also made so that high pressure steam can be used in case of emergency or extreme cold weather.

Our pumping plant, in which much improvement can be made, has been improved by the addition of an electrically driven pump, which, while somewhat small for present conditions, will be of much service.

The water supply for the girls' cottage, which has heretofore been furnished through a 1½-inch pipe, is now supplied by a 4-inch cast iron main connecting into the large main near the main building.

A fire hydrant has been located near the girls' cottage and the main was continued into the building, and standpipes provided with hose on each floor, which will afford ample protection.

The closets and wash rooms in all three of the boys' cottages, as well as in their quarters in the main building, have been replaced, and these buildings been generally repaired and repainted.

SCHOOLS.

The schools have been carried on the same as in former years. Our school course is the same as the public school, and embraces all grades from the primary to the ninth grade. One-half of our boys and girls attend a school session in the forenoon from 7:15 to 11:30, the other half attending in the afternoon session from 1:15 to 5:00 p. m. We employ five teachers in the grades at the boys' school and two at the girls' school. In addition we have a teacher of draw-

ing, and all inmates have the benefit of this instruction. Our teachers are all ladies, and are a loyal and self-sacrificing staff, doing some considerable work for the inmates outside the school room. Considering the backwardness of the inmates on coming here, the progress made is more than would naturally be expected. The discipline in our school rooms compares favorably with that in the public schools. In not over three or four instances has it been necessary for our teachers to call in a school officer to maintain discipline.

MUSIC.

For several reasons it seemed necessary to discontinue for a time the maintaining of a band. This was disbanded in January, 1903, and was reorganized in February, 1904. Our present band consists of about thirty pieces, and is made up largely from our families of small boys. They are making considerable progress and seem to take an interest in their work. The band practice takes the place of other work and the band boys are required to do but little work elsewhere.

An orchestra of twenty-two pieces has been lately organized among the girls. This orchestra consists of the following: Six violins, two violincellos, two violas, two mellophones, two bass viols, two cornets, one slide trombone, two clarinets, one snare drum, one bass drum and one piano. In this the girls seem enthusiastic, but it has been so lately started that we cannot say much of it, although we hope and expect that considerable good will come from it.

In addition to the above, vocal music is taught for thirty minutes at the commencement of each school session in the boys' school, and thirty minutes each afternoon in the school for girls.

During the first year covered by this report the shop work was interfered with to a considerable extent by the large amount of repair work we had to do, it being necessary to recall boys from the shops and in some instances to close a shop entirely for a time and work the boys on this repair work. During the last year we have not had so much of this to do and the interference has been less with the shop work and trades schools.

Our trades schools consist of the following: Printing, carpentry, blacksmithing, shoemaking, tailoring, laundering, floriculture, painting, farming and gardening. Boys also do the cooking both for the inmates and the officers, a separate officer being in charge of each of these kitchens. A large number of the smaller boys take the regular sloyd course which includes mechanical drawing under a competent instructor.

The girls have a large vegetable garden, in which they do all the work, raising practically all their vegetables, and quite an amount of small fruits. They take care of their large lawn, and during the summer have a fine flower garden. They also have all the poultry, and for this industry a poultry house 16x80 feet was built during

the past year. In addition they are instructed in cooking and general housework, also in sewing under a competent dressmaker. We have recently started knitting at their building in a small way and intend that they shall do the knitting for the whole institution. It is also contemplated that the girls shall do some of the plain sewing for the boys' department.

MILITARY TRAINING.

Military training was introduced into the institution last winter. From each of our five boys' families I appointed upon recommendation of the family manager and military instructor, one captain, two lieutenants and five sergeants. The officers are instructed by our military instructor, and he also drills the five companies as a battalion. This drill is for thirty minutes each day immediately following dinner. The drill consists of the regular batallion movements and the setting up exercises prescribed by the regular army tactics are gone through with. This I can say has been a great help both to the officers and inmates of the school. It helps the officers, as the cadet officers are frequently placed in charge of small squads, and helps the inmates, as it teaches them promptness, obedience, correct carriage, etc. It has, too, been beneficial in that the boys look better, move about with more precision and in better order, and has, no doubt, helped them physically.

Inmates are moved by the bugle call. Reveille is sounded at 6:00 A. M., assembly at 6:25 and mess call at 6:30. Fatigue and school call at 7:15, calling them to work and to school. Recall at 11:30, calling them from work and school. Assembly at 11:55, and mess call at 12:00. Fatigue and school call again at 1:15 and recall again at 5:00 P. M. Assembly and mess call at 5:25 and 5:30. Retreat at sundown and tatoo at 7:45 and taps at 8:00 P. M.

Inspection is held every Sunday immediately before the church service in the afternoon.

We have not, as yet, inaugurated the manual of arms, but expect to do so during the coming fall or winter.

The enlarging of the military idea of training and handling the inmates is contemplated, but just to what extent and in what manner this is to be done I cannot at this time outline.

OUR NEEDS.

The matter of additional buildings for the accommodation of the boys should be considered. If the girls' department should be removed, the building now occupied by them could be utilized by some of the families of boys, but considerable changing and altering would be necessary and an appropriation should be made for that purpose. But, if the girls' school is to remain here we will need an additional cottage for the boys.

We have at present no place where unruly boys can be segregated from others, and a guard house for this purpose should be established. This would need be only a small building, but the need of it is great and it should be built at once.

We also need some small building or a part of some building to be used as a hospital. Nothing of this kind now exists and our facilities for taking care of the sick, especially of those with contagious or infectious diseases are very inadequate.

The superintendent and his family are now compelled to live in a part of the main building. This is not satisfactory for many reasons, and a residence for the exclusive use of the superintendent should be provided, such to be entirely separate and apart from all other buildings.

The plan of keeping our boys, especially our larger ones, in open dormitories, is in my opinion a serious mistake, amounting almost to a crime. Knowing, as I do, the habits and tendencies of these inmates, it seems to me to be almost criminal on my part to be compelled to put them where they can and will practice their pernicious habits. In some cases boys who know nothing of the secret sins of others are taught these awful things here.

The state is by no means blameless when it even affords the opportunity for this, and the matter of remodeling our buildings, so as to prevent, instead of cultivating these unmentionable sins deserves the serious consideration of the legislature and of all our citizens.

I write of this delicate matter with much feeling and urge and appeal with all sincerity to you and through you to the legislature to remedy this serious mistake.

The power for our shop machinery is now supplied by engines located in the different shops. The engine and dynamos that supply the light are of the oldest patterns and are inadequate and should be replaced with a new electric generator and engine, preferably of the direct connected pattern of such capacity as to furnish energy to drive motors in the different shops. The engines now in use in the carpenter shop, laundry, blacksmith shop and kitchen should be replaced with motors of the proper size, thus doing away with the uneconomical engines and the losses in transmitting steam to them from the boiler room, and placing the power generating plant entirely in the engine room where it can receive proper attention from the engineer. We believe that the consumption of steam for power purposes can be decreased one-half by this improvement.

Our pumping plant, referred to above, is very wasteful. There is a pump located at the artesian well back of the boiler room which lifts the water from this well into a cistern near by. Another pump takes the water from this cistern and pumps direct into the main and reservoir. These pumps are of the duplex pattern, simple steam cylinders, and of a type which while usually reliable for service are very uneconomical in the use of steam. Further, the water

•

is handled twice by these pumps when it could as easily be pumped direct from the well into the main. However, neither of the pumps at present in use is adapted to this service. We would recommend the installation of a motor-driven pump of sufficiently large capacity in the well back of the boiler house, to pump directly into the main. The larger of the two pumps now in use can be placed in good order and kept in readiness as a fire pump. By these improvements we estimate that our water supply can be pumped for at least one-sixth of the present cost for fuel.

We would also recommend the installation of some system of water purification. Our boilers are at present doing the double duty of making steam and purifying the water as well. The capacity will be increased by the introduction of such a system, while the wear and tear due to the repeated cooling down and firing up when boilers are laid by to wash out, will largely be done away with. The life of the old boilers was materially shortened by the fact that the water carries so much mineral scale-forming matter, the accumulations of scale causing them to become bagged, which necessitated frequent patching and the eventual abandoning of their use. The use of soft water in laundry work will effect a large saving in clothing, table linen and bed clothing. Such a system for softening water should be of sufficient capacity to provide soft water for laundry purposes, as well as for the use of the boilers.

We would also recommend the purchase and installation of an exhaust steam feed water heater of modern pattern which is accessible for cleaning without disconnecting the steam piping attached thereto. A feed water heater is an indispensable adjunct to any boiler room and effects a considerable saving when properly installed.

We would suggest the addition of some machine tools for the purpose of making repairs. A lathe of medium size, equipped with proper tools and accessories, a moderate sized shaper, a good plain drill press with drills, and an emery grinder would enable us to make almost all needed repairs requiring machine work, thereby effecting a saving which would be large interest on the cost of such tools.

With some more suitable and modern machinery in our cabinet shop and by enlarging our printing facilities and the purchase of a new printing press, we could profitably do much of the work in these departments for other institutions now done elsewhere. I find that the inmates take a much more active interest in the making of such things as can and will be used than in making such articles as are usually made in the manual training shops and used only as models. The boys like to make a wagon, a desk, a harrow, wheelbarrow, or something of that kind, rather than some small article that is of no practical use. We have made a number of such articles as above mentioned for other institutions, and could in my opinion very profitably enlarge such manufacture.

The laundry is now on the first floor of the west end of the shop building. This has a wooden floor and is not easily kept in repair—the constant wetting causing it to decay rapidly. In my judgment this should be removed to the basement where a cement floor should be put in. The room now used as a laundry could be utilized as a tailor shop, and the present tailor shop used as a paint shop, which we need very badly, not having at present a suitable place in which to do our painting.

There was formerly a piano at the girls' cottage, but this we have had to move to the large chapel to take the place of an old inferior organ. There is now a rented piano at the girls' cottage, but this should be replaced with one belonging to the state.

The appropriation for the state agency department should be materially increased. I am satisfied that our supervisory work for boys and girls on parole should be more thoroughly done. Everything possible has been done in this line that could be with the help and facilities afforded. With the number on parole increasing to such a degree the necessity for more workers and more money to work with cannot be too strongly urged. I state without fear of successful contradiction that for every dollar spent through the state agency, two are saved to the current expense of the institution.

The legislature four years ago enacted a law under which probation officers were appointed in the three larger cities of our state. This wise measure is no longer an experiment, and its success has been fully established. Many children have no doubt been reclaimed and a commitment to this institution saved to them through the helpful agency of these probation officers. It is to be hoped that more such agencies may be established, and more and more be done along the line of prevention.

I wish at this time to acknowledge the very great assistance the probation officers have been to us, and to thank them for such help and assistance.

The reports of the physician and state agent are hereto attached and made a part of this report.

The report of the state agent shows only a part of the work done in that department, as it is of such a character that it cannot be shown in figures, and much of it cannot be made public, as publicity would in many cases mean the undoing of objects we are trying to accomplish.

The usual tables showing the work of the school and so far as possible the character of the inmates are appended.

In closing this report I desire to express to you, gentlemen of the board, my grateful thanks for the many favors you have shown me and for your courteous treatment.

My thanks are due especially to Assistant Superintendent H. W. George, to Miss A. E. Willard, steward, and to Miss Grace Johnston, state agent, for the manner in which they have at all times so loyally assisted me.

To all the other officers and teachers I wish to make a grateful acknowledgment for their cheerful, efficient and loyal service.

F. A. WHITTIER,
Superintendent.

Report of Physician.

F. A. Whittier, Superintendent Minnesota State Training School,
Red Wing, Minn.

Dear Sir: Enclosed please find summary of work done by the Training School physician from August 1, 1902, to August 1, 1904.

During the first twelve months there were 742 consultations, viz:

Boys	609
Girls	83
Hospital	50

During the second twelve months, ending July 31, 1904, viz.:

Boys	583
Girls	81
Hospital	77

In two years there were made 576 regular trips and 34 extra trips, or 610 total number of visits to the school and 127 to the hospital.

Average enrollment of boys.....	261
Average enrollment of girls.....	71.6
Number consultations of boys.....	1,292
Number consultations of girls.....	124
Per capita, boys.....	4.95
Per capita, girls.....	1.71

Showing that the health of the inmates of the girls' cottage is better than in the boys' department, and disproving the assertion that the health of the inmates of the girls' cottage has been affected injuriously by too close proximity to the boys' cottage and play grounds.

Three deaths occurred in the 24 months ending July 31, 1904—two in the boys' department, one being from rheumatism and one from a low form of fever resembling typhoid. In the girls' department there was one death caused by burns.

There was an outbreak of scarlet fever of a mild type, which was easily controlled, but the outbreak demonstrates the necessity of some building in which all cases of infectious or dangerous disease can be so thoroughly isolated that the danger to the balance of the Training School community can be reduced to a minimum. Had this outbreak proven more serious than it did, it would have been impossible to give the affected individuals proper care and prevent contamination in other families.

A building suitable for the purpose could be constructed at small expense, and it could be used for other purposes when not needed as an emergency hospital.

Your physician would also suggest that an early and thorough investigation of your plumbing in some of your buildings by an expert is desirable to prevent serious trouble in the future. The east end of the main building has been for many years in a very unsanitary condition, sewer gas has been perceptible in that end of the building. In the upper stories some of the rooms are at times uninhabitable when the wind blows from certain directions. A thorough investigation should be made and existing defects should be remedied at an early date to prevent serious injury to the inmates.

The health of the inmates has been very satisfactory, most of the consultations were for minor ailments or injuries.

Respectfully,

BRUNO JAEHNING, M. D.

BIENNIAL REPORT
OF THE
STATE AGENT
MINNESOTA STATE TRAINING SCHOOL.

PERIOD ENDING JULY 31, 1904.

To the Honorable the Board of Control of State Institutions.

Gentlemen: I have the honor to submit herewith my report of the work of the state agency for the biennial period ending July 31, 1904.

I have never written a biennial report without realizing the total inadequacy of figures to in any sense interpret the work they represent. Such a number placed out in homes; such a total under supervision; so many returned to the institution; are just so many figures to the casual observer. To those in the work, each unit has its history, has had so much effort expended in its possible betterment, represents so much of life's tragedy or success, that a volume of human interest could be written about it. Each boy or girl is committed to our care during the whole of his or her minority, often a matter of twelve or thirteen years, during which time we are expected to keep track of them. We deal with the weak, the wild, the wayward, and the criminally inclined boys and girls, at the time of life when most they need watchful care. Every parent knows the care and anxiety of looking after a boy or girl during the adolescent period, even with the best of heredity and environment to help them along. It is at this trying time that we have jurisdiction over these unfortunate ones.

The state agency was inaugurated in June, 1895, for the purpose of investigating the homes of the boys and girls, to provide better homes if their natural homes were unfit for them to return to, and to keep a helpful supervision over them until they reached manhood and womanhood. I have been the agent for this school ever since the agency began. After more than nine years' experience in the work I feel that I speak with less confidence about final results than I spoke the first year I was in the work. The good of today is so often the bad of tomorrow, the bad of today is so often the good of

tomorrow that judgment halts and statistics but approximate the truth.

Since the beginning of the agency there have been 1,862 departures from this school, representing 1,499 individuals, which means that there have been a good many who have had more than one trial on the outside. It has been the policy of your honorable body to keep down the population of the school, believing that many can reasonably behave and sustain themselves on the outside instead of becoming "institutionized" by remaining in the school and becoming an increasing burden upon the taxpayers of the state. This can be done with safety only when the children can be carefully watched on the outside. Whatever cause may be assigned for the unusually large number of returns chronicled in this report, that of ignorance as to their behavior on the outside cannot be laid against us. In former years children were kept here often five or six years, and a few even eleven years. The consequence was that the boys, especially, were as helpless and irresponsible as little children when they finally left the school. Bitter failures and mistakes and several returns to the school if by some contact with the outside world they finally learn how to live. The day the work of the agency began, in June, 1895, there were 336 boys and 41 girls in the school, a total of 377. On the date of this report, Aug. 1, 1904, there are 295 boys and 79 girls in the school, a total of 374. And this in spite of the large number returned, the increased population of the state and the natural ratio of increase in the numbers committed to the institution.

An intimate knowledge is often discouraging. Optimism feeds oftener on fancies than on facts and I think you will find that it is true that those who quote surprising percentages of the saved and reformed count to the good all those who have dropped out of sight and knowledge. The institutions who give the highest rate of those who have been reclaimed have no outside agents and rely only on chance hearsay and their own abounding faith as to the majority of their so-called facts. I do not see how any intelligent work can be done without the aid of field agents in supplementing the work of the institutions and in procuring careful supervision over those who are let out on trial. The result of such careful supervision will not only be enlightening but disappointing in the knowledge that facts force upon one.

Now that we have the assistance of probation officers in our three largest cities—and I wish here to express my appreciation of the value and helpfulness of their co-operation in the work of looking after those on the outside and my personal appreciation of the many kindnesses and courtesies extended to me by them—and now that the work is recognized and known all over the state, our sources of information have increased until we sometimes almost wish that we might enjoy a little blissful ignorance. The police throughout the state have also been both helpful and kind and I believe recognize our sincere desire to protect the community as well as the child.

With the co-operation of the parents—which we gain whenever possible—and the kindness of the many good men and women who have taken our boys and girls into their business and their homes, and the assistance of those in positions of authority, it has been possible to place out and keep a reasonable supervision over the large number released; and with the additional help granted by the last legislature, in the person of Mr. T. G. Kenney, appointed by your honorable body as assistant agent from the beginning of the biennial period we are now starting upon, we hope to go on to better achievement and closer personal supervision than has been possible heretofore with only one traveling agent. A glance at the table representing the present whereabouts of the children under our supervision on the outside will give some idea of the magnitude of the work.

Seventy-three homes, with self-supporting work, were found for the boys during this biennial period, of which forty were in the country.

Twenty-two homes, with self-supporting work, were found for the girls, eight of which were in the country.

In the pursuance of the work I traveled 25,043 miles on the railroads. I do not know how many miles I covered by team, in street cars and afoot.

We keep in personal correspondence with the boys and girls out on furlough, who are required to report in writing at least once a month. As these reports must often cover a long period of years, I make a practice of replying to every letter once a month, a mimeographed copy of the same letter being sent to each one of those so reporting. With the many other letters, the interviewing of the children, attendance at board meetings and other matters relating to the work of the agency office, about one-third of my time is necessarily spent at the institution. We have quite an elaborate and complete system of record, the time of an office assistant being almost entirely taken up with that work and with the mechanical work, the large correspondence and the many books of reference entail.

My grateful thanks are due to Superintendent F. A. Whittier and the officers of the school for their co-operation and assistance in the work. The exigencies of the work required the frequent assistance of officers in going for and returning children to the school, especially as the numbers of those on the outside had so rapidly increased in the last two biennial periods. It would have been a physical impossibility for one agent to do all of this and the other work too, and a spirit of the most hearty co-operation has always been shown towards the agency by the officers of the institution. Every item of information about our boys and girls on the outside has been treasured up, especially those reporting something good about them, and has been turned into the agency department to increase our store of knowledge and to add to the completeness of our records. The spirit shown everywhere has been that of deep interest in the welfare of the children and helpfulness in every way.

I wish most especially to thank you, gentlemen, for the many kindnesses and courtesies I have received at your hands and for your continued encouragement and interest in the work of the agency.

I submit for your consideration the following tables, summarizing the work for the last two years:

SUMMARY OF WORK.

INCLUDING BOTH BOYS AND GIRLS FOR BIENNIAL PERIOD ENDING JULY 31, 1904.

Left the School.	1903.	1904.	Total.
Boys	227	196	423
Girls	38	36	74
Totals	265	232	497

Two of the girls and eighteen of the boys left the school twice during this biennial period and are counted twice in the above table.

Manner of Leaving.	Boys.	Girls.	Total.
Furloughed within the state.....	312	51	363
Furloughed to go to other states.....	34	9	43
Discharged	4	8	12

Average number of months girls have remained out.....			5

STANDING OF RETURNED BOYS AND GIRLS WHEN THEY LEFT THE INSTITUTION.

	Boys.	Girls.	Total.
Left in class of honor.....	115	5	120
Not in class of honor.....	38	2	40
Leaves of absence	6	3	9
Escapes	33	33
Totals	192	10	202

ESCAPES.

Total number of escapes from the school.....	41
Total number of escapes returned.....	33

One of the boys not returned is now an inmate of the New York State Reformatory at Elmira, and another, almost twenty-one years of age when he escaped, is now out of our jurisdiction. Of all the escapes who have succeeded in staying out who are still under age but fourteen remain at large. One other is now an inmate of the Hospital for the Insane at St. Peter, after serving a term in the State Reformatory, from which place he was later transferred to the state prison.

MISCELLANEOUS INFORMATION.

Total number of individuals who have gone from the institution since the state agency began, from June, 1895, to July 31, 1904.	1,499
Total number, counting every departure.....	1,862
Total number on the outside still under age and supervision: Boys, 510; girls, 42; escapes, 14; total.....	566

We carry the names of 511 boys and girls on our mailing list, with most of whom we are in correspondence. These are scattered all over the state and some of them all over the world, as the following tabulated list will show:

Respectfully submitted,

GRACE JOHNSTON,
State Agent.

MINNESOTA STATE REFORMATORY.

BIENNIAL REPORT

OF THE

General Superintendent.

PERIOD ENDING JULY 31, 1904.

To the Honorable the Board of Control of State Institutions of the State of Minnesota.

Gentlemen: The undersigned has the honor to report as follows for the biennial period terminating July 31, 1904, inclusive, viz.:

MARKED INCREASE IN POPULATION.

An unusual increase in population has been maintained, as appears by the accompanying tables. Several causes may have contributed to the result, the chief of which has been the increase in the population of the state in general, but particularly in the larger cities. As the institution acquires more age, it becomes better known, which may have a bearing in the matter of commitments. The closer scrutiny into the past life of the inmates, which has been diligently pursued, has in some instances, led the managing board to believe that an early release, based solely on the conduct of the inmate while in the institution, might be inadvisable, and the increase in the term of detention, in such cases, has resulted in an apparent increase in the number of commitments.

The reformatory population of this state is very small as compared with that of some of the other states. For instance in Indiana the reformatory population has been over three times as great as ours, though the total population of Indiana for 1900 is given as being only forty-three per cent greater than that of Minnesota for the same year. The number of commitments to this institution may be expected to steadily increase annually hereafter for at least a number of years, with occasional fluctuations, which seem as certain to occur as they are difficult to understand.

WOMEN PRISONERS.

I wish to call attention again in this public manner to the fact that we have no accommodations whatever for the care or training of women. This statement has frequently been made before, and personal letters have been written to all the district judges informing them of the fact, but still inquiries bearing upon the matter are not unusual, and occasionally female prisoners are brought to the reformatory. When received they are boarded in jails, or placed in homes when such a course is feasible, but I feel that Section 3590 of the Statutes of 1894 should be amended by inserting the word "male" before the word "person." With our present equipment, women cannot be detained in the reformatory, and, in my opinion, it would be inadvisable to prepare and conduct quarters for female prisoners in this institution, or near it.

FEDERAL PRISONERS.

A number of federal prisoners have been received during the years past, as the reports will show. They come on definite sentences only, and are on that account not to be desired among the prisoners who are committed by the state courts on the indeterminate plan. I therefore recommend that the law be amended so as to permit the receipt and detention of federal prisoners on indeterminate sentences only, and subject to the action of the managing board.

TRANSFERS FROM TRAINING SCHOOL.

Boys and young men who are found to be incorrigible at the State Training School for Boys and Girls, are transferred to this institution, and, according to law, are under its jurisdiction until they reach the age of twenty-one years. In some cases they do not know their ages, and in others they are disposed to overstate their ages, in order to secure an earlier release. To definitely ascertain the true date of birth has often involved considerable work, in some instances has seemed impossible. To remove the difficulty I respectfully suggest a finding of fact by the court as to the date of birth of all persons committed to the State Training School. In some cases young men have been transferred from the Training School when in their twentieth or twenty-first year, and knowing that they could not be detained at the reformatory after reaching their majority, they have here continued the misconduct which caused their transfer. A few have thus left the reformatory while in the third, or lowest grade. This matter is important in the interest of discipline, and could be cured by a statute which would make possible their further detention for misconduct in the institution. I recommend such legislation.

SENTENCE TO REFORMATORY NOT GROUND FOR DIVORCE.

The case of *Dion vs. Dion* was an action for divorce on the ground that the defendant, having been convicted of felony, was sentenced to the reformatory. I appeared for the defendant, and, after the demurrer to the complaint had been sustained by the District Court of St. Louis county, an appeal was taken to the State Supreme Court, which affirmed the decision of the court below, and settled a question which has often been in issue in the past. A motion for a reargument on the ground that the commission of a felonious act by the defendant constituted "cruel and inhuman treatment," was denied.

ENTERTAINMENTS.

During the last biennial period a number of men prominent in professional and business circles of the state have visited the institution and delivered addresses to the inmates. Professional lecturers have been employed at times. Local musical talent has often been at our service and on one occasion a traveling theatrical company gave us an afternoon's entertainment.

VISITS OF JUDGES.

The following judges of the district courts have visited the institution, viz:

Hon. Lorin Cray of Mankato, Hon. F. M. Crosby of Hastings, Hon. J. D. Ensign and Hon. Wm. A. Cant of Duluth.

With these exceptions, no judges of the courts of record of Minnesota have visited the reformatory during the last five years. The district judges are doubtless busy officials, and a visit to St. Cloud involves an expenditure of some time and money, particularly to those who reside at a distance. Appreciating as I do the value to the institution of visits from the learned and thoughtful men who preside upon the district bench, I have thought that if it were made the duty of the judges to inspect the reformatory at least once in two years, and if provision were made for the payment of their expenses of travel for that purpose, the investment would result in much good to the service, and the visits would not be found onerous or distasteful to the visitors.

The sheriffs of the counties of Ramsey and Hennepin have attempted to make arrangements for visits here of the six judges of each of their respective district courts, but for reasons not involving disinclination on the part of the court, the plans were not carried out, but I still hope that they may be, especially as a very large proportion of all the inmates are received from those two counties.

RELIGIOUS AND MORAL INSTRUCTION.

During the year 1904 a new departure has been tried in the matter of supplying religious instruction to the inmates. The clergy-

men of St. Cloud were called upon, and in a spirit of generosity and charity, have responded. Pastors of four of the churches united in bible and sectarian religious instruction, and other pastors gave their lessons alone, so that all who desired it had instruction in the religion of their choice, with the exception of a few for whom teachers were not available. The experiment has not been carried on for a sufficient length of time to enable me to properly measure the results, but I believe that the volunteer ministrations of the churchmen have supplied to some of the inmates that which, if obtained earlier in life, would have saved them from criminal practices. It is a fact that very few of the inmates, in their youth, have had religious training. No compensation is paid to these instructors. Regular church services have been held on every Sunday morning at nine o'clock, and once each fortnight Dr. J. H. Dewart of Minneapolis has lectured on morals.

Attendance at the regular church service is optional, and at the moral instruction compulsory.

PERMANENT IMPROVEMENT AND PER CAPITA EXPENSE.

In the matter of permanent improvements a great deal of work has been done by inmate labor, all of which inures to the benefit of the state in the form of valuable and necessary assets, but for the work no credit appears in the system of bookkeeping in use, and the per capita expense of the institution always appears to be high.

As a rule only small appropriations are made in connection with the construction of buildings, and are used to purchase the necessary material and pay the salaries of the foremen connected with the work.

During the building season of 1904 the foundation and walls of a new cell wing were built. The value of the uncompleted building as it stands is \$39,000.00, with a cash investment by the state of \$16,427.81, showing the value of inmate labor in connection with this work alone to have been \$22,572.19; but although the state has thus added to its assets a structure of most enduring syenite, the institution is in no place given credit for the value of the labor, and the per capita expense of maintenance appears to be the same as though no work whatever had been done. I believe that a better and more satisfactory method, and one that would be more easily and better understood, would be to have larger special appropriations, and for the institution to receive credit from the funds for the labor furnished, and to have the appropriations for support made correspondingly smaller. I hope this may be done, so that the institution may not be misunderstood and disadvantaged in the minds of legislators, and of other citizens.

A photograph of the south cell wing as it appeared December 1st, 1904 is herewith transmitted. If feasible I trust that it, together with the data accompanying it, may appear in the biennial report of the Board.

DAIRY BARN.

The sum of \$3,000.00 which was appropriated some years since for the purpose, has been employed in the construction of a dairy barn, and the result is very satisfactory. The building cost somewhat more than \$3,000.00, as was anticipated when plans were decided upon, and the deficit was made up by the sale of rough stone from the quarry.

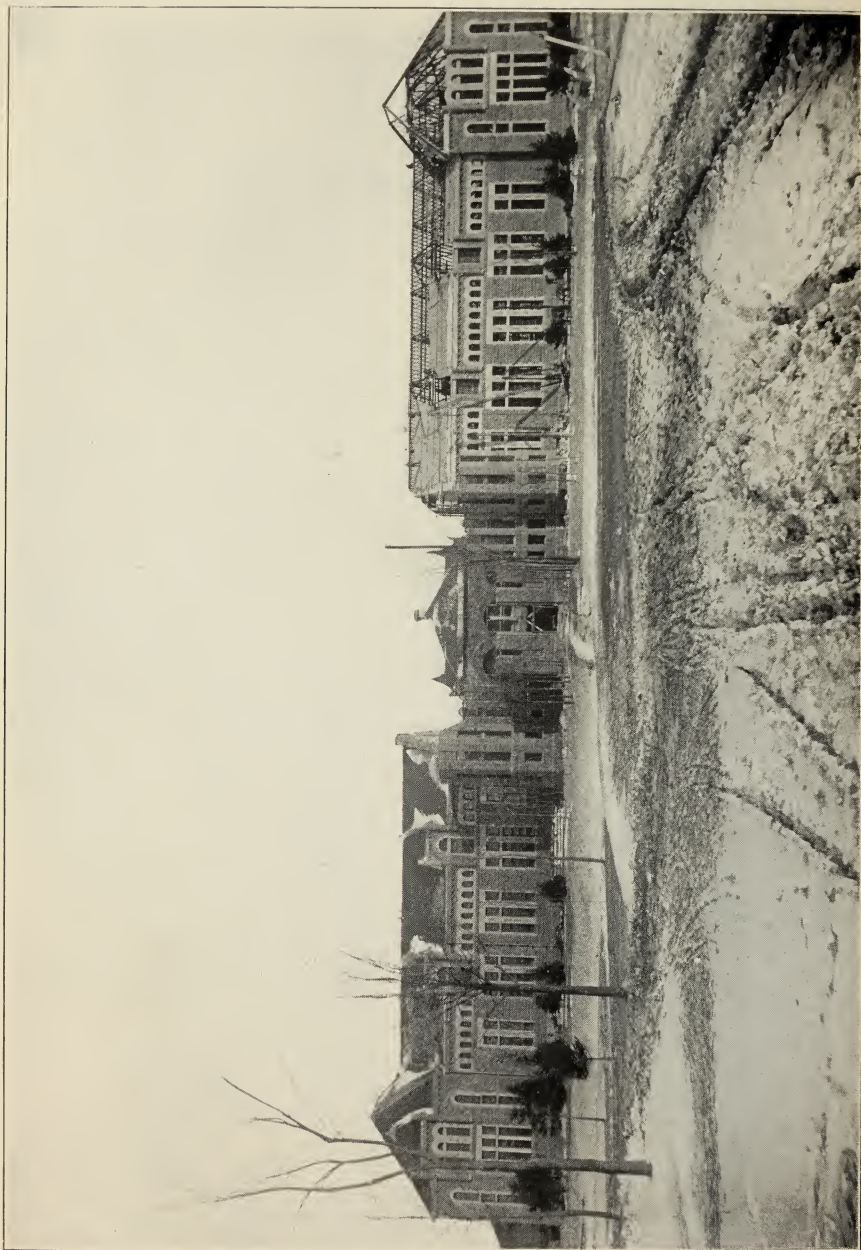

STONE WALL ABOUT GROUNDS.

The stockade which encloses the yard and connects it with the main buildings is constructed of planks sixteen feet long, which are set on end, and supported by oak posts. The stockade is now fifteen years old and is becoming affected by age. Sections frequently blow down. To replace it would cost about \$7,000 or more. In my opinion the construction of a stone wall about the premises should be commenced at once, and the sum of at least \$10,000 per annum should be made available for the purpose. In my last report I did not urge this matter for the reason that I felt that title to the so-called Breen quarry, on our north, should be secured as a preliminary step, inasmuch as it would be unwise to enclose with a permanent wall of stone, a yard too small for future operations. The Breen tract was not secured, though it seems to me to be very important that it should be, because, beside furnishing yard room, supplying granite, and affording ice in winter, it would give room outside the wall, which would be under the control of the institution; the same being deemed important in the construction of a permanent prison wall.

ADDITIONAL LAND.

Two years ago the price placed upon the twenty acres constituting the Breen quarry was \$7,500. I believe that the proper course to pursue is to obtain the Breen tract, if possible. If it cannot be done, I think the line of the stone wall should be extended far to the south of the southeast corner of the present enclosure, and from there, run on a straight line to a point south of the new south cell wing, with which it should then be connected. This would include the barns, and some good garden land inside the wall, and enable a railroad track to be built on such a grade, that when the power house is placed beneath the hill, as contemplated, coal could be delivered to the fuel bins without teaming.

This plan would involve a change in the public road which now passes east and west on the south side of the main buildings, but I believe that it could be brought about without inconvenience to, or objection from any one, if a good road were constructed along our west line to take its place. Although the state owns nearly nine hundred acres of land at this place, most of it is of very poor quality, being very sandy, and partially low and wet, and a tract only

STATE REFORMATORY, ST. CLOUD, (CENTER AND SOUTH WING UNFINISHED.)

two hundred feet in width lays between the front of the main buildings and the west line of the land. This is said to be an insufficient amount for a building having an imposing frontage of four hundred fifty feet of high stone walls. To correct the difficulty, and supply-pasture land which is much needed, and provide ground upon which residences can be constructed when desired, and give the state entire control of the public highway leading to the institution, a tract of 200 acres of very good clay land, which constitutes a part of the Freeman farm, can be bought for \$14,000; one-half payable in 1905, and the remainder in 1906. The land adjoins the state holding immediately on the west; is well improved for pasture, farm and garden purposes, and includes three houses which are now occupied by employes of the state, who pay nearly \$300 as rent per annum. I do not think this tract can ever be had at a lower figure, but I believe that it will advance in value on account of its quality, and its location on the city boundary line, and, if it should be transferred by Mr. Freeman to other parties, the state might not be able to obtain it without vexatious and expensive proceedings. I recommend its purchase on the terms above indicated, as I think they are the best that can be secured. To square the state lands on the southeast I recommend the purchase of the so-called Alger eighty, if it can be had at a reasonable figure. It is said to have been recently sold to Mr. Rome G. Brown of Minneapolis, but before the transfer to him, I had obtained an offer to buy it at \$1,600, which I consider a fair price to both parties, when the drainage ditch now in course of construction by us, shall have been completed.

ADMINISTRATION BUILDING.

Work on the administration building proper has been suspended during the past season on account of the pressing need for another cell wing. The plans having been changed, I am unable to furnish an estimate of the probable expense of completing it, and am obliged to refer your honorable body to the architect for information in this connection. It is a matter of the utmost importance that the work be commenced early in the spring of 1905, and continued to completion. The building is much needed for use, and the iron and other material in the unfinished structure will surely suffer from further exposure to the weather.

NEW SOUTH CELL WING.

The final completion of the new south cell wing, which was built to the roof during the year 1904, is a matter of the utmost importance, as there are now about thirty men sleeping on the flag in the corridor of the north cell wing, on account of insufficient cell accommodations.

The roof trusses are now being put into place, and shall soon be covered with temporary roofing. If an emergency appropriation

can be had early in the approaching legislative session, the cell block may be completed during the winter, and the necessary ceiling, plumbing and heating can then be installed, so that the building may be available early in the next season; and the crowded, and therefore dangerous, condition at present prevailing can thus be relieved. This is the most important matter mentioned in this report, and I commend it above all other things, to your earnest consideration. The total cost to entirely complete and equip the work is estimated at \$30,630, besides inmate labor. The building will then be worth \$87,000, of which \$47,057 will be cash disbursements, and \$39,943 will represent the value of the inmate labor.

EAST CELL WING PLUMBING.

The plumbing in the east or old cell wing is defective, and has always been disapproved whenever examined. It is fifteen years old, and was contract work. An unwholesome odor pervades the room whenever the closets are in use. To replace the work and make it serviceable and sanitary would cost about \$3,500.

LAUNDRY.

The laundry machinery and facilities are most meagre. Almost the entire equipment was bought at second hand at the inception of the institution, and is absolutely inadequate to an institution such as this one has grown to be. The sum of \$1,200 is required, and I sincerely hope that it may be procured, to properly equip the laundry.

SILOS.

Two silos should be built during the coming year in connection with the new dairy barn. On account of the prominence of their location, and to comport in appearance with their surroundings, they should be built of cut granite. For this purpose the sum of \$700 is required, beside inmate labor.

ROOT CELLARS.

A new root cellar should be built inside the stockade, and one near the new dairy barn. For want of proper winter shelter for roots and vegetables, there is an annual loss of food and feed supplies. For this purpose a cash appropriation of \$1,000 is required to purchase construction material, making no allowance for inmate labor. The capacity of each root house to be 8,000 bushels.

ADDITIONAL CELL ACCOMMODATIONS.

When plans were first adopted the institution was to be complete with the construction of the south cell wing, which would make the total capacity four hundred inmates. The constantly increasing number of commitments, and the experience of other states, have led

the managing board and myself to believe that the original plans will soon prove wholly inadequate, and I understand that it is designed to extend buildings toward the rear (east) from the ends of both the north and south wings, connecting with the main buildings at the power house, and also half way between the power house and the front of the buildings, thus eventually enclosing four large courts, and providing accommodations for 1,000 inmates.

Many years will necessarily be required for the completion of such extensive operations, but unless a start is made within the next biennial period, the institution is likely to be again overtaxed as to cell capacity, as it is at present. I therefore recommend an appropriation of \$25,000 available April 1, 1906, in order that the construction of an additional cell wing may be begun at that time. It would probably be built east from the north part of the north cell wing.

ENGINEERING DEPARTMENT.

The engineering department offers many difficulties and problems. The present power house is located in the rear of the main buildings, and on a height of land about fifty feet above the quarry, and the yard, in which the railroad cars are switched. It is only a matter of time when it must be removed to the rear, and part way down the side hill.

An appropriation of \$4,000 for cold storage and creamery was obtained four years ago, but for various reasons has never been used. If an ammonia plant is to be installed, it should be placed near the power house. It would not be wise to erect the cold storage plant near the present power house, with knowledge that the latter must eventually be removed. Neither would it do to erect the cold storage plant near the future location of the power house, because until the removal of the latter, it could not be operated advantageously. The same reasoning applies to the construction of a coal shed or bin. At present the coal is exposed to the weather, which is believed to deteriorate it to a considerable extent, but a temporary coal shed would add to the fire hazard, and is deemed undesirable. Beside there is a lack of room for its construction.

The condition of the boilers and the masonry is such that they require attention. Two of the boilers should be replaced by larger ones, and when that shall have been done, and the masonry replaced, the steam capacity of the battery would be sufficient for the purposes of the institution, until enlarged beyond the south cell wing, and new administration building. The necessary expense in this connection would be \$3,000. It seems to me that the course which promises the best results, and economy in the end, is to make an early transfer of the power house to its new and permanent location, and follow the removal with the construction of the cold storage, coal bins, and other buildings that belong near the power house. The room now occupied by the power house is needed for other pur-

poses. To provide proper housing, make the necessary connections, and provide new boilers, is estimated to cost \$15,000.

When the heating plant was overhauled two years ago, the work was not completed on account of the fact that the season had so far advanced that it became necessary to defer further work until warm weather. The overhead system was left unfinished for some distance from the power house, and the steam still goes through the tunnel in the basement. In my opinion the work should be finished as planned. The chief engineer reports the probable expense at \$500. The construction of recent buildings necessitates an extension of the lighting wires, which are not of sufficient capacity to carry any more load, and should be replaced by heavier ones. The present wooden switch board is too small and is not satisfactory. It should be replaced by a marble or slate one. The estimated cost of wires and switchboard is \$500.

COTTAGES.

The institution is located three miles from the business part of the city of St. Cloud. Some of the officers and heads of departments reside near the institution, but most of them live in the city proper, because no houses, or even building sites, are to be had in proximity to the reformatory. If two cottages should be constructed on the state land at a cost for both of \$6,000 besides labor, I believe that they could be rented at all times, and that it would result in advantage to the service, in the matter of night work, and of dispatching extra office work, which at times comes to some of the departments.

ELECTRICITY FOR POWER AND LIGHT.

Electric power can be procured from the company controlling the Mississippi river dam, two miles away. It has been indicated to me that the price would be made very favorable, and I think the subject one worthy of particular consideration, in view of the high price of coal at this point.

LEGISLATION REGARDING LIQUOR.

Men on parole from this institution are forbidden to drink intoxicants, and are returned for a violation of this condition. It will be understood that the drink habit is frequently the sole cause, and very often a concomitant cause, of crime and consequent imprisonment.

To reform some wrongdoers it is necessary only to induce them to practice total abstinence from intoxicants. It is doubtless a fact that young men on parole are frequently solicited by liquor dealers and others to resume the habit of drink. I therefore recommend a law, making it a misdemeanor to sell, give or furnish spirituous, vinous, malt or fermented liquor to a person on parole from this institution.

SPECIAL APPROPRIATIONS.

The special appropriations which are herein mentioned are admittedly extensive, but the board will surely not lose sight of the fact that the reformatory is now emerging from its small formative beginning into the dignity of a large, secure, valuable and permanent state institution, designed to remain always for the good that it may do to young men whose habits, environment or inclination have led them to wrong doing worthy of the attention which the people's servants are called upon to give to those who are out of harmony with the social order. Every step taken, and every building constructed, is with a view to permanence and future use.

Work in granite is done slowly and at a great expense of labor, and pains, but when once properly done, needs no further attention. It remains and answers its purpose until the need for it shall disappear.

CLOSING.

The statistical tables which accompany this report and the reports of heads of departments, may be of interest.

It is my opinion that the Minnesota State Reformatory has, during the last two years, maintained its standing in progress, and accomplished good, and that it is not an unworthy unit in what has been referred to, by European delegates to the International Prison Congress at Brussels in 1900, as the unique and interesting system of American reformatories.

Respectfully submitted,

FRANK L. RANDALL,
General Superintendent.

SUMMARY OF SPECIAL APPROPRIATIONS.

	1905.	1906.
Stone wall	\$10,000.00	\$10,000.00
Breen quarry	7,500.00
Freeman 200 acres	7,000.00	7,000.00
Alger eighty	1,600.00
South cell wing	30,630.00
East cell wing plumbing	3,500.00
Laundry	1,200.00
Two silos	700.00
Two root houses	1,000.00
Northeast cell wing	25,000.00
Power plant	*3,000.00
New power house and additional boilers.....	*15,000.00
Completing overhead steam plant	500.00
Wires and switchboard	500.00
Two cottages	6,000.00

*Both not necessary.

MINNESOTA STATE PRISON.

BIENNIAL REPORT

OF THE

WARDEN.

PERIOD ENDING JULY 31, 1904.

The Board of Control of State Institutions, St. Paul, Minnesota.

Gentlemen: —

I have the honor to submit herewith for your consideration my report of the operation of this Institution for the biennial period ending July 31, 1904. You will find carefully prepared tables of statistics relating to inmates, also of earnings and disbursements, together with other information in detail pertaining to the affairs of the Institution.

MOVEMENT OF POPULATION.

The number of prisoners in confinement on July 31, 1902, was 553, an increase of 67 during the preceding two years. The number of prisoners in confinement on July 31, 1904, was 634, of whom 13 were women and 69 life prisoners. This shows an increase of 81 in our Prison population during the past two years, or the period covered by this report. In my latest report to the Board of Control I called attention to the pressing need for more room to take care of the gradual increase in our Prison population. I recommended the speedy preparation for the building of a new Prison or an overhauling of the old Prison and the immediate erection of additional buildings to accommodate the increased numbers. An appropriation of \$55,000 was made by the Legislature, \$31,000 of which was used to build an insane ward and an addition to our cellhouse. But as the Board is well aware, this offers only temporary relief.

INCREASED POPULATION.

Aside from the hospital and insane ward, we have only 664 cells. This leaves us only 30 vacant cells at this, the low water-mark of the year. As soon as the fall terms of court convene, our population will increase; and in my opinion we will be again short of cell room before the winter closes. A moderate allowance for increase, based on the pro rata of increase the past two years, indicates that the Prison population will be augmented at least 250 during the next five years. This will make our Prison population 884 five years hence.

NEW PRISON.

It will be economy to decide upon one of two things at once, and then the doing of the one of two things as quickly as possible, viz: the selection of a site and the building of a new Prison, or making the necessary appropriation to build 250 cells, which will meet our requirements for the next five years.

PAROLED PRISONERS.

The grading and parole system went into effect in 1894. Since then we have paroled 668 prisoners, 542 of whom were committed on a definite sentence and 126 on reformatory plan. The added experience of two more years in administering the grading and parole system, furnishes satisfactory proof that its adoption was a wise and humane movement. Its moral influence upon the inmates of the Institution is good; its effect upon those released on parole has proven far-reaching, and in many cases its reforming influence has been effective and apparently permanent. Of the 668 prisoners paroled 63½ per cent were finally discharged by reason of expiration of sentence, 14½ per cent by the Board of Control, and 15½ per cent violated their paroles, 12 per cent of whom were returned to the Institution to serve out their unexpired sentences, leaving 3½ per cent of parole violators now at large.

LIFE PRISONERS.

The total number of life prisoners committed to this prison up to Aug. 1, 1904, has been.....			180	
Died				22
Pardoned				39
Transferred to asylums				7
Commutd, discharged				40
Commutd, serving out commuted sentence.....				3
In prison Aug. 1, 1904.....				60
Totals			180	180

FINANCIAL SHOWING.

Our net earnings and profits for the past two years exceeded the total expenses of the institution by \$116,727.01.

Totals	\$328,087.41	\$328,087.41

TWINE PLANT.

The twine plant has been operated during the past year at its maximum capacity. Through the additional machinery and facilities provided by the Board of Control,—among which might be mentioned the installation of a large, new Corliss Engine, a new Electric Plant, and other improvements resulting in betterments,—the efficiency of the plant has been greatly increased and the cost of manufacture has been correspondingly reduced. During the last three years, covering the period since the Board of Control took charge, our annual output of binding twine has increased nearly 100 per cent, or, in round numbers, from 5,500,000 pounds to 10,500,000 pounds per annum, and the increase in profits to the State, and the farmers thereof, has grown in proportion. The past year has been the most profitable for all concerned since the plant was established. The twine was sold to the farmers two cents per pound below the

ruling prices made by manufacturers to jobbers, thus giving the farmers their twine at two cents per pound below wholesale jobbing prices, a direct saving to the farmers and the State as follows:

YEAR ENDING AUG. 1, 1904.

		Prison Prices.		Wholesale Prices.	
Pure manila	1,638,560 lbs. 11 cts.	\$180,241.60	13 cts.	\$213,012.80

DIETARY.

The recent change in the administration of the Store and House Steward's departments upon the recommendation of the Board of Control, is giving very good satisfaction. Our experience with it

so far promises well for increased economy in the administration of those departments. It is believed that the change will give more satisfactory service and facilitate economies that could not be obtained under the old system. The food furnished to the employes and prisoners is well cooked and well served, and sufficiently varied to be healthful and appetizing. Green vegetables and fresh fruits have been amply provided by the Board in their respective seasons. See table showing per capita cost for food for officers, employes and prisoners.

MAINTENANCE AND EARNINGS.

PRISON INDUSTRIES.

We employ about 225 prisoners in the manufacture of binding twine. We cannot employ more than that number economically. The new shoe contract, made by the Board, goes into effect on September 30th, 1904, and provides that not more than 225 prisoners shall be employed on that industry. The two industries provide employment for 450 prisoners, aside from those required for routine

prison duties in other departments of the prison. This division will leave from 50 to 100 prisoners unemployed within the next few months. As the object and aim of the Board of Control in restricting the number to be employed in the manufacture of shoes was to reduce the competition in that industry to the minimum, the Board's plans seem wise and conservative and dictated by a disposition to be fair and equitable to all concerned; but in order to carry out these plans it will be necessary to make some other provision for the employment of our surplus prisoners. It will also be necessary to provide additional shop room for any new industry that the Board may, in its wisdom, decide upon. Our workshops and warehouses are already overcrowded. I would therefore respectfully suggest that an appropriation be asked for to build the necessary shop room to employ comfortably all of our prisoners.

PRISON LIBRARY.

The Prison library is in good condition. We have about four thousand volumes. The books are carefully examined when exchanged and every precaution is taken to prevent misuse or abuse of the books. They are kept well covered and clean, and carefully repaired in our bookbinding department. We also bind all of the leading periodicals which the Board has so generously provided for the benefit of the inmates.

ENTERTAINMENTS AND VISITORS' FEES.

The income from visitors' fees for the period covered by this report was \$6,619.05. It was originally intended to use the visitors' fees to support the Prison Mirror and the library, but the amounts now realized are much larger than required for these purposes. The Prison Mirror is practically self-supporting and the Prison library is in good condition. The decision of the Board to use some of this fund to enlarge the amusement and educational advantages has been greatly enjoyed and appreciated by the inmates. We now have a well organized brass band and a well drilled orchestra composed of prisoners, under the leadership of Prof. Hewitt, who devotes nearly all of his time to teaching vocal and instrumental music and providing the same for the entertainment of prisoners. The band plays and practices every day in the park when the weather permits, and vocal and instrumental music are amply provided for Holiday entertainments and at Sunday services.

EDUCATION.

The Prison School has been held eight months each year, commencing September 15th and ending May 15th. School has been well attended and is very successful. Prof. Darius Steward, Superintendent of the City Schools, assisted by a corps of prisoners whom

he selects and trains for the work of teaching, have shown a lively interest in the work. The regular Chautauqua organization and studies have been kept up during the last two years. The greatest latitude, consistent with good discipline, is allowed to the members of the Society. The Society (all prisoners) elects its own officers and conducts the meetings of the organization with the greatest possible freedom.

DISCIPLINE.

The discipline of the Prison has never been better than during the period covered by this report. If it is true that the best test of good discipline is the presence of that condition which provides the most ready and cheerful obedience to law and order with the minimum amount of friction and punishment, then we have been more than ordinarily successful. There has been perfect harmony and loyalty among the officers and employes, and the inmates, with few exceptions, have responded cheerfully to all requirements.

I desire to extend my thanks to all the officers and employes for the faithful discharge of all duties, and especially do I wish to thank the heads of various departments for their efficiency and to commend them for the loyalty and zeal displayed on all occasions, and at times under trying and difficult conditions.

In conclusion, I desire to express my sincere thanks to the Board of Control for its encouragement and support and for the able and painstaking efforts it has ever made to raise the standard of efficiency in all departments of the Prison. All of which is

Respectfully submitted,

HENRY WOLFER,
Warden.

REPORT OF THE PHYSICIAN.

To the Honorable: The Board of Control of State Institutions,
Gentlemen:—

I have the pleasure to present a summary of the records of the Medical Department of this Institution for the biennial period 1903-1904.

As the report indicates, the health of our inmates has not deteriorated. Our former fine record has been sustained. We have had only one death from acute disease during the two years. We have had an entire absence of any disease that would be water or food borne, or any that would come of poor sanitation.

REPORT OF THE SCHOOL SUPERINTENDENT.

To the Honorable: The Board of Control of State Institutions.

Gentlemen:—

A general view of the membership and of the scope of the work of the Night School at the Prison is presented by the following table:

	1902-1903	1903-1904
Opening sessions	Sept. 15th.	Sept. 14th.
Closing sessions	May 15th.	May 15th.
Number of sessions.....	103	101
Number present at first session.....	132	152
Number admitted after first session.....	73	49
Number of different pupils.....	205	201
Average attendance	154	162
Highest attendance	166	174
Average compulsory attendance.....	38	37
Average voluntary attendance.....	116	125
Number reported for lack of interest.....	4	0
Number of classes	14	14
Number of classes studying Bookkeeping	1	1
Number of classes studying Grammar	1	1
Number of classes studying Business Law	1	1
Number of classes studying Civics	1	1
Number of classes studying U. S. History.....	3	4
Number of classes studying Geography	4	3
Number of classes studying Reading	13	13
Number of classes studying Arithmetic	14	14

Every session of the school is attended by the Deputy Warden, the Assistant Deputy Warden, and five other officers. They all have a lively interest in the welfare of the school and are unflinching in their endeavors in its behalf. The school is doing its work with very gratifying results.

Respectfully submitted,

DARIUS STEWARD,

Superintendent.

August 16, 1904.

REPORT OF THE PROTESTANT CHAPLAIN.

To the Honorable Board of Control of State Institutions.

I herewith submit my biennial report as Protestant Chaplain of the Minnesota State Prison, for period ending July 31, 1904.

I have held religious services in the chapel each alternate Sabbath, save during my vacation when my duties were performed by a brother clergyman.

The attendance of the men upon these services has been most gratifying, and the attention most marked.

Numerous interviews have been had with prisoners upon call, and I believe they were productive of good results in many cases.

I have from time to time visited the library and noted the trend of thought in the men who applied for literature from time to time, and believe that on the whole great benefit is derived by them from the literature there obtained.

In closing I beg to express my cordial appreciation of the kindness and co-operation of Warden Wolfer and the other officials of the Institution which made my work pleasant and profitable.

Respectfully submitted,

S. J. KENNEDY,

Protestant Chaplain.

Stillwater, Minn., Aug. 15, 1904.

BIENNIAL REPORT
OF THE
STATE AGENT
PRISON AND REFORMATORY.

To the Honorable the Board of Control of State Institutions.

Gentlemen:—

I herewith submit the following as my biennial report for the period ending July 31, 1904:

The making of this, my first report of the work of this department, will be confined to a short statement of what has been done in the past two years.

A number of the suggestions of the former State Agent would be applicable to the conditions at present connected with the duties and efficiency of this office. The former administration of the office of State Agent was, as I understand it, eminently satisfactory. I have therefore, followed the conditions of things as I found them as nearly as possible. No material change has been inaugurated.

The present Agent is handicapped in that he has no regular assistance from any source. He must be ready at all times to answer calls to return parole breakers either to the Prison or to the Reformatory; to seek employment for both the discharged and paroled men, and to visit as many of these men as possible. I am sorry that this feature of the work cannot be more generally attended to, as I think it one of the most important matters in the whole list of duties connected with the parole system.

Other matters, such as correspondence with men on parole and their relatives and friends make large demands upon the time and attention of the State Agent; the investigation of complaints, the interviews with prisoners to be discharged and the report incident to same, also the monthly report and numerous other office duties and work, for which there is no regular office help provided, all of which takes up my time to such an extent, that this most important item is not attended to as it should be. More efficient service could be rendered if help could be provided.

I am of the opinion that a system of sub-agents could be provided for, with good results. It seems to me it would be a matter of economy as well as efficiency.

• DISCHARGED PRISONERS FROM THE STATE PRISON.

You will notice by my monthly reports, that a very large proportion of those discharged directly from the Prison do not present themselves at the State Agent's office. Of the 327 discharged during the past two years, 49 only have presented themselves for the purpose of securing reduced rate of transportation, 19 have requested assistance to procure work.

Of the 327 men discharged direct from the Prison since July 31, 1902, 128 have been so discharged between the months of November and April 1st, thus making no particular distinction as to time of year when time of sentence should expire, as per provision of Chapter 7402 of the General Statutes of 1894.

Of the 327 that have been discharged, 102 have admitted or are known to have served previous terms of imprisonment.

PAROLED PRISONERS.

The work of supervising the paroled prisoners from the Prison and the Reformatory has been carried on much as in the past.

THE ESSENTIAL PURPOSE.

The foregoing figures convey in the coldest way an outline of the work done by the state for its little wards. It is an easy task to report the number of children received and the number placed in homes and the cost of doing this. Such figures, however, while indicating the volume of work that is being done, cannot express the essential value of such work. This must be found in the permanent benefits which it confers upon the children and which are shown in the final development of the children. Figures cannot indicate the real meaning or purpose of this work, unique for a state, of helping and saving little children, deprived of their natural protectors, from want and suffering and giving them "the nurture, the care, the share of affection, if possible, which is the due of every child born of woman." Neither can figures indicate the spirit of a work which consists chiefly of personal service as exemplified by those foster-parents who have opened their homes to little strangers, in such numbers and received them "after the manner of sons and daughters."

It would be better if every child could be nurtured and reared by worthy parents to whom it had been given by nature, but here are these hundreds, some of them babes in arms, homeless and parentless, and every one must be given his chance to grow up into a useful citizen of this commonwealth. This is the essential purpose of the state to be carried out through this institution.

INSTITUTIONAL CARE RENDERED.

Individual and personal work is done here and institutional routine is not allowed to take the place of, or interfere with, such work. The institution is necessary to bring about conditions which render such personal service possible. Those who have cared for the children have brought to their tasks undulled sympathies and responsive hearts.

Only a part of the care and training given the children of this school is bestowed in the institution. The average time of residence of children in the school before being placed in homes is seven and one-half months. Thus the institutional care is not extended over a long period and is preparatory to their going into suitable homes.

The funds appropriated are expended in feeding, nursing, clothing, warming, teaching and training the children received in the institution, in seeking suitable private families willing to take the responsibility of their care and education and in carrying them to these private homes and supervising them after they have been thus placed.

Not the least valuable feature of temporary institutional care is the attention given to the physical needs of the children. Medical or surgical treatment is often needed and applied. A thorough physical examination is made when the children are received, and their physical defects discovered. These are often the obvious results of neglect or ill-treatment, or have become serious because of neglect. Enlarged tonsils and adnoid growths which often cause deafness and, if neglected, may seriously affect the development of the child, are not infrequently discovered and removed. Defective eyesight is occasionally found and remedied. Six bright children have been found with hearing so defective that they could not receive instruction by ordinary methods and have been placed in the School for the Deaf at Faribault, for instruction during the school terms. Likewise three children too nearly blind to be taught in this school have been transferred to the School for the Blind.

Good health has generally prevailed in this school. Occasional invasions of diphtheria and scarlet fever, as during the spring months of the present year, have occurred and been responsible for some deaths. Reference to the mortality list, Table No. 11, appended hereto, will show the number and causes of deaths, both in the school and in homes, since the institution opened.

The location of the school in the country on a farm is fortunate. There are no unclean streets and filthy alleys, but there are extensive play grounds, beautiful hills and broad acres which afford farm work and plenty of outdoor recreation for the children. The splendid herd of forty healthy cows affords good milk in abundance, and the farm yields vegetables in great variety, also fruits, including apples, plums, raspberries, strawberries and currants. Not only is the farm a source of some profit, as shown by Table No. 1, but it is a valuable means of education to the children. Classes of boys work and receive instruction in the garden, greenhouse, orchard and on the farm.

SCHOOL WORK.

There is no more important feature of the institutional training given the children preparatory to their going out to homes than that given in the day school.

The school is conducted in a fine, well furnished, eight-room building on the premises a little distance from the cottage dwellings. When "school calls" at nine o'clock the children leave their cottage homes and go to school after the manner of children in the public schools. Seven of the eight school rooms are occupied by the regular school grades, the kindergarten, sloyd, domestic science and music classes. The library of about eight hundred well selected books in this building is a valuable aid in the school work. Our teachers understand the important part which reading, wisely directed, plays in the education of the child, and that our children should acquire a taste for reading good books before they leave this school, because of the meager advantages in this direction afforded in the country homes and schools to which they go.

The pupils are graded according to their educational status as in the public schools. Six teachers are employed, and the several classes under their charge are instructed in sloyd, domestic science, kindergarten, vocal music and the subjects in the primary, intermediate and grammar grades. These classes include all of the children in the school above four years of age, the kindergarten including those from four to six. There are always many little boys present belonging in the first primary grade, and that room is generally full. Such little boys are harder to place out than the older ones and they accumulate.

It is often necessary to have more than one grade in the second and third rooms, as a result of the constant changing of the pupils and the consequent difficulty of grading them. Promotion of individual pupils is made as fast as their progress will permit. A few, who remain long enough, advance to the higher grades and enter the high school in Owatonna. Six have graduated from the high school, two of whom have taken courses in special schools, one in Carlton College, and one in the Winona Normal School, since their graduation. The Carlton student is to complete the literary course and graduate next June, having paid her expenses by her own efforts. These young people are the product of institutional care and training. Although residents of the institution during practically all of their childhood they were not "institutionalized" to their detriment.

Sloyd was introduced in our course about four years ago and has been readily adapted to our small children with highly satisfactory results. These classes include all boys eight years of age and older, and some of the girls. Nothing in our school is so popular with the boys as the sloyd and it is very helpful in the discipline.

Instruction in domestic science was begun two years ago, and its adaptation to our girls and practical value to them has been proven, although circumstances have delayed its complete introduction. Since the burning of our main building last January the room formerly occupied by the domestic science classes has necessarily been occupied for another purpose, and we will be unable to organize

these classes again until after the main building is reconstructed and occupied, which we hope will be early in the fall.

On Sunday chapel exercises are held in the forenoon at 10:30 and Sunday School in the afternoon at 3:00 o'clock. The teachers and state agents who may be present assist in these exercises, and the ministers and interested members of the several churches in Owatonna often come in and give valuable assistance.

Christmas, New Years, Fourth of July and Thanksgiving Day are appropriately and enthusiastically observed and thoroughly enjoyed by the children. Also, Decoration Day and the birthdays of Washington and other national characters are observed with special exercises.

It is in the school department that the strongest temptation comes to retain the children. They become interested in their studies and begin to make progress. The faithful teacher becomes interested in them. She loves them, and watches every step of progress, and it is discouraging, from the teachers' standpoint, to have them taken away just as the work is begun. But the original purpose of the state in establishing this institution must be kept in mind, and the education begun here left to be continued in the public schools of the communities in which the children are placed.

RECEPTION OF CHILDREN.

Children under fifteen years are eligible to admission. The statutory steps necessary to be taken to secure admission are simple and divested of every feature resembling a criminal proceeding. Homelessness, dependence, and ill-treatment are the grounds upon which admittance may be secured.

Crippled children who can walk and help themselves are not excluded. It has been feared that such children would accumulate in the school, in time, to the detriment of the placing-out work, but such has not been the case. The number present now is only eight, six less than it was two years ago. They are necessarily residents of the school for a long time, not being wanted for homes, but the success of many of them, as a result of the care and education given them here, has been so complete that the wisdom of receiving them can hardly be questioned. All who were proper subjects for treatment in the State Hospital for Crippled Children have been successfully treated there. The results of such treatments, in every instance, have relieved the little sufferers and corrected their deformities to a marked degree.

With few exceptions the children received during the biennial period have been bright and promising and easily placeable, and it has been necessary to return to their counties as unfit subjects for the school fewer than in some former years, the number thus returned being three. Two of these were children well advanced in years and incorrigible as the result of association with companions of bad repute and one was feeble minded.

Thirty-six of the one hundred ninety-four children present have been placed in homes and for various reasons returned. The most of them can and will, with little delay, be replaced. A few have been tried several times in homes without success. These will need to be retained for a term of training in the school before they are placed out again.

There is a marked increase in the number of infants under one year of age for whom admission is sought. More babies have been received the last year than in any previous year, the number being sixteen, but they have not been kept long. All but one had gone at the close of the year.

About the same number of children have received care in the school during the last two years as were cared for during the preceding like period.

There is a remarkable uniformity in the number received each year for the last six years. That the number has not increased is an encouraging fact. With the rapid increase in population of our state, a corresponding increase in the number of children to be cared for at public expense might be expected. If the fact that the number that this institution has been called upon to care for has shown no increase during the last two years, could be taken as evidence that the number needing its care has decreased, the belief that social conditions in Minnesota have improved and that this school has contributed helpfully to such a result, would be encouraged.

The fact is apparent that the State Public School system as carried out in Minnesota serves as a check on the accumulation of normal children in institutions to be supported at public expense.

PLACING-OUT WORK.

The record shows that the placing-out work has been well maintained during the biennial period, more children having been placed out than during any preceeding similar period, the number being six hundred fifty-seven, including replacements. This is an average of twenty-seven per month.

The replacing of unsettled children is more difficult than the first placing of them. With so many in homes there are always some that are unsettled and requiring attention. Many of these are transferred to other homes without being returned to the school. Table No. 13 gives an interesting record of the children indentured since the school opened and serves to show the permanency of the indentures. The one child shown to have been indentured seven times is at last well settled in an excellent town home, and at the age of sixteen bids fair to make a fine woman. To quote from the agent's recent report of her visit to the girl: "Lillie is a good, Christian girl, though she has much to contend with in her disposition."

When our children are placed out a trial period of three months is given, during which the foster parents may return them at will.

After the trial period expires the indenture, which is signed when the child leaves the school, becomes operative and the child is not to be returned without permission of the superintendent. The indenture, however, is so conditioned as to insure the child a speedy release from an unhappy or ill chosen home. An opinion has prevailed, to a very limited extent we hope, that our children are bound out to service. This is a false impression as all who have executed indenture agreements with us have had occasion to know. The conditions are largely in behalf of the child. The great State of Minnesota has not gone into the baby-farming business to let out the care of these children to the lowest bidder.

Applications are, from time to time, received from parents of children. These are always considered with the greatest interest in the hope that improved conditions may be found and the children restored to worthy parents. In this we are often disappointed by finding such a record of conduct as to forbid the return of the children. If the good character of the parents and their ability to care for and educate the children is established, it is a pleasure to reunite them. Heart ties and home ties are strong, and in passing upon such applications our usual requirements as to material things are not rigidly adhered to.

Adoption is desirable in many instances and it is encouraged when the relations between the foster parents and the child are shown to be sufficiently cordial. Consent to adoption is usually withheld, however, for at least one year after the child is placed. The step is too important to be taken hastily.

It will be observed that the number in homes subject to supervision has steadily increased, it being 1,195 at the close of the biennial period. The time has not come when the number of such as pass beyond our supervision, through legal adoption, restoration to parents, attaining majority and death, equals the number placed under our supervision.

Adequate supervision of these children is necessary if the essential purpose of the state in establishing and carrying on the work is to be carried out, and such supervision is authorized by the law which governs it all. If space would permit, convincing illustrations of the necessity of such supervision might be given, but the necessity is too apparent to need argument.

Our State Agents, through whom supervisory care of the placed-out children is given, are also charged with the duty of personally investigating the homes of applicants for children. And of such importance is this that we have come, through experience, to require a personal visit by an agent to every family before passing favorably upon its application for a child. Exceptions to this rule are rare.

Written recommendations, while helpful, often cannot be depended upon. We require them, from people of our own selection, but supplement them by the personal visit to the home and neighborhood. The motive and spirit back of the application and some-

thing of the qualifications of the applicant for the duties of parenthood, must be understood. The investigating agent must learn the wisdom taught in the fable of the elephant who found a brood of motherless young patridges in the jungle, and out of sympathy for the poor fledglings tried to hover them by sitting down on them herself; the moral of which is that not all women are fit to be foster mothers of dependent children.

The work of the State Agency is now performed by three agents and one travelling attendant, the personnel of this force remaining the same as it was two years ago, namely, Mr. Lewis, Mr. Jager, Miss Swindlehurst and Mrs. Lewis. They are men and women of genuine worth, well qualified for the work and their labors are unceasing. Additional help in this department would make more certain the possibility of keeping the institution small, and of keeping the Minnesota placing-out system at its best.

Many inquiries are received at this office for information as to the final results of this work. "How do the children turn out?" is the question. Our carefully kept and voluminous records show the history and movements, more or less complete, of every child assigned to our care.

The latest information from those now in homes subject to our supervision, as obtained from the reports of the visits of our agents to the children, indicates that ninety-one per cent of them are in good homes, progressing steadily and giving promise of success. This statement should be taken as it is meant and expressed, not as a claim that ninety-one per cent of the children cared for through this school have turned out well, but as information as to the condition of our children in homes when last seen, a large proportion of whom are still young and undeveloped. The final results will be seen later, perhaps not in our day.

Those of our children who have reached man's and woman's estate, are filling their places, a large percentage of them, with credit to themselves as young people of good character.

BURNING AND RECONSTRUCTION OF MAIN BUILDING.

On Monday, January 25, 1904, the central section and north wing of our main building were burned out so as to make complete reconstruction of the interior and roof necessary. While the cause of the fire is unknown, the presumption is that it was defective electric wiring.

Our own fire department and all employes worked faithfully at their posts of duty, and the Owatonna Volunteer Fire Department responded to our call for assistance, and the west and south wings of the building were saved.

A part of the contents of the building was also burned. The State's property loss was covered by insurance and the state was reimbursed in the sum of \$35,671.23. This amount with \$10,000 additional, which the Board of Control of State Institutions wisely

added for the purpose of rebuilding with fire proof material, was sufficient to repair the loss and give us a better building than we had before.

All occupants of the burning building were promptly removed in an orderly manner and no one was injured. The principal loss to the state is the serious inconvenience experienced until the building can be occupied again some time in the approaching fall.

Several employes met with personal losses, the heaviest of which was that of Mr. Balch, our engineer, whose duties as chief fireman prevented him from removing his property from the burning building.

APPROPRIATIONS RECOMMENDED.

Appropriations for the years ending July 31, 1906 and 1907, are recommended as follows:

IMMEDIATELY AVAILABLE.

Remodeling plumbing	\$2,000.00
Total	\$2,000.00

AVAILABLE AUG. 1, 1905.

Fire escapes	\$2,000.00
New laundry and equipments	5,200.00
Tunnels for steam and water pipes.....	2,100.00
New radiators and piping for four old cottages.....	2,800.00
Cement floors and new fixtures in cow barn.....	500.00
Library	250.00
Repairs and betterments	2,000.00
Total	\$14,850.00

AVAILABLE AUG. 1, 1906.

Rewiring buildings	\$800.00
Library	250.00
Rotary oven	750.00
Repairs and betterments	2,000.00
Total	\$3,800.00
Total for improvements	\$18,650.00
Current expense, in addition to standing appropriation, available Aug. 1, 1905.....	30,000.00
Current expense, in addition to standing appropriation, available Aug. 1, 1906.....	30,000.00
Total	\$60,000.00
State agency, in addition to standing appropriation, available Aug. 1, 1905	6,000.00
State agency, in addition to standing appropriation, available Aug. 1, 1906	6,000.00
Total	\$12,000.00

The plumbing in our older buildings is old, inadequate and unsatisfactory and much of it should be removed. Improved fixtures, including shower baths, should be put into five cottages, the hospital and south wing of the main building, and new and additional fixtures in the kitchens and childrens' dining room. To avoid an unsanitary condition of these departments these improvements should be made with the least possible delay.

Outside fire escapes have not been provided for our buildings. Only two of them, the central section of the main building and No. 5 Cottage, are more than two stories high, but we believe that suitable fire escapes should be provided without further delay.

The need of a new laundry building with complete equipment was felt two years ago when an appropriation for such purpose was recommended. The delay of two years has not lessened the need, which is now urgently felt, and we renew our recommendation for such an appropriation.

The steam mains leading to Cottages Nos. 1, 2 and 3, our oldest buildings, and the pipes and radiators in those buildings will hardly stand another year's service. The mains pass through the ground and are insufficiently covered. Many of the pipes, having been in use for eighteen years, are giving out. The radiators and the system of piping are antiquated and even if they were not worn out it would be economy to renew them. Tunnels should be constructed for the new mains and other pipes to pass through which would leave them accessible for repairs. Our recommendation also includes provision for repiping the south wing, which should be done at the same time the cottages mentioned are repiped.

The burning of the main building as the undoubted result of antiquated electric wiring has led us to recommend the rewiring of all buildings, except the school house and reconstructed portion of the main building, both of which are wired in conformity with the latest and best methods.

The fund for repairs and betterments should be maintained at the present rate of \$2,000 per year. There is need of the other improvements for which appropriations are asked and it is earnestly hoped that they will be granted.

Slight increases in the current expense and state agency funds are recommended, the amount for current expense, however, being the same as was recommended by your Board for the purpose two years ago. We think that, in estimating the amount to be appropriated for current expense, a sufficient margin should be allowed for the fluctuations in attendance which are quite impossible to control. A steady and rapid increase in the population of the school can be prevented only by fully maintaining the State Agency through which the children are placed and supervised in homes. To meet the increased work of this department the slight increase in the appropriation is asked.

CONCLUDING REMARKS.

There have been few changes in our official and teaching corps during the last two years, among which we mention the resignation of Miss Hughes, who had for many years served the school ably and loyally as teacher and director of music, and the retirement of Miss Durkee, our capable primary teacher on account of illness. With few exceptions, all who have labored here, especially those who have cared for and instructed the children, have done well, and we cannot refrain from expressing our approval of their work.

The pastors of the several churches in Owatonna have freely responded to our calls for assistance in religious exercises. Other members of the churches also, have given valuable help in our Sunday school. Such assistance has been thoroughly appreciated.

We are pleased to mention the harmonious relations that have existed between this Board and Board of Control of State Institutions.

The State Public School has enjoyed, in large measure, the moral support of the citizens of the State, and a like measure of such support will go far in insuring the successful continuance of its work in future.

Respectfully submitted, on behalf of the Board of Control.

GALEN A. MERRILL,
Superintendent.

STATE AGENCY.

MR. LEWIS' REPORT.

To the Superintendent,

Dear Sir: I respectfully submit herewith a report of my work as State Agent for the biennial period ending July 31st, 1904.

Efforts have been made to keep in touch with the accumulating number of children placed in foster homes. My work during this period has been largely devoted to visiting the children located in the first, fourth and sixth districts, including the counties of Waseca, Faribault, Blue Earth, Martin, Jackson, Nobles, Rock, Pipestone, Murray, Cottonwood, Ramsey, Hennepin, Anoka and Washington also those in Otter Tail County, as I had some other work which called me there.

I am pleased to note that most of these children are well situated in good homes and doing well. A few of the larger boys, however, are uneasy and dissatisfied because they do not get wages. The scarcity of farm help has fostered a spirit of jealousy or envy on the part of some of the neighbors, who have unwisely gone to the boys with offers of wages, thus making them feel that they were not being justly treated by their foster parents. This has

influenced some of the boys to leave their homes when nearing the age at which they would be released.

This scarcity of farm help has also been the cause of depriving many of the children, especially the boys, of their schooling, which becomes a serious matter, as, when deprived of schooling for one or two years, they fall behind others of their age, lose interest and do not wish to attend school. Too many people attach but little importance to education and do not urge the children to attend school, but keep them at home, usually to work. More frequent visits would help to correct this.

As I have suggested in previous reports, the supervision of the children after they go to foster homes is indispensable, and when neglected does the children and the community in which they live a grave injustice. It is the only way thorough work can be done and no amount of correspondence can take its place. If frequent visits are made, the children look forward eagerly to them and are impressed with the fact that we have a personal interest in them, and that they have friends on whom they can rely in time of trouble. If the visits are delayed, the children and foster parents feel that we have only a perfunctory interest in them, and a fear of us is engendered which is made use of to punish and control the children.

Periodical and frequent visits insure the faithful discharge of self-imposed duties by foster parents, and guarantee to the community at large that the interests of the children will be safeguarded in every respect.

I am more and more impressed each year with the results demonstrated by the treatment and training given the children in their homes.

Where they are treated as ordinary children, encouraged and helped, not too much expected either in the way of work or conduct, the results are satisfactory and the reward great for the patience, time and trust bestowed. I recently visited a boy who had previously seemed to be going to the bad, had been bitterly complained of, transferred once or twice, was vulgar, profane and dishonest. A good Christian family was prevailed on to take him, his faults kindly pointed out and he urged to do right, not for their sakes but his own, with the result that the boy has made a complete reformation, is now trustworthy, kind and doing well. On the other hand, where the main thought is selfish and mercenary, heavy and continuous work required, no recreation and few privileges granted, faults exaggerated and constantly condemned, results are disappointing; the children, in many instances, leaving their homes when nearing maturity, thus sacrificing their own financial interests, disappointing the foster parents and strengthening their belief in the incorrigibility and ungratefulness of the children.

During this biennial period I have made 633 visits to children and 316 visits to applicants.

Besides the above I have made many visits to officials and others for consultation, to newspaper offices, homes and elsewhere to spread information about our work, of which no record was made.

In addition to the above regular visits many special cases have required my attention. These special cases have been undertaken in a spirit of equity. While the well being of the child is of paramount importance, the rights of the foster parents have been considered and conclusions reached only after patient and careful investigation.

This work has required a large amount of travel, the total number of miles being 21,207 by train and 6,000 by team, no account being taken of travel by street car or on foot, which in the aggregate would be large.

My total expenses for the two years including salary has been \$4,043.04 which, estimated as incurred for making the visits only, is \$4.26 per capita.

With appreciation for all courtesies, I am yours truly,

FRANK LEWIS, State Agent.

MR. JAGER'S REPORT.

To the Superintendent,

Dear Sir: I respectfully submit herewith a partial report of my work as state agent for the biennial period ending July 31, 1904.

During this time my work has taken me into nearly every county of the state, though most of my time has been spent in the northern half of Minnesota. In this the newest part of our state the development and improvement is very marked and the increased advantages have made many new, desirable homes for our children where a few years ago we would not have cared to place them. Our opportunities in that section will increase as the country grows older, the only drawback being the distance from the institution which makes work there more expensive.

In some respects the work has been more difficult during these two years than during the previous biennial period. This is due largely to our prosperous times. A large number of our boys and girls have reached the age when their services are of good value in the labor market and they know it. This leads to a feeling of independence and restlessness which makes it easy for meddling people to influence them to leave their homes and strike out for big pay, a dangerous thing for them at their age when they need the influence of a home most. On the other hand, help being scarce, their guardians are tempted to keep them out of school for work and thus increase the cause of discontent. It is safe to say, however, that those who remain in their homes are the gainers both in money and character. There appears also to be an increased laxity in the home training and discipline of the young people in general, and a great many of the boys and girls we meet on the streets of our

villages and cities take life in such a frivolous way that they have a bad influence upon those to whom providence seems to have been less kind. People often complain that their difficulties in managing the children begin with their entering school and associating more with other children. The cigarette habit among boys and the depot and postoffice loafing habit among both sexes are sources of danger to every child, whether in its own or an adopted home. I feel that our requirements of our children and the homes wherein we place them are much above the average, but I sincerely hope that our standards in these respects will never have to be lowered.

In my dealings with county officials and men in public life, I have found a general feeling of confidence in our school and its work and prompt co-operation. In many instances this has been very marked. It is true, however, that there are a few county superintendents who discourage the enforcement of school laws; and county commissioners who will allow children to suffer want, or go to moral ruin, rather than to run the risk of losing a few votes or experiencing any unpleasantness by having these children sent to a place of safety; and a few probate judges who will consider legal technicalities rather than the good of the children, but happily they are few in number. It has been my lot to meet a number of the unfortunate fathers and mothers, whom misfortune has deprived of a home, and to discuss with them the subject of sending their children to the State School. I have found that the more worthy the parent the greater their confidence in us, and this has made me feel more heavily the burden of responsibility which we assume when we receive the children and take the place of their parents. To betray the trust they place in us would be nothing less than a crime. On the other hand I have met unworthy parents against whom we must protect the innocent but misguided child. I firmly believe that where the guilt of the parent is proven, all communication with the children should be prevented. To spend years of effort in rearing a child to pure and useful manhood or womanhood and then let parents undo this work in a few weeks is disheartening to both ourselves and the foster parents, though it cannot always be prevented. I have known of a number of cases where promising young people, yielding to a natural feeling of confidence in an almost forgotten parent, have been led to ruin by a drunken father or a vicious mother in a few weeks time. It may seem cruel to deprive a mother of her child, but in many cases it is far more cruel to the child and to society to do anything less than that.

Though we occasionally hear complaints against people who have our children, it is very seldom that they are proven true by a thorough investigation. They are often prompted by jealousy or are exaggerated accounts of happenings not understood by the complainant who has only seen one side of it. There are, of course, instances where injustice is done our children, but these are usually discovered by us when visiting the home and the situation, or the

child, changed. Sometimes the character of a home changes for worse in a very short time—so do children—and but for a prompt visit great wrong would be done. Constant visiting is the only safe way of carrying out the purpose for which our institution was founded.

There are many of our wards whom I have visited of whom I am very proud, and many of those now fighting their own battle of life are worthy examples for the most fortunately born child to follow. The work as a whole is very encouraging. I have greatly felt the loss of not having for circulation our printed reports for which we are often asked by people who are interested in our work and want more complete information than we can give them orally. I trust we may have them next year.

The expense of my work for this period has been as follows: Railroad fares, \$580.60; miscellaneous, \$29.75; street car, \$23.45; livery, \$344.75; hotel \$499.50; total, including salary, \$3,878.05; per capita cost of visits, \$5.71. I have made 252 regular visits and 126 special visits to children and investigated 301 applicants. I have traveled 24,978 miles by train and 3,260 miles by team. This is exclusive of street car travel and work done on foot.

Respectfully submitted,

H. J. JAGER,
State Agent.

MISS SWINDLEHURST'S REPORT.

To the Superintendent,

Dear Sir: I herewith respectfully submit my report as state agent, for the biennial period ending July 31, 1904.

My connection with this School began with the early days of this biennial period. I have found the work intensely interesting and growing closer to my heart as I see its development and far-reaching results.

I began work by reading histories of the children and by becoming somewhat familiar with these and other records referring to them. Being given our second district as my first field, I also prepared the clerical work necessary to my first trips to placed-out children and to applicants in their vicinity.

My first special case made a great impression upon me. It was the application of a grandmother for her deceased daughter's child. This little one had come to us with an undesirable family history, but I had seen the applicant and her evident love for the child, and I felt it a pleasure to go and fortify, by a judgment based on a thorough investigation, my desire to recommend the return of the baby to its relatives. The investigation revealed, however, that I must completely reverse my intended recommendation. A week later this fine boy went to gladden an excellent childless home where love, even greater than the poor grandmother's, begets good living.

The work of this district kept me engaged until the first of the new year. Each agent leaves the work of his district, at any time, to attend to special cases in any part of the state. Several such, outside my own district had fallen to my care during this period, one having taken me into the heart of the lumbering regions of Wisconsin. When in a neighborhood for special work it is our custom, when practicable, to do the regular visiting of that vicinity on the same trip, thus economizing expense. It was while engaged in the work of this district that I found a community where the people were negligent in the matter of schooling, as well for their own children, as ours. My driver, a good-hearted young fellow who had ruined his own prospects in life through drink, heard enough to be cognizant of the situation. Months later, on a special visit to this section, this man announced that hereafter our children would have their due in the matter of schooling—When asked for an explanation, he said that when the opposition candidate for County Superintendent of Schools solicited his vote that fall, he had laid before him the facts concerning school attendance in that county, and had extracted from him in the presence of many witnesses (also voters) a promise to correct that matter especially in the cases of State School children. The promise obtained, he got out and worked for the reform candidate. His election was secured and our young friend felt that the school problem was solved in that county—and it would be everywhere if all would do their duty as they see it as did this unfortunate young man do his. I was surprised also to find that he could give me news of many of the children whom I had visited on my former trips, for said he, "I keep on the look-out for those children now that I know who they are." In another town in this district I was told of a frequenter of saloons who was seen to eject from one of his own favorite resorts one of our sixteen years old boys, whom his guardian was finding it difficult to control. I am glad to say that the boy found that he was shadowed when around the saloon and gave up trying to establish himself there. He is now doing well and is much thought of in his community.

February and March were spent in the office and in making scattering trips of a semi-special nature. I then engaged in the work of our populous First district, which was not finished till the following Christmas. During this time, however, I did considerable work in the Twin Cities, made one or two rather extended trips to the north-western part of the State and carried some special cases. I then took up the work of our Fifth district which comprises the counties of Lyon, Lincoln, Redwood, Brown and Nicollet. This was finished the third week in June since which time I have been assisting with the work in the office, going out only when special work required immediate attention.

This work of the State Agency is considered by our Superintendent, as perhaps the most important work of the school. To fully

appreciate this view one must realize that the object for which the institution exists is to secure to each child normal development in a family home. To merely provide such a home is not enough, as we often see in the cases of children, left without further supervision, with apparently responsible people. The motives for taking children are not always easy to learn, and it sometimes happens that in spite of careful investigation they are not revealed until the child has been placed, and is receiving the treatment and training dictated by unworthy motives. Again motives may have been good but the ability to carry them out is found to be lacking. Without vigilant supervision of placed-out children, directed from a responsible source, many of them from one cause or another, lose the birthright due a citizen of an enlightened community, viz., opportunity and training to become a worthy member of society.

It is interesting to note the reasons given by applicants for taking children. One, a farmer who does not keep hired help, wants a little boy of sixteen years for "company for my wife." Another wants a girl of thirteen years, with a long list of attractive qualities that "we may be proud of her." Another sends a lock of very dark hair and stipulates that they will not take a child with lighter hair than the sample. Another would not have a plain girl in the house. Tapering fingers are often in demand. But happily these are only exceptional cases. Motives must be mixed in taking our older children. If good homes open for them for the assistance they themselves can render the households admitting them, we should be satisfied, as competent training in any line of honest manual labor is itself educative, and no home training is complete without it. Our concern in these cases is to be able to discriminate as to which of these homes will give the children thus admitted, the love, advantages and training that make a home everywhere a desirable place in which to rear children. Infallible penetration into men's motives and strength of character would be the only safe guard against mistakes. Happily our system of supervision may insure our children of all ages against lost years or even worse misery. Moreover, throughout the State is an ever increasing number of intelligent people who are able and willing, as they become better and better acquainted with the work of the School, to give us information and render us service in our efforts to secure and preserve our children's interests.

While there are discouragements in this, as in all work, yet cheering and inspiring incidents are of daily occurrence: Once I visited a home where a childless couple had taken a boy and a girl who had failed in other homes. They gave these bright, but troublesome children every advantage their neighborhood afforded, requiring of them work about the home adapted to their strength. Mine was the first visit made after both children were established in the home. These guardians declared they had the brightest and best children and the reports continue to be excellent. A rather elderly

couple who have a young woman whom they took from this School years ago, have more recently taken a girl now of some ten years of age. I called to see them late in the evening. They could not let me go without seeing their beautiful little girl though she was in bed for the night, so her foster-father brought her down stairs in her night clothes. At their request she greeted me with sleepy eyes, and soon bade me good bye and was borne back to bed in strong arms. It was a beautiful sight and with the air of comfort and Christian atmosphere about the home contrasted joyously with other visions I had from another agent, of the conditions from which this family of children came.—In the Scandinavian home of a middle aged couple, I visited a happy girl of about eight years. They are poor people, but are giving the child of their best and she is developing well in this simple but progressive home. They showed me the little bed, the foster father had made that she might sleep down stairs near them. As I was leaving they stood at the door with the child between them and said “You may be sure we will be good to her, our own four are in Heaven.” A worthy Irish woman almost dragged me into a private room, on my first visit to her, to warn the new agent against any blunders she might make. Said she, “You see Fred is your boy and Frank is mine, but I have allowed them to believe that both came from the State School that no jealousies may creep in. Of course, they both remember when Frank and I went to the school and brought Fred home with us, but Frank thinks he came from there before he could remember. He was born to us when our other children were grown and he always begged for a brother, so I let him help select one—and you can see how much they look alike.” A new neighbor called forth a rebuke by asking her which was her child. She promptly informed her that “They are both my boys,” and added, “Why they look enough alike to be twins.” I once visited an excellent farm home where the guardians had been urgent some months before in their letters asking for permission to adopt a sweet baby girl, whom they had taken from the School. We had been delayed in the visit we meant to make before granting the request. When I introduced myself the woman burst into tears and said that it would kill her if there were any reason why they might not keep the child. It was a pleasure to re-assure her. The child is now legally adopted and they are thinking of taking a little boy.

Coming to the School sixteen years after its institution, I have a pleasure the agents older in the work did not have in their first years of agency work. Many of the first wards of the School have grown to maturity and are filling responsible and honorable positions in society. From time to time I meet members of this increasing number and it is indeed an inspiration; for these young people averaged no better advantages, up to the time of their commitment to the School than do the children we are receiving now, while the general average of homes open to our children throughout the State must be improving.

During this biennial period I have made 542 visits to children and investigated 349 applications for children. I have visited 82 special cases; of these I transferred 21 of the children to other homes, returned 19 to the school; the remaining 42 cases were adjusted and the children remained in their respective homes. I also accompanied 69 children from the School to the homes provided for them. My expenses, including salary were \$3,284.82, making an average cost per visit of \$3.46. Necessarily there are many visits made that do not classify under any of these heads and of which no mention is made in a report of this scope.

Trusting that my work has yielded to our children good commensurate with my interest and pleasure in this great work, I am,

Very respectfully,
HANNAH SWINDLEHURST,
State Agent.

MRS. LEWIS' REPORT.

To the Superintendent,

Dear Sir: I respectfully submit herewith a report of my work as State Agent for the biennial period ending July 31, 1904.

My work as traveling attendant for the children is one that is of great interest and pleasure to me. The reception of the children by the foster parents is often an index of their feeling towards them. The children are naturally timid about going to strangers they have never seen before and know nothing of, and if they are met in a kind motherly or fatherly way they seem to be assured of a welcome in the family, and cheerfully accompany the people. While such a spirit is shown by the majority of the people taking children, there are some who seem reserved and wait for the approach of the child or attendant, and look the child up and down as though they wanted to be assured of all the necessary qualities before taking it.

It is not unusual for trains to be late, or for something to occur to cause the people who are to meet the children to fail to be at the station, which causes apprehension, or fear on the part of the children and shows the necessity for someone to accompany them. My work with the babies, on the whole, has been very satisfactory. Their helplessness and dependence appeal strongly to me, and although I become very much attached to them in the few hours or days I have them with me I am glad to put them in the arms, and near to the hearts of the new parents, knowing that whoever takes a baby takes it for the love of the child. Some of these trips have been long and tiresome, and in some instances many inconveniences have been experienced, yet the pleasure and satisfaction of the work is what lingers in the memory.

While my principal work has been that of traveling attendant to children sent to homes, it has been my duty also to visit and investigate the homes of some applicants for children who lived in the vicinity.

During this period I have accompanied 206 children to homes and returned 11 children to the school. To accomplish this work I have traveled 19,264 miles by train, besides many miles by team. My total expenses have been \$685.78, which makes the small per capita of \$3.34.

Respectfully submitted, MRS. FRANK LEWIS,
State Agent.

SCHOOL FOR THE DEAF.

SUPERINTENDENT'S REPORT.

Biennial Period Ending July 31, 1904.

Faribault, Minn., Nov. 3, 1904.

Gentlemen: The report, I have the honor herewith to submit, covers the period of two years, beginning Aug. 1, 1902, and ending July 31, 1904. This is the thirteenth biennial report—the sessions of the school covered by it are the fortieth and forty-first. This communication is supposed to comprise a brief statement of the events of interest occurring during the biennium.

The two years have been distinguished by zealous and harmonious work on the part of all. The discipline of the school has been easy to handle, there being few infractions that called for more than a word.

At the graduating exercises, diplomas have been granted to eight pupils, June, 1903, and seven in June, 1904. Eight certificates of honorable discharge have been granted. These young people leave us well equipped, having a fair education, and all of them knowing how to do something that will secure to them a living, should they be dependent upon their own exertions.

We impart an extremely practical education. We think we are safe in saying that no school or college turns out, as graduates, a larger percent of persons who become substantial citizens, than does the Minnesota School for the Deaf.

It is true that it costs somewhat more each year to teach the deaf than to teach speaking children, but they do not spend nearly so many years in school as do their hearing brothers. Every state in the Union has provided for the education of the deaf, and almost without exception, an industrial course is provided as well. This is an absolutely free school. Strange as it may appear, there are many deaf children in Minnesota either who have never attended the school, or who have been permitted by their parents to remain

under instruction only a short time. These poor children cannot be educated in the public schools, hence have life's journey before them without any adequate preparation for it. These facts suggest the feasibility of a compulsory school law. Still, it must be admitted that it is a delicate matter for mere human law to invade the sanctity of the home. It would, perhaps, be more difficult to enforce a compulsory school law than to enact one.

The usual reason given for delay in bringing the pupil to school till adult age has been reached, is ignorance of the existence of the school. In order to dispel such ignorance and to reach the parents, over seventeen hundred double postal cards were sent to as many postmasters and the same card was sent to each of the county superintendents of public schools in August, 1904. As a result, fifty names of deaf children who had not attended school were returned. I am thus put in communication with the parents of these children; many of whom may be placed in this school. We are especially grateful to these postmasters and county superintendents for their hearty responses. Many of the newspapers of the state have also placed us under obligations to them by inserting notices of the school free of charge.

The following table shows the attendance for a number of years:

	Boys.	Girls.	Total.
Enrollment for school year ending July 31, 1900....	148	104	252
Enrollment for school year ending July 31, 1901....	147	107	254
Enrollment for school year ending July 31, 1902....	149	119	268
Enrollment for school year ending July 31, 1903....	143	126	269
Enrollment for school year ending July 31, 1904....	152	135	287

METHODS OF INSTRUCTION.

These are about the same as are adopted by most institutions of the kind. The number of teachers employed in the school is twenty-two. The number in the industries is nine. We teach about thirty-two per cent of our pupils orally. I am convinced that a larger number should be instructed orally. For a number of years one oral grade has been added each year. We now have eight oral classes; this secures fair grading.

There is little or no difference of opinion as to the value of the trades. We place such value upon industrial training for all children that we believe it should be introduced more extensively in our public schools even, if necessary, at the expense of much of the high school work.

There are two distinct schools among the educators of the deaf as to method. Pure oralists claim that practically all the deaf can be educated orally. This means that they think that about all the deaf can be taught to speak and read the lips of those who speak to them, sufficiently well to enable them to communicate with their friends in a satisfactory manner. This class of persons includes ad-

NEW SCHOOL BUILDING. SCHOOL FOR DEAF, FARIBAULT.

vocates of the day schools, except in some of the large cities and some of the state institutions. The advocates of the combined method believe in the oral method but differ as to the per cent of the deaf who can be best educated orally. We know no safer test of the merits of an enterprise than its product. If it be a man—what can he do? A machine—what can it produce? The soil—what can it grow?

It was our privilege to be present at one of the sessions of the international congress of the deaf at St. Louis. It was one of the most thrilling spectacles I have ever witnessed. There were estimated to be present some eight hundred persons. Of this vast audience it would be safe to say that ninety per cent of them had been instructed by the combined method, and a large per cent of these had not been orally trained. This audience was made up of representatives of perhaps every state in the Union, besides a few from foreign countries. They were men and women of intelligence and evident thrift. Could we desire more conclusive proofs of the merits of the combined schools?

To me another significant fact is, that the graduate deaf are satisfied with the work of the combined schools. I know of no one whose opinion is entitled to more consideration than is that of him who has experienced that to which he testifies. It must be admitted that the combined schools are indebted, in a measure, to the pure oralist for the added emphasis given to speech in educating the deaf. However widely educators of the deaf may differ as to methods, I think I speak for the combined schools, and these comprise nearly all of the state institutions, when I say that they are willing to compare their graduates in speech and lip reading, as well as in technical and general information, with those of the schools of the pure oralists.

HEALTH.

The general health of the pupils has been good. Two deaths have occurred: John Edward Rosell on the railroad track Feb. 14, 1904, and Manuel Ellenbaum of heart failure, Feb. 28, 1904.

Numerous severe cases of sickness have been handled skillfully by our physician, Dr. W. H. Robilliard, and by our eye, ear, throat and nose specialist, Dr. A. F. Pringle.

The following is a summary of the work accomplished during the two years covered by this report:

A new school building has been erected at a cost of \$25,298.72. It is a handsome structure. It has twelve school rooms and a basement in which space is provided for a bowling alley and gymnasium appliances.

Substantial additions have been made to the hennery, largely by the boys of the cabinet shop. We now have about two hundred hens.

A new header has been put into the boilers at a cost of \$1,313.83. This sum came from the repair fund and has crippled the school.

A large addition has been made to the cabinet shop.

The bath rooms of East and West Barron Hall have been remodeled—each having been provided with new tubs and Gegenstrom shower baths, and this affords ample bathing facilities for the boys.

An entirely new bathroom has been equipped with tubs and shower baths on the second floor of the south wing of the main building for the girls. The toilet rooms for both boys and girls have been provided with lavatories and ranges. All this has been done for the sum of \$4,417.75.

Nine hundred and fifteen linear feet of cement guttering has been laid at a cost of \$183. A covered waterway, one hundred forty-five feet long, has been built between the cabinet shop and boiler house at a cost of \$133.25.

An excellent gymnasium for the girls has been provided by removing the partition between two mansard roof rooms.

CHANGES.

Mr. A. W. Dobyms resigned to accept a similar position in the Washington school, September, 1902.

Miss Amy E. Snyder resigned on account of ill health, February, 1903. These had been faithful and efficient teachers, he for two, and she for over twelve years.

Mr. W. M. Kilpatrick and Miss Mollie Medcraft, both experienced teachers, began their work in September, 1902.

Miss Grace M. Jewell began her work as teacher Feb. 15, 1904.

Mrs. E. G. Renfro, Misses Bertha Park, Nettie Christy and Marian King were appointed to begin work as teachers September, 1904.

APPROPRIATIONS NEEDED.

I respectfully recommend that the board request the following appropriations:

FOR MAINTENANCE FOR TWO YEARS, BEGINNING AUGUST 1, 1905.

For 1905-6, 293 pupils at \$206.00.....	\$60,358.00
For 1906-7, 303 pupils at \$206.00.....	62,418.00
Ordinary repairs for 1905-6.....	3,500.00
Ordinary repairs for 1906-7.....	3,500.00
For oven	2,200.00
For three new boilers	6,231.00
For one 75 K. W. dynamo.....	2,500.00
For draining lawn and garden.....	490.00
For school desks and furniture.....	480.00
For library for two years.....	500.00
For completing and equipping gymnasium.....	700.00
For conduit between buildings	1,200.00
For improvement of grounds	1,500.00
For needy pupils of the National College.....	300.00

The following is a brief statement of the reasons for the preceding requests:

Our per capita for the year ending July 31, 1904, was \$207.37. This compares favorably with the cost of maintenance in similar institutions in other states and with corresponding costs in this school in past years. This is certainly a good showing in view of the excessive fuel bills we have, as compared with institutions south of Minnesota.

ORDINARY REPAIRS.

The thirty-five hundred dollars asked for ordinary repairs is conservative in view of the age of the buildings; some of them having been built over forty years ago.

The wood cornice and battlements on decks of roofs are in many cases rotted, and will have to be replaced.

Much painting of roofs will be needed.

The carpets are much worn and the furniture is scant.

The attic story of the hospital should be partitioned. This is necessary in order to accommodate convalescent patients in case of epidemics. This work will be done by the pupils. I may add, here, that the pupils of the cabinet shop are doing a large part of the repairs to furniture and buildings.

Plumbing is, most of it, old and the same thing is true of much of the piping, having been in since the institution was established.

Many of the floors of the main building must be replaced.

The barns need new roofs and to be painted.

The floor of the hog house should be cemented.

The State should take at least as good care of her property as the farmer does of his.

OVEN.

We have a small oven; it is so small that it is entirely inadequate to the need.

The space occupied by the old oven should be utilized for working space and a shed room built for the new oven. We are teaching baking as a trade to nine boys. The oven and extension would cost \$2,200.

NEW BOILERS.

Three new 150-horse power boilers are needed to replace six old 51-horse power boilers now in use. These boilers could be installed for \$6,231.

These boilers are old and their natural life may end at any moment. Our coal bills are exceedingly large. If three fires would accomplish about as much as six, it would seem to be a good proposition to put in the larger boilers.

DYNAMO.

The dynamos we are now using have been run fifteen years and are not reliable. A new 75 K. W. machine would cost \$2,500.

TILING.

The garden and lawn should be tile drained. Many of the best trees have been killed by standing water. The garden is rich, but is often too wet to admit of successful cultivation.

The entire cost of this draining could not be done for less than \$490.

SCHOOL DESKS.

There is not a public school in the state that is not better equipped with desks and furniture than is this school; some of it has been in use for forty years. We need one hundred fifty new single desks. These and the furniture would cost about \$480.

LIBRARY.

Our pupils being deprived of hearing and many of them of speech need all the facilities that can be provided in way of books. The last legislature gave us five hundred dollars for the two years. We are now asking for the same sum for the next two years. The pupils enjoy these books immensely. Books are an absolute necessity to the deaf.

GYMNASIUM IMPROVEMENT AND EQUIPMENT.

In the past, little attention has been paid to the physical development of the pupils. They are in especial need of such training, and the request for \$700 is made with a view to doing something for these children along the lines intimated.

CONDUIT.

The conduit between the new school and the main buildings is needed to convey the steam and water pipes and electric wires. If economy and satisfactory service are to be considered, no question can be raised as to the feasibility of the proposition. This tunnel would be 4 feet 6 inches by 6 feet by 155 feet and could be constructed at a cost of perhaps \$1,200.

IMPROVEMENT OF GROUNDS.

The grounds, driveways and walks have not had the care that those of the plain citizen get. There are over sixty acres belonging to this institution. The state does not hesitate in spending millions of dollars on her capitol and grounds. Is it consistent or wise to neglect the buildings and grounds of her state institutions?

GALLAUDET COLLEGE.

Minnesota has more students in this college than any other state; she now has nine. The college being in Washington City is so far removed from Minnesota that, although free for tuition and board to those who are not able to pay, still is out of the reach of some who would attend. I earnestly recommend that the local board of this institution and the Board of Control request the enactment of a law authorizing a standing appropriation of \$300 per annum. This \$300 to be the sum total and to be used to help only deserving, needy pupils to attend the college.

If Gallaudet College were in Minnesota no such request would be made for then the railroad fares, the principal cost, would not be prohibitory. These fares added to the cost of clothing and books are just a little more than some of the aspirants to the attainment of a college education can raise. To such pupils as cannot pay board and tuition, the college is free. It is supported by the general government.

A number of other states are helping their aspiring deaf young men and women in the way suggested. It would seem a pity to deny these bright young people, seriously handicapped as they are, when it would cost the state so little to grant this boon.

We are indebted to Mr. Robert Loheyde for a moving picture exhibition; to Mr. William Wade for books; to Mr. B. B. Sheffield for an automobile ride given practically to the whole school; to Mr. C. L. Washburn, a graduate of the school, who presented to the Noyes Literary Society, six volumes of Imperial Reference Library, nine volumes of Ridpaths History of the World, four volumes of People's Natural History and twenty-four volumes of Abbott's Makers of History; to the various newspapers sent in exchange for the Companion; to the friends of the school, who have in various ways, shown an interest in the institution; to both the Board of Directors and Board of Control of State Institutions for their uniform consideration and helpful spirit. To all officers, teachers and employes, as well as to the pupils themselves, are we grateful, for to these is due whatever of success has marked the work of the past.

Nor would we forget to render obeisance to Jehovah for putting it into the hearts of the people to establish and maintain this school for the deaf.

Respectfully submitted,

J. N. TATE,
Superintendent.

APPENDIX.

CIRCULAR OF INFORMATION.

This is a free unsectarian school, established and supported by the state, for the education of children who, by reason of deafness, are unable to be educated in the public school.

Board, care and instruction are free, but parents and guardians must provide clothing and traveling expenses. A deposit of not less than five dollars is required at the beginning of each school year.

Counties from which pupils come will render assistance when needed for clothing and transportation. (Chapter 205, section 7, General Laws 1887.)

Deaf children residing in Minnesota are admitted after they are eight and until they are twenty-five years of age.

The regular course of instruction embraces ten years. In emergencies a longer time is granted.

The course of study embraces that pursued in the public schools with some modifications in order to adapt it to this special work. In addition to this, a number of industries are taught.

We have an oral department in which pupils are taught to speak correctly and to read the lips.

No provision is made for the support or care of children during the summer vacation; during this time parents are expected to take charge of their children.

The proper time for pupils to enter the school each year is at its opening on the second Wednesday of each year. The school closes on the first Wednesday of June.

All applications for admission to the school, all money for pupils and letters of inquiry should be made to

J. N. TATE,

Superintendent School for the Deaf,
Faribault, Minn.

SCHOOL FOR THE BLIND.

REPORT OF SUPERINTENDENT.

Biennial Period Ending July 31, 1904.

Gentlemen: I have the honor to present the report of this school for the period of two years beginning August 1, 1902, and ending July 31, 1904, being the thirty-seventh and thirty-eighth annual sessions of the school.

ATTENDANCE AND TEACHERS.

During the school year 1902-3 there were in attendance 83 pupils, of whom 51 were males and 32 were females. There were admitted during the year 17 pupils who had not previously attended this school.

During the school year 1903-4 there were in attendance 91 pupils, of whom 48 were males and 43 were females. There were admitted during the year 17 pupils who had not previously attended this school.

During the biennial period there were in attendance 105 pupils, of whom 59 were males and 46 were females. From the opening of the school in 1866 there have been admitted 328 different pupils.

With a single exception no changes have been made in the teaching force during the biennial period. On the first of March, 1903, Miss Nancy Buskett was obliged to give up the position of head music teacher on account of failing health and she was succeeded by Miss Ernestine Safford. Miss Emma Brandeen has been employed during the two years as music tutor while pursuing her studies further in the school.

At the close of the school year 1903-4 Miss Grace E. Beardsley resigned her position as primary teacher and Miss Marie Beckos has been employed in her place for the current year.

The kindergarten work has this year been placed in the hands of Miss Anna Stubstad, leaving the former kindergarten teacher to devote her whole time to manual and industrial training. These young ladies come to us with excellent preparation and experience in the work of teaching and good results may confidently be expected of them.

HEALTH.

During the first year of the period no cases of contagious disease occurred in the school and no cases of such severe illness as to call for the use of the hospital. During the winter of 1903-4 the scarlet fever prevailed extensively in the city of Faribault and was quite virulent in type. In January three cases appeared at the same time in the school, but prompt isolation and great care prevented the further spread of the disease at that time. Again in April another case occurred which was treated in the same way and with equally satisfactory results. The patients all made good recoveries with no serious results. No other cases of contagious disease occurred during the year 1903-4 and no cases of dangerous illness of any other kind occurred.

SCHOOL WORK.

The work of the school has been carried on substantially in accordance with the course of study given herewith. At the close of the school year 1902-3 Raymond Dart and Helmer Nerby received the regular diplomas for the completion of the High School course. A special course was completed by Peter Oren. At the close of the school year 1903-4 Paul Miller and Emma Redemann received diplomas for the completion of the High School course.

During the two years classes have been maintained in the following subjects in the literary department:

New York Point Reading,
Spelling,
Etymology,
Grammar,
Composition and Rhetoric,
Latin,
German,
Geography,
United States History,
General History,
English History,
Physiology,
Physics,
Chemistry,
Astronomy,
Geology,
Elocution,
Typewriting,
General Reading,

Botany,
Zoology,
Number Work,
Mental Arithmetic,
Practical Arithmetic,
Algebra,
Plane Geometry,
Solid Geometry,
Civics and U. S. Constitution,
History and Constitution of Minnesota,
Political History,
Political Economy,
Psychology,
Ethics,
Sociology,
New York Point Writing,
Kindergarten.

Instruction has been given in the following subjects and instruments in the music department, during the period under consideration:

Piano,
Cabinet Organ,
Pipe Organ,
Violin,
Viola,
Violincello,
Double Bass,
Flute,
Clarionet,
Cornet,
Trombone,
Orchestra,

Singing Classes,
Vocal Training,
Musical Notation in New York Point,
Harmony,
Counterpoint,
Musical History,
Piano Tuning,
Piano Repairing,
Piano Construction,
Musical Acoustics,
Organ Tuning,
Organ Repairing.

In the industrial department work and instruction have been carried on in the following branches:

Bead and Fancy Work,
Knitting,
Hand and Machine Sewing,
Hammock and Net Weaving,

Sloyd and Wood Turning,
Broom and Whisk Making,
Mattress Making and Repairing,
Rafia and Reed Work.

ADDITIONS AND IMPROVEMENTS.

The library department and the general work of the school have profited greatly by the extended additions which have been made to the library and by the more complete organization of the library which has been made during the last year.

The appropriation for library purposes made by the last legislature enabled us to expend \$900 in the purchase of much needed books in raised print. A similar amount will be expended during the present year and when this is done our library will compare favorably with those of the best institutions of the kind in the country. A library room has been fitted up with the necessary stacks of shelves and regular issues are made to all who may wish to draw books. By a recent act of congress books in raised print can now be sent by mail free of charge. This enables us to supply our pupils with reading matter during the summer and to furnish reading matter to such blind people throughout the state as may desire it. This act together with the full supply of books, now, and soon to be, available in our library promises to be of great value to the blind of the state.

In the music department two Schimmel pianos have been added to our equipment. As several of our pianos are old and one or two practically worn out these are hardly more than replacements. Our supply of small instruments has been kept good by purchases from the same appropriation.

The special appropriations for improvements and repairs have been almost entirely expended in the renovation of the buildings, but they have been inadequate to keep them in all respects in a proper condition for use.

Just at the close of the last year of the biennial period bids were solicited for the construction of the long needed boy's dormitory building in accordance with plans and specifications prepared by Clarence Johnston, state architect. The contract for its construction was awarded to O'Neil & Son of Faribault, and the building is now well on toward completion. It is expected that it will be ready for occupation by or soon after the first of next January.

NEEDS AND RECOMMENDATIONS.

The occupation of the new boys' building will make necessary many changes, for which considerable appropriations will be needed.

It is hoped that the present boiler arrangement will by hard pressure carry the heating of the old and new buildings through the portion of the winter that will remain after the new building is occupied, but it is certain that it will not be safe to rely upon this as a permanent arrangement. A balance of some \$800 of a former appropriation for a boiler can be utilized for the increase of heating facilities, but at the time of the installation of a new boiler radical changes should be made in the boiler room and in the arrangement of the boilers. The boiler room itself should be extended to take in the present coal sheds, its floor lowered about two feet to secure surer return drainage, and the present boilers should be reset to harmonize with the new arrangement of the room and to permit the addition of other boilers without further change as the expansion of the school may demand. The excavation for and construction of new coal sheds will also be made a necessity by the foregoing change. Not less than \$4,000 should be asked for in order to complete satisfactorily this work. If this appropriation could be made immediately available the work on it could be begun early the coming season and thus ensure its completion before the opening of the next school year.

As I have already intimated, the standing appropriations for repairs have not been adequate to maintain our present buildings in an entirely satisfactory condition. In my last biennial report I called attention to the necessity for more adequate fire protection, to replace worn out material and to extend the scope of protection by additional standpipes and hose and such other protection as might be needed. I also called attention to the necessity for the replacement of much of the electric wiring in the building on account of its antiquated and unsafe methods of placement. These needs still remain and in addition to them there is a demand, equally

pressing if not more so, for the replacement of a considerable portion of the plumbing of the center building and north wing. The recent report of the commission appointed by the Governor to inspect the condition of the various institution buildings calls forcible attention to the above needs. The change of use of much of the present building caused by the removal of the older boys to the new building will necessitate the expenditure of considerable sums in this readaption and incidentally in the replacement and renovation. For all these purposes the head of the State Commission informally and unofficially suggested that the sum of \$10,000 would be needed. In my opinion this sum could be wisely expended in the above mentioned ways, while the most conservative estimate would demand the immediate expenditure of not less than \$6,000.

The terrace overlooking the main road leading to the school is a menace to the safety of the pupils, as a fall of some thirty feet to the rock gutter below, which is always a possibility, would have serious if not fatal results. This has been guarded against heretofore by the erection of a temporary poultry netting fence for the most dangerous portion of the terrace and by forbidding the pupils the use of the rest of the adjacent grounds. Such an arrangement is necessarily transient and unsatisfactory. A five-foot steel fence of close pickets should be placed along the entire brow of the terrace, a distance of about 450 feet. This could probably be constructed for \$600.

The location of the new boys' building is such as to make necessary some grading and improvement of grounds, for which \$500 would probably be sufficient.

The old Faribault building which is attached to the north end of the present buildings is constructed of wood and is about fifty years old. Its location, deeply in the shade of the other buildings, makes it undesirable for use for regular school purposes, and its construction makes it a menace to the other better built structures to which it is attached. Further, its interior is in bad repair and would call for a large expenditure to make it at all suitable for school use. It cannot, however, be dispensed with unless other provision is made for the varied purposes for which it is now used. I would suggest that it be removed from its present location and placed in the rear of the boiler house near the brow of the west bluff and there be used for a laundry building, for which purpose little interior change and expenditure would be necessary. It is universally recognized that the present laundry is inadequate and ill adapted to its use. The Faribault building, located as suggested above, would be admirably adapted for laundry purposes and would be so situated as not to endanger other property if it should take fire. The present laundry room would then be used for the purposes that the basement of the Faribault building is now used, that is for cold storage and for scultery and other kitchen purposes. The loss of the other two floors

of the Faribault building would have to be compensated for elsewhere.

I propose that for this the present Superintendent's cottage be taken as a cottage for the larger girls, thus relieving the other buildings and compensating for the room lost in the removal of the Faribault building. The Superintendent's cottage is located on the girl's grounds sufficiently near the other buildings for practical purposes, and is so arranged within as to serve very well for the use proposed. For the removal of the Faribault building and the equipment of it and the Superintendent's cottage for the proposed purposes I recommend the appropriation of \$1,000.

Such changes further necessitate the provision of a new cottage for the Superintendent. It has long been recognized that the present arrangement was only temporary, both because of the location and character of the structure. An opportunity now presents itself to make permanent and adequate provision for the Superintendent and at the same time greatly improve the facilities of the institution in other lines as has already been indicated. I therefore recommend that the present superintendent's cottage be so transferred and that a new cottage be erected in such a location as to be suitable in its relations to the whole school plant.

The sum of \$6,500 will be needed to construct the new building and provide for its heating, plumbing, and water and sewerage connections.

For the equipment of a typewriter class room with typewriters and enclosing desks the sum of \$550 is recommended.

For musical instruments and library supplies the sum of \$500 for each year of the coming biennial period, or \$1,000 in all, is recommended.

The ordinary repair and improvement fund of \$1,000 for each year should be continued as heretofore and the current expense appropriation should be increased \$1,000 for each of the two years, making a total of \$23,500 for each year.

The following statement summarizes the above recommendations, together with a statement of the years in which they should be made available:

SPECIAL APPROPRIATIONS.

For the year ending July 31, 1905—

For boiler house and coal shed reconstruction, equipment, and steam connections	\$4,000.00
---	------------

For the year ending July 31, 1906—

Repairs and remodeling of present buildings.....	\$6,000.00
Steel fence for terrace border.....	600.00
Removal of Faribault building and readaption of it and superintendent's cottage	1,000.00
Grading and improving grounds	500.00
New cottage for superintendent	6,500.00

SPECIAL APPROPRIATIONS.—Continued.

Typewriter room equipment	550.00
Musical instruments and library supplies.....	500.00
Ordinary improvements and repairs	1,000.00
	<hr/>
	\$16,650.00
For the year ending July 31, 1907—	
Musical instruments and library supplies.....	\$500.00
Ordinary repairs and improvements	1,000.00
	<hr/>
	\$1,500.00
	<hr/>
Total special funds	\$22,150.00

CURRENT EXPENSE APPROPRIATIONS.

For the year ending July 31, 1906—	
In addition to standing appropriation of \$12,000.....	\$11,500.00
For the year ending July 31, 1907—	
In addition to standing appropriation of \$12,000.....	\$11,500.00

REMARKS AND ACKNOWLEDGMENTS.

An interesting three days' session of the American Association of the Instructors of the Blind was held in St. Louis, July 20, 21 and 22, which it was my privilege to attend. A large number of superintendents and teachers of the blind were present and the meetings were of more than ordinary importance and value.

During the biennial period books and apparatus have been received from the American Printing House for the Blind of Louisville, Ky., to the value of \$394.93 as our proportion of the annual subsidy of \$10,000 granted by the United States government to the schools for the blind of this country.

We are also under renewed obligations to the Society for Providing Evangelical Literature for the Blind for several copies of the Sunday School Weekly in New York point character throughout the period.

Our thanks are due the publishers of the Faribault Republican and Pilot for the donation of their respective papers to the school.

I desire in closing this report to give expression to my appreciation of the conscientious devotion to the duties entrusted to them which has characterized the officers and teachers of the school during the past two years.

Respectfully submitted,

JAMES J. DOW,
Superintendent.

The cash receipts for the years have been derived from the following sources:

	1902-3.	1903-4.
Brooms	\$987.65	\$553.30
Bead and fancy work.....	50.96	42.90
Hammock and basket work.....	35.38	27.94
Farm	86.36	51.60
All other sources	78.56	188.67
Totals	<u>\$1,238.91</u>	<u>\$864.41</u>

The products of the farm, garden and shop which have been consumed by the school or are on hand for consumption, are as follows:

	1902-3.	1903-4.
Milk	\$146.36	\$183.73
Vegetables	162.06	192.04
Meat	140.19	99.26
Brooms and whisks	14.90	15.00
Hay	72.00	90.00
Totals	<u>\$535.51</u>	<u>\$580.03</u>

Below is given a statement of the receipts and expenditures of pupils' funds:

COUNTY FUNDS.

Balance		\$204.99
Amount received		673.23
Amount disbursed	\$793.78

THIRTEENTH BIENNIAL REPORT
 OF THE
BOARD OF REGENTS
 OF THE
UNIVERSITY OF MINNESOTA.

University of Minnesota,
 Office of the Board of Regents,
 Minneapolis, Dec. 12, 1904.

The Board of Control of State Institutions.

Gentlemen: I have the honor, in behalf of the Board of Regents, to submit herewith the thirteenth biennial report of the Board of Regents of the University for the biennial period ending July 31, 1904.

Very respectfully your obedient servant,
GREENLEAF CLARK,
 President.

ATTENDANCE.

The attendance for the last three academic years, in the several departments is shown in the following table:

TABLE OF ATTENDANCE.

	1901-2	1902-3	1903-4
College of Science, Literature and the Arts.....	1,179	1,215	1,252
College of Engineering and the Mechanic Arts.....	345	394	397

Duplicates	64	50	31
Totals less duplicates.....	3,656	3,788	3,846

CURRENT EXPENSE.

The total amount in the state treasury to the credit of the general university fund, in the fiscal year ending July 31, 1903, was \$442,042.06. The amount expended in the same year, including bills incurred before but paid after its expiration was \$451,121.21, showing an excess of expenditure over actual receipts of \$9,079.15—a deficit. The total amount in the treasury to the credit of the same account in the year ending July 31, 1904, was \$472,659.45, and the expenditures in the same year, including bills incurred before, but paid after its expiration was \$463,586.24, an excess of receipts over expenditures of \$9,073.21—a balance. The estimates of the amount which will be available for the several departments of the university in the fiscal year are subject to three contingencies; the amount that will be paid into the state treasury from tax collections, upon which our income partly depends, and more especially the time of such payments; the amount that will be received from tuitions and fees; and the amount that will be received from the sales of agricultural products. The apparent balances against the university at the close of the fiscal year are wholly or largely due to the failure of some of the counties to pay into the state treasury the taxes due to the state on the June settlement, till after the close of the fiscal year. That of 1902-3 is due in part to a depression in tuition receipts, but more largely to the failure of counties to make seasonable tax returns, and that of 1903-4 is due wholly to the latter cause. These balances adjust themselves, or are readily adjusted, by the operations of the succeeding year; so that there need be no difficulty in keeping the expenditures, for all practical purposes, within the limit of our income, though it may be at the expense of efficiency. Moneys coming into the treasury for the benefit of the university, from the June tax settlement, and from the federal government under the Hatch and Morrill bills, and for interest on a part of its permanent fund, constituting together a considerable part of our income, are not received until after the close of the academic year. This necessitates the borrowing of money by the university, in the winter and spring months, to meet its current expenses. It is suggested that this necessity may be avoided, and interest saved, by the enactment of a law authorizing the temporary transfer, to a limited amount, and under proper supervision, of moneys from the general revenue fund to the general university fund. The state auditor is of opinion that this may be done without embarrassment to the treasury. The paramount need of the university is more means for its current expenses. There is a constant struggle to supply things that are needed for educational work and for experimentation, and still keep within the limit of our resources. It is incumbent on us to say that economy now verges on, if it has not reached, the stage of waste. The growth of the institution has been so rapid that it has been difficult, not only for the legislature, but for the management, with the best intentions, to keep pace with

the development. A comparison was instituted last year with the other state universities, as respects the ratio of expenditure for current expenses to the number of students, not for the purpose of basing on it an estimate beyond the requirements of strict economy, but to emphasize the necessity of more means for current expenses to keep the institution up to the standard of the day, and make it effectual for the realization of the expected beneficial results of its work. The following table shows the results of such comparison. It is compiled from information obtained directly from the presidents of the universities of the states named therein respectively, and contains all the universities from which replies were received, except the University of Missouri, in the appropriations for which current expense is so combined with the expenses of equipment of buildings and laboratories, the purchase of books, the grading of the campus, and other purposes, that the amount appropriated for current expense cannot be eliminated. Enrollment in summer schools is included in the number of students in the respective institutions, and there is included under the heading "Appropriations for Current Expenses" the entire amount available for such purpose, whether derived from direct appropriations, from estimated avails of an annual tax, from the federal government, from interest, from tuitions, or any other source:

COMPARATIVE TABLE.

State Universities.	Number of Students 1902-03.	Appropriations for current expenses 1903-04.	Per capita appro- priations for current expense
Wisconsin	2,870	\$529,000	\$184.32
Michigan	3,792	708,500	186.84
Kansas	1,294	194,650	150.42
Indiana	1,416	290,000	197.41
California	*3,922	583,000	148.67
Illinois	†3,289	500,000	152.02
Nebraska	2,560	335,000	138.67
North Dakota	‡493	73,000	148.07
Ohio	1,735	400,000	230.54
Iowa	1,442	240,000	166.43
Minnesota	3,788	481,900	127.21

The figures 481,900 for Minnesota are obtained by adding to the amount in the state treasury in the year 1904 \$443,629.41, the amount unpaid by delinquent counties, \$38,263.53—\$481,892.94.

*Including all affiliated departments in San Francisco, except Mark Hopkins Institute of Art, which receives no state aid. These affiliated departments are all self-sustaining, except the Medical School.

†Including professional schools at Chicago which are self-sustaining.

‡Of whom 125 were in preparatory department.

Collections from tuitions and fees increased from \$90,658.03 in the year ending July 31, 1901, to \$104,000 in the year ending July 31, 1902, to \$104,915.39 in the year ending July 31, 1903, and to \$125,048.50 in the year ending July 31, 1904. These increments

are due in part to increased attendance, and, in part, to a readjustment of the rates of tuition. The policy of the management is, to impose the highest rates of tuition upon students of the professional colleges, and students of the other departments whose education on special lines in applied science and the industrial arts, qualifies their graduates to enter at once upon the work of their professions; and to impose light tuitions upon students in the other departments. In the judgment of the board it will not be judicious or wise, at least for the present, materially to increase the rates of tuition as now established; and consequently no further increase in the revenues from this source is to be expected in the future, except such as arises from an increase in the attendance. The following table shows the yearly rates of tuition as now established in the several departments:

TABLE OF TUITION RATES.

	Residents.	Non-Residents.
The College of Science, Literature and the Arts....	\$20.00	\$40.00
Graduate students	10.00	10.00
The School of Chemistry.....	30.00	60.00
The College of Engineering and Mechanic Arts....	30.00	60.00
The School of Mines.....	30.00	60.00
The College of Agriculture.....	20.00	40.00
The School of Agriculture.....	5.00	10.00
The Dairy School.....	15.00	15.00
The short course for farmers.....	10.00	10.00
The College of Law.....	60.00	60.00
Matriculation fee (payable but once).....	10.00	10.00
Graduate students	30.00	30.00
College of Medicine and Surgery.....	100.00	100.00
College of Homeopathic Medicine and Surgery—		
First and second years.....	100.00	100.00
Third and fourth years.....	80.00	80.00
College of Dentistry	100.00	100.00
College of Pharmacy—		
First year	75.00	75.00
Second and third years	80.00	80.00
Diploma fee	10.00	10.00
Summer School—Elementary section		5.00
Summer School—University section	5.00	10.00

In addition to the tuition, fees are charged to cover the expense of material and breakage in laboratory work.

Nearly two-thirds of the current expenditures of the university are for salaries and wages. The salaries of professors and instructors have always been, and now are, low; and it is more and more evident, as stated in our last report, that some raises must be made, from time to time, not only in justice to a class of devoted and accomplished men, but to hold our men; in other words, to prevent the most valuable and useful from going to other institutions at higher salaries. It is degrading and detrimental to the university to place it in the position of a training ground for the trial, test

and proof of men in its faculties for the benefit of other institutions. Just and judicious administration will therefore require more money for the salary list, not only for the reasons above stated, but because an increase of registration from year to year renders imperative an increase in the teaching force.

After careful and conservative estimates, the board begs to represent, that in their judgment, the judicious, salutary and economical administration of the university will require for current expenses in the next biennial period, not less than \$100,000 per year in addition to receipts from all other sources.

THE COLLEGE OF SCIENCE, LITERATURE AND THE ARTS.

The growth in this, the oldest and largest of the several departments, is steady and constant. Its registration has increased from 941 in the year ending July 31, 1900, to 1,252 in the year ending July 31, 1904. Its culture is general, rather than on specific lines. It aims not only to bestow upon its students general knowledge in science, literature and the arts, but to train the mind, and to develop mental and moral power in the individual, and thereby to disseminate reflected beneficial influence in the community. Its course of study is practically the same as that which, up to a comparatively recent date, constituted the exclusive work of the old and renowned educational institutions of the country. The old main building, for many years the only one on the campus, and which in later years has sheltered this department, was totally destroyed, together with its contents, by fire in September last. As a consequence the sub-departments of English Language and Literature, Greek Language and Literature, Latin Language and Literature, German Language and Literature, Scandinavian Language and Literature, French Language and Literature, Political Economy, Rhetoric, History and Mathematics are now without a home. The various classes have been provided for as best they could be, and professors, instructors and students are courageously and with admirable spirit going on with their work under great and perplexing disadvantages. The insurance on the building was \$58,000, and on the contents \$5,000, all of which has been collected. The amount collected on the contents has, from the necessity of the case, been used to replace, as far as it would go, department books and other things necessary for constant use in the instructions of the several classes.

As stated in our last report the building had become congested and inadequate for its uses; and more room for the department, and for desirable enlargement in the scope of its work, had become a pressing need. A new building to accommodate this great, important and growing department, must needs afford much more room than the one which has been destroyed. And in this connection we beg to call your attention to the expediency of constructing better buildings at the university than has heretofore been the general

custom; and to the prevailing sentiment throughout the country that public buildings, built for time, and intended to endure, should, in the interest not only of safety, but of true economy, be solidly constructed and fireproof. It is estimated that such a building, large enough to accommodate the department and meet its coming needs, cannot be erected for less than \$425 000 in addition to the \$58,000 received from insurance, and we respectfully recommend that an appropriation of that amount be made for the construction of a new main building to become available at the earliest practicable time.

THE COLLEGE OF ENGINEERING AND THE MECHANIC ARTS.

The policy of the management has been to raise the educational standard in this college, as well as others, rather than to increase the number of its students; and the rules to that end have been more rigidly enforced in the last decennium than ever before. At the close of the year 1902-3 the department of design and industrial art was abolished, not so much from the want of appreciation of its desirability, as with the object of saving the expense of it. Notwithstanding the policy above mentioned, and the abolition of the school of art, the number of students in the college increases steadily from year to year. In 1901-2 the attendance was 327 in all departments; in 1902-3 it was 373, and in 1903-4 the attendance more than made up for the loss of art students, and reached 384. There has been but slight increase in expenses in the year last past over the preceding year, but if the attendance continues to increase it will be necessary to add to the corps of instructors.

One of the most important events of the past two years to be noted is the recent creation of a department of municipal and sanitary engineering. It was found that it would not add greatly to the expenses of the college, and that modern conditions demanded it for the conservation of the comfort, health and life of our citizens. Much needed equipment in the engineering department and repairs to its work shops, and additions to its electric plant, now being made out of the appropriation for these objects, which became available in the year ending July 31, 1905, will be of great aid in the work of the department, and will add greatly to the facilities for affording light from our own resources. The dean of the college reports a noticeable improvement in scholarship of its students.

A recent fire in the mechanic arts building damaged the building to the amount of \$1,409 and destroyed contents of the value of \$3,646.30, all of which loss is covered by insurance. It is proposed to apply the insurance money, when collected, to the restoration of the building and the replacement of the equipment destroyed. The contents destroyed were mostly the equipment of the laboratory for mechanical practice in the basement. Before the fire occurred the board had determined upon the wisdom of removing the laboratory

from the basement of this building, where it had outgrown its accommodations, and was a disturbance to the other work of the building, to an addition to the power plant building of 40x60 feet, to be constructed at an estimated cost of \$20,000. Out of the appropriation of \$40,000 by the last legislature "for equipment and repairs in engineering department and electric light plant," \$10,000 was allotted for the enlargement of the electric light plant. It is found that while this sum will be sufficient to provide a plant adequate for the present demands, yet such plant will not be large enough to afford in addition light to the new bacteriological building and other buildings now about to be constructed, and that true economy requires that the addition to the plant be made large enough for these additional requirements, which will enhance its cost to about \$15,000. To accomplish these objects and to afford the contemplated and much needed addition to the equipment of the department, including some additional equipment for such new addition, will require \$10,000. We therefore recommend that an appropriation of \$20,000 be made for an addition to the power plant building for a laboratory for mechanical practice, and additional general equipment in the department.

THE SCHOOL OF MINES.

The new School of Mines building has been completed, and the equipment made possible by the appropriation of 1903 has been installed. More elaborate and efficient instruction has been the outcome of these much needed improvements. The high standard of attainment required for a diploma in this school has given it a high rank, and its graduates are in demand for responsible positions.

In order to keep the school up to its avowed standard of excellence, it is necessary that it be supplied, from time to time, with the latest and most efficient machinery and apparatus. The rapid development in metallurgical lines makes this imperative. Prof. Appleby, the dean of the college, than whom no one is better informed, says that no other engineering lines are characterized by so radical and evolutionary changes (naming as an instance the cyanide process, which revolutionized the treatment of gold ores); and that antiquated machinery and apparatus, and obsolete processes, cannot develop a successful engineer. The constantly recurring expense of such new and improved machinery and apparatus should not be charged to, and so help to deplete, the current expense fund.

It is considered that \$2,000 per year will meet the requirements in this regard, and we respectfully recommend that an annual appropriation of that amount be made for apparatus and machinery in the School of Mines.

THE COLLEGE OF LAW.

The addition to the Law School building has been completed and equipped out of the appropriation of 1903 for the purpose.

This much needed improvement has accomplished its object, and placed the school upon a satisfactory basis, as respects its accommodation. The number of students has constantly increased, notwithstanding the requirements for admission are more rigidly enforced, and qualifications for a degree are more closely scrutinized, till the attendance in the year last past reached 535. If all the students of the school graduated, and engaged in the practice of the law, there might be ground for a contention that the profession did not require so many men, and the night classes might be abolished; but there are many young men who purpose to engage in other pursuits, who attend the law school for the knowledge of the rules of business, and the mental discipline it affords; and inasmuch as the law school is self sustaining, and the tuition paid by these men covers the cost of their instruction, it is not deemed wise or judicious, for the present, to restrict the facilities now afforded. There is, however, a strong sentiment in the board in favor of the adoption of higher requirements for admission, and a higher standard of attainment for graduation, at no distant day.

THE COLLEGE OF MEDICINE AND SURGERY.

The increase, three years ago, of minimum entrance requirements to one year of college or university academic work, in addition to a high school degree, has reduced the number of students from 362 in the year ending July 31, 1902, to 266 in the year ending July 31, 1904; and a further reduction to about 200 is anticipated from the same cause, from which point its registration will probably gradually increase. As a result of the advanced requirements, the quality of the student body has improved in a gratifying degree. There is a strong sentiment in the faculty, with which the Board of Regents are in sympathy, in favor of adding another year of academic work to the entrance requirements at an early day, which will place the school upon a higher plane of scholarship than any of the medical schools of the country except Harvard and Johns Hopkins.

Since the last report a system has been put in operation, which co-ordinates the course of the College of Science, Literature and the Arts with that of the Medical Department, so as to admit of the completion of both courses in six instead of eight years. Thirty-six students registered in this course the first year, and beneficial results are confidently expected from the innovation.

The didactic work occupies the time of the professors and instructors to such a degree, that less opportunity is afforded than is desirable for investigation and research; still some creditable work has been done in these lines.

Quite extensive examinations have been made by the Departments of Pathology and Bacteriology and of Medical Chemistry, in collaboration with the State Board of Health and local laboratories,

of the water supply and sewage disposal of the public institutions and cities of the state. The most important achievement in the line of research in the last year is the discovery of the cause of "spotted fever," a disease which has been the scourge of certain sections of Montana and Idaho for twenty years, and whose mortality has been from 70 to 80 per cent. The work was undertaken for the Montana Board of Health by Drs. Wilson and Chowning of the Pathological and Bacteriological departments. Their researches have shown that this disease is due to an animal parasite which is present in the blood and organs of the afflicted patient, and belongs to the same family to which Texas fever in cattle is due. A study was made of its method of transmission, and such facts divulged in regard to the disease and its transmission as will lead, as it is hoped, to effective preventative and remedial measures. The results of the investigation have been promulgated in the medical journals.

The introduction of a laboratory for the Pasteur treatment and study of hydrophobia is contemplated.

The co-ordination of the State Board of Health, of which Prof. Wesbrook is the bacteriologist, and the university department of pathology and bacteriology, of which he is the head, is helpful to both. They have much in common, owing to the similarity in the phases of their work. The routine and research work of the health department, involving public health problems, results in the accumulation of material of no further use to them, but valuable for museum collections and for instruction, and familiarity with laboratory processes of practical investigation is of great value and importance to medical students, who, after their graduation, are in demand for health officers. No pains have been spared in planning the new bacteriological building. Prof. Wesbrook visited the best laboratories, not only of this country, but of Europe, where he was cordially received and afforded every facility to examine and to take descriptions and photographs of laboratories, their arrangement and equipment. It is designed that this building shall contain the laboratories of pathology, bacteriology and hygiene of the university, and the laboratories of the State Board of Health, constructed and equipped so as to meet the most modern and approved requirements. It is expected that these laboratories will become an important center of knowledge, training, research and authority, as respects not only the investigation of diseases of the human family, but of animals as well, where diseases are common to both, though the investigation of the diseases of the latter is not now directly in charge of the health department.

It is expected that the new building will be completed in the year 1905. This will necessitate a further appropriation for its equipment by the next legislature, so that the laboratories may be available for use immediately after the completion of the building. The last legislature appropriated \$5,000 for its partial equipment; and it is estimated that in order to equip the building and its labora-

tories up to the most modern and approved standards will require a further appropriation of \$25,000 and we recommend that it be made. There is need of a new animal building to take the place of one which became dilapidated and has been torn down, to breed animals for use in the laboratories. Such animals cannot be obtained from other sources when required and in sufficient numbers. We recommend that an appropriation of \$2,500 be made for such a building.

COLLEGE OF HOMEOPATHIC MEDICINE AND SURGERY.

The number of students in this college in the year 1899-00 was 24; in 1900-1, 27; in 1901-2, 20; in 1902-3, 18; in 1903-4, 14. At the meeting of the board held Oct. 1, 1903, the requirement then in force, of one year's college or university academic work in addition to a high school degree, for admission to the medical schools, was, at the earnest solicitation of the homeopathic faculty, suspended for a period of two years, as to the School of Homeopathy. The reason assigned for this action was the serious effect the advanced requirement was having upon the patronage of the school.

An informal effort was made by the board to unite the two schools, by establishing in the College of Medicine and Surgery a chair for teaching the materia medica and therapeutics of the homeopathic school, and giving the medical students opportunity to attend upon the instruction of both chairs, or to elect between them. Some of the prominent physicians of both schools were disposed to favor the plan; but the State Homeopathic Medical Society took action in the matter, and decidedly opposed the innovation.

COLLEGE OF DENTISTRY.

Nothing is needed but the necessary facilities to make this department of high order. The conditions remain the same as set forth in our last report. The qualifications for admission are fully up to the general standard of such institutions; the curriculum contemplates a thorough course, and its faculty are faithful and efficient. Its students pay a tuition of \$100 per year, and collections from the infirmary amounted in the last year to \$10,676.23. These collections are from charges, at low rates—much below standard prices—for work done by the students, under the inspection of the professors and instructors, for patients, who are able to bear a part, but not the whole, of the ordinary expense.

It was the purpose of the board to recommend the construction and equipment of a building to accommodate this department and the College of Pharmacy, which is in like predicament as respects facilities. With such accommodations it is thought the two colleges would soon become self sustaining. But the necessities of the university growing out of the destruction of the main building are so

great and urgent that we refrain from such recommendation, and the department must continue to struggle along, as best it may, for a while longer, unless the legislature in its wisdom shall otherwise determine.

THE COLLEGE OF PHARMACY.

There has been no change as respects the accommodations of this department since our last report. The great needs are more room and more laboratories. The course of study requires more laboratory work than most other courses, from the nature of the subject. The curriculum is of a high order, and notwithstanding the drawbacks above mentioned, and the depressing influence of hope deferred, the faculty and students under the example and inspiration of Prof. Fred J. Wulling, the dean of the school, have gone on, with the most admirable patience, courage and spirit, to do the best they could, and with results much better than could be expected. The members of the senior class, as a rule, are in demand for responsible positions several months in advance of graduation.

It is hoped that some additional accommodations and facilities may be afforded this department after the completion of the bacteriological building.

DEPARTMENT OF AGRICULTURE.

This department has continued, with success, its important work during the last two years, though somewhat crippled in its experimental work, in common with other departments of the university, by lack of means. Its registration increases steadily and constantly from year to year, and no reason is apparent why such increase should not continue in the future. The number of students in the College of Agriculture is now 30, a desirable increase, because it affords a more adequate resource for scientific men for instruction and research. The dean of the department states that it has now enrolled the largest number of strictly agricultural students found in any American institution. The farm and station have continued their work of hybridizing, growing and distributing new varieties of wheat, flax and other grains; of developing and testing the utility of different varieties of fruits; of elucidating and disseminating methods for improving and conserving the fertility of soils; of experimental and practical application of the best methods of dairying; of the development and test of grasses and vegetables; of practical instruction in the useful mechanic arts; of investigation and instruction in farm management; the economic use of human and animal foods; the breeding and type of animals, and on other lines. The demonstrated usefulness of the school and station will obviously continue to attract students, and the general plant will, from time to time become, as other departments of the university have become,

congested, and require enlargement. Among the needs of the department is a steel water tank to replace a wooden one, which has been in use twelve years, and is now decaying. It is estimated that such tank with its tower and connections with the water system will cost \$5,500.

There is also needed a reel and hose for protection against fire, which will cost \$1,000. We recommend that appropriations be made for these objects.

It is found that the appropriation of \$250,000 to be raised by taxation pursuant to the act of the last legislature in this behalf, for the construction and equipment of a main building, a live stock building and the enlargement of the heating and lighting plant, will not be adequate for all these purposes. The live stock building has been constructed at a cost of about \$35,000. It is estimated that the cost of enlarging the heating and lighting plant will be \$20,000, and the cost of equipping the main building, when completed, will be about \$20,000. There will therefore be left, out of this appropriation, for the construction of the main building \$175,000. It is found that this amount is insufficient for the construction of a fire proof building planned to meet its requirements, and the State Board of Control is averse to any other than fire proof construction, with which view this Board is in hearty accord. It is estimated that to construct such a fire proof building large enough to meet present requirements, and planned with a view to its uses, and not in the grip of an inadequate cost price, will require an expenditure of \$250,000.

There is need of a girls' dormitory. The present accommodations are inadequate for the increasing numbers, and the Board, after thorough investigation and consideration of the subject, find no escape from the conclusion that the dormitory system at the school is, under present conditions, indispensable. The estimated cost of such a dormitory is \$30,000.

There is no adequate drill hall at the school for instruction in military science. Drill out of doors in the winter months, during which the sessions of the school are held, is impossible. Not only the importance of military training for our youth, but our obligations to the federal government admonish us that this matter should be no longer deferred. It is thought a suitable drill hall, which will answer the purpose of a gymnasium as well, can be built and equipped for \$40,000. The room now used for the purpose would then become available, with some alterations, for a much needed increase of facilities for mechanical work.

The barn accommodations for the dairy herd are inadequate for experimental and educational uses. On account of the rapid increase of students more dairy cattle are needed to furnish milk enough for class work. It is also deemed desirable that the dairy herd should be separated from the other stock. When the dairy hall is vacated by the Dean, and the subdivision of agriculture on

the occupation of the new main building, it will be necessary to rearrange the same, thus making increased accommodations for the dairy school. It is estimated that the cost of an additional barn for the dairy herd, the remodelling and equipping of dairy hall, and for additional silos needed will be about \$30,000.

The agricultural farm as now occupied consists of 256 acres owned by the State, and 173 acres of leased lands, of which 20 acres is leased from the Agricultural Society at a low rent. All of this leased land, or an equivalent acreage, is necessary for the school and for experimental purposes. Lands necessary for the school and station ought not to be held by such a precarious right of enjoyment. There is also a tract of land of about forty acres in such immediate proximity to our buildings as to be, as at present improved, a source of annoyance, and which would become of greater annoyance, and positive detriment, in case it should be used for more unsightly or uncouth purposes. Aside from the reason above stated, the acquisition of this land is justified for general uses.

This leased land, except that owned by the Agricultural Society, or in its place an acreage of say, 160 acres, as well as the tract of land last above referred to, ought in the opinion of the Board to be acquired for the use of the school and station by purchase or condemnation.

To supplement the former appropriation so as to admit of the construction of an adequate fire proof main building, and to provide means for the erection and equipment of a girl's dormitory, the construction and equipment of a drill hall and gymnasium, the construction and equipment of a dairy barn, rearranging and equipping dairy hall and for additional silos, and to defray the expense of the purchase or condemnation of additional lands for the use of the school and station, we beg respectfully to suggest a continuation of the taxation provided for in the act of the last legislature for such time as is necessary to secure means for the accomplishment of these ends.

WOMAN'S BUILDING.

There is a long felt need of a building on the campus devoted to the exclusive use of women, for rest, comfort, social intercourse, association meetings, and such other purposes as it may be found useful for.

The need of such a building is so strongly felt by the young ladies of the University that they have undertaken to raise the money necessary for its construction, through their own efforts; and by entertainments and other agencies have, after two years of effort now on hand a fund of \$1,000 for the purpose. It is evident that the burden of such an enterprise is too great for them, and that they should be relieved of it. They are ready, however, if such a building shall be erected, to assume the burden of furnishing it, which, with the fund now on hand, would seem to be within their resources.

THE GENERAL LIBRARY.

We beg respectfully to repeat the recommendation of our last report that an appropriation of \$5,000, available one-half in each year, be made for a subject catalogue, an indispensable agent in the useful employment of any general library.

The library has received no considerable acquisition to its strength in several years. The multiplicity of objects of expenditure, in the building up and development of the institution, have made it difficult, with the most generous intention, to satisfy all the needs as they arise. The general library needs to be brought up-to-date and strengthened by an addition of books.

In order that the expense of this may be distributed, and the perennial need of new and additional books may be supplied, we respectfully recommend that an annual appropriation of \$10,000 be made for additions to the general library, and of \$3,000 for the cost of periodicals, of rebinding books, and for incidental expenses.

ORDINARY REPAIRS.

We call attention to the usual appropriation for ordinary repairs. The appropriation for this object by the last legislature was \$10,000 per year, and the Board are of opinion that the appropriation of the same amount for each of the two next years will be sufficient.

MILITARY SCIENCE.

Lieut. Haydn S. Cole having, at his own request, been relieved, Maj. Geo. H. Morgan of the Ninth Cavalry was assigned by the War Department to the charge of the military instruction in the University in the spring of 1903. Instruction and drill have gone on at the campus, and at the Agricultural School, as heretofore, and a commendable amount of proficiency in the cadets is observable. The aim of the Commandant has been, in the language of his report, "To consider and treat the corps of cadets so far as possible as a volunteer regiment to be organized and instructed as quickly and efficiently as possible—the officers and non-commissioned officers thus being instructed in the duties and responsibilities they would be compelled to assume were they called upon by the government in case of war." We beg to call especial attention to the following recommendation of Major Morgan. He says that while it is not considered a hardship for the cadet, that he should furnish his own uniform, and that it would verge on paternalism for the State to furnish it; yet, that extra equipment for the commissioned officers and for the band and trumpet corps should be supplied as soon as possible; and he adds "That with care an outfit to cost not over \$600 would last for years, and might be considered a reasonable expense

for a regiment of 800 cadets." The Board concur in this view, and respectfully recommend that an appropriation of \$600 be made for the purpose above indicated.

ENDOWMENTS.

GILFILLAN TRUST.

The income received from this fund from its inception up to August 1, 1904, amounts to....		\$6,000.00
There has been returned to the fund for principal and interest on loans.....		267.56
		<hr/>
Total receipts		\$6,267.56
There has been loaned to 40 students.....	\$4,045.00	
There has been paid out for expenses:		
For record books and stationery....	\$19.94	
For rent of safe in deposit vault.....	17.00	
	<hr/>	36.94
Balance on hand August 1, 1904.....		2,185.62
		<hr/>
		\$6,267.56

The income from this fund is affording much needed assistance to students who are compelled to rely upon their own resources for their education, and there can be no doubt that the beneficent purpose of the donor will be realized.

Since August 1, 1904, applications for loans have been allowed but not yet made, to the amount of \$1,650—and there has been returned to the fund for principal and interest on loans \$52.50.

THE LUDDEN TRUST.

The Hon. John D. Ludden, by an indenture of trust executed in June, 1904, endowed the University of Minnesota with the further sum of \$5,000, to be held, invested, and reinvested, through its Board of Regents, and the income thereof to be collected, received and applied by said Board to the financial assistance of students of either sex in the School of Agriculture, in the same manner as is provided in his former deed of trust of the same amount; thus increasing his endowment to \$10,000. Mr. Ludden delivered into the hands of the Regents for the principal sum one Northern Pacific registered gold bond of the denomination of \$5,000, payable to "The University of Minnesota" in gold coin on the first day of January, 1897, with interest at four per cent per annum, payable quarterly in gold coin; being a bond of the same series as that delivered over for the principal of the first donation. The premium on the purchase of this bond was paid by Mr. Ludden, thus enlarging his donation. The income from this fund received up to August 1, 1904, amounts to \$450, and up to that date two students had been aided from it by gift, such being the provision of the trust, to the amount of

\$100, and \$3.75 was disbursed for account books, leaving \$346.25 to the credit of the income account at the commencement of the current year.

THE ELLIOTT SCHOLARSHIP LOAN FUND.

The income account from the inception of the trust to the close of the last fiscal year shows as follows:

Received from interest.....		\$750.00
Received for principal and interest on loans		315.00
		<hr/>
		\$1,065.00
Loaned to 13 students.....	\$1,015.00	
Paid for account book.....	3.00	
Balance August 1, 1904.....	47.00	
	<hr/>	
	\$1,065.00	

This endowment is for assisting young men in the School of Mines.

FENCE AROUND ATHLETIC FIELD.

Mr. Alfred S. Pillsbury has constructed around that part of the campus used as an athletic field, a substantial brick wall at an expense of \$15,000—a useful and valuable acquisition to the University.

OTHER DONATIONS.

Prof. E. W. D. Holway presented to the University for the herbarium a valuable collection of rust and other fungi, estimated to comprise, with duplicates, 10,000 specimens, and also a valuable mycological library.

Mrs. Martha S. Cutts donated \$500 to establish and maintain a prize in the College of Medicine and Surgery.

Mr. F. W. Sardeson, instructor in paleontology, donated to the University, in June last, a valuable collection of fossils.

The donations for scholarships, prizes, and other purposes made to the University prior to the last biennium, too numerous to mention in detail, have all been duly administered according to the directions of the several donors.

All of the endowments and donations, including Pillsbury Hall, the gift of the late John S. Pillsbury, have been conferred upon "The University of Minnesota," a corporation of which the Regents are the members, in trust to be managed and administered by its Board of Regents; and The University of Minnesota has accepted the several trusts and obligated itself for their faithful performance.

THE GEOLOGICAL AND NATURAL HISTORY SURVEY.

The natural history branch of the survey has continued to be the exclusive field of operations for the two years last past. The receipts and expenditures, in that period, and the condition of the fund at its close are shown as follows:

Balance to the credit of the fund August 1, 1902		\$47,791.84
Receipts in the year ending July 31, 1903:		
From salt spring land sales.....	\$16,650.75	
From sales of geological survey reports.....	85.55	
	<hr/>	16,736.30
Total receipts		\$64,528.14
Disbursements in the same year.....		<hr/> 18,337.13
Balance August 1, 1903.....		\$46,191.01
Receipts in the year ending July 31, 1904:		
From salt spring land sales.....	\$10,929.40	
From sales of geological survey reports.....	29.05	
	<hr/>	10,958.45
Total receipts		\$57,149.46
Disbursements in the same year.....		<hr/> 11,384.41
Balance August 1, 1904.....		\$45,765.05

Land contracts are now outstanding to the amount of \$7,869.33. Only tracts of Agricultural College lands, amounting to 40 acres, remain unsold, the estimated value of which is \$6 per acre.

THE BOTANICAL DEPARTMENT.

Field work has been prosecuted the last two years, on the north shore of Lake Superior, and in Hennepin, Dakota and Kandiyohi Counties. The funds at the disposal of the Board will not admit of much further general field work; so, with the exception of odds and ends, it may be regarded as completed. Preliminary reports of some of the work may be given, but most of it will be incorporated in the final report.

The accessions to the library of the department, during the biennium, amount to 1,486 bound volumes, and about 16,000 pamphlets. This is inclusive of the valuable mycological library presented to the University by Prof. E. W. D. Holway.

The herbarium has been increased in the two years, by the addition of 28,691 specimens, including the important collection of rust and other fungi presented by Prof. Holway, estimated to comprise, with duplicates, some 10,000 specimens. Since the last report the entire collection, for the purpose of its preservation, has been put through the carbon bi-sulphide preserving process, special tanks and methods having been devised for the purpose.

Two new parts of the "Minnesota Botanical Studies" have been prepared by the head of the department (who has undertaken the authorship of the whole series of his own motion) published, and disseminated, comprising 274 octavo pages and 28 plates, and at the suggestion of Prof. MacMillen, Prof. Freeman has undertaken the preparation of an untechnical treatise on the Plant diseases of Minnesota, the manuscript of which is now ready for publication. This publication will be of very definite and permanent value to the crop growers and gardeners of the State.

Since the last biennial report there have been discovered and announced through the botanical survey 147 varieties of plants, not previously known to occur in Minnesota, of which 9 are entirely new to science.

The prime necessity of this department is more room, as fully set forth in our last report, but its supply will not be urged at this time. There is, however, imperative need of a new plant house for growing and storing plants required for daily use in the class rooms, the old ones having become dilapidated and past repair. For the construction of such plant house and the necessary equipment, including pipes and connections for heating, we recommend an appropriation of \$10,000.

THE ZOOLOGICAL DEPARTMENT.

The field work in this department has been limited to such matters as were immediately related to the final report on the birds and fishes of the State, now in course of preparation, and the funds remaining from the proceeds of the sales of the Salt Spring lands will not justify its further general prosecution. The manuscript for the final report on the birds and fishes is in an advanced state of preparation, and its publication now only awaits the preparation of the illustrated plates. The stored specimens and material have been thoroughly overhauled and are found in a condition to be utilized. There is the same need in this department, as in the botanical department, of room to preserve and utilize the results of the survey.

CARE OF CRIPPLED AND DEFORMED CHILDREN.

This work was intrusted to the Board of Regents by the provisions of Chapter 289, Laws of 1897. It was promptly taken up and has been carried on without interruption down to the present time. We have earnestly endeavored to carry out the provision of the law and to give the children coming within its terms the benefits and advantages contemplated by it.

The Board of Regents has entered into a contract with the Board of Control of the City and County Hospital in St. Paul, by the terms of which provision is made for the care of the children at that insti-

tution. A large two-story brick building, detached from the other hospital buildings, has been set apart for the use of the children in our charge. Another building, also detached, is given for school room and kindergarten work. These buildings are well lighted, heated and ventilated and are kept in a thoroughly sanitary condition.

Under our contract the City Hospital is to care for the children as patients are cared for in first-class hospitals, including attendance of trained nurses day and night, food, washing, bandages and medicines; in fact, everything that the children need except physicians' attendance and braces or mechanical appliances. The Board of Regents pays the Board of Control of the Hospital for the services above mentioned \$3.75 per week for children under twelve years of age, and \$4.50 per week for children between twelve and sixteen years, the latter being the maximum age at which any are received.

This contract has been renewed from time to time for periods of two years each as the work has been continued in our hands by the legislature and new appropriations made. The current period will expire May 1, 1905. We have found our arrangement with the City Hospital economical and very satisfactory. The children have received most excellent care from Dr. Anker the superintendent, and from all of his assistants.

The work was commenced in October, 1897. Since that date and up to December 1, 1904, 248 patients have been received into the hospital. During the two years which have elapsed since the making of our last report 85 patients have been received into the hospital. For a full statement of what has been accomplished in the medical and surgical treatment of these children during the past two years, reference is made to the annual reports which have been published and distributed to all physicians in the state.

Dr. Gillette the surgeon-in-chief receives no compensation for his services. They are entirely voluntary. He does a large amount of work for these children and he does it in a conscientious and careful manner. To his efforts, more than to those of any other person, the success of the work is due.

Inasmuch as some of the children remain in the hospital two or three years, and most of them at least six months, we have deemed it advisable to employ a teacher, who can give them such instruction as they are capable of receiving. Miss Katherine Kennedy, of St. Paul, is employed for this purpose, at a salary of \$45 per month. She has done excellent work among the children. She not only gives practical and useful instruction, but, with the aid of a piano, she does much to enable the children to pass pleasantly what might otherwise be dreary days of confinement in the hospital.

The expenditures for the fiscal year ending July 31, 1903, were \$8,583.13. Of this amount \$7,622.68 was paid to the City and County Hospital for the care and nursing of the children under the special contract above mentioned; \$332.50 was paid for kindergarten teacher; \$300 was paid for clerk hire and superintendence; \$162.50 was paid for braces and mechanical devices. The balance was for books, postage, rent of piano, printing, etc.

The expenditures for the fiscal year ending July 31, 1904, were \$9,587.81. Of this amount \$8,623.66 was paid to the City and County Hospital for the care and nursing of the children under the contract above mentioned; \$470 was paid for the kindergarten teacher; \$300 was paid for clerk hire and superintendence; \$83.87 was paid for printing the report and mailing same to all physicians in the state. The balance was for rent of piano, braces, books, postage, etc.

The work is steadily increasing and it seems quite probable that when the next biennial period commences on August 1, 1905, there will be 65 patients in the hospital and that before it closes the number will increase to 75. It will not be safe to enter on this period with an appropriation of less than \$15,000 per annum.

As to whether the work should be continued we repeat what we said in our last report: "As to the future of this work, we would say that, in our judgment, it ought to be continued by the state through some agency. There are, no doubt, many hundreds of indigent children in Minnesota suffering from various deformities, such as club feet, hip disease, spinal disease and dislocation of joints, most of which cannot only be remedied, but entirely cured, under the care of a competent orthopedic surgeon, having at his command suitable hospital facilities, braces, mechanical appliances, etc. Few people appreciate what modern science has been able to accomplish in this direction. And this can be done without any considerable pain or suffering to the child. On the contrary, the child is, in most instances, relieved from pain as soon as the treatment commences. If these children are taken while young they may be saved from the terrible misfortune of going through life as cripples and hunchbacks, and instead of being helpless paupers and beggars they may become respectable, self-supporting citizens. It is difficult to imagine a more humane or a more profitable work in which the state could engage or to which it could devote a small part of its revenue."

The work of carrying out the provisions of the law above mentioned is entirely foreign to the duties of the Board of Regents in the management of the University. The legislature saw fit to assign to the board the duty of inaugurating the work in the first instance and has ever since continued to invoke its services in carrying it on. The work itself was, no doubt, regarded as an experiment, and the placing of it in our hands as a temporary arrangement. We

have made an earnest effort to give it a fair trial and to expend the money placed at our disposal economically and solely for the purpose for which it was intended. If the legislature at its coming session shall be able to find some other agency through which the state can carry on this work we shall be much pleased.

UNIVERSITY MANAGEMENT.

The State Board of Control entered upon the performance of that part of the financial management of the University devolved upon them, near the close of the year 1902-03. The expenditures of the year 1903-04 for current expenses amounted to \$463,586.24. Of this amount \$329,499.76 was paid for salaries and wages, which by law are, and must needs be, for intelligent and successful administration under the control of the same authority which exercise the educational management. The bills for fuel in the same year, in addition to about 500 tons on hand at its commencement, amounted to \$28,443.29. The balance of \$105,643.19 was expended for a great variety of educational instrumentalities, ranging all the way from delicate instruments for scientific work, to the commonest articles of necessity. Under the system of the Board of Control, which contemplates the letting of contracts for supplies to the lowest bidder, whenever practicable, detailed estimates containing lists of every article to be needed for certain fixed periods of time, and the quantity and estimated cost of each item, are required to be made by the heads of departments. These estimates are first carefully investigated by the Executive Committee of the Board of Regents, and approved, with such reductions and modifications as the conditions seem to warrant, and are then transmitted, pursuant to law, to the Board of Control, who consider it their duty, under the law of their organization, to make a new and independent investigation of the necessity of the several articles embraced in them. This leads to repeated conferences by the Executive Committee and the heads of departments with the Board of Control, and adds greatly to the burdens of all concerned. There are many educational instrumentalities, some of which have to be purchased abroad, which, from their especial nature, cannot well be let to the lowest bidder, and are often most economically obtained through the heads of departments, who are familiar with the best sources of supply. In the making up of these detailed estimates omissions occur and unforeseen conditions arise which make the acquisition of articles not embraced in them indispensable. This necessitates new and additional estimates to go through the same process of a double investigation. While the result is the adoption by the Board of Control of the estimates as approved by the Executive Committee, with a few minor exceptions, the aggregate amount of which is quite small

and inconsiderable, yet injurious delays result from the double process, and what is of more importance the heads of departments are burdened with an excess of detailed work of a character which is distasteful to them, and consumes an unwarranted portion of their time, which ought to be devoted to their educational work, a loss of time that is not, and cannot be, compensated for by any economic advantages to be gained by the purchase of these educational instrumentalities through an independent agency. There has been hearty co-operation between the two boards with a view to the best attainable results under the anomalous conditions in which they are placed. Contracts for fuel and for the construction of buildings and improvements, after the plans, in the making of which this Board has a share of the responsibility, are settled, can be submitted to the competition of coal dealers and builders with equal advantage through either agency.

A system which is adapted to those institutions whose chief requirements are the shelter, care and subsistence of involuntary inmates, is ill adapted to the educational requirements of a great and diversified university; and after a year's experience of the working of the laws as now framed, we beg to reiterate our conviction that the educational management and the financial management of the University are so interwoven that their separation in whole or in part cannot conduce to its intelligent, successful or economical administration; and we beg further to reiterate our conviction that a non-political board of eminent citizens, appointed by the Governor and confirmed by the Senate, composed of graduates of colleges, professional men, and business men, who shall serve without reward, or the hope of reward, save only in the consciousness that they are doing something in their day and generation, to promote the public welfare, is best adapted to administer the affairs of a diversified university. The history of the old colleges and universities in this country and elsewhere, all of which are governed on this theory, and their memorable success as shown in the record of the achievements of their alumni, not only justifies the old way, but points the danger, in this intensely commercial age, of trying the experiment of operating a university, whose scope of instruction ranges from the teaching of the humanities through various grades of applied science, art and technology, to the simpler, but not less important, forms of the industrial arts, by a board of salaried officials without experience of university life or work. Fidelity to our trust demands that this statement of present conditions, and of our well considered views in respect to the same, be made. We most respectfully, but earnestly, urge that the University be restored to its old foundation, the foundation established by its founders, and contemplated in the Constitution of the State.

RECAPITULATION OF APPROPRIATIONS RECOMMENDED.

For current expenses, \$75,000.00 per year.....	\$150,000.00
For construction and equipment of main building, in addition to the insurance collected	425,000.00
For addition to power house building and equipment in the en- gineering department	20,000.00
For construction and equipment of new plant and storage house	10,000.00
For equipment of new bacteriological building.....	20,000.00
For ordinary repairs, \$10,000 per year.....	20,000.00
For additions to the general library, \$10,000 annually.....	20,000.00
For periodicals, rebinding, and repair of books, and incidental expenses, of the general library, \$3,000 per year.....	6,000.00
For improvement of the campus, \$5,000 per year.....	10,000.00
For new animal house.....	2,500.00
For equipment for commissioned officers and the band and trum- pet corps	600.00
For new apparatus and machinery in the School of Mines, \$2,000 annually	4,000.00
At the Agricultural School and Station:	
For new steel water tank and connections.....	5,500.00
For reel and hose.....	1,000.00
Total	\$694,600.00

Continuation of tax of last session for additional means for construction and equipment of main building, a girls' dormitory, the construction and equipment of a drill hall and gymnasium, the construction and equipment of a dairy barn, rearranging and equipping dairy hall, additional silos, and the acquisition of additional land for the farm and station.

The following schedules and statements show the administrative and executive officers and the faculty and instructors of the University; also the financial report of the University accountant, showing in detail the receipts and disbursements for the several departments for current expenses, and the expenditure of special appropriations for each of the two years last past. The disbursements of the University for the last year, as well as the purchase of the things it needed, and the construction of buildings and other improvements, after the plans were agreed on, have been under the management of the State Board of Control; but it has been thought best to continue our system of detailed accounting through the last year, as well as the first, for the sake of conformity.

Attention is called to the report of the President of the University to the Board of Regents which is appended hereto.

All of which is respectfully submitted in behalf of the Board of Regents.

GREENLEAF CLARK,
President.

THE BOARD OF REGENTS

The HON. JAMES T. WYMAN, MINNEAPOLIS, - - - -	1907
President of the Board	
CYRUS NORTHROP, LL. D., MINNEAPOLIS, - - -	<i>Ex-Officio</i>
The President of the University	
The HON. SAMUEL R. VAN SANT, WINONA, - -	<i>Ex-Officio</i>
The Governor of the State	
The HON. JOHN W. OLSEN, ALBERT LEA, - - -	<i>Ex-Officio</i>
The State Superintendent of Public Instruction	
The HON. STEPHEN MAHONEY, B. A., MINNEAPOLIS, -	1907
Secretary of the Board	
The HON. O. C. STRICKLER, M. D., NEW ULM - - -	1907
The HON. ELMER E. ADAMS, B. A., FERGUS FALLS, -	1909
The HON. THOMAS WILSON, ST. PAUL, - - - - -	1909
The HON. WILLIAM M. LIGGETT, BENSON, - - - -	1909
The HON. A. E. RICE, WILLMAR, - - - - -	1909

The HON. DANIEL R. NOYES, ST. PAUL, - - - - -	1910

EXECUTIVE OFFICERS

THE UNIVERSITY

CYRUS NORTHROP, LL. D., *President*
E. BIRD JOHNSON, B. S., *Registrar*
ERNEST B. PIERCE, B. A., *Assistant Registrar*
B. F. CARTER, *Accountant and Purchasing Agent*

THE COLLEGES

JOHN F. DOWNEY, M. A., C. E., *Dean of the College of Science,
Literature and the Arts*
GEORGE B. FRANKFORTER, PH. D., *Dean of the School of
Chemistry*
FREDERICK S. JONES, M. A., *Dean of the College of Engineering
and the Mechanic Arts*
WILLIAM R. APPLEBY, M. A., *Dean of the School of Mines*
WILLIAM M. LIGGETT, *Dean and Director of Department of
Agriculture*
WILLIAM S. PATTEE, LL. D., *Dean of the College of Law*
PARKS RITCHIE, M. D., *Dean of the College of Medicine and
Surgery*
EUGENE L. MANN, M. A., M. D., *Dean of the College of Homeo-
pathic Medicine and Surgery*
WILLIAM P. DICKINSON, D. D. S., *Dean of the College of Dentistry*
FREDERICK J. WULLING, PH. G., *Dean of the College of Pharmacy*

LIBRARIES AND MUSEUMS

WILLIAM WATTS FOLWELL, LL. D., *Librarian*
LETTIE M. CRAFTS, B. L., *Assistant Librarian*
INA FIRKINS, B. L., *Library Assistant*
ANNA L. GUTHRIE, B. A., *Library Assistant*
MARY S. MCINTYRE, B. S., *Librarian of School of Agriculture*
THOMAS G. LEE, M. D., *Librarian of Department of Medicine*
HUGH E. WILLIS, LL. M., *Librarian of the College of Law*
CHRISTOPHER W. HALL, M. A., *Curator Geological Museum*
HENRY F. NACHTRIEB, B. A., *Curator of the Zoological Museum*

ALLEN W. GUILD, *Superintendent of Buildings*
EDWIN A. CUZNER, *Superintendent of Grounds*

THE FACULTY

-
- CYRUS NORTHROP, LL. D., President, 519 Tenth Avenue S. E.
 FRANK MALOY ANDERSON, M. A., 1629 University Avenue S. E.
 Assistant Professor of History.
 WILLIAM R. APPLEBY, M. A., 911 Fifth Street S. E.
 Dean of the School of Mines and Professor of Metallurgy.
 FREDERICK H. BASS, C. E., Minneapolis
 Assistant Professor of Sanitary Science, in charge of
 Municipal and Sanitary Engineering.
 GEORGE N. BAUER, Ph. D., Minneapolis
 Assistant Professor of Mathematics.
 JOHN PARSONS BEACH, Harvard Chambers
 Assistant Professor of Music.
 CHARLES W. BENTON, M. A., Litt. D., 516 Ninth Avenue S. E.
 Professor of the French Language and Literature.
 JABEZ BROOKS, D. D., 1708 Laurel Avenue.
 Senior Professor of the Greek Language and Literature.
 RICHARD BURTON, Ph. D., Boston, Mass.
 Special Lecturer on English Literature.
 JOHN S. CARLSON, Ph. D., 827 Seventh Street S. E.
 Professor of the Scandinavian Languages and Literatures.
 JOHN S. CLARK, B. A., 729 Tenth Avenue S. E.
 Professor of the Latin Language and Literature.
 ADA L. COMSTOCK, M. A., Minneapolis
 Assistant Professor of Rhetoric.
 FRANK H. CONSTANT, C. E., 1803 University Avenue S. E.
 Professor of Structural Engineering.
 LOUIS J. COOKE, M. D., 906 Sixth Street S. E.
 Director of the Gymnasium.
 JOHN F. DOWNEY, M. A., C. E., 825 Fifth Street S. E.
 Dean of the College of Science, Literature and the Arts,
 and Professor of Mathematics.
 HENRY T. EDDY, C. E., Ph. D., 916 Sixth Street S. E.
 Professor of Engineering and Mechanics.
 JOHN J. FLATHER, Ph. B., M. M. E., 1103 Fourth Street S. E.
 Professor of Mechanical Engineering.
 WILLIAM W. FOLWELL, LL. D., 1020 Fifth Street S. E.
 Professor of Political Science; Lecturer on International Law;
 Librarian.
 GEORGE B. FRANKFORTER, M. A., Ph. D., Flat 1, 602 Fourth Avenue S.
 Professor of Chemistry and Dean of the School of Chemistry.
 EDWARD M. FREEMAN, M. S., St. Paul
 Assistant Professor of Botany.
 JOHN E. GRANRUD, Ph. D., 605 Delaware Street S. E.
 Assistant Professor of Latin.
 BENJAMIN F. Groat, B. S., 1312 Fifth Street S. E.
 Assistant Professor of Mathematics and Mechanics, School of Mines.

- CHRISTOPHER W. HALL, M. A., 803 University Avenue S. E.
Professor of Geology and Mineralogy; Assistant Curator of the
Museum.
- ARTHUR EDWIN HAYNES, M. S., M. Ph., Sc. D., 703 River Parkway
Professor of Engineering Mathematics.
- WILLIAM R. HOAG, C. E., 1516 Seventh Street S. E.
Professor of Civil Engineering; Topographer of the Geological
and Natural History Survey.
- JOHN C. HUTCHINSON, B. A., 3806 Blaisdell Avenue
Professor of the Greek Language and Literature.
- GEORGE FRANCIS JAMES, Ph. D., 106 Willow Street
Professor of Pedagogy.
- FREDERICK S. JONES, M. A., 712 Tenth Avenue S. E.
Professor of Physics, Dean of the College of Engineering and
the Mechanic Arts.
- WILLIAM H. KAVANAUGH, M. E., Minneapolis
Assistant Professor of Mechanical Engineering in Charge of
Experimental Engineering.
- WILLIAM H. KIRCHNER, B. S., 618 Tenth Avenue S. E.
Assistant Professor of Drawing, College of Engineering and the
Mechanic Arts.
- FREDERICK KLAEBER, Ph. D., 616 Ninth Avenue S. E.
Professor of Comparative and English Philology.
- FRANCIS P. LEAVENWORTH, M. A., 1628 Fourth Street S. E.
Professor of Astronomy and Director of the Observatory.
- CHARLES F. MCCLUMPHA, M. A., Ph. D., The Ashmore
Professor of the English Language and Literature.
- E. EUGENE McDERMOTT, M. S., 1301 Sixth Street S. E.
Assistant Professor of Rhetoric and Elocution.
- HOPE McDONALD, M. S., 1216 Harmon Place
Assistant Professor of History.
- CONWAY MACMILLAN, M. A., 1004 Seventh Street S. E.
Professor of Botany; Botanist of the Geological and Natural
History Survey.
- FRANK L. McVEY, Ph. D., 621 15th Avenue S. E.
Professor of Political Economy.
- JOHN G. MOORE, B. A., 2810 University Avenue S. E.
Professor of the German Language and Literature.
- GEORGE H. MORGAN, LL. B., Major U. S. A. Minneapolis
Professor of Military Science and Tactics.
- HENRY F. NACHTRIEB, B. S., 905 Sixth Street S. E.
Professor of Animal Biology; Zoologist of the Geological and
Natural History Survey; Curator of the Zoological Museum.
- EDWARD E. NICHOLSON, M. A., 914 Seventh Street S. E.
Assistant Professor of Chemistry.
- EMIL OBER-HOFFER, Hampshire Arms
Professor of Music.
- JOSEPH BROWN PIKE, M. A., 525 Tenth Avenue S. E.
Professor of Latin.
- FRANCES B. POTTER, M. A., 2412 Harriet Avenue
Assistant Professor of English.
- MARIA L. SANFORD, 1401 Sixth Street S. E.
Professor of Rhetoric and Elocution.

- CHARLES A. SAVAGE, Ph. D., Minneapolis
Assistant Professor of Latin.
- WILLIAM A. SCHAPER, Ph. D., 1009 University Avenue S. E.
Assistant Professor of Political Science.
- CARL SCHLENKER, B. A., 312 Union Street S. E.
Assistant Professor of German.
- CARLYLE SCOTT, Minneapolis
Assistant Professor of Music.
- GEORGE D. SHEPARDSON, A. M., M. E., Minneapolis
Professor of Electrical Engineering.
- CHARLES F. SIDENER, B. S., 1320 Fifth Street S. E.
Assistant Professor of Chemistry.
- CHARLES P. SIGERFOOS, Ph. D., 1206 Fifth Street S. E.
Professor of Zoology.
- SAMUEL G. SMITH, Ph. D., LL. D., St. Paul
Professor of Sociology.
- FRANK W. SPRINGER, E. E., 1100 Fifth Street S. E.
Assistant Professor of Electrical Engineering.
- JOSEPHINE E. TILDEN, M. S., 800 Fourth Street S. E.
Assistant Professor of Botany.
- CHARLES E. VAN BARNEVELD, B. A. Sc., E. M., 813 Seventh Street S. E.
Professor of Mining Engineering.
- WILLIS M. WEST, M. A., 1314 Sixth Street S. E.
Professor of History.
- ALBERT B. WHITE, Ph. D., 515 Fifth Avenue S. E.
Assistant Professor of History.
- MATILDA J. WILKIN, M. L., 618 Fifteenth Avenue S. E.
Assistant Professor of German.
- NORMAN WILDE, Ph. D., 901 Sixth Street S. E.
Professor of Philosophy and Psychology.
- HENRY L. WILLIAMS, M. D., 629 Fifteenth Avenue S. E.
Director of Athletics; Clinical Instructor in Gynecology, College of Medicine and Surgery.
- JOHN ZELNY, B. S., B. A., Minneapolis
Associate Professor of Physics.
- WILLIAM M. LIGGETT, St. Anthony Park
Dean of the College of Agriculture and Director of the Experiment Station.
- ANDREW BOSS, St. Anthony Park
Associate Professor of Agriculture, in charge of live stock.
- SAMUEL B. GREEN, B. S., St. Anthony Park
Professor of Horticulture and Forestry and Horticulturist of the Experiment Station.
- T. L. HAECKER, St. Anthony Park
Professor of Dairy Husbandry, in charge of the Dairy Husbandry in the Experiment Station.
- WILLET M. HAYS, M. Agr., St. Anthony Park
Professor of Agriculture; Vice-Chairman and Agriculturist of the Experiment Station.
- M. H. REYNOLDS, M. D., V. M., St. Anthony Park
Veterinarian of the Experiment Station; Professor of Veterinary Medicine and Surgery.
- THOMAS SHAW, St. Anthony Park
Lecturer on Animal Husbandry.

- HARRY SNYDER, B. S., St. Anthony Park
Professor of Agricultural Chemistry; Chemist of the Experiment Station.
- DEXTER D. MAYNE, St. Anthony Park
Principal of the School of Agriculture, Instructor in Economics.
- FREDERICK L. WASHBURN, M. A., St. Anthony Park
Professor of Entomology; Entomologist of the Experiment Station.

- WILLIAM S. PATTEE, LL. D., 1319 Fifth Street S. E.
Dean of the College of Law; Professor of Equity and International Law.
- HOWARD S. ABBOTT, B. L., Minneapolis
Professor of Corporation Law.
- HENRY L. FLETCHER, Minneapolis
Professor of Contracts and Real Property.
- A. C. HICKMAN, A. M., LL. B., 1301 Fifth Street S. E.
Professor of Pleading and Practice.
- JARED HOW, LL. B., St. Paul
Lecturer on Landlord and Tenant.
- EDWIN A. JAGGARD, M. A., LL. M., St. Paul
Professor of Taxation.
- ROBERT S. KOLLINER, LL. B., Minneapolis
Professor of Personal Property.
- C. D. O'BRIEN, 20 Globe Building, St. Paul
Lecturer on Criminal Procedure.
- JAMES PAIGE, M. A., LL. M., 1414 Yale Place
Professor of Torts and Criminal Law.
- JAMES O. PIERCE, 507 Eighth Street S.
Lecturer on Constitutional Jurisprudence and History.
- JOHN DAY SMITH, LL. M., 2720 Pillsbury Avenue
Lecturer on American Constitutional Law.
- HERBERT R. SPENCER, Duluth
Lecturer on Admiralty Law.
- JOHN COCHRANE SWEET, LL. M., Minneapolis
Lecturer on Mortgage Foreclosure.
- GEORGE B. YOUNG, A. M., LL. B., 240 Gilfillan Block, St. Paul
Lecturer on the Conflict of Laws.
- C. W. BUNN, St. Paul
Special Lecturer, College of Law.
- WILLIAM LOUIS KELLEY, St. Paul
Special Lecturer, College of Law.
- FRANK B. KELLOGG, St. Paul
Special Lecturer, College of Law.
- M. B. KOON, Minneapolis
Special Lecturer, College of Law.

- PARKS RITCHIE, M. D., Lowry Arcade, St. Paul
Dean and Professor of Obstetrics, College of Medicine and Surgery.
- AMOS W. ABBOTT, M. D., 21 Tenth Street South
Clinical Professor of Diseases of Women, College of Medicine and Surgery.

- EVERTON J. ABBOTT, A. B., M. D., Endicott Arcade, St. Paul
Clinical Professor of Medicine and Chief of Medical Clinic,
College of Medicine and Surgery.
- RICHARD OLDING BEARD, M. D., Andrus Building
Professor of Physiology, Department of Medicine.
- J. W. BELL, M. D., Andrus Building
Professor of Physical Diagnosis and of Clinical Medicine, Col-
lege of Medicine and Surgery.
- HENRY MARTYN BRACKEN, M. D., L. R. S. C., Edinburgh. Dayton Building
Professor Materia Medica and Therapeutics, College of Medi-
cine and Surgery.
- HUBERT C. CAREL, B. S., Minneapolis
Assistant Professor of Chemistry, Department of Medicine.
- A. B. CATES, A. M., M. D., Dayton Building
Professor of Obstetrics, College of Medicine and Surgery.
- JAMES T. CHRISTISON, M. D., St. Paul
Clinical Professor of Diseases of Children, College of Medicine
and Surgery.
- JAMES H. DUNN, M. D., Syndicate Block
Professor of Surgery, College of Medicine and Surgery.
- FREDERICK A. DUNSMOOR, M. D., New York Life Building
Professor of Operative and Clinical Surgery, College of Medi-
cine and Surgery.
- CHARLES A. ERDMANN, M. D., Minneapolis
Professor of Anatomy, Department of Medicine.
- BURNSIDE FOSTER, M. A., M. D., Lowry Arcade, St. Paul
Clinical Professor of Diseases of the Skin, and Lecturer upon
the History of Medicine, College of Medicine and Surgery.
- JOHN F. FULTON, Ph. D., M. D., Lowry Arcade, St. Paul
Professor of Ophthalmology and Otology, College of Medicine
and Surgery.
- ARTHUR J. GILLETTE, M. D., Seven Corners, St. Paul
Professor of Orthopædic Surgery, College of Medicine and
Surgery.
- CHARLES L. GREENE, M. D., Lowry Arcade, St. Paul
Professor of Theory and Practice of Medicine, College of
Medicine and Surgery.
- GEORGE D. HEAD, B. S., M. D., Minneapolis
Professor of Clinical Microscopy and Medicine, College of Medi-
cine and Surgery.
- ANDREW HENDERSON, M. D., Minneapolis
Clinical Professor of Medicine, College of Medicine and Surgery.
- CHARLES H. HUNTER, A. M., M. D., Syndicate Block
Clinical Professor of Medicine and Chief of Medical Clinic, Col-
lege of Medicine and Surgery.
- W. A. JONES, M. D., Dayton Building
Clinical Professor of Nervous and Mental Diseases, College of
Medicine and Surgery.
- W. S. LATON, M. D., Syndicate Block
Professor of the Diseases of the Nose and Throat, College of
Medicine and Surgery.
- THOMAS G. LEE, B. S., M. D., University
Professor of Histology and Embryology, Department of Medi-
cine.

- J. WARREN LITTLE, M. D., Syndicate Arcade
Clinical Professor of Surgery, College of Medicine and Surgery.
- A. McLAREN, A. B., M. D., Lowry Arcade, St. Paul
Clinical Professor of Diseases of Women, College of Medicine
and Surgery.
- JAMES E. MOORE, M. D., Dayton Building
Professor of Clinical Surgery, College of Medicine and Surgery.
- WINFIELD S. NICKERSON, Sc. D., Minneapolis
Assistant Professor of Histology, Department of Medicine.
- LOUIS A. NIPPERT, M. D., Syndicate Arcade
Clinical Professor of Medicine, College of Medicine and Surgery.
- C. NOOTNAGEL, M. D., Minneapolis
Clinical Professor of Medicine, College of Medicine and Surgery.
- HENRY J. O'BRIEN, M. D., St. Paul
Clinical Professor of Surgery, College of Medicine and Surgery.
- JUSTUS OHAGE, M. D., St. Paul
Professor of Clinical Surgery, College of Medicine and Surgery.
- C. EUGENE RIGGS, A. M., M. D., Endicott Arcade, St. Paul
Professor of Mental and Nervous Diseases, College of Medicine
and Surgery.
- THOMAS S. ROBERTS, M. D., Minneapolis
Professor of Diseases of Children, College of Medicine and
Surgery.
- JOHN T. ROGERS, M. D., Lowry Arcade, St. Paul
Professor of Clinical Surgery, College of Medicine and Surgery.
- J. E. SCHADLE, M. D., Lowry Arcade, St. Paul
Clinical Professor of Diseases of Laryngology, Rhinology and
Otology, College of Medicine and Surgery.
- HENRY L. STAPLES, A. M., M. D., Syndicate Block
Clinical Professor of Medicine, College of Medicine and Sur-
gery.
- J. CLARK STEWART, B. S., M. D., Dayton Building
Professor of Principles of Surgery, College of Medicine and
Surgery.
- ALEX J. STONE, M. D., LL. D., Lowry Arcade, St. Paul
Professor of Diseases of Women, College of Medicine and Sur-
gery.
- ARTHUR SWEENEY, M. D., St. Paul
Professor of Medical Jurisprudence, College of Medicine and
Surgery.
- FRANK C. TODD, M. D., Dayton Building
Professor of Ophthalmology and Otology, College of Medicine
and Surgery.
- MAX P. VANDER HORCK, M. D., Dayton Building
Professor of Diseases of the Skin and Genito-Urinary System,
College of Medicine and Surgery.
- FRANK FAIRCHILD WESBROOK, A. M., M. D., C. M., 328 Tenth Avenue S. E.
Professor of Pathology and Bacteriology, College of Medicine
and Surgery.
- CHARLES A. WHEATON, M. D., Lowry Arcade, St. Paul
Emeritus Professor of Surgery, College of Medicine and Sur-
gery.
- S. M. WHITE, B. S., M. D., Minneapolis
Assistant Professor of Pathology and Bacteriology, College of
Medicine and Surgery.

- EUGENE L. MANN, M. A., M. D., Endicott Arcade, St. Paul
Dean and Professor of Otology, College of Homeopathic Medicine and Surgery.
- ALONZO P. WILLIAMSON, LL. B., M. D., Pillsbury Building
Professor of Mental and Nervous Diseases and Medical Jurisprudence, College of Homeopathic Medicine and Surgery.
- E. E. AUSTIN, M. D., Andrus Building, Minneapolis
Professor of Gynæcology, College of Homeopathic Medicine and Surgery.
- WARREN S. BRIGGS, S. B., M. D., Ernst Building, St. Paul
Senior Professor of Clinical Surgery, College of Homeopathic Medicine and Surgery.
- GEORGE E. CLARKE, Ph. B., M. D., Stillwater
Senior Professor of Theory and Practice of Medicine, College of Homeopathic Medicine and Surgery.
- ALFRED E. COMSTOCK, M. Sc., M. D., New York Life Building, St. Paul
Professor of Regional Surgery, College of Homeopathic Medicine and Surgery.
- FREDERICK M. GIBSON, M. D., O. & A. Chir., Pillsbury Building
Professor of Ophthalmology, College of Homeopathic Medicine and Surgery.
- OSCAR H. HALL, M. D., Ernst Building, St. Paul
Associate Professor of Renal Diseases, College of Homeopathic Medicine and Surgery.
- DAVID W. HORNING, A. B., M. D., Pillsbury Building, Minneapolis
Associate Professor of Diseases of Heart, Lungs, Clinical Medicine, and Physical Diagnosis, College of Homeopathic Medicine and Surgery.
- HENRY H. LEAVITT, M. D., Pillsbury Building, Minneapolis
Professor of Rhinology and Laryngology, College of Homeopathic Medicine and Surgery.
- WILLIAM E. LEONARD B. A., M. D., Andrus Building
Senior Professor of Materia Medica and Therapeutics, College of Homeopathic Medicine and Surgery.
- HARRY M. LUFKIN, M. D., Germania Life Building, St. Paul
Professor of Diseases of Children, College of Homeopathic Medicine and Surgery.
- ROBERT D. MATCHAN, M. D., Masonic Temple
Senior Professor of Principles and Practice of Surgery, College of Homeopathic Medicine and Surgery.
- B. HARVEY OGDEN, M. A., M. D., Ernst Building, St. Paul
Senior Professor of Obstetrics, College of Homeopathic Medicine and Surgery.
- GEORGE E. RICKER, B. A., M. D., Ernst Building, St. Paul
Senior Professor of Clinical Medicine and Physical Diagnosis, College of Homeopathic Medicine and Surgery.
- GEORGE F. ROBERTS, M. D., Pillsbury Building
Senior Professor of Gynæcology, College of Homeopathic Medicine and Surgery.
- ROBERT R. ROME, M. D., 900 22nd Avenue S.
Professor of Gynæcology, College of Homeopathic Medicine and Surgery.
- HUGH J. TIMSTEAD, M. D., 829 16th Avenue N., Minneapolis
Associate Professor of Obstetrics, College of Homeopathic Medicine and Surgery.

- WILLIAM P. DICKINSON, D. D. S., Andrus Building
Dean of College of Dentistry and Professor of Materia Medica.
- THOMAS B. HARTZELL, D. M. D., M. D., Syndicate Arcade
Professor of Pathology, Therapeutics and Oral Surgery, College of Dentistry.
- E. FRANKLIN HERTZ, D. M. D., Andrus Building
Professor of Dental Anatomy and Instructor in Prosthetic Dentistry, College of Dentistry.
- ALFRED OWRE, D. M. D., M. D., C. M., Minneapolis
Professor of Operative Dentistry and Metallurgy, College of Dentistry.
- OSCAR A. WEISS, D. M. D., Masonic Temple
Professor of Prosthetic Dentistry and Orthodontia, College of Dentistry.
- JAMES O. WELLS, A. M., D. M. D., Masonic Temple
Professor of Crown and Bridge Work, College of Dentistry.

- FREDERICK J. WULLING, LL. M., Phm. D., Minneapolis
Dean and Professor of Pharmacology, Pharmaceutical Chemistry and Pharmacal Jurisprudence, College of Pharmacy.

INSTRUCTORS AND ASSISTANTS.

- WILLIAM AGATE, Minneapolis
Machinist, College of Engineering and the Mechanic Arts.
- E. V. APPLEBY, M. D., St. Paul
Clinical Instructor in Ophthalmology, College of Medicine and Surgery.
- ARNOLD AZEMAR, Minneapolis
Instructor in French.
- F. A. BABENDRIER, Minneapolis
Lecturer on Pharmacy, College of Homeopathic Medicine and Surgery.
- GUSTAVE BACHMAN, Phm. C., Minneapolis
Instructor in Pharmacy and Laboratory Assistant, College of Pharmacy.
- CHARLES R. BALL, M. D., Minneapolis
Assistant in Nervous and Mental Diseases, College of Medicine and Surgery.
- GERTRUDE E. BALLARD, B. A., Minneapolis
Assistant in Rhetoric.
- MARGUERITE BARBOUR, Minneapolis
Assistant in Physical Culture.
- JOSEPH W. BEACH, M. A., Harvard Chambers
Instructor in Rhetoric.
- FRED S. BECKLEY, M. D., St. Paul
Assistant in Diseases of Women, College of Homeopathic Medicine and Surgery.
- FREDERICK E. BECKMAN, Ph. D., Minneapolis
Instructor in French and Spanish.

- A. E. BENJAMIN, M. D., Pillsbury Building
Clinical Instructor in Gynæcology, College of Medicine and
Surgery.
- EMMA BERTIN, Minneapolis
Instructor in French.
- MARGARET BLAIR, St. Anthony Park
Instructor in Sewing and Household Art, School of Agri-
culture.
- A. E. BOOTH, M. D., Andrus Building
Lecturer on Orthopædia, College of Homeopathic Medicine
and Surgery.
- WILLIAM BOSS, St. Anthony Park
Instructor in Carpentry and Power Machinery, School of Agri-
culture.
- JOHN D. BRIMHALL, M. D., Moore Building, St. Paul
Clinical Instructor in Orthopædic Surgery, College of Medi-
cine and Surgery.
- WILLIAM E. BROOKE, B. C. E., M. A., Minneapolis
Instructor in Engineering Mathematics.
- JOHN C. BROWN, M. A., Minneapolis
Instructor in Animal Biology.
- JULIA BRUDE, St. Anthony Park
Instructor in Sweet Curd Cheese Work, Dairy School.
- COATES P. BULL, B. Agr., St. Anthony Park
Assistant in Agriculture and Rural Engineering, School of Agri-
culture.
- MARY L. BULL, St. Anthony Park
Assistant in Cooking and Laundering, School of Agriculture.
- OSCAR C. BURKHARD, B. A., Minneapolis
Instructor in German.
- ANNA M. BUTNER, 500 Tenth Street S.
Instructor in Physical Culture.
- FREDERICK K. BUTTERS, M. S., Minneapolis
Instructor in Botany and Practical Pharmacognosy, College of
Pharmacy.
- LEROY CADY, St. Anthony Park
Assistant in Horticulture, School of Agriculture.
- HELEN E. CAMP, B. A., Minneapolis
Assistant in History.
- R. A. CAMPBELL, M. D., Minneapolis
Assistant in Diseases of the Nose and Throat, College of Medi-
cine and Surgery.
- RAYMOND P. CHASE, B. A., Minneapolis
Assistant in Rhetoric.
- HERMAN H. CHAPMAN, B. S., B. Ag., Grand Rapids
Superintendent of Sub-station at Grand Rapids.
- L. S. CHENEY, M. S., St. Anthony Park
Instructor in Botany, School of Agriculture.
- WILLIAM M. CHOWNING, M. D., Minneapolis
Junior Demonstrator of Pathology and Bacteriology, Depart-
ment of Medicine.
- PETER CHRISTIANSON, B. S., E. M., Minneapolis
Instructor in Metallurgy, School of Mines.

- HENRIETTA CLOPATH, Minneapolis
Instructor in Drawing, College of Engineering and the Me-
chanic Arts.
- S. G. COBB, M. D., Minneapolis
Assistant in Clinical Medicine and Physical Diagnosis, College
of Homeopathic Medicine and Surgery.
- LILLIAN COHEN, M. A., Minneapolis
Instructor in Chemistry.
- A. R. COLVIN, M. D., Minneapolis
Clinical Instructor in Surgery, College of Medicine and Surgery.
- CATHERINE COMFORT, B. L., Minneapolis
Preceptress of the School of Agriculture, and Instructor in
English.
- WM. H. CONDIT, B. S., M. D., Minneapolis
Assistant in Materia Medica and Surgery, College of Medicine
and Surgery.
- GEORGE M. COON, M. D., Lowry Arcade, St. Paul
Clinical Instructor in Genito-Urinary Diseases, College of Med-
icine and Surgery.
- H. J. CREDICOTT, Minneapolis
Assistant Instructor in Cultures and Starters, Dairy School.
- J. GROSVENOR CROSS, B. S., M. D., Minneapolis
Assistant in Clinical Medicine, College of Medicine and Surgery.
- HANS H. DALAKER, B. A., Minneapolis
Instructor in Mathematics.
- LESLIE O. DART, M. D., Minneapolis
Assistant in Pediatrics, College of Medicine and Surgery.
- HERBERT W. DAVIS, M. D., Lowry Arcade, St. Paul
Clinical Instructor in Obstetrics, College of Medicine and
Surgery.
- LESTER W. DAY, M. D., Minneapolis
Assistant in Clinical Medicine, College of Medicine and Sur-
gery.
- SAMUEL N. DEINARD, M. A., 331 E. Franklin Avenue
Instructor in Semitic Language and Literature.
- WARREN DENNIS, B. S., M. D., St. Paul
Clinical Instructor in Surgery, College of Medicine and Surgery.
- IRA HARRIS DERBY, B. S., Minneapolis
Instructor in Chemistry, Department of Medicine.
- HARRY DIXON, Minneapolis
Chief Engineer, College of Engineering and the Mechanic Arts.
- HAL DOWNEY, B. A., Minneapolis
Instructor in Animal Biology.
- J. M. DREW, St. Anthony Park
Instructor in Blacksmithing and Poultry, Registrar of the
School of Agriculture.
- A. W. DUNNING, M. D., Minneapolis
Clinical Instructor in Nervous and Mental Diseases, College
of Medicine and Surgery.
- JOHN W. DYE, Minneapolis
Director of Gymnasium of the School of Agriculture.

- HENRY A. ERIKSON, B. E. E.,
Instructor in Physics. Minneapolis
- M. L. ERICKSON, M. Agr.,
Assistant in Forestry, College of Agriculture. St. Anthony Park
- R. EMMETT FARR, M. D.,
Assistant in Surgery, College of Medicine and Surgery. Minneapolis
- JOSEPH E. L. FAYANS,
Instructor in French. Minneapolis
- OSCAR W. FIRKINS, M. A.,
Instructor in Rhetoric and English. 1528 Fourth Street S. E.
- HARRY C. GILMORE,
Assistant in Carpentry, College of Engineering and the Me-
chanic Arts. Minneapolis
- JAMES T. GILFILLAN, M. D.,
Assistant in Clinical Medicine, College of Medicine and Surgery. St. Paul
- JUDD GOODRICH, M. D.,
Clinical Instructor in Surgery, College of Medicine and Surgery. St. Paul
- GEORGE D. HAGGARD, M. D.,
Assistant in Physiology, College of Medicine and Surgery. Pillsbury Building
- EVERHART P. HARDING, Ph. D.,
Instructor in Chemistry. Minneapolis
- EARL R. HARE, M. D.,
Prosecutor in Anatomy, Department of Medicine. Minneapolis
- MARY V. HARTZELL, D. M. D.,
Instructor in Comparative Dental Anatomy, College of Dentistry. Minneapolis
- PAUL A. HIGBEE, M. D.,
Assistant in Surgery, College of Homeopathic Medicine and
Surgery. Masonic Temple
- FRED E. HOBBS, B. L., LL. B.,
Instructor in Justice and Moot Court Practice. Minneapolis
- P. A. HOFF, M. D.,
Assistant in Clinical Medicine, College of Medicine and Sur-
gery. St. Paul
- TORGER A. HOVERSTAD, B. Agr.,
Superintendent of Sub-station at Crookston. Crookston
- JOHN A. HUMMEL, B. Agr.,
Assistant Chemist, College of Agriculture. St. Anthony Park
- ANNAH H. HURD, Phm. D., M. D.,
Assistant in Diseases of the Blood and Ductless Glands and
Otology, College of Homeopathic Medicine and Surgery. Pillsbury Building
- ETHEL S. HURD, M. D.,
Assistant in Ophthalmology, and Lecturer on Electro-Thera-
peutics, College of Homeopathic Medicine and Surgery. Pillsbury Building
- EDWARD JOHNSON,
Instructor in Foundry Practice, College of Engineering and
the Mechanic Arts. Minneapolis
- PETER JOHNSON,
Assistant in Forge Work, College of Engineering and the
Mechanic Arts. Minneapolis
- GEORGE H. JOHNSTON, M. A.,
Instructor in Psychology. Minneapolis

JANE KENNEDY, M. D., Medical Examiner for Women.	Minneapolis
ROY S. KING, M. E., Instructor in Mechanical Engineering.	Minneapolis
MARGARET KOCH, M. D., Assistant in Paedology, College of Homeopathic Medicine and Surgery.	Masonic Temple
ARTHUR C. KOERNER, Assistant in Music, School of Agriculture.	St. Anthony Park
DAVID LANDO, M. D., Assistant in Medicine, College of Medicine, and Surgery.	Minneapolis
A. A. LAW, M. D., Instructor in Operative Surgery, College of Medicine and Surgery.	Minneapolis
FREDERICK LEAVITT, M. D., Clinical Instructor in Obstetrics, College of Medicine and Surgery.	St. Paul
ALFRED LIND, B. S., M. D., Lecturer in Mechano-Therapy, College of Medicine and Surgery.	Minneapolis
JENNINGS C. LITZENBERG, B. S., M. D., Assistant Physical Director; Clinical Instructor in Obstetrics, College of Medicine and Surgery.	Minneapolis
HAROLD L. LYON, Ph. D., Instructor in Botany.	Minneapolis
MARY S. MCINTYRE, B. S., Librarian of the School of Agriculture.	St. Anthony Park
EDWARD P. MCCARTY, E. M., Instructor in Mining, School of Mines.	Minneapolis
CHARLES N. MCCLOUD, Ph. C., M. D., Lecturer on First Aids to the Injured, College of Pharmacy.	Minneapolis
JEANETTE McLAREN, M. D., Assistant in Obstetrics, College of Medicine and Surgery.	St. Paul
LINDA H. MALEY, B. L., Assistant in Rhetoric.	Minneapolis
ARTHUR T. MANN, B. S., M. D., Clinical Instructor in Surgery, College of Medicine and Surgery.	Minneapolis
MARION A. MEAD, M. D., Assistant in Laryngology, College of Medicine and Surgery.	Pillsbury Building
WILLIAM H. MERRIMAN, Instructor in Machine Work.	Minneapolis
C. B. MOAK, Instructor in Dairy Laboratory, Dairy School.	St. Anthony Park
WILLIAM R. MURRAY, B. A., M. D., Clinical Instructor in Ophthalmology and Otology, College of Medicine and Surgery.	Minneapolis
C. H. NEILL, M. D., Lecturer on Skin and Genito-Urinary Diseases, College of Homeopathic Medicine and Surgery.	Medical Building, Minneapolis
HARRIS D. NEWKIRK, A. B., M. D., Assistant in Clinical Medicine and Physical Diagnosis, College of Homeopathic Medicine and Surgery.	Minneapolis

MARGARET L. NICKERSON, M. A., Instructor in Histology, Department of Medicine.	Minneapolis
LILLIAN NIXON, B. A., Assistant in Rhetoric.	Minneapolis
OSCAR W. OESTLUND, M. A., Instructor in Animal Biology.	Minneapolis
EDD C. OLIVER, Instructor in Machine Design, College of Engineering and Me- chanic Arts.	Minneapolis
A. W. PARKIN, Instructor in Cheese Making, Dairy School.	St. Anthony Park
ARTHUR L. PARSONS, B. A., Instructor in Mineralogy.	Minneapolis
LEVI B. PEASE, M. S., Instructor in Assaying, School of Mines.	Minneapolis
MARY G. PECK, M. A., Instructor in English.	Minneapolis
A. G. PHELPS, M. D., Assistant in Clinical Medicine and Physical Diagnosis, College of Homeopathic Medicine and Surgery.	Minneapolis
JOHN H. QUENSE, C. E., M. E., Instructor in Drawing, College of Engineering and the Me- chanic Arts.	Minneapolis
WALTER RAMSEY, M. D., Assistant in Pediatrics, College of Medicine and Surgery.	Minneapolis
CLARENCE B. RANDALL, Assistant in Drawing and Farm Buildings, School of Agriculture.	St. Anthony Park
H. K. READ, M. D., Demonstrator of Anatomy, Department of Medicine.	Minneapolis
SOREN P. REES, B. S., M. D., Instructor in Physical Diagnosis and Clinical Medicine, Col- lege of Medicine and Surgery.	Minneapolis
H. M. REID, D. D. S., Instructor in Prosthetic Dentistry, College of Dentistry.	Minneapolis
HARRY P. RITCHIE, Ph. B., M. D., Clinical Instructor in Gynæcology, College of Medicine and Sur- gery.	St. Paul
WILLIAM B. ROBERTS, A. B., M. D., Lecturer on General Surgery, College of Homeopathic Medicine and Surgery.	Pillsbury Building
WILLIAM A. ROBERTSON, B. S., Instructor in Physics, School of Agriculture.	St. Anthony Park
BERT ROSE, Instructor of Cadet Band.	Minneapolis
J. L. ROTHROCK, M. D., Clinical Instructor in Pathology and Gynæcology, College of Medicine and Surgery.	St. Paul
H. A. RUGGLES, B. L. A., Assistant in Entomology, School of Agriculture.	St. Anthony Park
H. L. RUSSELL, Ph. D., Instructor in Bacteria in Dairy Products, Dairy School.	St. Anthony Park

HENRY SANDHOLT, Assistant in Creamery Work.	St. Anthony Park
EDWARD P. SANFORD, M. A., Instructor in Rhetoric.	Minneapolis
FREDERICK W. SARDESON, Ph. D., Instructor in Palæontology.	Minneapolis
JESSIE SCHULTEN, Assistant in Rhetoric.	Minneapolis
WALDEMAR SCHULZ, Ph. D., Instructor in German.	Minneapolis
GEORGE E. SENKLER, M. D., Clinical Instructor in Medicine, College of Medicine and Sur- gery.	Minneapolis
JUANIATA L. SHEPPERD, M. A., Instructor in Cooking, Laundering, and Home, College of Ag- riculture.	St. Anthony Park
ROYAL R. SHUMWAY, B. A., Instructor in Mathematics.	Minneapolis
EDWARD K. SLATER, Assistant Instructor in Creamery Work, Dairy School.	St. Anthony Park
EDITH J. SNELL, B. A., Instructor in Mathematics, Geography, History, School of Agri- culture.	St. Anthony Park
M. SONDEGAARD, Instructor in Cultures and Starters, Dairy School.	St. Anthony Park
DAVID F. SWENSON, B. S., Instructor in Philosophy.	Minneapolis
JAMES M. TATE, Instructor in Wood Work, College of Engineering and the Me- chanic Arts.	Minneapolis
WILLIAM I. THOMAS, Instructor in Rhetoric.	Minneapolis
HENRY L. ULRICH, M. D., Assistant in Clinical Microscopy, College of Medicine and Sur- gery.	Minneapolis
J. A. VYE, Instructor in Penmanship and Accounts, School of Agriculture, and Secretary of the Experiment Station.	St. Anthony Park
ALBERT M. WEBSTER, B. A., Instructor in Latin, College of Medicine and Surgery.	Minneapolis
JAMES M. WALLS, D. M. D. Instructor in Operative Technics and Demonstrator of Operative Dentistry, College of Dentistry.	St. Paul
H. L. WHERLAND, Assistant Engineer, College of Engineering and the Mechanic Arts.	Minneapolis
B. D. WHITE, Instructor in Creamery Management, Dairy School.	St. Anthony Park
GRACE L. WHITTRIDGE, Assistant in Physical Culture for Women, School of Agriculture.	St. Anthony Park

M. RUSSEL WILCOX, M. D., Demonstrator of Physiology, Department of Medicine.	Minneapolis
VAN H. WILCOX, M. D., Assistant in Operative Surgery, College of Medicine and Surgery.	Minneapolis
ELEANOR M. WILKINSON, Instructor in Physiology and Dietetics, College of Medicine and Surgery.	Minneapolis
HUGH E. WILLIS, LL. M., Quiz Master and Instructor in Law, College of Law.	Minneapolis
LOUIS B. WILSON, M. D., Senior Demonstrator of Pathology, College of Medicine and Surgery.	Minneapolis
F. R. WRIGHT, M. D., Clinical Instructor in Dermatology and Genito-Urinary Dis- eases, College of Medicine and Surgery.	Minneapolis
FRANK R. WRIGHT, D. D. S., M. D., Lecturer on Anæsthesia and Chief of the Anæsthetic Clinic, College of Dentistry.	Minneapolis
ANTHONY ZELENY, M. S., Instructor in Physics.	Minneapolis

UNIVERSITY SCHOLARS.

- In Anatomy*—Karl Klemer, C. C. Tyrrell.
In Animal Biology—Neil S. Dungay, E. E. Hemingway, M. A.
In Bacteriology and Pathology—Chelsea Pratt, Robert L. Tebbitt, S. E. Williams, George C. Dittman, George E. Dix, John L. Devine, George E. Thomas.
In Botany—Daisy Hone, B. A., Arthur M. Johnson.
In Chemistry—Marjorie Cole, Arnold V. Dahlberg, Francis C. Frary, Frank Grout, Edward Gutsche, Joseph Hopkins, Frank J. Longworth, William Methley, Charles D. Poore, Anton R. Rose, A. E. Carr, E. A. Loomis.
In Drawing—Franklin R. McMillan.
In French—Jules T. Frelin.
In Geology—E. McM. Pennock.
In Gymnasium—Frederick R. Schweitzer.
In Histology and Embryology—E. E. Olander, C. W. Wilkowski, J. E. Hynes and Charles McMahon.
In History—Helen E. Camp, B. A.
In Observatory—Sturla Einarson.
In Pedagogy—Charles M. Holt.
In Philosophy—Bernice M. Cannon, B. A.
In Physics—Alois F. Kovarik.
In Political Economy—Irwin A. Churchill.
In Rhetoric—Ella C. Ruscoe.
In Surgical Pathology—Hugh S. Willson.

REPORT OF THE PRESIDENT OF THE UNIVERSITY.

Gentlemen of the Board of Regents.

The demand for higher education is increasing in all parts of our country. This is proved by the largely increased number of students in attendance at the various colleges and universities. It is explained by the fact that the higher education has come to be generally recognized as valuable even for men in business and by the further fact that women in great numbers are now for the first time seeking this education. The preparatory schools have so increased in number as to be able to prepare students for colleges in all parts of the country thus making it easy and comparatively inexpensive for the student to fit himself for entrance to the college.

Moreover as the education offered is made broader it appeals to larger numbers; and thousands every year now enter college who would never think of doing it if the old curriculum had been maintained furnishing preparation only or mainly for the so-called professions. Never before in the history of the world has it been as possible for the children of the poor to secure a college education as it is now. The people of Minnesota realize this, and very many persons of small means are reaping the benefit of the state's liberality. The public appreciation of the University of Minnesota is shown by the continued increase in the number of students. Although in several of the colleges the standard of admission has been raised, producing a diminution in the number of students entering these colleges, notably the College of Medicine and Surgery, yet the total number of students in the University continues to rise, though at a somewhat less rate the last year than in previous years; but the number in attendance the last year was about forty larger than in any preceding year. Judging by the past there is every reason to suppose that the number in attendance the coming year will be still greater and if the increase shall equal the average of the last ten years it will be about two hundred.

The following is the statement in detail of attendance in the various colleges of the University during the last two years:

	1902-1903.		
	Men.	Women.	Total.
Graduate students	117	42	159
The College of Science, Literature and Arts.....	503	712	1,215
The College of Engineering and the Mechanic Arts	368	26	394
The School of Mines.....	111	111
Department of Agriculture.....	513	125	638
The College of Law.....	471	5	476
The Department of Medicine.....	504	25	529
The Summer School—University section less duplicates	73	245	318
Totals	2,660	1,180	3,840
Duplicates	51	1	52
Totals, excluding duplicates.....	2,609	1,179	3,788

	1903-1904.		
	Men.	Women.	Total.
Graduate students	82	35	117
The College of Science, Literature and Arts.....	479	773	1,252
School of Chemistry.....	36	36
School of Mines.....	118	118
College of Engineering and the Mechanic Arts....	396	1	397
Department of Agriculture.....	562	143	705
College of Law.....	529	6	535
Department of Medicine.....	472	13	485
The Summer School.....	52	160	212
Totals	2,726	1,131	3,857
Duplicates	11	11
Net totals	2,715	1,131	3,846

SALARIES.

While the total of the salaries paid by the University is large, because it is necessary to employ a large number of teachers to instruct the thousands of pupils, the average salary is very small—and very few of the salaries are as large as they ought to be. A professor has social relations and social duties; he can not live in obscurity or squalor; he cannot spend all his salary on the ordinary necessities of life without dwarfing both his own soul and his influence on others—and yet with the cost of living what it has been recently, it is difficult to see how some of the teachers of the University can provide for the bare necessities of life out of their very small salaries. I hope that the Board of Regents will ask for a sufficient increase in the appropriation for current expenses to enable the Board to relieve its employes of positive discomfort and to make it possible for its teachers to do their work under the best conditions without perpetual financial anxiety. No one of the teachers, I am sure, expects or desires any lavish expenditure for them; but they all desire and deserve to have a comfortable support in return for the qualifications and the labor which they place at the service of the State.

APPROPRIATION FOR THE LIBRARY.

The cutting down of the annual appropriation for the Library from seventy-five hundred dollars a year to five thousand and the charging to this appropriation expenses not incurred for the general library, has reduced the amount available for the purchase of books to so low a figure as to endanger the welfare of the University at a vital point. A University without books or without the books which contain the results of the latest researches of scholars in all lines of investigation is not an ideal institution. I am sure that the people of Minnesota wish their University to be so good that they

may safely commit to it the education of their children, and may also as citizens be proud of it as an honor to the State. No other thing can contribute so much to this as a generous provision for the Library. Inasmuch as the cost of rebinding and repairing books, and of supplying magazines and periodicals is charged to the appropriation for the Library, there is left for the purchase of books not more than three thousand dollars of the present appropriation which is not adequate for the wants of the University. An appropriation considerably larger than five thousand dollars should be asked for.

TRAINING FOR BUSINESS AND PUBLIC LIFE.

There are some subjects not now taught in the University for which provision ought to be made—I refer particularly to a class of subjects closely related to political economy and especially valuable in the training of men for business and for public life—Economic Geography, Institutes of Commerce and Statistics are perhaps most important.

The time seems to me to have come when provision should be made for a course of instruction in the subjects which underlie business of the more complicated character such as is characteristic of the present age; and I recommend that additional appropriations be asked for to meet the necessary expense. Students taking the business course would pursue for considerably more than half the time studies already provided in the University courses. It is to supplement these by studies specially related to business and public service that additional teachers are needed.

A BUILDING FOR WOMEN.

There are in the University more than eight hundred women, most of whom are in the College of Science Literature and Arts, and during the day are present in the buildings or on the grounds of the Campus. There is no building specially devoted to the comfort of these women. It has seemed to these women, and to the large and influential body of women in Minnesota known as the Minnesota Federation of Women's Clubs, that a special building ought to be provided for women. With entire unanimity the women of the State ask that an appropriation of twenty-five thousand dollars may be made for this purpose by the legislature, and they request the Board of Regents to include this in their legislative budget—It is a reasonable request. I am sure it will seem so to the Regents—And I am equally sure that the men of Minnesota in the legislature will not refuse to grant the request if it is made and is known to be the request of the women of Minnesota.

THE COLLEGE OF SCIENCE, LITERATURE AND ARTS.

The work in the College of Science, Literature and Arts has been carried forward without any disturbance of the peace and order of the College. The tendency is more apparent than ever before for men to enter technical or professional schools, while women seek the courses devoted to general culture. As a consequence the number of women in the College of Science, Literature and Arts is considerably larger than the number of men. This is not in itself a matter for regret inasmuch as many of the women are fitting themselves for teaching. I should, however, regret to see the men devote themselves too exclusively to technical work to the utter neglect of general culture. I think that time will show what is the wisest course and that any undue tendency to specialize will be corrected by experience, and men will choose wisely the course which will do them the most good whether it be for general culture or for technical skill. This college suffers more than any other on account of the insufficiency of the General Library to which the Librarian in his report refers in vigorous terms.

A rearrangement of the work in this college was made in 1904 to go into operation at the opening of the first semester in the following collegiate year. In accordance with this arrangement work is now conducted in all parts of the day, six days in the week excepting Saturday afternoon instead of five days as heretofore. The courses of study were shortened to three exercises a week instead of four as formerly. This permits two courses to be given every hour each week in one room—the courses coming on alternate days. The aggregate work to be done by the student is not diminished by shortening the courses. The result of these changes is a more continuous use of recitation and lecture rooms by which the congestion of students and classes was very much relieved until on the morning of the twenty-fourth of September the Old main Building was totally destroyed by fire. The Faculty at once took the necessary steps to provide places for the classes driven out of the Main Building. Very great credit is due Dean Downey for the promptness and patience with which he studied the needs and the possibilities of the hour and the perfect manner in which order was in a day brought out of what threatened to be chaos. Every department in the University that could possibly spare a room for a time or part of the time cheerfully did its best to relieve the situation; the Y. M. C. A. Building was pressed into use for a large number of classes; the post office was established in the rotunda of the Library Building; and although the pressure is not pleasant and rooms are crowded beyond all comfort, students and faculty alike have accepted with good humor the unpleasant situation as inevitable and the year promises to be a successful one in spite of the greatly regretted fire which destroyed a building exceedingly serviceable as well as most venerable of the University buildings. A new building must of course be erected at the earliest possible moment; and as it must provide

accommodations for ten departments, some of which have more than five hundred students, it is to be hoped that the new building may be large enough for the needs and that we shall not in this case repeat the mistake so often made by us in the past of erecting too small a building.

I am glad to present herewith the special reports of the Deans of the various Colleges and Schools embraced in the University. In most cases these reports are given in full as presented to me by the Deans. In a few cases the reports have been shortened by the omission of portions not specially important to the public.

THE COLLEGE OF ENGINEERING AND MECHANIC ARTS.

Dean F. S. Jones of this College reports as follows:

“Several noteworthy changes in the College of Engineering and Mechanic Arts have been made during the past two years.

The great importance of thorough mathematical training has prompted the faculty to announce that since the prosecution of the work in the engineering course depends so largely on the preliminary training in mathematics, no student will be admitted to this college with a condition in any mathematical subject.

The ever increasing amount of technical work necessary to be done during the four year college course has necessitated a reduction in the amount of language work, and the curriculum at present requires every student to take one year of English with a proviso that at least two years of some language other than English be offered for entrance. It will be seen that English has been strengthened in the college curriculum and that preparatory schools are encouraged to do more work in languages and less along mechanical and technical lines.

One year of chemistry is now required for entrance with the intention of completing the required work in chemistry earlier in the course, leaving the upper years for strictly professional work. In order to accomplish this, physics has been increased during the sophomore year and decreased in the Junior year, and students are encouraged to pursue a course in shop work and manual training in the summer school, so that this work may not be burdensome during the college year.

A number of changes have been made with a view to a greater freedom of choice in the matter of electives, and we find that many students avail themselves of this choice and really complete courses in more than one engineering line. Many mechanical engineers, for example, have completed not only the mechanical engineering course, but have so selected their subjects as to fit them for electrical and civil engineering work.

One of the most important changes to be noted is the establishment of the course of municipal and sanitary engineering, and the creation of a sub-department in this very important line of work.

The demand throughout the state for men who are trained in this branch of engineering is increasing so rapidly that the development of this particular department was imperative. It has necessitated the introduction of courses of study in biology, water analysis, bacteriology and public health and hygiene, and at a recent meeting of the Board of Regents Mr. Frederick H. Bass was made assistant professor of civil engineering and put in charge of this particular work. It is hoped and believed that it will rapidly develop into one of the most important departments of this college.

Many of the difficulties of the students are being corrected by the efficient services of the Committee on Students' Work, and whereas in former years irregularities in students' records were the rule they have now become the exception. Two years ago not a single senior had finished his work at the time appointed for the recommendations to the Board of Regents for degrees. Last year, not a single senior was behind in his work at this time.

It is with very great pleasure that I call your attention to the harmonious working together of the various departments of this college. For many years each department was conducted without particular regard for the common good, and the college as a whole lacked unity. At the present time, the welfare of the entire college is considered before that of any single department, and there is a most encouraging unity of action and purpose.

In the matter of discipline there is little to report, and it is hoped that the reorganization of the Engineers' Society among the students will result in great good in elevating the moral and intellectual tone of the students, which is the avowed object of this society.

Changes in the material equipment have already been reported to the President of the Board of Regents, but you may deem it worthy of notice that the old Mechanic Arts building has been thoroughly remodeled and enlarged and will be of much greater value to the college than it has been in the past. The improvements on this building amounted to \$10,000, provided for by the last legislature. Other material improvements are: The increase of the University electric light plant, for which \$10,000 was provided; the equipment of a new forge shop, at a cost of \$2,500; and increased equipment in various departments of the college, amounting in all to \$15,000.

The greatest need of the college at the present time is a room for use as a mechanical laboratory, and it is hoped that this may be secured in the near future.

There have been no changes in the faculty except for the addition of three assistants, but the attendance has been increasing from year to year, and at the present time is the largest in the history of the college, notwithstanding the fact that the abolition of the work in industrial art and design reduced the attendance very materially.

The per capita cost of educating an engineering student has decreased slightly for the past three years, and the increase in fees has made the college much more nearly self-supporting.

Our class rooms, laboratories and workshops are full. Our instructors are busy throughout the day, and if the attendance continues to increase it will be impossible to care for the larger number of students without adding to our instructing force.

In closing, it gives me great pleasure to report that there is an ever increasing demand for men who have been trained in this college, and long before commencement day the prospective graduates of the Engineering College have secured desirable positions in their chosen professions."

DEPARTMENT OF AGRICULTURE.

Dean William M. Liggett makes the following report:

Substantial progress has been made in the Department of Agriculture. The number of students has increased from 618 in 1902 to 720 in 1904. All of the practical lines of instruction have been maintained with the same degree of efficiency as in former years. In order to further improve the practical work of the school, the young men are now required to have had at least six months' farm experience before entering the institution. A special course in farm mathematics has been added, dealing more specifically with those problems of the farm requiring mathematics. This course is given by Principal D. D. Mayne. A short course in English is now given in the first year, which, with the farm mathematics, has materially strengthened the curriculum. The practical work in the school has been farther developed; particularly noteworthy are the livestock practicums, which include the handling, care and feeding of farm animals.

The work in the School of Agriculture has been characterized by great earnestness on the part of both faculty and students. A number of valuable text books have been written by different members of the faculty and published by prominent publishing houses. These books are in use in a number of Agricultural Colleges and Universities.

The farmers' short course, designed for mature farmers who are unable to take the three years' school course, has been well attended, and the work enthusiastically received. The course for dairymen has also been well attended, and many of those who have taken the work have won prizes and high awards for skill in butter-making.

The Experiment Station, although organized primarily for purposes of investigation, has exerted an educational influence. Numerous requests have been received from this and other states for the bulletins, which have been used for class room purposes and for study by farmers' clubs.

Through the farmers' institutes, various affiliated agricultural societies, and the agricultural press, different members of the faculty have assisted materially in disseminating agricultural knowledge.

The pioneer stage of agricultural education has passed, and the work is now rapidly assuming a definite pedagogical form which possesses a distinct educational value from a purely disciplinarian point of view. The wisdom of the Board of Regents in establishing the School of Agriculture in 1888 is now quite evident. It is estimated that over 3,500 students have been in attendance since its opening. A very large proportion of this number are now actively engaged in farming in this state.

While the object of the School of Agriculture is to train young men and young women to become successful farmers, and intelligent and useful citizens, a few have taken the course with the view of entering the College of Agriculture. The courses of study in the School and College have recently been correlated so that graduates of approved high schools can enter the College of Agriculture and complete the course in four years. This includes the practical work given in the School, the advanced technical work of the College, together with such general science and other subjects given in the College of Science, Literature and Arts as are necessary to form a basis for technical instruction in agriculture. This course was successfully inaugurated last year and gives promise of being a valuable acquisition to our system of agricultural education. It is pleasing to note that the graduates of the College of Agriculture have been much sought after by Agricultural Colleges and Experiment Stations, the agricultural industries, the National Department of Agriculture, owners of large estates, and the agricultural press. A strong course in Forestry, and also one in Home Economics, of an advanced and scientific nature, have been added during the past biennial period.

In the Experiment Station the work has gradually assumed definite and fruitful lines of investigations relating to agriculture. Problems relating to crops, soils, farm animals, horticulture, forestry, dairying, feeding of live stock, entomology, human and animal foods, and the business of farming have been studied and valuable bulletins published.

Experimental work in the Dairy Division has been continued along along two well defined lines: first, the relation of type of animal to economic milk production, and second, the scientific phase of animal nutrition. The Minnesota station first showed by an experiment with a large number of cows through a series of years, that the economic production of milk depended upon the conformation of the animal rather than upon breed. This finding has been verified in numerous experiments conducted by experiment stations in this and other countries.

It was incidentally discovered during the experiment above referred to, that the feeding standards formulated by the German

scientists and used and taught in all our Agricultural Colleges for nearly half a century were not applicable to conditions existing in this country, and the new standards used in their stead are meeting with the approval of the ablest American authorities in this line of work.

To maintain and further develop the Department of Agriculture, particularly the School, a continuation of the present liberal policy on the part of the Board of Regents, the legislature and the people of the state is necessary. Other states are spending much larger sums upon agricultural education, and Minnesota cannot afford to take a backward step after developing its magnificent School of Agriculture.

THE COLLEGE OF LAW.

Dean W. S. Pattee of the College of Law presents the following report:

“During the past two years the Department of Law of the University of Minnesota has experienced a steady and gratifying growth and development in several directions.

First. At its last session the legislature appropriated \$30,000 for an addition to the Law Building and for its equipment. The addition has been made; the old portion of the building has been reconstructed internally; and the whole structure thus enlarged and improved has been equipped with gas, electricity, furniture and other necessary conveniences, so that no Law School Building in the country is better adapted and suited to the purposes of a Legal Department.

Second. There has been a steady increase in the number of students during the last two years; there being in attendance last year five hundred and thirty-five. This increased enrollment has taken place notwithstanding an increased severity in the application of our rules for admission and graduation.

Third. Our Library has received several important additions. Beside the regular annual increase of State and Federal Reports, a set of the Reprint of all the English Reports has been procured; and through the generous donation of Hon. A. D. Keyes the library has received under his will about one thousand volumes, containing many valuable books, and all of which are suited to the use of a College of Law. These books are not yet in the possession of the College, but will be at the expiration of a period of time designated in the gift.

Fourth. An additional Professor and an Instructor in Law have been added to the teaching force, and such distinguished lawyers as C. W. Bunn and Frank B. Kellogg have been added to our staff of lecturers.

Fifth. There has been a steady improvement in the methods of instruction, such as naturally attends experience and the cordial in-

terchange and comparison of views between the faculties of the leading law schools of the land.

THE COLLEGE OF MEDICINE AND SURGERY.

Dean Parks Ritchie reports as follows:

The College of Medicine and Surgery enters upon its seventeenth year with an enviable reputation and a firm purpose to reach a higher plane of excellence.

The increase of our entrance requirements to one year of Academic work, in addition to a high school course or its equivalent, has improved the quality of our student body to a most gratifying extent. The inauguration of the six-year course leading to the degree of B. S. and M. D., is a distinct advance and will certainly attract a better grade of students, more than thirty men registering for that course the first year of its operation. The request of our Faculty that the Board of Regents further advance our entrance requirements to at least two years of University Academic work was denied. It is our hope and expectation, that in the near future this request may be granted, giving us the highest Academic standing of American Medical Colleges, with the exception of Harvard and Johns Hopkins Universities.

Our work for the past two years has been up to the level of the best medical schools in this country. Our laboratories are admirably planned, fairly well equipped, and some of our teachers have more than a national reputation. When our new pathological building shall have been completed and equipped, we can "point with pride" to the best medical laboratories of any college in the West with a single exception.

In our clinical teaching we labor under the disadvantage, that excepting the University dispensary and the St. Paul Free Dispensary the University has no control of any hospital in the Twin Cities. The clinical service is supplied solely by the personal efforts of the instructors, and for which none of them receive any salaries. The University should have absolute control of the clinical facilities of one or more hospitals in each city, and clinical instructors should receive some financial compensation in recognition of their worth and work.

We have recently met with a painful loss in the death of our Professor of Surgery, Dr. James H. Dunn. An admirable teacher, a skillful surgeon and a loyal friend, his colleagues and students alike mourn his untimely death and "refuse to be comforted."

The following additions and changes in our Faculty have occurred since last report. Dr. John W. Little was elected Clinical Professor of Surgery. Dr. Andrew Henderson Clinical Professor of Medicine, but has since resigned owing to a change of residence. Dr. H. J. O'Brien, Clinical Professor of Surgery. Dr. George D.

Head Clinical Professor of Medicine and Microscopy. In the revision of the Chair of Medicine, Dr. Chas. L. Greene was made Professor of the Practice of Medicine, and Drs. Chas. H. Hunter and E. J. Abbott were made Clinical Professors and Chiefs of Medical Clinics in Minneapolis and St. Paul respectively. Dr. Frank C. Todd was made Professor of Ophthalmology or Otology vice Dr. J. F. Fulton resigned. The title of Dr. Archibald MacLaren was changed to Clinical Professor of Surgery. At the annual meeting Dr. M. D. Hurd was elected Secretary of the Faculty succeeding Dr. R. O. Beard. At a recent meeting Dr. J. E. Moore was nominated by the Regents as Professor of Surgery vice Dr. Dunn deceased. Dr. Shadle Professor Diseases of the Nose and Throat vice Dr. Laton resigned. Dr. John L. Rothrock Clinical Professor of Gynecology vice Dr. A. MacLaren, and Dr. Wm. R. Murray Clinical Professor Diseases of the Nose and Throat vice Dr. Schadle.

COLLEGE OF HOMEOPATHIC MEDICINE AND SURGERY.

Dean Eugene L. Mann presents the following report:

The College of Homeopathic Medicine and Surgery respectfully submit the following report:

All of our old students have returned save one member of the Senior class, a practicing dentist, who has decided to give up his medical course on account of his increasing dental practice.

It is impossible at this time to give the number in the Freshman class, as owing to the system of registration, we do not get our full numbers until the second semester, when individual work in this department begins; there are at present only three registered with us, but at this time last year we had but two and this number was increased to six in the second semester. All of these have returned this year.

A review of the incoming classes in the other Homeopathic Colleges of the country does not show that Minnesota students are going elsewhere for their medical education, and the practitioners of the state are not disloyal to the home school.

The recent changes in medical education have, in a great measure, eliminated the old time Preceptor and most students of medicine go direct from school or college to their medical studies without time spent in a physician's office. An organized attempt is being made to reach this class through influential homeopathic patrons in the various cities of the state whom we are seeking to keep informed of the college and its needs. We hope that returns from our efforts in this direction will result in increased attendance at the College.

THE COLLEGE OF DENTISTRY.

Dean W. P. Dickinson reports as follows:

The enrollment for the last two years has been as follows:

	Freshmen.	Juniors.	Seniors.	Unclassed.	Total.
1902-03.....	71	28	33	10	142
1903-04.....	45	58	26	8	137

At the present time, in the first semester of

1904-05.....	29	36	58	6	129
--------------	----	----	----	---	-----

The enrollment was larger than usual in 1902-03 because it had been announced that the following year the course in Dentistry would be extended to four years.

The enrollment in 1903-04 was swelled by the announcement that the following year the requirements for admission would be increased so as to include a four years' high school course and evidence of mechanical ability.

The smaller attendance at the present time is mainly due to delay in publishing the Bulletin containing information that the course had been changed from four years to three years in harmony with other schools. The number of students could easily be doubled in a few years, if the College were provided with a building adapted to modern dental teaching, and the proper encouragement were given by the Regents in other needs.

There have been no radical changes in the teaching, but the work has kept pace with new and valuable ideas and methods. The work done has received the commendation of the profession, and each year an increasing number of students from other schools have sought to enter the Junior and Senior classes.

THE COLLEGE OF PHARMACY.

Dean F. J. Wulling makes the following report:

The number of students has not increased materially during the past few years, but the quality and scholarship have decidedly improved. Nearly all the students have had a full high school course as preparation for their work, or other training equivalent thereto. The work done in the college commands the respect of the pharmacists of this and neighboring states, and as a rule the members of the Senior class are offered very satisfactory positions several months in advance of their graduation.

The college is in urgent need of larger quarters. There is so much laboratory work to be done that the amount of room needed in proportion to the number of students is greater than in most other colleges of the University. At present the College occupies practically only two working rooms and in these, seven laboratory subjects are conducted—and in addition the rooms are used for

lectures and recitations. The larger of these rooms can accommodate at most thirty-six students and only eighteen at a time.

The College of Pharmacy has a course of study that is up to date but it is difficult to do justice to it in such cramped quarters. The College, in the judgment of those most familiar with the work to be done, needs a junior pharmaceutical laboratory, a senior laboratory, one for dispensing, one for pharmaceutical botany and pharmacognosy, a room for grinding and powdering drugs, a room for museum to be used also as a reading and reference room, a lecture room, two recitation rooms, a laboratory for special work, and rooms for the supplies for various laboratories. Furnished with these accommodations the College would compare favorably with the other departments of the University. It is worthy of mention that the Dean and Faculty of this College while fully understanding the needs of the College, have been very patient, waiting while other colleges were provided for and hoping that their turn to be cared for would come in due time. It seems to me that the time has come, and the College of Pharmacy should be provided with proper accommodations in a new building that will meet the wants of both Dentistry and Pharmacy, or in the Laboratory of Medical Science when the new Bacteriological building is completed. The work in materia medica, therapeutics, didactic general chemistry, qualitative analysis, toxicological chemistry and urinalysis, formerly given during the entire year, has within the last two years been concentrated in one semester, the work being doubled for the time, and the result has been satisfactory.

The death of Prof. Charles J. Bell, in January, 1903, removed an efficient member of the faculty and for a time delayed the work of both classes in general chemistry, toxicology and urinalysis. Professor Carel has since had charge of the work.

Repeated requests have been received from pharmacists and clerks for a shorter course than two years. It has been decided by the Faculty, after careful consideration of these requests, that the shortening of the course would not be consistent with the high aims of the College and that a refusal to shorten the course would work no injury to those desiring to give only one year to professional study, since they can now take the work of Junior year if they choose to do so. The research work done by the College has consisted mainly of analyses, chemical, macroscopical and microscopical, of drugs and chemicals used in medicine. The result of this work is reported annually to the State Pharmaceutical Association.

THE SCHOOL OF MINES.

Dean W. R. Appleby reports as follows:

"I herewith submit report, as requested, on the Minnesota School of Mines. The new School of Mines building has been completed and the equipment made possible by the legislative appropriation of

1903 has been installed. The building is designed to accommodate only technical work of the School of Mines. The new building is 150 feet long by 65 feet wide and is modern in every respect. It is a brick building three stories high. The lower floor is occupied by the assaying and metallurgical laboratories. The second floor contains offices, two large lecture rooms, departmental library and a museum. The third floor provides two quiz rooms and a large well lighted draughting room, thesis room, dark room and a blue print room. The equipment is strictly up-to-date and is complete as far as the funds available would permit. In order to keep the school abreast of the times more efficient machinery and apparatus should be purchased as these articles appear in the market. The rapid development in metallurgical lines makes this imperative. The cyanide process revolutionized the treatment of gold ores. Antiquated machinery, apparatus and obsolete processes cannot develop a successful mining or metallurgical engineer. To serve the best interests of the state and to make the money already appropriated by past legislatures most productive, the School of Mines must meet these changes by the installation of the most modern pieces of machinery and apparatus.

With suitable quarters and increased laboratory facilities the School of Mines has continued to grow. More elaborate and efficient instruction has been the outcome of these much needed improvements. The ease with which the graduates of this school obtain employment and the positions of trust they hold reflect credit on the work given by the various departments. The high standard of scholarship has been upheld by requiring the student to complete the entire work of each year before passing into advanced work of the following.

The mining interests of Minnesota are of great and increasing importance. There is a steady demand for trained engineers. We have a number of graduates on the engineering staffs of the various mining companies operating on our own iron ranges. While our school is in a flourishing condition and has the advantage of being established at a university centre, it is to be regretted that the instructors and students are not in closer touch with the mining men of the state. The work of instruction and the standing of the graduates of the school among the managers and officials of the various mining companies would be greatly benefited by closer intercourse with the latter and frequent visits from the heads of the departments in the School of Mines. This need could be met by having the state provide for short annual visit of the students to the iron districts. An opportunity should be given the instructors in mining work to make additional visits, preferably at the opening and the close of the shipping season."

SCHOOL OF CHEMISTRY.

Dean George B. Frankforter makes the following report:

"The School of Chemistry has seen material growth during the past two years. The total number of students has increased nearly twenty per cent. This increase has been largely in the advanced and technical work and the demand for technologists is such as to warrant even greater specialization than has occurred during the past two years.

EQUIPMENT.

The appropriations have been increased during the past two years, on account of the increase in the number of students. The equipment is about what it was two years ago. There has been a little gain in technical apparatus and therefore it is possible to offer the students a wider range of technical work. The laboratories in general are a little better equipped than they were two years ago.

GENERAL CHEMICAL WORK.

The enormous demand made by the nation on the science of chemistry has made it necessary that students in chemistry should be taught more than the simple principles of the science. Each problem worked out by the students in the laboratory now represents, besides the principle involved, some practical phase in the industrial world. This duo-didactic idea seems to be absolutely essential in modern scientific education. The work during the past two years has been arranged more than ever along this line.

RESEARCH WORK.

In addition to the general work already referred to, considerable time has been given to chemical research work. While this work is of vital importance, less attention has been given to it than should have been done on account of the general prescribed work.

This work has been done almost entirely in a search after truth, at the same time the industrial side has not been overlooked. A discovery which simply increases the storehouse of knowledge without benefiting the human race is not worthy of being called a discovery. This has been the stand taken in following the young chemists in their work. Subjects have therefore been assigned with a practical as well as a purely theoretical side. During the past two years the following subjects have been studied and many new substances have been made:

1. Investigation of Isopyrum, a plant growing in Minnesota. Two alkaloids were isolated. One of these is entirely new. It has medicinal properties

2. Investigations of Rhus Glabra (Sumach). This work was begun with the idea of determining the commercial value of this abun-

dant shrub. Besides the examination of the tannin present, two new forms of the cholesterols were separated.

3. Eugenol (Oil of Cloves). The work on this very important compound was begun from a purely theoretical point of view. A number of new compounds have been made. Some of these have decided medicinal properties.

4. An examination of Mililotus (Sweet Clover). The leaves and the seed were examined and the quantity of coumarine determined.

5. The oils of the common Mullein.

6. An examination of the Deep Well and Spring Waters of Minnesota.

7. An investigation of the Pitch of the Northern Pine. A number of new substances have been made from this pitch. The turpentine has also been carefully studied.

8. The Pitch of the Douglas Fir including the Turpentine. A method of obtaining the pitch from the wood has been worked out and a number of new compounds have been made. This work with that of the Northern Pine extends over a period of five years and now includes some twenty-five new compounds with a mass of new facts concerning colophonium and turpentine.

This work has been largely done outside of regular hours. Most of it has been done in collaboration with advanced chemical students."

THE GENERAL LIBRARY.

The Librarian, Dr. W. W. Folwell, reports as follows:

"The General Library had as its nucleus in September, 1869, when the first college work was begun about one bushel basket full of public documents. In the course of the first term of that year the Regents purchased a collection of books made by Col. D. A. Robertson of St. Paul who was for a short time our first professor of Agriculture. These books were partly historical, and partly what would now be called sociological, in their character. With new purchases the library contained by the end of the year 2,000 volumes. In the year following Professor G. Campbell on leave of absence in Europe bought some three thousand volumes and the President of the Board reported the library as numbering upwards of 5,000 volumes and being "the finest and most complete in the State." The report of the Board for 1871 contained a printed author-catalogue.

In 1873 the library of Dr. Tappan, Ex-President of the University of Michigan, numbering some 2,000 volumes was acquired, and these with new purchases and donations swelled the accessions to about 10,000.

Already the University had been made a designated depository of U. S. public documents, and the original nucleus has since grown into one of the best collections in the country. About 100 volumes only are needed to complete our "Congressional Set."

Since this purchase last mentioned no additions have been made in bulk. The limited annual appropriations have been carefully expended for books of first necessity as advised by heads of departments. The periodicals which have been subscribed for have been bound and form valuable additions.

The General Library now contains about 72,999 volumes, of which 53,500 are stored in the library building, and are under the immediate care of the library force.

The first need of the General Library is a complete card catalogue of authors, subjects and titles. The small working force has never sufficed for more than the provisional author catalogue.

The complete catalogue mentioned will at all times be an exhaustive index of all persons, things and transactions named in the books of any account down to date. A card catalogue is always complete and can be added to at will.

According to the best practice the cards should be printed. Considering what is got for the money, printing is really cheaper than manuscript or typewriting.

A library without a catalogue is like a book without an index, or a cargo of freight without an invoice.

The appropriation asked for two years ago of \$2,500 for each of two years was a reasonable estimate.

The completion of our "Congressional set" is a special need. The cost may be \$300.

Regarded as a collection for general use the library needs books of reference, sets of periodicals, reports of learned societies, and proceedings of public bodies.

No departments have been so favored that any can be regarded as well supplied. Every head of department will inform you that the library is weak in his lines. And it is. It needs enrichment all round and on all lines. Especially is this true for those departments of which books are the apparatus, Philosophy, Political Science, Sociology, History and Literatures.

Another matter which will soon press for attention is the multiplication and expansion of departmental libraries. At the present time the following have been established.

Astronomy,	Engineering, Mining,	Mechanics,
Biology,	French,	Military Science,
Botany,	Geology,	Pedagogy,
Chemistry,	German,	Physics,
Drawing,	Greek,	Philology,
Engineering, Civil,	History,	Rhetoric,
Engineering, Electrical,	Latin,	Scandinavian.
Engineering, Mechanical,	Mathematics,	

At first they were formed by withdrawal of books from the shelves of the general library. Later the collections have been enlarged by specific purchases out of the library fund. These purchases are drawing heavily on this fund. The following is a rough count of the

numbers of volumes added to the general collection and to the departmental libraries in the last three University fiscal years, so far as the library records show:

	Gen. Library.	Dept. Library.
1901-1902.....	1,649	1,668
1902-1903.....	1,365	1,936
1903-1904.....	1,350	860
Totals	4,364	4,464

Of the purchases for some departmental libraries such as Biology, Botany, Chemistry, Rhetoric, the librarian has no knowledge. The whole number of books in departmental libraries is something over 20,000.

Two important questions are already demanding consideration.

1. What shall be the general policy as to departmental libraries? Shall they be limited to a comparatively small collection of books specially desirable for departments, especially little used or not at all by readers generally? If they are to become large and growing collections, it is obvious that they must soon become independent libraries, each with a proper force for operating it.

2. What relation shall the departmental libraries have to the general library? Shall they be regarded as branches of the general library under the supervision of the librarian?

The present usage is various. Some of the departmental libraries are managed as absolutely independent establishments in which the librarian of the University is not expected in any way to meddle. Others insist on the assistance of the library force in classifying and cataloguing the books, and taking the annual inventory. Many departments have their binding ordered through the general library. Some make their own arrangements. Most order their periodicals through the general library; a few subscribe independently.

The above remarks have no reference to College Libraries of the University, such as those of Law, Medicine, and Agriculture. The suggestion is submitted that for these, independent funds should be established so that they need not draw at random in the general library appropriation.

Some years ago it was found desirable to restrict the loan of books from the general library to students, to nights and holidays.

In the present year on account of persistent abuse of this privilege it became necessary for the protection of the students themselves to withdraw it, and no books are now loaned to students. No loud complaints have been made but there is foundation for the suggestion that this rule is too sweeping. It is said with truth, that there are many books which students might be allowed to borrow for home reading for some days without injustice to others. I am of opinion that this suggestion ought to be entertained and if approved of, that provision should be made for carrying it out.

We have many books of general literature, and in time shall have many more, which are not daily nor frequently in use for reference or consultation. Many of our students have not had opportunity to acquaint themselves with such books. They have some leisure which might properly be devoted to general reading. Some students have a pardonable desire to read widely in the best books.

I therefore respectfully submit the following proposition for your consideration.

1. Let the general library be divided into two collections.

- a. The reference collection.

- b. The circulating collection.

2. Move the latter into a separate room, properly fitted up, and place a special attendant in charge.

3. Issue to registered students these books for periods varying with the demands.

4. Require a moderate deposit of money to cover loss, damage and delays.

There would be some expense for shelving and furniture and the cost of service would be somewhat increased, but I am convinced that the benefits resulting would warrant any reasonable increase."

COMMENT.

I commend to the Board the information and recommendations contained in the reports of the Deans and the Librarian. I can only ask of the Board the adoption of a general policy in respect to some of these matters as the successful working out of the various problems must after all, be the result of wise administration and the harmonizing of methods and conditions. It is not difficult to see what the University needs. The question is—with so many needs which ones shall be supplied first. I do not expect to see the University wants all met in my time. But we are making progress and if we have clear views of just what we want to do, our progress will be more rapid.

GENERAL MANAGEMENT.

I am under very great obligations to the Deans of the various Colleges and Schools in the University for the fidelity and wisdom shown by them in the management of their respective trusts. While I am not aware that my own duties have diminished in quantity they have been connected more closely than heretofore with the whole University and less with one special College. Much of my attention has been given to matters of business which came into prominence by reason of the divided authority of the Board of Control and of the Board of Regents. I have done everything in my power to make life pleasant for the Purchasing Agent and to prevent friction in administration and I hope I have succeeded in my

endeavors. Certainly the most friendly relations exist at the present time between the various bodies to which has been intrusted the government of the University. But while this is true I can not but say that it seems to me to be the wisest course for the Legislature to free the University from the authority of the Board of Control. The University has learned some useful things from the Board of Control and will undoubtedly, if set free, continue the reforms which have been made. The Board of Regents will be able to manage the affairs of the University with much less of circumlocution delay and uncertainty than at present with two heads to the institution.

DEATH OF JUDGE GREENLEAF CLARK.

Judge Greenleaf Clark, President of the Board of Regents of the University of Minnesota, died at Lamanda Park, California, December seventh, nineteen hundred four. Judge Clark had spent the summer in St. Paul, and appeared to be about as well as usual, though his friends knew that he was not in vigorous health. He devoted himself during the Fall to the preparation of his Biennial Report as President of the Board of Regents. He attended a meeting of the Executive Committee Thursday, November seventeenth, nineteen hundred four and presented his report to the committee and announced his immediate departure for California for his health. He was evidently suffering at the time from the consciousness of inability to work and from the effects of his illness. He bade the Committee "Goodbye" with his usual heartiness and cheerfulness. On the evening of November twenty-fourth, Thanksgiving Day, he left St. Paul for California. The news of his death was received thirteen days later.—A letter written to me by a friend at Judge Clark's request three days before his death, but not received by me till after his death, said that "Judge Clark arrived at Lamanda Park Monday, November twenty-eighth. He was completely worn out and greatly changed in looks. One had only to see him to realize that he was a very sick man. He was at once put to bed and was never able afterwards to sit up." His death occurred nine days later.

On the morning of December eighth I announced the death of Judge Clark to the students of the University and in doing so, spoke as follows:

"The news comes to us this morning that Judge Greenleaf Clark, President of the Board of Regents of the University of Minnesota, died last night at Lamanda Park, California.

This announcement will bring very deep sorrow to the friends of the University and to all who were associated with Judge Clark in the activities of life

He was a gentleman of the old school, with all the regard for honor which characterized the best men of the generation to which he belonged. He was a native of New Hampshire, a graduate of

Dartmouth College, in N. H., and at the last Commencement Judge Clark was honored by Dartmouth with the degree of Doctor of Laws.

All his life of many years in Minnesota, Judge Clark was the close and confidential friend of Governor John S. Pillsbury, and he became President of the Board of Regents after Governor Pillsbury's death in 1901.

Judge Clark completed his biennial report to the Governor, as President of the Board of Regents, about two weeks ago, and leaving the report with the Executive Committee, he bade us goodbye for the winter, intending to go at once to California. He went to California, according to his usual custom, and in two weeks the word comes that he has died.

A more loyal friend, a more honorable gentlemen, a citizen more devoted to the welfare of the state, or an officer of the University with more wisdom and devotion to its interests does not survive him for there was no one in all these respects superior to him.

I feel his death as a personal bereavement.

He was the last member of the Board of Regents as it was constituted when I was called to the state. Other men are living who were then Regents, but they are no longer Regents. He has been continued as a member of the Board during all these twenty years and he has always been a wise counselor and the truest of friends. No one can fill Judge Clark's place. There are other good men who can fill their own place, but none of them can fill his place."

I am sure that every member of the Board of Regents will feel that the University has lost, in the death of Judge Clark, one of its ablest and most devoted friends, and will also experience a deep sense of personal bereavement as they realize that the noble, courteous and conscientious gentlemen who has so long been a member of the board and for three years has presided at its meetings, will no more share in its counsels and no more lighten the burdens of official life by his pleasant companionship.

Respectfully submitted,

CYRUS NORTHPROP,
President.

FINANCIAL STATEMENT.

Minneapolis, Aug. 1, 1904.

Hon. Greenleaf Clark, President of the Board of Regents.

Sir: I herewith submit the financial report of the University of Minnesota for the fiscal year commencing Aug. 1, 1902, and ending July 31, 1903.

D. W. SPRAGUE,
Accountant.

GENERAL STATEMENT OF RECEIPTS AND DISBURSEMENTS
FOR THE FISCAL YEAR ENDING JULY 31, 1903.

CURRENT EXPENSE RECEIPTS.

Balance on hand Aug, 1, 1902		\$37,324.61	
Less unpaid warrant of July	\$13,033.46		
Less June and July bills paid \$1,678.26 after August 1st.....	\$2,440.64	\$4,118.90	\$17,152.36
True balance			\$20,172.25
From Grants Made by U. S. Government—			
Approved March 2nd, 1861, and July 2nd, 1862, being interest on bonds of various states in which the resulting funds are invested.....		\$53,203.62	
United States Treasurer, Hatch Fund.....		15,000.00	
United States Treasurer, Morrill Fund.....		25,000.00	
			\$93,203.62
From State Appropriations—			
23/100 of one mill revenue tax.....	\$152,518.00		
Deficiency appropriation	35,000.00		
			\$187,518.00
From the University—			
Fees collected and deposited by the Accountant..	\$104,915.39		
Farm sales and other miscellaneous receipts....	21,199.31		
			\$126,114.70
Total			\$427,008.57

DISBURSEMENTS.

By paid expense lists as per detailed statement..	\$416,870.75	
By sums paid out and transferred by Auditor....	3,160.02	
		\$420,030.77
		\$6,977.80
Add Revolving Fund turned into Treasury at close of year.....		3,000.00
Auditor's balance Aug. 1, 1903.....		\$9,977.80
The amount of funds collected and turned into the treasury during June and July, 1903, the last two months of the year, was one hundred forty-seven thousand dollars, something over one-third of the income of the University for that year. This is practically true every year. That being the case, there are times during the year when there are no funds available to meet expense lists when due.		
The total expense lists for the year 1902-03, was.....	\$447,961.19	
The amount paid previous to August 1st as above stated was	416,870.75	
Leaving a balance unpaid of.....		\$31,090.44
Amount in Treasury August 1st.....	\$9,977.80	
Delayed taxes paid after August 1st.....	12,033.49	
		\$22,011.29
Leaving a deficit of.....		\$9,079.15

DETAILED STATEMENT OF RECEIPTS FOR THE FISCAL YEAR ENDING JULY 31, 1903.

CURRENT EXPENSE.

The Anatomical Building was burned Jan. 29, 1902. Origin of the fire not definitely known. The Ore Testing Works was struck by lightning Saturday night, Aug. 29, 1902. Both buildings were very seriously damaged. The contents of the two buildings were almost entirely destroyed.

With the consent of the auditor the funds derived from the insurance on the two buildings and their contents were placed at the disposal of the Executive Committee with which to repair the buildings and to replace, as far as possible, the contents.

Received from the several insurance companies the sums set opposite their names, on account of losses sustained by fire in the Anatomical Building.

BIENNIAL REPORT

OF THE

DEPORTING AGENT

OF THE

BOARD OF CONTROL

OF

STATE INSTITUTIONS.

To the Board of Control of State Institutions:

Gentlemen: I respectfully submit the following report covering the biennial period commencing August 1, 1902, and ending July 31, 1904:

The expression "the year 1903" indicates the year ending July 31, 1903, and the expression "the year 1904" designates the year ending July 31, 1904.

NUMBER OF CASES OF SUPPOSED NON-RESIDENT DEPENDENTS INVESTIGATED AND DISPOSITION OF SAME.

FOR THE YEAR 1903.

Insane	104
Of these there have been—	
Deported	66
Found to be residents of the state.....	5
Found not insane	5
Discharged	9
Retained in hospital, residence unknown.....	9
Retained for humanitarian reasons.....	4
Discharged by death.....	6
Total	104

FOR THE YEAR 1904.

Insane	105
Of these there were—	
Deported	52
Found to be residents of the state.....	8
Found not insane	2
Discharged	5
Discharged by death.....	2
Retained in hospitals, residence unknown.....	34
Retained in hospitals for humanitarian reasons.....	2
Total	105

DEPORTATIONS.

During the biennial period deportations have been made as follows:

During the year 1903.....	80
During the year 1904.....	61
Total during period	141

IN 1903.

England	1
Roumania	1
Hungary	1
Bohemia	2
Austria	2
Germany	3
Finland	4
Norway	5
Sweden	6
Canada	6
Other states	49

Total 80

IN 1904.

Austria	1
Germany	3
Finland	5
Norway	6
Sweden	5
Canada	7
Other states	34
Total	61

During the year 1903 about 18 per cent of the deportations were to foreign countries and in 1904 about 25 per cent were sent to foreign countries.

In 1903 fourteen deportations were made under the United States immigration laws, and in 1904 fifteen deportations were made under the same laws.

The amount of the appropriation used in 1903 was \$5,465.41, making an average cost of each deportation \$68.31. In 1904 the amount of the appropriation used was \$3,817.75, making the average cost of each case \$62.57.

The average cost of each deportation for the biennial period was \$65.84.

Considering all the items of expense in the detention and treatment of the insane \$1,000 is fairly estimated to be the average cost to the state for each patient who remains a state charge. Using this amount as a basis, the one hundred and forty-one patients de-

ported during the biennial period would have cost the state \$141,000, if allowed to remain in the state hospitals. The cost of deportation was \$9,283.16, leaving a gain of about \$131,717. It will be understood that there should be deducted from this amount the expense of caring for the patients during the short time they were in the state hospitals.

POORHOUSES.

During the biennial period two thoroughly modern poorhouses have been built. They are located in Rice and Chisago counties. The poorhouses in the following counties have been inspected, viz:

Becker,	Freeborn,	Rice,
Blue Earth,	Goodhue,	Scott,
Brown,	Houston,	Steele,
Cottonwood,	Mower,	Wabasha.
Faribault,	Nobles,	Winona.
Fillmore,	Otter Tail,	

COUNTY JAILS.

During the biennial period several good jails have been built. County commissioners are exercising greater care in the construction of jails and as a result the newer buildings have been constructed in accordance with the spirit as well as the letter of the law.

The new jails are in the following counties, viz: Brown, Hubbard, Wilkin, Clearwater, Steele and Renville.

Jails in the following counties have been inspected, viz:

Becker,	Goodhue,	Scott,
Blue Earth,	Houston,	Sibley,
Brown,	Jackson,	Stearns,
Carver,	Lac qui Parle,	Steele,
Clay,	Le Sueur,	Todd,
Cottonwood,	Martin,	Wabasha,
Dakota,	Mower,	Waseca,
Douglas,	Nobles,	Watonwan,
Faribault,	Otter Tail,	Winona.
Fillmore,	Rice,	
Freeborn,	St. Louis,	

CITY AND VILLAGE LOCKUPS.

I am glad to report that the new lockups which have been built during this period are much better than those built during any preceding period. This improvement follows as a result of compliance with the law on the part of cities and villages.

Quite a number of villages have unintentionally failed to observe the law requiring plans and specifications for lockups to be ap-

proved by your board before such lockups were constructed, and as a result several of the new lockups do not meet the requirements of the law.

Lockups have been built in the following cities or villages, to-wit:

Albert Lea,	Fulda,	Pillager,
Amboy,	Grand Marais,	Pine River,
Arco,	Harmony,	Porter,
Backus,	Herman,	Sandstone,
Bird Island,	Kilkenny,	Starbuck,
Burtrum,	Lengby,	Tenny,
Clarissa,	Lamberton,	Wells,
Cokato,	Lowry,	Wyoming,
Ellsworth,	Mountain Lake,	Minneota.
Fergus Falls,	Pelan,	

The following lockups have been inspected, viz:

Albert Lea,	Fulda,	Montgomery,
Alexandria,	Glenville,	Moorhead,
Alpha,	Glyndon,	Morristown,
Amboy,	Goodhue,	Mountain Lake,
Avoca,	Good Thunder,	New Prague,
Battle Lake,	Harris,	New York Mills,
Belle Plaine,	Hastings,	Nicollet,
Bellingham,	Hawley,	North Branch,
Bingham Lake,	Heidelberg,	Northfield,
Blue Earth City,	Henning,	Odessa,
Brandon,	Heron Lake,	Owatonna,
Brewster,	Hibbing,	Perham,
Bricelyn,	Hinckley,	Pine City,
Butterfield,	Houston,	Round Lake,
Carver,	Ionia,	Rushford,
Ceylon,	Jackson,	St. Charles,
Chanhasen,	Janesville,	St. James,
Chandler,	Jeffers,	Sandstone,
Chaska,	Jordan,	Shakopee,
Chatfield,	Kasota,	Sherburne,
Currie,	Kiester,	Slayton,
Delavan,	Kilkenny,	Sleepy Eye,
Detroit,	Kinbrae,	Truman,
Duluth (Cent. Station),	Lake City,	Twin Valley,
Duluth (West End),	Lake Crystal,	Wabasha,
Dundas,	Lakefield,	Wadena,
Dundee,	Lake Park,	Waseca,
Dunnell,	Lanesboro,	Waterville,
Easton,	Le Sueur,	Welcome,
Edgerton,	Lewiston,	Wells,
Elmore,	Long Prairie,	Wesely,
Elysian,	Lyle,	Westbrook,
Evansville,	Madelia,	Willmont,
Eyota,	Madison,	Winnebago City,
Fairmont,	Madison Lake,	Woodstock,
Faribault,	Mankato,	Worthington,
Fergus Falls,	Mapleton,	Zumbrota.
Frazee,	Minnesota Lake,	

The following lockups have been condemned :

Alden,
Albert Lea,
Amboy,
Argyle,
Arlington,
Audubon,
Bingham Lake,
Bird Island,
Browns Valley,
Buffalo Lake,
Chandler,
Clara City,
De Graff,
Delavan,

Dodge Center,
Easton,
Fairmont,
Fergus Falls,
Fulda,
Graceville,
Granite Falls,
Hallock,
Heron Lake,

Lamberton,
Lyle,
Mountain Lake,
New London,
New Paynesville,
North Branch,
Osakis,
St. James,
St. Vincent,
Walker,
Welcome,
Wheaton,
Woodstock,
Worthington.

Respectfully submitted,

D. A. LINDSEY,
Agent.

Thirteenth Biennial Report of the Board of Directors of the Minnesota Schools for the Deaf and the Blind.

In compliance with the law we respectfully submit the Thirteenth Biennial Report of the Minnesota Institutes for the Deaf and the Blind, embracing the fortieth and forty-first years of the School for the Deaf and the thirty-seventh and thirty-eighth years of the School for the Blind.

The personnel of the board remains the same as at the date of the last biennial report, except that the Honorable R. A. Mott was succeeded in January, 1903, by the appointment of Chas. D. McKellip, of Faribault.

The reports of Superintendent J. N. Tate, of the School for the Deaf, and of Superintendent Jas. J. Dow, of the School for the Blind, accompanying this report, give in detail the work and progress in all departments of their respective institutions, the improvements made, etc., together with the cost of their maintenance during the last biennial period; also estimates for maintenance, repairs and improvements for the next two years. These reports have been carefully examined by the officers of this board and found to be correct. We consider that the amounts asked for are very reasonable, and we would urgently request that the legislature grant the appropriations in full.

The work of the schools during the past two years has been materially hindered on account of the lack of room to properly care for the pupils who have been in the schools, to say nothing of making provision for the rapidly increasing number of children and youth in the state who have need of the education and training given here and which can be obtained nowhere else. The School for the Blind has been particularly cramped for quarters, but happily the trouble will soon be remedied to a considerable extent by the new building now in course of construction and which will be ready for occupancy the coming winter.

The erection of an addition to the cabinet or wood-working shop at the School for the Deaf, and the completion and occupancy

during the past year of a new building for the educational classes at the same school, were improvements much needed and they add greatly to the facilities for both manual training and educational work.

The Kirker-Bender fire escape erected at the School for the Deaf this year will not only prove to be a valuable device for saving life in case of fire, but it is a source of enjoyment and recreation to all connected with the school.

E. H. LOYHED, Pres.

CHAS. D. McKELLIP,
Secretary.

THIRTEENTH BIENNIAL REPORT

OF THE

MINNESOTA HISTORICAL SOCIETY

TO THE

LEGISLATURE OF MINNESOTA.

SESSION OF 1905.

MINNEAPOLIS:
GREAT WESTERN PRINTING CO.
MARCH, 1905.

ST. PAUL, MINN., March 15, 1905.

To, Hon. John A. Johnson, Governor:

I have the honor to transmit the thirteenth biennial report of the Minnesota Historical Society, for the two years ending December 31, 1904.

Previous to this series of biennial reports, the society made annual reports to the annual sessions of the legislature; and its age is the same, beginning in 1849, with that of Minnesota as a Territory and as a State.

Very respectfully yours,

WARREN UPHAM,

Secretary and Librarian.

OFFICERS OF THE SOCIETY.

NATHANIEL P. LANGFORD.....	<i>President.</i>
GEN. HENRY W. CHILDS.....	<i>First Vice President.</i>
WILLIAM H. LIGHTNER.....	<i>Second Vice President.</i>
WARREN UPHAM.....	<i>Secretary and Librarian.</i>
DAVID L. KINGSBURY.....	} <i>Assistant Librarians.</i>
JOSIAH B. CHANEY.....	
HENRY P. UPHAM.....	<i>Treasurer.</i>

MEMBERS OF THE EXECUTIVE COUNCIL.

Ex-Officio.

HON. JOHN A. JOHNSON.....	<i>Governor.</i>
HON. RAY W. JONES.....	<i>Lieutenant Governor.</i>
HON. PETER E. HANSON.....	<i>Secretary of State.</i>
HON. SAMUEL G. IVERSON.....	<i>Anditor of State.</i>
HON. JULIUS H. BLOCK.....	<i>Treasurer of State.</i>
HON. EDWARD T. YOUNG.....	<i>Attorney General.</i>

Elective.

HON. MOSES K. ARMSTRONG, St. James.	DAVID L. KINGSBURY, St. Paul.
EVERETT H. BAILEY, St. Paul.	GEN. WILLIAM G. LE DUC, Hastings.
GEN. JAMES H. BAKER, Mankato.	HON. WILLIAM E. LEE, Long Prairie.
HON. JACOB V. BROWER, St. Paul.	WILLIAM H. LIGHTNER, St. Paul.
HON. JOHN R. CAREY, Duluth.	HON. JOHN D. LUDDEN, St. Paul.
JOSIAH B. CHANEY, St. Paul.	REV. EDWARD C. MITCHELL, St. Paul.
GEN. HENRY W. CHILDS, St. Paul.	CHARLES P. NOYES, St. Paul.
GEORGE H. DAGGETT, Minneapolis.	JOHN D. O'BRIEN, St. Paul.
HON. WILLIAM H. DUNWOODY, Minneapolis.	HON. CHANNING SEABURY, St. Paul.
MAJOR JOHN ESPY, St. Paul.	JOHN A. STEES, St. Paul.
HENRY S. FAIRCHILD, St. Paul.	HENRY P. UPHAM, St. Paul.
JAMES J. HILL, St. Paul.	WARREN UPHAM, St. Paul.
GEN. LUCIUS F. HUBBARD, St. Paul.	WILLIAM G. WHITE, St. Paul.
NATHANIEL P. LANGFORD, St. Paul.	PROF. NEWTON H. WINCHELL, Minneapolis.

STANDING COMMITTEES OF THE EXECUTIVE COUNCIL,
1903-1906, REVISED, WITH NEW APPOINTMENTS BY
THE PRESIDENT, NOVEMBER, 1904.

Organization.—J. H. Baker, J. R. Carey, C. Seabury, W. H. Dunwoody.

Permanent Building.—W. G. Le Duc, J. J. Hill, D. L. Kingsbury, M. K. Armstrong, J. D. O'Brien.

Finance.—H. P. Upham, J. D. Ludden, C. Seabury, W. E. Lee.

Library.—H. P. Upham, J. Espy, N. P. Langford, G. H. Daggett, W. H. Lightner.

Publications.—N. P. Langford, J. H. Baker, E. C. Mitchell, J. B. Chaney.

Property.—H. S. Fairchild, D. L. Kingsbury, L. F. Hubbard, E. H. Bailey.

Obituaries.—J. D. Ludden, H. W. Childs, J. A. Stees, J. H. Baker.

Lectures.—E. C. Mitchell, W. H. Lightner, H. S. Fairchild, C. P. Noyes, J. Espy.

Endowment Fund.—H. W. Childs, W. E. Lee, N. H. Winchell, C. Seabury, C. P. Noyes.

General Business.—G. H. Daggett, W. G. Le Duc, H. W. Childs.

Membership.—J. V. Brower, W. H. Dunwoody, E. H. Bailey, W. G. White.

Museum.—J. V. Brower, E. C. Mitchell, J. B. Chaney, N. H. Winchell.

The secretary of the society is *ex-officio* a member of all standing committees.

REPORT.

The Minnesota Historical Society, in presenting to the legislature its thirteenth biennial report, may be pardoned for a reasonable pride in its present prosperous condition, conscious that it has fulfilled the trust imposed upon it by the people of the state.

The society was organized in 1849, by a few of the pioneers of the territory, and was incorporated by an act of the First Territorial legislature, approved October 20, 1849, thus being the first literary institution organized in the territory. Its library, consisting then of only a few volumes, was the first established in Minnesota. The amended charter of 1856 enacted: "The objects of said Society, with the enlarged powers and duties herein provided, shall be, in addition to the collection and preservation of publications, manuscripts, antiquities, curiosities, and all other things pertaining to the social, political, and natural history of Minnesota, to cultivate among the citizens thereof a knowledge of the useful and liberal arts, science, and literature."

The work of this society therefore comprises:

(1) The collection, preservation, and publication of materials for the history of Minnesota and its people.

(2) The collection and management of a library containing useful works of reference on the local and general history of Minnesota, of the United States and the world, and on all other valuable departments of knowledge.

(3) The diffusion, among the citizens of the state, of useful knowledge.

Last autumn the fifty-fifth anniversary of the founding of this Society was passed; and it now comes to a new and better epoch, in its removal to the magnificent and fireproof new capitol.

INCREASE AND PRESENT CONDITION OF THE LIBRARY.

On the date of the twelfth biennial report, January 1, 1903, there were on our shelves 38,228 bound and 34,098 unbound volumes; total,

72,326 volumes. During the subsequent two years, the additions to the library have been as follows :

	1903.	1904.
Bound volumes.....	2,711	2,242
Unbound volumes.....	332	73

At the beginning of this year 1905, the library had 43,181 bound and 34,503 unbound volumes, amounting together to 77,684 volumes.

All the accessions have been catalogued, with reference to the names of authors and to the places and subjects treated, requiring the writing of 5,264 library cards in the year 1903, and 5,855 in 1904. The total number of cards in our library catalogue at the beginning of this year was 94,500. The cataloguing has been done in a very careful manner by Mr. D. L. Kingsbury, assistant librarian, with the aid of Miss Annie E. Vose; and besides they have mainly supplied the books inquired for by users of the library.

In the foregoing records of growth the newspaper department was included. It should also be considered separately, for as a repository of our state history it is certainly the most important and valuable part of the library. These thousands of newspaper volumes are a priceless treasury of materials for future local historians of Minnesota, and of her counties, cities, and towns, from their beginning to the present time.

In the year 1903 the number of newspaper volumes bound and added to the library was 578, and in 1904 the number was 529. The yearly increase of this department is thus about a twelfth part of the total present number, which on January 1, 1905, was 6,526.

The number of Minnesota newspapers, daily, weekly, and monthly, regularly received, is now 512, and 45 others are received from outside of this state, making the entire number 557. All the Minnesota papers are donated by the editors and publishers, who appreciate the importance of having them placed where they will be preserved for all coming time. The newspaper collection is accessible to all who wish to consult it, and is so arranged that any paper of any date can be readily found. This department, receiving on an average more than a hundred newspaper issues every working day, is under the very efficient care of Mr. J. B. Chaney, assistant librarian, with Mr. Harry M. McLean as assistant.

The Minnesota department of the general library, including books relating particularly to this state, is very extensive and of great interest to all our people. It comprises the journals of the legislature, and the laws enacted; reports of the supreme court; messages and reports of executive officers and departments of the state government; reports of

the state university, normal schools, and institutions of correction and charity; catalogues of our colleges and academies; reports of the state geological survey; of county, city, and town officers, boards of trade, railway and other corporations; state, county, city and town histories, atlases, and business directories; the published proceedings and records of the numerous religious, charitable, and social organizations; and many historical, descriptive, biographical, and statistical works, beginning with the narratives of the earliest explorers of the area of Minnesota. This collection numbers 1,461 bound books, and about 1,550 pamphlets.

Two other departments to which constant attention for their increase has been given during many years, and in which this library is scarcely surpassed by any other in the United States, are local history and American genealogy.

Of township and strictly local histories (but not including county and state histories, biographies, and publications of societies), the number of bound volumes in the library at the beginning of this year is, for Maine, 119; New Hampshire, 148; Vermont, 45; Massachusetts, 690; Rhode Island, 55; and Connecticut, 152; with considerable numbers for New York, New Jersey, Pennsylvania, and all the states, so far as these special histories have been published. During the past seven years our number of town histories of New England has increased from about 730 to 1,209, the gain being 65 per cent of the former number.

Of American family histories, or genealogies, our library now has 1,579 bound volumes and 797 pamphlets, besides many books in this class published by societies, others giving genealogies of many families collectively, and the genealogical portion of township histories. These collections, free (like all the library) for the use of readers and students, are much consulted for tracing lines of ancestry. Their increase within seven years has amounted to 577 books and 397 pamphlets, or, in the aggregate, about 70 per cent of the number counted early in the year 1898.

Another department which is much consulted is the complete series of reports of the United States patent office. All the publications of our national government are received gratuitously, this being a designated depository library. About a sixth part of the entire library consists of these national reports and public documents, which are of the very highest importance and usefulness.

HISTORICAL SCRAP-BOOKS.

Twenty-nine quarto scrap-books, each of 160 pages, well indexed, have been filled during the past twenty-five years by the secretaries and

assistants of this society. Within the recent years increased attention has been given to this work, which is now being carried forward at the rate of three or four books yearly.

Eight additional volumes are now being filled, receiving as many special classes of newspaper items and articles, with their accompanying illustrations. The general subjects thus separately classed for more convenient reference are: 1, This society, its meetings, papers read, donations, etc.; 2, The City of St. Paul; 3, Minneapolis; 4, Minnesota, outside the Twin Cities; 5, Other states, and especially the adjoining states of the Northwest; 6, Obituary biographies, chiefly of Minnesota people; 7, The Civil War, reunions of former soldiers, the Grand Army, and the Loyal Legion; and 8, The Louisiana Purchase, its Centennial Exposition, held last year in St. Louis, and the Lewis and Clark Exposition, to be held this year in Portland, Oregon.

These scrap-books present a great amount of historical and biographical information, pertaining mostly to Minnesota, which could not otherwise be so conveniently obtainable. It should be added that the files of our state newspapers donated to the library by the editors and publishers are never used for clipping to make these books; but that extra copies of all papers required for this use are purchased.

THE PORTRAIT COLLECTION.

The number of individual portraits displayed in the rooms of the society is 241; besides thirty-two group pictures, which comprise about 1,300 portraits. Nearly all are of pioneers and founders of Minnesota, or of citizens who in later years have had a prominent part in the history and development of the state. There are also about 150 other pictures, as of ancient buildings, monuments, paintings of historic scenes, etc., and 40 framed documents, including a letter of George Washington, written in 1754, which is in the case holding the Washington chair. This collection is the most interesting part of the society's possessions for visitors who have only a short time to spend in its rooms.

About 1,000 additional portraits of Minnesota pioneers and leading citizens, mostly photographs of card and cabinet sizes, are owned by the society and are alphabetically catalogued, so that any of them can be conveniently found.

By donation from the St. Paul Chamber of Commerce, this Society has recently received 29 large framed portraits and a group of 68 separate photographs framed together, all of which, on account of lack of space in our present rooms, are reserved to be displayed in the new capitol.

THE MUSEUM.

Little space has been occupied in the old capitol by this society's museum, which, so far as it can be there exhibited, is contained in five cases. These comprise many very interesting historical relics illustrative of the conditions of the pioneer settlement of Minnesota, of the Sioux War and the Civil War, of the people who built the thousands of prehistoric mounds in this state, and of their tribes, the Sioux and Ojibways, who were living here when the first white men reached this region.

It is expected that, with more space soon to be provided for this library and museum, and for the display of portraits, in the new capitol building, all these collections will be greatly increased. This will be especially true of the museum in its department of archæology, for which Hon. J. V. Brower, a member of the society's council and chairman of its museum committee, has collected, during the past ten years, a vast number of specimens, in total exceeding 100,000, of stone implements and weapons, flakes from their manufacture, bone and copper ornaments, pottery, etc., partly from the modern Indians and partly from the ancient mounds, throughout Minnesota and a large region reaching west to the Rocky mountains and south to Kansas.

Another member of the Council and of the same committee, Rev. Edward C. Mitchell, has generously announced that he will deposit in this museum the greater part of his very valuable private collection, now at his home in St. Paul, including many thousand specimens of aboriginal implements, weapons, ornaments, and pottery. These munificent contributions from Councilors Brower and Mitchell will give to this museum a national importance surpassed by only very few other archæological collections in this country.

DONATIONS.

The society has received many donations from its members and friends, among whom Hon. Moses K. Armstrong, of St. James, Minn., a member of the Council, was the first to establish a fund for the benefit of the library, now exceeding \$2,000, from the sales of his recent book, "The Early Empire Builders of the Great West."

Another library fund of \$1,000 has been received as a bequest from the late Gov. Alexander Ramsey, who for twenty-six years was the president of this society, from its organization in 1849 to 1863, and from 1891 until his death, April 22, 1903.

It is also announced that a third fund, amounting to \$1,000, was given to this society by its late president, Hon. Greenleaf Clark, by a bequest in his will.

Abundant donations have been received to the library from the historical societies of other states, of Canada, England, and other countries; from other societies devoted to sciences and the arts; from schools, colleges, and universities; from public libraries and museums; from the geological surveys of several states, of the United States, and Canada; and from various departments of our national government.

The record of donations during the last year includes 957 books, 2,317 pamphlets, 509 volumes of newspapers received unbound from the publishers, 12 manuscripts, 10 broadsides, 18 atlases, 395 maps, 49 portraits and other framed pictures, 109 photographs, and 30 articles for the museum. Their total amounts to 3,897 gifts. Many of the books and pamphlets received in these donations are duplicates of what were already in the library; but such are valuable for exchange, whereby others new to our collection are obtained.

It should be added that many of the pamphlets received in such abundance as gifts are new to this library, not duplicates, and that they would be of much value if sufficient assistance could be employed for their cataloguing, without which they are not available to be consulted by readers. Probably more than 5,000 pamphlets are now stored away, to be classified, catalogued, and placed in the library for readers, whenever opportunity may permit. This work will probably wait until after the removal of the library to the new capitol.

The society desires and is grateful for gifts of books, pamphlets, newspaper files, maps, manuscript narratives, diaries, and original documents of every sort which may throw light on the history of any portion of the United States, and particularly of Minnesota and the Northwest.

Especially it is desired to obtain all new publications of township or other local histories and of family genealogies. Many volumes in these departments have been received through donation. If they should not be so available, the secretary wishes to be informed when books and pamphlets of these classes are published, with note of their number of pages and scope and the price for purchase.

RESEARCHES AND PUBLICATIONS.

Thus far the possessions of the society have been considered, and the functions of its corporeal life and growth. This great mass of very valuable property will be indeed an embarrassment of riches in its re-

moval to the new quarters, expected to be done during the present spring. Another part of the work of the society, by its members in preparing papers and addresses for its meetings and its publications, and by the secretary and assistants in research concerning the history of Minnesota and the Northwest, may be properly termed the vital breath, the animating spirit, the soul, of all that the society has and is.

Two new volumes of our Historical Collections, the tenth and eleventh, have been completed, their first published copies being supplied to members of the society at the meeting of the Council on February 13th of this year.

Volume X, having 938 pages, with 23 plates, contains twenty-two miscellaneous addresses and papers that had been read before the society during the past five years; also the memorial addresses presented at meetings of the society in honor of the late Bishop Whipple, Governor Ramsey, Judge Flandrau, and General Sanborn; and brief biographies of thirty-five deceased members.

This volume was found to be so large that it has been necessary to bind it in two parts, which are consecutively pagged. Part II has an index of the whole volume. It also contains an index of the authors and principal subjects in the series of these Volumes I to X, and a personal index of Volumes I to IX, both of which were compiled from the indexes of the several volumes. These general indexes will be very convenient for references to subjects and persons noticed in the entire series.

Volume XI, in 285 pages, with 11 maps and 88 other illustrations, mostly portraits and views from photographs, is entitled "Itasca State Park, an Illustrated History, by J. V. Brower, Author of Volume VII, Minnesota Historical Collections, 1893, etc."

Another volume for this series is in preparation by Mr. Brower, to treat of the archæology of this state, its aboriginal mounds, the Indian tribes, and their implements, weapons, and ornaments. Extensive manuscripts and plat-books of the late Alfred J. Hill, of St. Paul, comprising records of archæological explorations throughout Minnesota and the Northwest during many years, are expected to be obtained from his heirs and to be used in this publication, with large additions from the author's personal explorations and surveys.

The secretary, working on themes of our state history in the intervals permitted by other duties, with Mrs. Rose Barteau Dunlap as literary assistant, has three volumes in preparation for the same series, namely, first, "Minnesota Biography," an alphabetic list of biographies of the pioneers and chief citizens of Minnesota as a territory

and state during its first half century; second, "Minnesota Geographic Names," giving the origin, meaning, and date, so far as can be ascertained, of all our proper names, as of the state, its counties and townships, cities, villages, railway stations, postoffices, creeks, rivers and lakes, hills and mountains, and the streets and parks in cities; and, third, a History of this Society in its work for our state, its library and other collections, and its membership, with catalogues of the portrait collection and of the departments of local histories and genealogies, a bibliography of Minnesota state publications and of the history and literature of this state, and helpful information concerning other portions of the library and museum.

On the first and second of these volumes a large amount of work has been done. The compilation of the "Minnesota Biography," now nearly ready to be published, chiefly done by Mrs. Dunlap, with reading of each sketch by the secretary before it is typewritten for the copy to be used in printing, has been carried forward to the extent of about 12,000 biographic sketches, varying in length from two to ten lines. Each gives references at the end, by Arabic numerals, to the works from which it is derived, as former collections of biographies, our state and county histories, the legislative manuals, this society's publications, its scrap-books, other books and pamphlets, newspaper files, etc. Two hundred or more sources of information are thus compiled into one alphabetic series, which gives very concisely the principal dates and facts about each person, with citation of all other works where more full details of the biography may be found. It is believed that this careful compilation of all important biographic sketches in our many state publications, supplemented by other biographies obtained by correspondence and personal interviews, will be of very great and permanent value for frequent reference by all classes of our people who care to acquaint themselves with our state history.

Work has also been well begun by the secretary and literary assistant on a biography, in one or two volumes, of the late Alexander Ramsey, Minnesota's "War Governor" and "Grand Old Man," foremost in statesmanship for promotion of this commonwealth, designed to be published in the same series of Historical Collections.

MEMBERSHIP.

According to the by-laws of the Executive Council, the due of annual membership is five dollars yearly, which in six years confers life membership, with no further dues; but an applicant may become a life member at the beginning of membership by the payment of twenty-five

dollars. Members receive the current publications of the society, are welcomed in the monthly council meetings, and are invited to write historical papers, especially on the local history of any part of Minnesota, for these meetings and for publication in the society's Historical Collections. Besides the annual and life members, who, when residing within this state, constitute the active membership, the society includes two other classes, namely, corresponding members and honorary members. A list of the present members in each of these classes, with their addresses, is given on later pages.

The society now has 17 honorary members, 77 corresponding members, 212 life members, and 49 annual members, the total being 355. The honorary and corresponding members represent nearly every state of the Union, Alaska, the provinces of Canada, England, and France. Nearly all of the life and annual members, together numbering 261, are residents of Minnesota, and they represent a large number of our counties. It is desired by the society that every county of the state shall be so represented in its membership.

NECROLOGY.

The following deaths of members have occurred during the past two years, since the last preceding biennial report.

1903.

Corresponding Member:

Peter Neff, Cleveland, Ohio.....May 12th.
Benjamin Drew, Plymouth, Mass.....July 19th.

Life Members:

Hon. Alexander Ramsey, St. Paul.....April 22nd.
Hon. Charles E. Flandrau, St. Paul.....September 9th.

1904.

Life Members:

Hon. George L. Becker, St. Paul.....January 6th.
Frank B. Semple, Minneapolis.....February 17th.
Hon. Hiram F. Stevens, St. Paul.....March 9th.
Gen. John B. Sanborn, St. Paul.....May 16th.
Henry L. Williams, Los Angeles, Cal.....June 7th.
Dr. James Henry Dunn, Minneapolis.....June 16th.
John B. Spencer, Alameda, Cal.....July 30th.
Hon. Rensselaer R. Nelson, St. Paul.....October 15th.
Hon. Greenleaf Clark, St. Paul.....December 7th.

Annual Members :

Julius M. Goldsmith, St. Paul.....	May 4th.
Hon. Eli Trumbull Wilder, Red Wing.....	June 3rd.
William R. Dorr, Englewood, N. J.....	December 1st.

1905.

Life Member :

Dr. George R. Metcalf, St. Paul.....	March 1st.
--------------------------------------	------------

It is with profound sorrow that we have to record the deaths, within these two years, of three presidents of this society.

Gov. Alexander Ramsey, who was its first president, from 1849 to 1863, and again from 1891 until his death, was born near Harrisburg, Pa., September 8th, 1815; was a member of Congress from Pennsylvania, 1843-47; was the first territorial governor of Minnesota, 1849-53; governor of this state, 1860-63; United States senator, 1863-75; and secretary of war, 1879-81. He died at his home in St. Paul, April 22nd, 1903.

Gen. John B. Sanborn, who was elected president, succeeding Governor Ramsey, May 11th, 1903, was born in Epsom, N. H., December 5th, 1826; came to Minnesota, settling in St. Paul, in 1854; and practiced law in this city continuously until a few weeks before his death, except when in public service. He was adjutant general of Minnesota in 1861; was colonel of the Fourth Minnesota Regiment in 1862; was promoted to the rank of brigadier general in 1863; and was breveted major general in 1865. During the years 1865-66, as United States commissioner, he made many important treaties with the Indians, and in 1867 was appointed by Congress as a member of the Indian Peace Commission. He became a member of this society in 1856, and was a member of its Executive Council since 1875. General Sanborn died at his home in St. Paul, May 16th, 1904.

Hon. Greenleaf Clark was elected president September 12th, 1904. He was born in Plaistow, N. H., August 23rd, 1835; came to St. Paul, Minn., in 1858, which was ever afterward his home; and practiced law here until he was appointed an associate justice of the Supreme Court of this state in 1881. The following year he resumed his law practice, from which he retired in 1888. He became a regent of the State University in 1879, and president of the Board of Regents in 1901. Judge Clark was elected to life membership in this society December 13th, 1880, and to its Executive Council, January 19th, 1891. After his election as president, he presided in three monthly meetings of the Council. Late in November he went to southern California, as he had

done for several preceding winters, and died December 7th, 1904, at Lamanda Park, near Los Angeles.

RESOURCES AND EXPENDITURES.

The annual appropriations from the state are \$15,000, available within the fiscal year of the state accounts, ending July 31st. The expenditures of the society have been as follows:

	1903.	1904.
Purchase of books.....	\$3,021.28	\$2,512.42
Binding and printing.....	1,122.56	1,122.65
Express and freight.....	118.17	137.06
Postage	107.00	102.00
Insurance	10.20	177.32
Rent	120.00	120.00
Miscellaneous	162.80	244.13
Archæological field work.....	1,866.64	1,999.92
Services	5,431.68	6,125.29
	<hr/> \$11,960.42	<hr/> \$12,540.79

Unexpended parts of the appropriations for these years are reserved, as approved by the state auditor, for use in the removal to the new capitol, to supply museum cases, and whatever other furnishings may be needed for the library, museum, etc., in addition to the equipment provided by the State Capitol Commission.

RETROSPECT OF TEN YEARS.

The present secretary, being in the tenth year of his service for this society, may be permitted to review briefly its progress during this period.

The library has grown from 55,265 volumes at the beginning of 1895 to 77,684 volumes on the first day of this year. In a larger proportion the accessibility of this great collection of books and pamphlets has been increased by its card catalogue, which in 1895 numbered 54,847 cards, and now 94,506.

In 1895 the newspapers received by the Library numbered 340, and now 557; but the bound newspaper volumes have more than doubled, increasing from 2,924 to 6,526. The average annual increase of 360 volumes, however, has been lately much exceeded, for about 550 newspaper volumes have been bound and added to the Library in each of the last two years.

Great progress has been made in our collection of township and county histories, which comprise now about twice as many volumes as ten years ago.

Likewise in the department of American genealogies our Library has more than doubled its collections, both of bound volumes and pamphlets, during this time.

At the beginning of the year 1895 we had completed three scrap-books of selected newspaper items and articles on our state history, and three other books were being filled. Since then the number of these scrap-books completed has increased to twenty-nine, with eight others in progress under a system of classification of subjects, as noted on a foregoing page.

Thirteen manuscript books of copied letters, written by the secretary in the correspondence of the society, have been filled, comprising more than 10,000 letters. Descriptive catalogues of all accessions to the library, and special records of all donations, fill several large volumes.

Within these ten years the society's Portrait Collection has increased by about a hundred large framed portraits, about 800 portraits in group pictures, and nearly the same number of separate card and cabinet photographs.

More than any other department of our possessions, the Museum has been remarkably enlarged, as before stated, by very extensive archaeological collections, contributed by two honored councilors of this society.

Ten annual meetings and several special meetings of the society have been held, and ninety monthly meetings of the Executive Council, these being omitted in June, July and August. In nearly all these meetings public addresses and papers on Minnesota history have been presented.

Four volumes, VIII to XI, of our Historical Collections have been published during these ten years, comprising 2,459 pages, with 159 plates (portraits, maps, and views from photographs), besides other illustrations. Volume I has been reprinted, in 1902, comprising 430 pages.

During this period many members have been received, and many former members have died. The increase of membership is about 150, from about 200 members in 1895 to a present list of 355 members.

LOOKING FORWARD.

It may be reasonably anticipated that similar ratios of increase of the society's library and other collections, of its publications, and

of its membership, will continue during the coming years. Therefore it is evident that a new and ample building, to be occupied entirely by this society, similar to those devoted to state history in Madison, Wisconsin, and Des Moines, Iowa, should soon be provided, preferably on some site nearly adjoining the new capitol.

This society acts as the servant of the people of the state in gathering its very extensive and valuable library, which stands in the front rank among the great historical libraries of the United States. It is in the state capitol building and is a free reference library, open daily to the public from 8:30 a. m. to 5 p. m. In view of the remarkable growth of our state in population and wealth, its educational institutions, with which this society, in its service of the public through its library, museum, portrait collection, and publications, is to be classed, deserve proportional increase of their support, that Minnesota shall continue to hold its proud position among the foremost states in providing for the diffusion of useful knowledge among its citizens.

In asking for additional means to prosecute its work in the collection and preservation of Minnesota history, and in the building up of the library, which is to have larger space in the new capitol, our society can look with friendly emulation on the prosperity and great usefulness of the Wisconsin Historical Society, for whose work, chiefly in the support of its library, that state grants at present \$30,000 yearly in appropriations and other state aid. In addition to the annual expenditures the state of Wisconsin has erected, for the use of its Historical Society, a fireproof building at a cost of about \$400,000, four stories in height, with a capacity for 550,000 volumes.

The state of Minnesota has just cause for pride in the work already achieved by our Historical Society, and for the future it may well pattern to some extent after the adjoining state with which this comparison has been made. One of the special needs of our library is additional assistance for cataloguing the many pamphlets which are received mostly by donations, and for analyzing a larger part of the books than is now possible, so that their separate papers, subjects, and authors may be listed in the card catalogue. There is also an urgent need of more ample funds for the increase of the library by purchases.

The removal to the new capitol, expected to be done during the next few months, rearrangement of the library there, installation of the museum, and especially of its archaeological department, and the general increase of all the society's collections, will require much work and financial expenditure.

During the brief time which must yet intervene before the removal, the society anticipates that its members and others will donate,

but reserve at their homes, many portraits, historical pictures, and articles for the museum. These departments, which are of chief attraction and instructiveness to visitors, even with their present inadequate space, will then have ample exhibition in a fireproof building.

The library, and most notably its newspaper department, also greatly need the more commodious rooms which are there designed for them. With this removal, it may be confidently predicted that this society, in all the branches of its work for our state history, will renew and increase its strength to perform more fully its high duties for the people of Minnesota.

CHARTER AND BY-LAWS OF THE MINNESOTA HISTORICAL SOCIETY:

CHARTER.

AN ACT TO INCORPORATE THE HISTORICAL SOCIETY OF MINNESOTA.

[Approved October 20, 1849.]

Be it enacted by the Legislative Assembly of the Territory of Minnesota:

That C. K. Smith, David Olmsted, H. H. Sibley, Aaron Goodrich, David Cooper, B. B. Meeker, A. M. Mitchell, T. R. Potts, J. C. Ramsey, H. M. Rice, F. Steele, Charles W. Borup, D. B. Loomis, M. S. Wilkinson, L. A. Babcock, Henry Jackson, W. D. Phillips, Wm. H. Forbes, Martin McLeod, and their associates, be and they are hereby constituted a body corporate and politic, by the name and style of the "Minnesota Historical Society," and by that name, they and their successors shall be, and they are hereby made capable in law, to contract and be contracted with, sue and be sued, plead and be impleaded, prosecute and defend, answer and be answered in any court of record or elsewhere, and to hold any estate, real, personal, or mixed, and the same to grant, sell, lease, mortgage or otherwise dispose of for the benefit of said Society, and to receive donations to be applied as the donor may direct, and to devise and keep a common seal; and to make and enforce any by-laws not contrary to the constitution and laws of the United States or this Territory; and to enjoy all the privileges and franchises incident to a corporation, and that the property which the Society may be allowed to hold shall not exceed five thousand dollars.

SEC. 2. *Be it further enacted*, That any five members may, at any meeting of said Society, constitute a quorum to do business, and shall, within one year from and after the passage of this act, organize, and, under such regulations as they may adopt, elect a President, two Vice Presidents, a Treasurer, and a Secretary, who shall record the proceedings, do the correspondence, and file all communications he may receive touching the object of the Society; which said officers shall hold their offices respectively until their successors are elected, which may take place every three years. The regular meetings of said Society shall take place on the second Monday succeeding the annual meeting of the Legislative Assembly of said Territory, at the seat of government; and the object of said Society shall be the collection and preservation of a Library, Mineralogical and Geological specimens, Indian curiosities, and other matters and things connected with, and calculated to illustrate and perpetuate the history and settlement of said Territory.

AN ACT TO AMEND AN ACT ENTITLED, "AN ACT TO INCORPORATE THE HISTORICAL SOCIETY OF MINNESOTA."

[Approved March 1, 1856.]

Be it enacted by the Legislative Assembly of the Territory of Minnesota:

SECTION 1. That in addition to the privileges and immunities granted, and duties assigned to the Minnesota Historical Society by the act approved October 20, 1849, the said Society shall be allowed to receive by bequest, donation, or purchase, any amount of property, real or personal, and shall hold the same in perpetuity, as a sacred trust for the uses and purposes of said Society, without in any manner mortgaging or by debts incumbering such property now in possession, or thereafter to be acquired; nor shall any such property be liable, in any manner or form whatever, for any debt contracted by said Society; and the real property now vested in the Society, in the City of St. Paul, and the building hereafter to be located thereon, as a Hall for the same, and the personal property of the Society, shall be exempt from taxation.

SEC. 2. As soon as convenient after the passage of this act, the Society shall elect an Executive Council, consisting of not more than twenty-five members of the Society, who shall hold their office for the term of three years, and until their successors are elected, which election shall thereafter take place triennially. The Executive Council shall elect and appoint all officers and such agents and collaborators of the Society, resident and non-resident, as they may deem necessary or useful, and the Executive Council shall have the custody of all the property, real and personal, of the Society, and shall frame such by-laws and constitution for their government as they may deem expedient, and do all other things not inconsistent with this act, essential to the prosperity of the Society.

SEC. 3. The objects of said Society, with the enlarged powers and duties herein provided, shall be, in addition to the collection and preservation of publications, manuscripts, antiquities, curiosities, and all other things pertaining to the social, political and natural history of Minnesota, to cultivate among the citizens thereof, a knowledge of the useful and liberal arts, science, and literature.

SEC. 4. That all acts and parts of acts, so far as they are inconsistent with the provisions of this act, are hereby repealed.

AN ACT TO AMEND CHAPTER XV., SESSION LAWS OF 1856, IN RELATION TO THE HISTORICAL SOCIETY.

[Approved February 19, 1875.]

Be it enacted by the Legislature of the State of Minnesota:

SECTION 1. That chapter XV. of the Session Laws of 1856, entitled "An act to amend an act entitled 'An act to incorporate the Historical Society of Minnesota,'" be and is hereby amended so as to increase the number of members composing the Executive Council, to thirty.

SEC. 2. The Governor, Lieutenant Governor, Secretary, Auditor, and Treasurer of State, and the Attorney General, shall be *ex-officio* members of the Executive Council.

SEC. 3. This act shall take effect and be in force from and after its passage.

AN ACT ESTABLISHING THE MINNESOTA HISTORICAL SOCIETY AS A FREE PUBLIC LIBRARY.

[Approved March 5, 1869.]

Be it enacted by the Legislature of the State of Minnesota:

SECTION 1. That for the better support and more enlarged usefulness of the Minnesota Historical Society, there is hereby appropriated, out of any money in the treasury not otherwise appropriated, the sum of two thousand dollars, which shall be paid to, and expended by, the Executive Council of said Society, in such manner as they may deem will best promote its objects and aid its purposes; and said Executive Council shall, at the close of the year, report to the Governor the manner in which such money has been expended, and the vouchers therefor.

SEC. 2. And in consideration of such sum, the said Society shall cause their library to be kept open for the free use of the public, during the usual business hours about the Capitol, under such restrictions relative to the consultation of books, and the taking of extracts therefrom, as the Executive Council may direct.

EXTRACT FROM ARTICLE XV., SECTION 1, OF THE CONSTITUTION OF THE STATE OF MINNESOTA.

[Adopted October 13, 1857.]

In the event of the seat of government being removed from the City of St. Paul to any other place in the State, the Capitol building and grounds shall be dedicated to an institution for the promotion of science, literature, and the arts, to be organized by the legislature of the State, and of which institution the Minnesota Historical Society shall always be a department.

BY-LAWS OF THE SOCIETY.

ADOPTED MARCH 18, 1879.

1. The annual meetings of the Society shall be held at the rooms of the Society, unless otherwise ordered, on the second Monday succeeding the assembling of the Legislature, in years when a session is held, and in other years on the second Monday of January. Due notice of the meetings shall be given by the Secretary, by a publication of the same in at least two papers of the State.

2. Five members shall constitute a quorum for the transaction of business, but a less number may adjourn to a time certain.

3. All active members in good standing shall have the right to participate in the business of the annual or other meetings of the Society.

4. The order of business shall be as follows:

1. Call to order by the President.
 2. Reading of minutes of last annual or any special meeting.
 3. Reports of officers.
 4. Election of Executive Council (at triennial meetings).
 5. Addresses, lectures, or papers read.
 6. Any other business properly coming before the Society.
5. Special meetings of the Society, for any purpose, may be called by the President, at the request of five members.
6. Any life member may be nominated for membership in the Executive Council. All voting for members of the Council shall be by ballot. All nominations made to the Secretary previous to the triennial meeting, shall be by him printed on a slip for the use of members in balloting, and members can vote only when present in person. All the members nominated may be voted for on one ballot, and a majority of all votes cast shall be necessary to elect.

ORGANIZATION OF DEPARTMENTS FOR STUDY AND INVESTIGATION.

7. To promote the usefulness of this Society, by encouraging the acquisition and diffusion of knowledge among its members and the people of Minnesota generally, departments may be organized as follows:

Any three or larger number of members of the Society may organize any department now or hereafter designated, and select their own chairman and hold their meetings in the council room of the Society, at such times as it shall not be pre-engaged by the Executive Council or any other department. The departments to be so organized at this time shall be known and designated as follows:

Department of Annals and General History of Minnesota.

- " Geology of Minnesota.
- " Zoology of Minnesota.
- " Botany of Minnesota.
- " Meteorology of Minnesota.
- " Northwestern Geography and Cartology.
- " American History.
- " European History.
- " Oriental History.
- " Genealogy and Heraldry.
- " Ethnology and Anthropology.

8. Any branch of the departments may be constituted a section, and any section or group of sections may be constituted a department, on the approval of the Executive Council. Each department or section shall have power to establish any rules and regulations for its government that are not inconsistent with the charter or by-laws of this Society.

9. Additional departments may be organized in like manner as the foregoing, whenever approved by the Executive Council. Whenever the Executive Council shall refer any question or subject to any department or section, its members shall investigate the same without unnecessary delay, and report thereon to the Executive Council.

10. When any persons shall become annual members of the Society, and shall pay their fees, with the declared purpose of becoming members of a department, the fees and dues by them paid may be expended by such department, for any books and periodicals desired for its use. And the members of said de-

partment may withdraw the books so purchased from the rooms of the Library, under the rules and regulations adopted by them, when the same shall have been approved by the Executive Council; provided, that all books so purchased shall be the property of the Society.

BY-LAWS OF THE EXECUTIVE COUNCIL.

OBJECTS, POWERS AND DUTIES.

1. The objects, powers and duties of this Society are defined in its charter. Among its objects are the following: To collect, arrange, and preserve, a Library of Books, Pamphlets, Maps, Manuscripts, Prints, Papers, or Paintings; a cabinet of Minerals and Archæological curiosities, and other materials illustrative of the Civil, Religious, Literary, and Natural History of the State; to rescue from oblivion the memory of its early pioneers, and to obtain and preserve narratives of their exploits, perils and hardy adventures; to exhibit faithfully the antiquities, the past and present condition, and resources of Minnesota; and it may take steps to promote the study of history by lectures and other means, and to publish and diffuse information relative to the description and history of the State.

MEMBERS.

2. The Society shall be composed of Active, Corresponding and Honorary Members.

3. Active Membership comprises such annual and life members as have been, or shall hereafter be, elected, and reside within this State.

4. Corresponding Members shall be persons residing elsewhere, who feel an interest in the Society and its objects, and are willing to aid it by representing it in their vicinity, and procuring donations for its Library and Cabinet.

5. Honorary Members shall consist of persons distinguished for their literary or scientific attainments, particularly in the department of American History.

ELECTION OF MEMBERS.

6. No person shall be elected to membership unless proposed at a regular meeting of the Executive Council, and his admission moved by two members of the Society. If any member demand a ballot, the same shall be taken, and five negative votes shall exclude the person proposed.

7. Annual dues shall be five dollars per annum; any member who shall pay annual dues for six successive years, shall then be entitled to a life membership; but any person, by paying the sum of twenty-five dollars at one time, in advance, may be elected a life member, and shall thereafter be free from the payment of annual dues.

8. Should any annual member fail to pay the annual dues for three months, his name shall be erased from the roll of members, and not be replaced until all arrearages of dues are paid.

GOVERNMENT.

9. The government of the Society shall be vested in an Executive Council (as provided by the charter and its amendments), composed of the *ex-officio* members, and thirty life members, to be chosen by ballot every three years at an annual meeting of the Society; due notice of said meeting to be given in at least two papers of the State.

10. The Executive Council shall have the control and regulation of the affairs of the Society, and shall make collections and disbursements of its funds, and shall take all needful measures for its success and proper management.

11. The Executive Council shall fill vacancies in their own number or among the officers of the Society (caused by death, removal from the State, resignation, or any other cause), and may, in its discretion, declare the place of any member of the Council vacant, who shall be absent three successive meetings thereof without sending a reasonable excuse therefor to the Secretary.

OFFICERS.

12. The officers of the Executive Council shall be the officers of the Society, and shall be as follows:

A President;

A First Vice President;

A Second Vice President;

A Secretary; and

A Treasurer;

who shall be elected by a majority of actual and individual ballots, at the first meeting of the Executive Council after the triennial meetings of the Society, and shall serve for the term of three years and until their successors are chosen; and no *viva voce* nominations shall be made in the Executive Council for the election of officers of the Council, or for filling vacancies of officers or members of the Council.

If any officer is absent from the monthly meetings of the Executive Council more than three successive meetings, unless detained by sickness, absence from the city, or any reasonable cause, his office may be declared vacant.

VACANCIES.

13. If a vacancy shall occur in any of the offices of the Society, or in the Executive Council, it shall be filled by a special election, at the next meeting of the Council, and the person so elected shall hold his office for the unexpired term of the person vacating the same.

THE PRESIDING OFFICER.

14. The President, or in his absence, one of the Vice Presidents, or in their absence, a Chairman *pro tempore*, shall preside at all meetings of the Society and the Executive Council, and shall have a casting vote. He shall preserve order, and decide all questions of order subject to an appeal. He shall also appoint all committees authorized by the Executive Council or by the Society, unless otherwise provided.

THE SECRETARY.

15. The Secretary shall keep the minutes and records of the Society, furnish diplomas to members, give due notice of the annual and monthly meetings, and

attend to the correspondence of the Society, carefully preserving the originals of all letters received, laying the same before the Executive Council at its monthly meetings. He shall, on being advised of the death of any member, record it, with the time and place of death, and report the same at the next meeting. He shall be, *ex-officio*, a member of all the standing committees, and perform such other duties as the Council shall direct. He shall make a written report of the operations of the Society at the annual meetings. The Secretary shall also perform the duties of Librarian until otherwise directed by a vote of the Council.

THE TREASURER.

16. The Treasurer shall receive all moneys belonging to the Society, and disburse the same only on the order of the Executive Council, attested by the Secretary. He shall give bonds in such sum as may be required and approved by the Executive Council. He shall keep a true account of his receipts and payments, and report the same in full to the Society at its annual meetings, and to the Executive Council quarterly, or whenever so ordered.

THE LIBRARIAN.

17. The Librarian shall have charge of the Library and Cabinet, the care and arrangement of books, manuscripts, papers, maps, etc., belonging to the same. He shall properly preserve, arrange and keep them in good order. He shall cause to be prepared and kept, a proper catalogue of the same. He shall keep a book in which shall be recorded all donations to the Society of whatever nature, with the name of the donor and date of the same, and shall acknowledge the receipt thereof, and also carefully label such donations with the title of this Society, and name of the donor. He shall under no circumstances permit any book, manuscript, document, or anything belonging to the Society, to be removed from its rooms, except as provided for in section 10 of the by-laws of the Society. At each monthly meeting he shall report the donations received since the last meeting, and at the annual meetings shall make a full report of the condition and progress of the Library.

MEETINGS, QUORUM, ETC.

18. The regular meetings of the Executive Council shall be held on the second Monday of every month.

19. Ten members shall constitute a quorum of the Executive Council for the transaction of business, but a less number may adjourn.

STANDING COMMITTEES.

20. The Standing Committees of the Executive Council shall be as follows:

1. A COMMITTEE ON ORGANIZATION, to whom shall be referred all questions pertaining to the charter and by-laws.

2. A COMMITTEE ON PERMANENT BUILDING, whose duty shall be to devise the best ways and means for securing a permanent building or hall, for the use of the Society.

3. A COMMITTEE ON FINANCE, who shall examine and report upon all claims against the Society, and also the reports and accounts of the Secretary and Treasurer.

4. A COMMITTEE ON THE LIBRARY, who shall, with the Secretary and Librarian, have the general superintendence of the Library, the purchase of books, exchange of publications, procuring of suitable furniture, etc.

5. A COMMITTEE ON PUBLICATION, who shall examine all manuscripts presented to the Society, and select those suitable for publication, which they shall edit and supervise, if ordered to be printed by the Society.

6. A COMMITTEE ON PROPERTY, who shall have the care of the property of the Society, and other matters connected with its real estate.

7. A COMMITTEE ON OBITUARIES, who shall be charged with the preparation of memoirs of deceased members of the Society, or the collection of materials for the same.

8. A COMMITTEE ON LECTURES, who shall arrange for such lectures or addresses before the Society as may be deemed advisable.

9. A COMMITTEE ON ENDOWMENT FUND, who shall be charged with ascertaining and carrying into effect the best plans for the increase of the Permanent Fund, and its profitable employment.

10. A COMMITTEE ON GENERAL BUSINESS, to which shall be referred all business not properly referable to either of the above committees.

11. A COMMITTEE ON MEMBERSHIP OF THE SOCIETY, to which shall be referred all applications for such membership, before consideration thereof by the Executive Council.

12. A COMMITTEE ON THE MUSEUM, which, with the Secretary and Librarian, shall have charge of the Society's collections, other than portraits, manuscripts, maps, and printed matter.

21. All Committees, both standing and special, shall report on the subject referred to them, at the next succeeding meeting of the Executive Council, which report must be in writing and signed by the members of the Committee.

MEETINGS, ETC.

22. The President shall call a meeting of the Executive Council, whenever requested, in writing, by five members of the Society.

23. Members of the Society in good standing, shall have the privilege of attending the meetings of the Executive Council and participating in all the exercises, but are not entitled to vote.

24. All parliamentary questions shall be decided by the President, subject to appeal to the Council.

25. All motions or resolutions, regarding the business management or work of the Society, shall be referred to its appropriate committee before being acted on, unless otherwise ordered by a two-thirds vote of the Council.

26. All amendments made to these by-laws shall be proposed in writing at a regular meeting of the Executive Council, and shall (if seconded by three other members) lie over for action at least one month, and a copy of such proposed amendment shall in the meantime be sent to each councilor; and no such proposed amendment shall be adopted unless by an affirmative vote of two-thirds of those present, which vote shall not be less than ten in number.

27. All by-laws and rules for the government of this Society or its Council, not herein contained, are hereby abrogated.

ORDER OF BUSINESS.

- I. The chair taken by the presiding officer.
- II. Calling the Roll of Members.
- III. Minutes read.
- IV. Donations received since last meeting reported.
- V. Correspondence read.
- VI. Reports of Standing Committees.
- VII. Reports of Special Committees.
- VIII. Nomination and election of Members.
- IX. Lectures, papers and obituary addresses read.
- X. Unfinished business.
- XI. New business. •

LIST AND PRICES OF THE MINNESOTA HISTORICAL SOCIETY COLLECTIONS.

VOLUME I.

This is a republication of the "Annals" of the Society, which were issued in parts, dated 1850, '51, '52, '53, and '56, and which were not consecutively paged. It is termed "COLLECTIONS OF THE MINNESOTA HISTORICAL SOCIETY, VOL. I. St. Paul: 1872" (octavo, pp. 519), and has an elaborate index. In 1902 it was again reprinted; pages xii., 430. Price, \$2.50.

CONTENTS.

- The French Voyageurs to Minnesota during the Seventeenth Century, by Rev. E. D. Neill.
- Description of Minnesota (1850), by Hon. H. H. Sibley.
- Our Field of Historical Research, by Gov. Alex. Ramsey.
- Early Courts of Minnesota, by Hon. Aaron Goodrich.
- Early Schools of Minnesota, by D. A. J. Baker.
- Religious Movements in Minnesota, by Rev. C. Hobart.
- The Dakota Language, by Rev. S. R. Riggs.
- History and Physical Geography of Minnesota, by H. R. Schoolcraft.
- Letter of Mesnard, by Rev. E. D. Neill.
- The Saint Louis River, by T. M. Fullerton.
- Ancient Mounds and Memorials, by Messrs. Pond, Aiton and Riggs.
- Schoolcraft's Exploring Tour of 1832, by Rev. W. T. Boutwell.
- Battle of Lake Pokegama, by E. D. Neill.
- Memoir of Jean N. Nicollet, by Hon. H. H. Sibley.
- Sketch of Joseph Renville, by E. D. Neill.
- Department of Hudson's Bay, by Rev. G. A. Belcourt.
- Obituary of James M. Goodhue, by E. D. Neill.
- Dakota Land and Dakota Life, by E. D. Neill.
- Who Were the First Men? by Rev. T. S. Williamson.
- Louis Hennepin, the Franciscan, and Sieur Du Luth, the Explorer.
- Le Sueur, the Explorer of the Minnesota River.
- D'Iberville, an Abstract of his Memorial.
- The Fox and Ojibway War.
- Capt. Jonathan Carver and his Explorations.
- Pike's Explorations in Minnesota.
- Who Discovered Itasca Lake? by Wm. Morrison.
- Early Days at Fort Snelling.
- Running the Gauntlet, by Wm. J. Snelling.
- Reminiscences, Historical and Personal, by Hon. H. H. Sibley.

VOLUME II.

Volume 2 was published in three parts, dated respectively 1860, 1864 and 1867. Part 3 was not, at first, consecutively paged, and thus the volume could not be conveniently indexed; but that part has been reprinted (in 1889), and the account of the celebration of the Carver Centenary is added, with an index of the whole volume. Pages 294. Price \$2.50.

CONTENTS.

- Voyage in a Six-oared Skiff to the Falls of St. Anthony, in 1817, by Maj. Stephen H. Long.
 Early French Forts, and Footprints of the Valley of the Upper Mississippi, by Rev. E. D. Neill.
 Occurrences in and around Fort Snelling, from 1819 to 1840, by Rev. E. D. Neill.
 Religion of the Dakotas (Chapter VI. of James W. Lynd's Manuscripts).
 Mineral Regions of Lake Superior, from their First Discovery to 1865, by Hon. Henry M. Rice.
 Constantine Beltrami, by Alfred J. Hill.
 Historical Notes on the United States Land Office, by Hon. Henry M. Rice.
 The Geography of Perrot, so far as it relates to Minnesota, by Alfred J. Hill.
 Dakota Superstitions, by Rev. Gideon H. Pond.
 The Carver Centenary, an Account of the Celebration, May 1st, 1867, of the One-Hundredth Anniversary of the Council and Treaty of Capt. Jonathan Carver, with the Naudowessies, at Carver's Cave in St. Paul, with an Address by Rev. John Mattocks.

VOLUME III.

Published in three parts, dated 1870, 1874, and 1880; paged continuously, and indexed; illustrated with a steel engraving of Rev. John Mattocks. Pages, viii., 433. Price, \$2.50.

CONTENTS.

- Relation of M. Penicaut, translated by Alfred J. Hill; with an Introductory Note by Rev. E. D. Neill.
 Bibliography of Minnesota, by J. Fletcher Williams.
 A Reminiscence of Fort Snelling, by Mrs. Charlotte O. Van Cleave.
 Narrative of Paul Ma-za-koo-te-mane, translated by Rev. S. R. Riggs.

The Inkapaduta Massacre of 1857, by Hon. Charles E. Flandrau.

VOLUME IV.

HISTORY OF THE CITY OF ST. PAUL AND COUNTY OF RAMSEY, MINNESOTA, by J. FLETCHER WILLIAMS, containing a very full sketch of the first settlement and early days of St. Paul, 1838 to 1848, and of the Territory from 1849 to 1858; lists of the early settlers and claim owners; amusing events of pioneer days; biographical sketches of over two hundred prominent men of early times; three steel portraits, and forty-seven wood-cuts (portraits and views); lists of federal, county and city officers since 1849, statistics, and index; published in 1876. Pages, 475. Price, \$3.50.

VOLUME V.

HISTORY OF THE OJIBWAY NATION, by WILLIAM W. WARREN (deceased); a valuable work, containing the legends and traditions of the Ojibways, their origin, history, customs, religion, daily life and habits, ideas, biographies of leading chieftains and orators, vivid descriptions of battles, etc. The work was carefully edited by Rev. Edward D. Neill, who added an appendix of 116 pages, giving an account of the Ojibways from official and other records. It also contains a portrait of Warren, a memoir of him by J. Fletcher Williams, and a copious index. Published in 1885. Pages, 535. Price, \$3.50.

VOLUME VI.

Published in three parts, in 1887, 1891, and 1894; comprising miscellaneous papers on the history of Minnesota and the Northwest; with eight portraits, and index. Pages, iv., 556. Price, \$2.50.

CONTENTS.
